6. Pappas states that Fresno already has a plethora of television services, it being assigned seven channels which provide programming from affiliates of each of the three major networks, two independents, one Spanish language and one noncommercial educational station. In addition, it is said to receive service from nearby Hanford and Visalia stations as well as area cable television systems. Therefore, according to Pappas, the Fresno market is already adequately served, and the assignment of an additional channel would only jeopardize the economic viability of both the existing and new service. Pappas further questions the qualifications of petitioner's consultant as well as the motives and financial qualifications of the petitioner in seeking a full service television assignment. Pappas alleges that Oakley's consultant has advertised that by applying for the allotment of full service television channels and then applying for use of such frequency with the minimum power allowed, those persons stymied by the Commission's current freeze on low power television applications can still become involved in television broadcasting. It further states that according to Commission records, the petitioner is involved in no less than eight television proposals and therefore cannot validly state its intention to apply for each facility in conformance with the Commission's multiple ownership rules. These rules limit one party's ownership to no more than seven television stations, with no more than five being VHF. See, § 73.636 of the Commission's Rules.

7. In reply to the allegations of Pappas and NABER, petitioner states that NABER seeks the conversion of the UHF allocations to land mobile use, and the issue should be raised in a separate rule making. The basis for Pappas' objections, he alleges, are simply the desire to avoid further competition to its existing station and its aversion to use of a consultant who "markets its' services."

8. The objections of Pappas are not issues which can be decided in a rule making proceeding. The Commission does not oversee the choice of consultants to represent an interested party before the agency. It is incumbent upon a petitioner to be aware of the requirements which will be imposed upon him should be become a Commission licensee and be prepared to fulfill such requirements. Likewise, the financial ability of a petitioner to follow through with an application and construction of broadcast facility is an issue which is more properly handled at the application stage. Although it was true that a party could not own more than seven [3] facilities in each of the broadcast services, those limits have been raised to twelve. Further, the Commission does not guarantee that the party petitioning for the assignment of a frequency will become the ultimate licensee. Therefore, even though he may not apply for authorization to operate more than twelve stations, he may petition to have a reasonable number of additional channels assigned to particular communities in the belief that he may not be awarded the license for each of his prior-requested channels. It is expected, however, that should a party receive permits for the maximum number of stations, he would then notify the Commission of that fact and seek dismissal of any pending rule makings seeking assignments for which he could not apply.

9. The Commission recognizes that operation of a television station on Channel 69 can lead to objectionable interference to land mobile users operating on adjacent spectrum (800–806 MHz).[5] In this regard, the Commission ordered changes in the operations of various land mobile stations in order to eliminate interference caused by a Channel 69 station in Atlanta, Georgia.[6] Such action was taken after various other attempts to correct the problem such as reducing the television licensee's daytime operating power to six percent of full power (166 kw) proved ineffectual. The Commission does not believe that the referenced Atlanta situation is unique. Thus, it is suspending all Channel 69 assignments until it can find an adequate solution to the problems caused by electromagnetic emissions from new television stations on adjacent land mobile facilities.

10. Accordingly, in light of the above, It Is Ordered, That the Petition for Rule Making filed by Millard V. Oakley IS DENIED.

11. It is Further Ordered, That this proceeding IS TERMINATED.

12. For further information concerning the above, contact Joel Rosenberg, Mass Media Bureau, (202) 634–6530.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Brooksville, Florida); MM Docket No. 86–136, RM–5204.

Adopted: April 8, 1986.

Released: April 16, 1986.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed by Radio Development Laboratories ("petitioner") requesting the allotment of Channel 225A to Brooksville, Florida, as its first FM service. Petitioner stated its intention to apply for the channel.

2. We believe that the proposal warrants consideration. The channel can be allotted in compliance with the distance separation requirements provided a site restriction of 6.8 km (4.2 miles) is imposed. In view of the foregoing, the Commission seeks comments on the proposal to amend the FM Table of Allotments, § 73.202(b) of the Rules, with regard to the community listed below:

City	Channel No.	
	Present	Proposed
Brooksville, FL		225A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows:

William B. Maggio, Radio Development Laboratories, 27316 Hickory Hill Road, Brooksville, Florida 33512, (petitioner).

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

VOL 51 ISS 77 APR 22 1986

Notice of Proposed Rule Making

In the matter of amendment of §73.606(b), Table of Assignments, Television Broadcasting Stations (Warner Robins, Georgia); MM Docket No. 86-132, RM 5145.

Adopted: April 7, 1986.
Released: April 10, 1986.

By the Chief, Policy and Rules Division.

1. The Commision herein considers a petition for rule making filed by Steven D. King ("petitioner") requesting the assignment of UHF Television Channel 35 to Warner Robins, Georgia. Petitioner stated his intention to apply for the channel.

2. Warner Robins (population 39,893) in Houston County (population 77,605) [1] is located in central Georgia, approximately 95 miles southeast of Atlanta. Warner Robins is currently without local television service. The proposed assignment of Channel 35 to Warner Robins would require a site restriction 1.4 miles southeast of the city to avoid short spacing to unused Channel 35 at Lafayette, Georgia.

3. In view of the fact that the proposed assignment could provide a first local television service to Warner Robins, comments are invited on the proposal to amend the Television Table of Assignments, §73.606(b) of the Rules, as it pertains to the following community:

City	Channel No.	
	Present	Proposed
Warner Robins, GA		35

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Larry G. Fuss, Sr., Contemporary Communications, Post Office Box 3976, Jackson, Georgia 30233 (consultant to the petitioner)

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(e)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference room at its headquarters, 1919 M Street, NW., Washington, D.C.

SUMMARY: Action taken herein proposes the allocation of Channel 284A to Montauk, New York, as the community's first local FM service, at the request of MarkKey Broadcasting Company.

DATES: Comments must be filed on or before June 9, 1986, and reply comments on or before June 24, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-653C.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73.

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations (Montauk, New York); MM Docket No. 86-137, RM-5176.

Adopted: April 8, 1986.
Released: April 16, 1986.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration the petition for rule making submitted on behalf of MarKey Broadcasting Company ("petitioner") requesting the allocation of Channel 284A to Montauk, New York, as the community's first local FM service. Petitioner states that it will apply for the channel, if allocated. Channel 284A can be allocated in compliance with the Commission's minimum distance separation and other technical requirements.

2. Petitioner describes Montauk as an unincorporated community which is not listed in the U.S. Census reports. Petitioner states that Montauk, located at the southeastern tip of Long Island's eastermmost peninsula, is a resort area with a year-round population of 1,300-2,000 persons and a summertime population which ranges from 25,000 to 30,000 persons. Further, it states that Montauk has its own Chamber of Commerce, post office and zip code, fire department, public library, school system, and local businesses which identify with the community. Based on this information, petitioner contends that Montauk is a geographically identifiable population grouping and thus can be considered a community within the meaning of section 307(b) of the Communications Act of 1934 as amended.

3. We agree with the petitioner that Montauk is a "community" and thus eligible for a broadcast allotment. Montauk is, in fact, listed in the U.S. Census as a Census Designated Place ("CDP") and attributed with a fulltime population of 2,828 persons. As defined by the Census Bureau, CDP's consist of closely settled population centers without corporate limits, the boundaries of which are delineated by the Census Bureau. These communities have been included in the previous Census reports and identified as "unincorporated places" ("U"). While the Commission has held that a listing in the U.S. Census may not be sufficient in itself to determine that an area meets the "community" criteria mandated by section 307(b) of the Act, the demographic data supplied by the petitioner also convinces us that Montauk does indeed qualify as a "community" for allotment purposes.

4. We believe the public interest would be served by proposing to allocate Channel 284A to Montauk, New York, as it would provide the community with its first local FM service. Accordingly, we propose to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules, with respect to the community listed below, to read as follows:

City	Channel No.	
	Present	Proposed
Montauk, NY		284A

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. **Note:** A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

6. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Russell D. Lukas, Esq., Lukas, McGowan, Nace & Gutierrez, Chartered, 1090 Vermont Avenue, NW., Suite 650, Washington, D.C. 20005.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding contact Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530. However members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communication Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to

VOL 51 ISS 77 AP 22 1986 UMI

file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See Section 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the peititioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 86-112; RM-5219; FCC 86-147]

Radio Broadcasting; Satellite and Terrestrial Microwave Feeds to Noncommercial Educational FM Translators

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This Notice of Proposed Rule Making requests comments on a proposal to permit noncommercial educational FM translators to rebroadcast programming they receive by microwave or satellite feeds from their commonly-owned noncommercial educational FM broadcast stations. This authority would apply only in cases where the translator is assigned to reserved noncommercial channels. This Notice is issued in response to a petition for rule making filed by the Moody Bible Institute of Chicago. The proposed change to the Commission's rules would make more reliable and higher quality signals available to areas that are currently unserved or underserved by noncommercial radio service.

DATES: Comments are due on or before July 1, 1986, and reply comments on or before August 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FM Broadcast Translator Stations, Radio broadcasting.

[MM Docket No. 86-112, RM-5219; FCC 86-147]

This is a summary of the Commission's notice of proposed rule making in MM docket No. 86-112, RM-5219, adopted April 3, 1986, and released April 16, 1986.

The full text of this Commission Decision is available for inspection and copying during normal business hours in the FCC dockets branch (room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, Northwest, Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. On October 31, 1985, the Moody Bible Institute of Chicago (Moody) petitioned the Commission to amend its rules to permit noncommercial educational FM translators to receive signals fed by satellite or terrestrial microwave facilities. Moody proposes that this expanded authority be limited to the rebroadcast of the parent station on its owned and operated translators. The petitioner also proposes that the authority for use of microwave and satellite feeds be limited translators assigned to noncommercial educational reserved channels (Channels 200–220). Comments filed by Family Stations, Inc., Northern Michigan University and KPSI Radio Corp. generally support Moody's petition. The National Association of Broadcasters, National Radio Broadcasters Association and National Public Radio filed oppositions to Moody's petition.

2. The Commission believes that it is now appropriate to consider Moody's proposal. We have recently concluded several related radio proceedings in Docket Nos. 80-90, 84-231 and 20735 that, while still unresolved, had led in part to our 1984 denial of a similar petition filed by Moody in 1981.[1] We believe that this proposal for limited expansion of FM translator authority may offer technical and public interest benefits to licensees and to radio audiences, especially those in remote areas that are currently underserved by noncommercial radio services. The proposed revision to our rules would alleviate a number of FM translator technical problems that are inherent in over-the-air reception of signals. The use of microwave and satellite technology would permit a higher quality signal to be received and permit the signal to reach more remote areas that those that can be reached currently with traditional over-the-air broadcast technology. Further, we believe that in some instances the cost of service per listener would decrease so that noncommercial educational stations would have more resources for programming. On this basis, we believe that the proposal could promote better service for those currently receiving noncommercial FM radio via translators and extend radio service to understand areas.

[1] *See*, the Commission's denial of Moody's 1981 petition by *Memorandum Opinion and Order* in Docket 19010, 98 FCC 2d 26 (1984). *See*, also, *Report and Order* in BC Docket No. 80-90, 46 FR 20488 (1983), recon. *Memorandum Opinion and Order* in BC Docket No. 80-90, 49 FR 10320 (1984) and *First Report and Order* in MM Docket 84-231, 50 FR 3514 (1985).

3. Accordingly, we propose to amend § 74.1231 of our rules, as set forth in the attached Appendix, to authorize the use of microwave and satellite distribution of noncommercial educational radio signals by qualified stations. In order to qualify for this authority, the broadcast station and its authorized noncommercial translator must be commonly-owned and the translator station would have to be assigned to the noncommercial educational reserved channels. We also propose to amend §§ 74.501, 74.531, 74.532 and 74.1250 of our rules, as set forth in the Appendix, to make noncommercial educational FM station licensees eligible for licenses for the aural broadcast intercity relay stations necessary to relay their programming by microwave to their translator stations.

4. This is a non-restrictive notice and comment rule making proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

5. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, this proceeding will benefit licensees and radio audiences by extending noncommercial educational signals to underserved areas. Public comment is requested on the initial regulatory flexibility analysis set out in full in the Commission's complete decision.

6. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements; and except for the additional applications expected to be received, the proposed rules would not increase or decrease burden hours imposed on the public.

7. Pursuant to the applicable procedures set forth in §§ 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before July 1, 1986, and reply comments on or before August 1, 1986. All relevant and timely comments will be considered by the Commission before final aciton is taken in this proceeding.

8. This Notice of Proposed Rule Making is issued pursuant to authority contained in sections 4(i) and 303 of the Communications Act of 1934, as amended.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Part 74 of Title 47 of the Code of Federal Regulations is proposed to be amended to read as follow:

The authority citation for Part 74 would continue to read as follows:

Authority: 47 U.S.C. 154 and 303.

2. 47 CFR 74.501 is proposed to be amended by revising paragraph (b) to read as follows:

§ 74.501 Classes of aural broadcast auxiliary stations.

* * * * *

(b) *Aural broadcast intercity relay station.* A fixed station for the transmission of aural program material between radio broadcast stations, other than international broadcast stations, and between noncommercial educational FM radio broadcast stations and their co-owned noncommercial educational FM translator stations.

* * * * *

3. 47 CFR 74.531 is proposed to be amended by redesignating paragraphs (c) through (f) as (d) through (g) and adding new paragraph (c) to read as follows:

§ 74.531 Permissible service.

* * * * *

(c) An aural broadcast intercity relay station is authorized to transmit aural program material between a noncommercial educational FM station and a noncommercial educational FM translator station operating on a NCE reserved channel (Channels 200 to 220) and owned, operated, and controlled by the licensee of the originating NCE FM station.

* * * * *

4. 47 CFR 74.532 is proposed to be amended by revising paragraph (a) to read as follows:

§ 74.532 Licensing Requirements.

(a) An aural broadcast STL or intercity relay station will be licensed only to the licensee or licensees of broadcast stations other than international broadcast stations, and for use with broadcast stations or noncommercial educational FM translator stations owned entirely by or under common control of the licensee or licensees.

* * * * *

5. 47 CFR 74.1231 is proposed to be amended by revising paragraph (b) to read as follows:

§ 74.1231 Purpose and permissible service.

* * * * *

(b) Except as set forth in paragraph (f) and (g) of this section, an FM translator may be used only for the purpose of retransmitting the signals of a primary FM broadcast station or another FM translator station which have been received directly through space, converted, and suitably amplified. A noncommercial educational FM translator station operating on a NCE reserved FM channel (Channel 200 to 220) licenced to the licensee of a NCE-FM station may additionally retransmit the signals of such a primary NCE-FM station which have been received by satellite or terrestrial microwave link.

* * * * *

6. 47 CFR 74.1250 is proposed to be amended by revising paragraph (a) to read as follows:

§ 74.1250 Transmitters and associated equipment.

(a) FM translator and booster transmitting apparatus used by stations authorized under the provisions of this subpart may only use transmitting apparatus that has been type accepted for such use in accordance with Subpart J of Part 2. Translator stations authorized for transmitter output power of 10 watts may also use FM broadcast transmitters notified or type accepted to operate with an output power not exceeding 10 watts under the provisions of Part 73 of the Rules for broadcast stations.

Notices

Federal Register
Vol. 51, No. 77
Tuesday, April 22, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Adjudication; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Adjudication of the Administrative Conference of the United States, to be held at 10:00 a.m., Wednesday, April 30, 1986, at 2120 L Street, NW., FTC Hearing Room #1 (Lower Level), Washington, D.C. The committee will meet to consider reports and recommendations from Professor George Johnson of George Mason University School of Law on the OSHA–OSHRC enforcement model and Professor Richard Pierce of the University of Pittsburgh School of Law on the use of the Federal Rules of Evidence in Federal agency adjudications. For further information, call Richard K. Berg, 202–254–7065.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least one day in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the committee before, during or after the meeting. Minutes of the meeting will be available on request.

Richard K. Berg,
General Counsel.
April 18, 1986.

BILLING CODE 6110-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

National Plant Genetic Resources Board Meeting

According to the Federal Advisory Committee Act of October 1972 (Pub. L. 92–463, 86 Stat. 770–776), the USDA, Science and Education, announces the following meeting:

Name: National Plant Genetic Resources Board.

Date: May 14–15, 1986.

Time: 8:30 a.m.–4:30 p.m., May 14; 8:30 a.m.–4:30 p.m., May 15.

Place: Room 104–A, Williamsburg Room, Administration Building, Department of Agriculture, Washington, DC.

Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permits.

Comments: The public may file written comments before or after the meeting with the contact person below.

Purpose: To review matters that pertain to plant germplasm in the United States and possible impacts on related national and international programs; and discuss other initiatives of the Board.

Contact Person: C.F. Murphy, Executive Secretary, National Plant Genetic Resources Board, U.S. Department of Agriculture, BARC-West, Room 239, Building 005, Beltsville, Maryland 20705. Telephone (301) 344–1560.

Done at Beltsville, Maryland, this 27th day of April 1986.

Charles F. Murphy,
Executive Secretary, National Plant Genetic Resources Board.

BILLING CODE 3410-09-M

Cooperative State Research Service

Committee of Nine; Open Meeting

In accordance with the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463, 86 Stat. 770–776), the Cooperative State Research Service announces the following meeting:

Name: Committee of Nine.

Date & Time: May 22–23, 1986; 8:30 a.m.–4:30 p.m., 8:30 a.m.–2:00 p.m.

Place: Room 336–A Administration Building, Department of Agriculture, Washington, DC. 20251.

Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permit.

Comments: The public may file written comments before or after the meeting with the contact person listed below.

Purpose: To evaluate and recommend proposals for cooperative research on problems that concern agriculture in two or more States, and to make recommendations for allocation of regional research funds appropriated by Congress under the Hatch Act for research at the State agricultural experiment stations.

Contact Person for Agenda and More Information: Dr. Edward M. Wilson, Recording Secretary, U.S. Department of Agriculture, Cooperative State Research Service, Room 206 Justin Smith Morrill Building Washington, DC. 20251; telephone 202/447–4587.

Done at Washington, DC, this 10th day of April 1986.

John Patrick Jordan,
Administrator, Cooperative State Research Service.

BILLING CODE 3410-22-M

Soil Conservation Service

Station Hill RC&D Flood Prevention Measure, Ft. Kent, ME

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Station Hill RC&D Flood Prevention Measure, Aroostook County, Maine.

FOR FURTHER INFORMATION CONTACT: Ron E. Hendricks, State Conservationist, Soil Conservation Service, USDA Office Building, University of Maine, Orono, Maine 04473, telephone 207–866–2132.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings Ron E. Hendricks, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for a water control and disposal system which provides flood protection to residences and town roads. The planned system consists of the installation of 2 diversions with a reinforced concrete pipe outlet.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Ron E. Hendricks.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with state and local officials)

Dated: April 14, 1986.

Charles Whitmore,
Deputy State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 13-86]

Foreign-Trade Zone 84, Harris County, TX (Houston POE); Amendment of Zone Plan

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Port of Houston Authority (PHA), grantee of Foreign-Trade Zone 84, requesting an amendment to its zone plan by adding 5 warehousing and business park sites in Harris County, Texas, within the Houston Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 USC 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 7, 1986.

PHA received authority from the Board to establish a multisite foreign-trade zone in Harris County, Texas, on July 15, 1983 (Board Order 214, 48 FR 34792, 8/1/83). While 5 PHA sites were approved as conventional ones, the remaining sites were approved for 5 years subject to special conditions. The zone plan was amended in 1985 to delete 8 and add 10 non-PHA sites subject to the same time limitations and conditions as the original ones (Board Order 303, 50 FR 20252). The proposed amendment of the plan would also be subject to the same time limitation and conditions as the other non-PHA sites.

The proposed amendment would involve adding three warehousing operations and two business park sites to the zone project; the Care Shipping, Inc. facility, located on a 34-acre site on Peninsula Blvd. Near the intersection with Sheldon Road in the Jacintoport area, Harris County: the Mirrer's Warehouse and Storage Co, Inc. operation, located on a 26-acre site at 6833 City Park Loop, Houston; the Manchester Terminal Corporation facility, located on a 73-acre site at 10000 Manchester Blvd., Houston; Easley Investment Corporation's 13-ace Interpark-Rankin development on 1920 Rankin Road, Houston; and, the Transcentral Business Park on McAulty Road, Houston.

In accordance with the regulations, an examiners committee has been appointed to investigate the application and report to the board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Donald Gough, Deputy Assistant Regional Commissioner, U.S. Customs Service, Southwest Region 5850 San Felipe Street, Houston, TX 77057; and Colonel Gordon M. Clarke, District Engineer, U.S. Army Engineer District Galveston, P.O. Box 1229, Galveston, TX 77553.

Comments concerning the proposed amendment of zone plan are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before May 19, 1986.

A copy of the application is available for public inspection at each of the following locations:

U.S. Dept. of Commerce District Office, 2625 Federal Courthouse, 515 Rusk Street, Houston, Texas 77002

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Dept. of Commerce, Room 1529, 14th. and Pennsylvania NW., Washington, D.C. 20230

Dated April 16, 1986.

John J. Da Ponte, Jr.,
Executive Secretary.

BILLING CODE 3510-DS-M

[A-122-506]

Antidumping; Oil Country Tubular Goods From Canada; Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have determined that oil country tubular goods (OCTG) from Canada are being, or are likely to be, sold in the United States at less than fair value. Welded Tube of Canada, Ltd., is excluded from this determination. We have notified the U.S. International Trade Commission (ITC) of our determination, and we are directing the U.S. Customs Service to suspend the liquidation of all entries of oil country tubular goods from Canada that are entered, or withdrawn from warehouse, for consumption, on or after April 20, 1986 and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Steven Lim or Charles E. Wilson, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–1776 or (202) 377–5288.

Final Determination

Based upon our investigation, we have determined that OCTG from Canada are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). We made fair value comparisons on approximately 83 percent of the sales of the class or kind of merchandise to the United States during the period of investigation. Comparisons were based on the United States price and foreign market value. The company-specific margins are: Algoma Steel Corp., Ltd. (Algoma), 14.26 percent; Ipsco, Inc. (Ipsco), 40.85 percent; Sonoc Steel Tube, Ltd. (Sonco), 3.35 percent; and Welded Tube of Canada, Ltd. (Welded Tube), 0 percent.

VOL 51 ISS 77 AP 22 1986 UMI

Since Welded Tube had no sales at less than fair value, that company is excluded from this final determination of sales at less than fair value.

Case History

On July 22, 1985, we received a petition from the Lone Star Steel Company (Lone Star) and CF&I Steel Corporation (CF&I) on behalf of the domestic OCTG industry. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleged that imports of OCTG from Canada are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that these imports are materially injuring, or are threatening material injury to, a U.S. industry. The petition also alleged that sales of the subject merchandise were being made at less than the cost of production and that critical circumstances exist. After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We initiated the investigation on August 19, 1985 (50 FR 33387). On September 11, 1985, the ITC determined that there is reasonable indication that imports of OCTG from Canada are materially injuring a U.S. industry (50 FR 37086).

We presented antidumping duty questionnaires to counsel for Ipsco and to counsel for Algoma, Sonco, and Welded Tube, Canadian producers and exporters of the products under investigation, on September 5, 1985. The responses were received on October 22, 1985.

On January 7, 1986, we published a preliminary determination of sales at less than fair value with respect to this merchandise (51 FR 600). The notice stated that if the investigation proceeded normally, we would make our final determination by March 17, 1986.

On January 15, 1986, counsels for the respondents requested a postponement of the final determination. We granted this request and postponed the final determination until not later than April 16, 1986 (51 FR 3369). In accordance with section 774(a) of the Act, a public hearing was held on March 5, 1986.

Scope of Investigation

The products covered by this investigation are "oil country tubular goods" which are hollow steel products of circular cross section intended for use in the drilling for oil or gas. These products include oil well casing, tubing and drill pipe of carbon or alloy steel, whether welded or seamless, manufactured to either American Petroleum Institute (API) or non-API (such as proprietary) specifications as currently provided for in the *Tariff Schedules of the United States, Annotated* (TSUSA) under item numbers 610.3216, 610.3218, 610.3233, 610.3234, 610.3242, 610.3243, 610.3249, 610.3252, 610.3254, 610.3256, 610.3258, 610.3262, 610.3264, 610.3721, 610.3722, 610.3751, 610.3925, 610.3935, 610.4025, 610.4035, 610.4210, 610.4220, 610.4225, 610.4230, 610.4235, 610.4240, 610.4310, 610.4320, 610.4325, 610.4335, 610.4942, 610.4944, 610.4946, 610.4954, 610.4955, 610.4956, 610.4957, 610.4958, 610.4967, 610.4968, 610.4969, 610.4970, 610.5221, 610.5222, 610.5226, 610.5234, 610.5240, 610.5242, 610.5243, and 610.5244. This investigation includes OCTG that are in both finished and unfinished condition.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

Where the merchandise was sold to unrelated U.S. purchasers prior to its importation into the United States, we used the purchase price of the subject merchandise, as provided in section 772(b) of the Act, to represent the United States price. We calculated the purchase price based on the delivered, packed, duty paid price to unrelated U.S. purchasers. We deducted brokerage charges, U.S. duty and inland freight.

We used exporter's sale price (ESP) as the United States price where the merchandise was sold to unrelated purchasers after importation, as provided for in section 772(c) of the Act. We deducted brokerage charges, U.S. duty, inland freight, U.S. processing expenses, credit, warranty, and other selling expenses, where appropriate. With respect to Algoma, we made additions for import duties, paid by Canadian producers on imports of raw materials, which were rebated or not collected by reason of the exportation of the merchandise to the United States, pursuant to section 772(d)(1)(B) of the Act.

Foreign Market Value

The petitioners alleged that sales in the home market were at prices below the cost of production. We examined costs of production which included all appropriate costs for materials, fabrication and general expenses.

In accordance with section 773(a)(1)(A) of the Act, for Algoma, Ipsco and Welded Tube, where we found sufficient sales above the cost of production in the home market, we used home market prices to determine foreign market value. Where there were insufficient sales of such or similar merchandise in the home market, or where there were insufficient sales above the cost of production, we used constructed value as the basis for comparison.

Where foreign market value was based on home market prices, we made comparisons of such or similar merchandise based on type, grade, dimension and end finish as selected by Commerce Department industry experts. Where foreign market value was based on constructed value, we used appropriate production costs for the period under investigation as the basis for the constructed value for each product group.

We calculated the market prices for each product on the basis of delivered prices to unrelated purchasers. From these prices, we deducted foreign inland freight. We made adjustments, where appropriate, for differences in circumstances of sale related to commissions, warranties and credit expenses pursuant to § 353.15 of our regulations. We also made adjustments for differences in the physical characteristics of the merchandise pursuant to § 353.16 of our regulations. We disallowed a claimed adjustment for differences in level of trade between U.S. and Canadian markets.

In addition, when comparing exporter's sales price to the home market price, we deducted indirect selling expenses from the home market price but limited the deduction to the amount of the U.S. indirect selling expenses in accordance with § 353.15 of our regulations. We also allowed quantity discounts in accordance with § 353.14 of our regulations, and we made adjustments, where appropriate, for differences in packing costs.

In accordance with section 773(e) of the Act, we calculated foreign market value for Sonco based on constructed value. For Sonco, there were no sales of such or similar merchandise in the home market or in third country markets.

We calculated the constructed value by totaling the costs of materials used in producing such or similar merchandise, fabrication, general expenses, profit, and packing costs for shipments to the United States. Where the amount for general expenses was less than ten percent of the cost of materials and fabrication, we adjusted it to the statutory minimum of ten percent. Where the amount for profit was less than eight percent of the sum for the costs of materials, fabrication and general expenses, we adjusted it to the statutory minimum of eight percent. In certain instances, where information in the submissions of respondents was insufficient, the best information available was used. Where appropriate for constructed value, adjustments were made under §353.15 of the Commerce Regulations for differences in circumstances of sale between the two markets. These adjustments were for differences in credit and warranty expenses. Also, where appropriate for exporter's sales price transactions, adjustments were made to foreign market value under § 353.15(c) to account for indirect selling expenses incurred in the home market sales of the "same class or kind of merchandise," up to the amount of indirect selling expenses incurred on U.S. sales.

For comparisons involving purchase price transactions, when calculating foreign market value, we made currency conversions from Canadian dollars to U.S. dollars in accordance with § 353.56(a) of our regulations, using the Federal Reserve certified daily exchange rates. For comparisons involving exporter's sales price transactions, we used the official exchange rate for the date of purchase pursuant to section 615 of the Trade and Tariff Act of 1984 (1984 Act). We followed section 615 of the 1984 Act rather than § 353.56(a) of our regulations, as it supersedes that section of the regulations.

Final Negative Determination of Critical Circumstances

Counsel for petitioners alleged that imports of OCTG from Canada present "critical circumstances" within the meaning of section 733(e)(1) of the Act. Critical circumstances exist when the Department has a reasonable basis to believe or suspect that: (1) There have been massive imports of the merchandise under investigation over a relatively short period; and (2)(a) there is a history of dumping in the United States or elsewhere of the merchandise under investigation, or (b) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise under investigation at less than its fair value.

We generally consider the following concerning massive imports: (1) Volume and value of imports (2) seasonal trends, and (3) the share of domestic consumption accounted for by the imports.

In considering this question, we analyzed recent trade statistics on import levels, import penetration ratios for OCTG from Canada for equal periods immediately preceding and following the filing of the petition, and seasonal factors. Based on our analysis of recent trade data, we found that imports of OCTG from Canada during the period subsequent to receipt of the petition have not been massive when compared to recent import levels and import penetration ratios. For the reasons described above, we determine that "critical circumstances" do not exist with respect to OCTG from Canada.

Verification

As provided in section 776(a) of the Act, we verified the information provided by the respondents by using standard verification procedures, including examination of relevant sales and accounting records of the company.

Issues

The major issues raised at our public hearing of March 5, 1986, and in the written comments submitted are as follows:

Petitioner's Comments

Comment 1: The petitioner and a domestic interested party (with regard to Sonco) assert that the Department should reject the responses submitted by Algoma, Sonco, and Welded Tube as inadequate and, therefore, should use the best information available.

DOC Position: We have examined the responses in this case and have determined that there are no grounds for disregarding, in total, the responses of Algoma, Sonco and Welded Tube as unresponsive. Generally, the Department will examine a respondent's questionnaire response to determine if it provides a reasonable amount of information upon which a determination can be made. Where such a response is clearly inadequate for such purposes, the Department disregards it and uses best information available. Where responses are deficient in certain areas, respondents are allowed the opportunity to clarify those areas. The Department will use best information available with regard to those areas where clarifications by respondents have not been adequate or timely enough to make an informed determination.

The Department does not feel that the responses submitted in this investigation are so clearly deficient as to warrant disregarding them. We have sought clarification of certain issues and have made our findings and calculations based upon the information available to us which we believe was most dependable for purposes of fair value comparisons. In certain instances, where information in the found to be insufficient, we used the best information available.

Comment 2: The petitioner contends that Algoma failed to provide specific costs for the production costs during the period of investigation in its response. Therefore, the Department should reject the cost data submitted by the producer and use the best information available.

DOC Position: The information in the response reflected the form in which the company's accounting system complies such data. Additionally, more detailed information was presented for one product, as an example of the specific costs included in the total amount. Under these circumstances, the Department concluded that the information presented in the response was reasonable.

Comment 3: Petitioner contends that Algoma submitted data representing cost of goods sold as opposed to production costs and, thus, the Department should use the best information available to determine the cost of production.

DOC Position: The Department concluded, after its review, that the cost of goods sold, as adjusted, included all costs, appropriately valued, related to the production of OCTG.

Comment 4: Petitioner contends that the Department should not deduct interest income from Algoma's selling, general and administrative expenses (SG&A).

DOC Position: The Department followed the usual practice and offset the interest expense with only the interest income from incidental investment related to the ordinary course of business.

Comment 5: Petitioner argues that the Department should not allow Algoma's adjustments to the cost of goods sold. These adjustments depart from Algoma's normal accounting procedures, and violate the Department practice of relying on a respondent's normal accounting practices in calculating the constructed value.

DOC Position: We agree. These adjustments were disallowed.

Comment 6: Petitioner claims that Algoma improperly reclassified certain manufacturing expenses as part of SG&A. Each of these expenses is associated with the production of OCTG and, therefore, properly considered a manufacturing expense.

DOC Position: We agree. The final determination treated the general works expenses as manufacturing overhead.

Comment 7: Petitioner argues that Algoma improperly shifted allocations of certain expenses from regular casing to high strength casing. Furthermore, they argue that Algoma improperly allocated certain expenses based on man-

VOL 51 ISS 77 AP 22 1986 UMI

hours per ton, rather than based on tons produced, their normal accounting practice. The Department should not allow such adjustments.

DOC Position: We agree. Algoma's reallocations were disallowed for the final determination.

Comment 8: Petitioner argues that because Algoma made improper adjustments to its costs, the Department should not rely on Algoma's submitted cost data. However, if the Department does use Algoma's data in its final determination, the Department should adjust that data to properly allocate overhead and depreciation expenses to OCTG.

DOC Position: The submitted cost data was used. Adjustments were made to depreciation and overhead areas.

Comment 9: Petitioner argues Algoma's interest on long-term debt must be included in SG&A expense. The respondent's rationale for excluding the expense ignores that the steel for OCTG is produced in-house and that debt is fungible.

DOC Position: We agree. Interest on long-term debt was included for the final determination.

Comment 10: Petitioner argues that Algoma's depreciation, fixed overhead costs and SG&A expenses should be included in the U.S. manufacturing cost adjustment.

DOC Position: We agree. These costs were included for the final determination.

Comment 11: Petitioner argues that information submitted by Ipsco on March 4, 1986, regarding Ipsco's costs for prime and limited service production costs should be disregarded.

DOC Position: The calculations submitted by Ipsco on March 4, 1986, were not used as the basis for this final determination.

Comment 12: Petitioner claims that Ipsco's bad debt expense adjustment to FMV should be disallowed since it was not written off as a loss during the period of investigation. Further, Ipsco improperly considered this to be a direct selling expense, contrary to the Departmental practice of treating such items as indirect selling expenses.

DOC Position: We agree that we should disallow this claim. Normally, we consider bad debt losses when the company writes them off in accordance with their own practices. In Ipsco's case, the debt in question is to be settled in court and is not considered a loss. Therefore, the claim is disallowed.

Comment 13: Petitioner claims that Ipsco overstated its warranty expenses by including secondary costs that should not be treated as direct warranty adjustments; instead, they should be treated as indirect selling expenses.

DOC Position: During the verification, Department officials established from Ipsco's source documents that the included expenses were directly related to the warranty costs of the pipes. Therefore, such expenses were considered as part of warranty expenses in the circumstances of sales adjustments.

Comment 14: Petitioner claims that in calculating Ipsco's freight costs the Department should use average freight costs rather than the actual freight cost, because these are the only costs that have been verified for all markets.

DOC Position: We agree and have used the verified average freight costs.

Comment 15: Petitioner contends that the Department should use Ipsco's actual production costs rather than the calculated "normalized" costs proposed by Ipsco. Contrary to Ipsco's assertions, its actual cost are not extraordinary within the Department's definition of the term and therefore are the appropriate costs to use the final determination. Further, the "normalized" costs submitted by Ipsco were untimely, hypothetical, and unsubstantiated.

DOC Position: Ipsco incurred abnormally high costs for certain products which it recently started producing. However, the normalized cost data submitted by Ipsco was not sufficiently substantiated. At verification, information was gathered regarding yield rates during and after the period of investigation. Where such information was available, the low yield rates in the period of investigation were normalized, in keeping with the Department's policy of amortizing start-up costs over future production.

Comment 16: Petitioner claims that Ipsco failed to account for research and development costs. The Department should adjust Ipsco's cost of production to reflect unreported research and development costs.

DOC Position: Ipsco reported research and development costs as part of general and administrative expenses. However, petitioner refers to Ipsco's argument that certain expenses incurred in initial production runs of experimental products, which in Ipsco's cost accounting system are classified as production costs, should be excluded from the "normalized" costs of these products. In the calculation of "normalized" costs for these products, the Department amortized these costs over present and estimated future production.

Comment 17: Petitioner argues that the Department should not classify Ipsco's off-specification OCTG as a by-product. There is significant demand for off-spec OCTG and, therefore, its production is desirable. Further, classifying off-spec OCTG as a by-product and not attributing any cost of production to it would encourage firms to circumvent the antidumping order by merely ceasing to test pipe for compliance with API standards.

DOC Position: We treated Ipsco's production of off-specification pipe as a full-costed product by spreading the cost of production equally over prime production and production off-spec products.

Comment 18: Petitioner argues that Welded Tube's cost of production data should be adjusted to reflect the differential in costs of producing casing of different dimensions.

DOC Position: We agree. For the final determination, we reallocated labor and overhead costs to accurately account for the differences in costs among different casing diameters.

Comment 19: Petitioner argues that Welded Tube's second quality tube should be included as a yield loss and the production costs offset by the sale of scrap.

DOC Position: We agree. The second quality product was treated as a by-product. Revenues from the sale of scrap were offset against production costs.

Comment 20: Petitioner argues that Welded Tube's slitting costs should be recalculated, first by allocating this expense among the proper mills, and then by allocating the costs among the products produced in that mill.

DOC Position: We agree. This was done for the final determination.

Comment 21: Petitioner argues that the following income items should not be allowed as deductions from Welded Tube's factory overhead and SG&A expenses: "storage income," "sundry income," and "dividend income."

DOC Position: We agree. These were not included in the final determination.

Comment 22: Petitioner argues that the factory overhead costs that Sonco reclassified to SG&A expense for purposes of the antidumping investigation should be included as a manufacturing cost.

DOC Position: We agree. These costs were included in manufacturing overhead for the final determination.

Comment 23: Petitioner argues that the reallocation of Sonco's electricity, water and gas costs among mills for the purposes of this antidumping investigation should be disallowed.

DOC Position: The reallocation was disallowed.

Comment 24: Petitioner claims that Sonco's accrued warranty expenses should be included as an overhead expense.

DOC Position: Accrued warranty expense was included in SG&A expense for the final determination because it is a selling expense.

Comment 25: Petitioner claims that any overstatement in submitted yield rates by Sonco should be corrected and production costs adjusted accordingly.

DOC Position: The Department used the verified yield rates except for limited service casing. The yield and, accordingly, the costs were revised for the limited service pipe.

Comment 26: Petitioner argues that the production costs of limited service casing should be increased to reflect the scrap cost of producing this casing.

DOC Position: We agree. The costs were increased to include estimated scrap and rejected casing.

Domestic Interested Party

Comment 1: Counsel for interested party claims that Sonco's raw material supplier, Algoma, is a related party. Interested party further claims that Algoma has an option to purchase 50 to 100 percent of Sonco's shares. Because of this relationship, the Department should not presume that sales of raw material to Sonco were at arm's length prices. Accordingly, interested party argues that data used to substantiate sales of raw material by Algoma to Sonco should be disregarded and that the Department should use best information available to calculate these costs.

DOC Position: During the verification, the Department reviewed the raw material prices and found that the validity of the transaction prices were supported by the company's records. We found no evidence that any elements of the values were missing. Therefore, we determine that the purchases from Algoma were made at arm's length prices.

Comment 2: Counsel for interested party claims that Sonco's scrap loss was too low, and that the Department should disregard it and use the best information available to calculate the production cost.

DOC Position: After careful review of verification document, we believe that, except for the limited service products discussed within, submitted yield rates for the six-month period used for the final determination were reasonable.

Comment 3: Counsel for the interested party claims Sonco's overhead costs should be allocated on the basis of mill run time.

DOC Position: We reviewed allocations of overhead items which were computed based on tonnage and determined that the difference in costs between use of run time and tonnage bases was not significant.

Comment 4: Counsel for interested party claims that the SG&A reported by Sonco are too low due to the underallocation of such items as warehousing expenses and inventory carrying charges. Sonco's actual SG&A expense should be equal to or higher than that of Ferrum Inc., Sonco's parent company. Allocation of SG&A expenses based on sales tonnage will underallocate expenses to OCTG.

DOC Position: See our responses to Sonco's Comments number 4 and 7.

Comment 5: Counsel for the interested party argues that the Department should not accept Sonco's cost allocations because they do not reflect the respondent's usual cost allocation practices and should use best information available.

DOC Position: We agree that the respondent's reallocations should not be accepted. Such reallocations were disallowed for the final determination.

Comment 6: Counsel for the interested party argues that Sonco's accrued warranty expense should be allocated to the production cost.

DOC Position: Accrued warranty expense was allocated as part of SG&A expense for the final determination.

Comment 7: Counsel for the interested party argues that Sonco's actual profit margin on the OCTG was not specific and it prevents the interested party from checking to see if Sonco under-reported its cost of goods sold and SG&A.

DOC Position: The Department verified the actual elements of cost related to Sonco's costs of production to determine if the costs were appropriately valued.

Comment 8: Counsel for the interested party argues that Sonco's cost for further manufacturing in the United States was understated.

DOC Position: We agree. Certain SG&A and manufacturing expenses were reallocated for the final determination.

Comment 9: Counsel for the interested party and petitioner argues the constructed value information provided by Sonco is inconsistent and unreliable.

DOC Position: For the final determination, the constructed values were based on the verified amounts.

Respondents Comments

Sonco Comment 1: Sonco argues that the U.S. sales of API products constitute the majority of its sales, and sales of the limited service product are so small that they should be excluded from the fair value comparison because they were not in the ordinary course of trade.

DOC Position: We have included "limited service" products in the fair value comparison. We rejected Sonco's argument of treating "limited service" products as not in the ordinary course of trade. Ordinary course of trade is not applicable to U.S. sales.

Comment 2: Sonco argues that the credit expenses incurred in both markets were the same and no adjustment for credit expenses required.

DOC Position: We agree.

Comment 3: Sonco argues that a cash discount offered U.S. customers should not be treated as a reduction in price, but rather as an offset to credit expenses.

DOC Position: It is long established practice that the Department treats such discounts as reductions of price not as part of a credit expense equation.

Comment 4: Sonco argues that if the Department does not use Sonco's total credit expense calculation, then the discount given for early payment should be treated as a circumstance of sale adjustment. If the Department makes this circumstances of sales adjustment, it should be made for all comparison using either home market sales or constructed value.

DOC Position: A reduction for an early payment discount from the price has been a longstanding administrative practice. A discount represents a reduction in the price paid by the customer and must be deducted in calculating the U.S. price. It is not a circumstance of sale adjustment.

Comment 5: Sonco claims that the Department should use the daily exchange rate rather than the quarterly exchange rate for its currency conversion.

DOC Position: We agree and have done so.

Comment 6: Sonco claims that the Department should allocate the costs of producing scrap, rejects, and limited service OCTG to the production of the prime and non-prime merchandise. To calculate those costs, the Department should offset the cost of production by revenue earned in the selling of the scrap, reject and by-product material. this is consistent with Departmental practice.

DOC Position: We treated scrap and rejects as by-products. The limited service OCTG, which has the same use as the prime quality product, was not treated as a by-product.

Comment 7: Sonco claims that it properly classified consulting fees, general plant administration and salaries, and insurance as SG&A expenses rather than the cost of manufacturing. Therefore, the

VOL 51 ISS 77 AP 22 1986 UMI

Department should include them in Sonco's SG&A rather than in its cost of manufacture.

DOC Position: We disagree. We believe that the expenses were more appropriately classified as overhead.

Comment 8: Sonco claims that the Department overstated the SG&A expenses by using the Sonco parent company's financial statement rather than expenses specific to Sonco. Ferrum Inc.'s, financial statement includes SG&A attributable soley to products other than OCTG. Including these expenses is contrary to the Department's practice of attributing only those SG&A expenses related to the products under investigation.

DOC Position: We agree. Only SG&A expenses related to the production of OCTG were used for the final determination.

Comment 9: Sonco should not include accrued pipe warranty expenses in its submitted overhead costs because it has never had a warranty claim against its OCTG products.

DOC Position: An allocation of this expense was included in SG&A expense for the final determination.

Comment 10: Sonco has properly allocated its electricity, water and gas costs between the two mills at the Van Kirk facility on the basis of an engineering study that measured actual usage. The Department should use this allocation.

DOC Position: We disagree. The allocation used in Sonco's internal accounting system, produced in the normal course of business, was used for the final determination.

Comment 11: Sonco properly allocated its plant depreciation and electricity costs on the basis of tons produced because these costs are a function of production.

DOC Position: We disagree. However, since the difference in the amount of plant deprecition and electricity costs between the allocation based on run time and based on tonnage was insignificant, we accepted the submitted amounts.

Comment 12: Sonco has properly accounted for all costs incurred in further processing its material in the United States.

DOC Position: We disagree. We believe that several expenses were allocated using inappropriate allocation bases, resulting in an understatement of costs. These included general and administrative expenses and certain manufacturing costs. We reallocated these for the final determination.

Comment 13: SG&A expenses reported in the financial statements of Ferrum Inc., Sonco's parent, should not be used since they include expenses of the Lyman Tube Division which are completely unrelated to OCTG production.

DOC Position: We agree. Only SG&A expenses related to the production of OCTG were used for the final determination.

Comment 14: Sonco claims that their SG&A expenses should not be allocated as a percentage of cost of goods sold. This methodology overstates the expense because a large portion of Sonco's business is the conversion of pipe for other companies using customer-supplied coil.

DOC Position: We agree. SG&A expenses for the final determination were allocated to the products under investigation on a tonnage basis, a basis we believe to be more appropriate than the cost of goods sold basis under the circumstances for this company.

Comment 15: Sonco claims that the Department should offset the amount of the U.S. selling expenses from its ESP sales in the amount of its selling expenses for comparable merchandise in the home market. Such an offset is in accordance with Departmental practice and should be allowed whether the foreign market value is based on home market sales or constructed value.

DOC Position: We agree and have done so.

Algoma Comment 1: Algoma argues that the Department should exclude the amount for "depreciation and amortization" which was included in the preliminary determination from its calculation of Algoma's SG&A expenses because this amount was already included in the submitted cost of production.

DOC Position: We agree. Since these costs were included in respondent's submission, no adjustment was made by the Department for its final determination.

Comment 2: Algoma argues that the Department should exclude the long-term interest expense because none of Algoma's long-term debt was incurred to purchase the assets used in manufacturing the merchandise under consideration.

DOC Position: We disagree. Since the debt was incurred as part of the corporate long-term capitalization, we included an allocation of the expense in the final determination.

Comment 3: Algoma argues that the Department should reduce Algoma's short-term interest expense by the short-term interest income Algoma earned in 1984, before including the interest expense in SG&A. This interest income was earned in the normal course of business. Such an offset is consistent with Departmental practice.

DOC Position: We agree. The Department followed its usual practice and offset interest expense by ordinary interest income associated with incidential investments related to the ordinary course of business.

Comment 4: Algoma argues that the foreign exchange losses and deferred exchange losses shown in Algoma's Financial Statement are merely paper losses (not actual current expenses to Algoma) and are thus not properly attributable to Algoma's SG&A expense.

DOC Position: We disagree. These were allocated as part of SG&A expense.

Comment 5: Algoma argues that the Department should exclude "seconds" sales of clearance merchandise from its fair value commparison because they were not made in the ordinary course of trade. Algoma states that Departmental policy is to include such clearance sales only if home market sales are otherwise inadequate or the clearance sales represent a significant portion of the U.S. sales under investigation. Alternatively, Algoma suggests that if the Department does include clearance sales, it should compare clearance sales in both markets.

DOC Position: We disagree. We do not believe that these sales of overruns and downgraded API specification material qualify as "clearance merchandise" outside the ordinary course of trade since they were of prime quality and of standard API sizes.

Comment 6: Algoma claims that, in its preliminary determination, the Department failed to adjust the constructed value for physical differences despite its stated position that Algoma was entitled to this adjustment.

DOC Position: We have adjsuted the constructed value for physical differences in reaching this final determination.

Comment 7: Algoma was consistent with Department standards in reclassifying certain "general works" expenses from overhead to SG&A expenses for the submission.

DOC Position: We disagree. For the final determination, these were included in the cost of manufacture.

Comment 8: Algoma correctly modified its ESP U.S. manufacturing expenses adjustments to reflect the price per ton for plain-end OCTG.

DOC Position: We agree. The submission methodology was accepted.

Comment 9: Algoma argues that taxes and royalty payments on iron-ore properties not in production should be excluded from cost of production because such costs do not relate to OCTG production.

DOC Position: We disagree. Since the company is an intergrated producer these expenses would relate to the production of OCTG. For the final determination, the taxes and royalty payments were included in SG&A expense.

Comment 10: Algoma states that it properly treated raw material purchases from related parties as 100 percent variable costs in its calculation of difference in merchandise adjustments.

DOC Position: We agree with Algoma's treatment of the material purchase as 100 percent variable cost.

Comment 11: Algoma contends that it properly excluded the capital tax from SG&A expense in Algoma's submission because this tax is essentially a form of income tax.

DOC Position: We disagree. The tax is based on capital and not income. In addition, the normal treatment of this capital tax in Canada is a general expense. We therefore included it in SG&A expense for the final determination.

Comment 12: Algoma argues that its cost of production should not include an allocation of the general costs of CP Enterprises Limited, Algoma's parent company, because CP Enterprises provides no services to Algoma.

DOC Position: We agree. CP Enterprises Limited is essentially a holding company and, as such, acts as only an investor in Algoma.

Comment 13: Algoma's selling, general and administrative expenses should be allocated on the basis of tons sold.

DOC Position: We disagree. For the final determination, the cost of goods sold allocation basis was used because it takes into account differences in product costs.

Comment 14: Algoma maintains that the Department should make an adjustment for the differences of price due to differing levels of trade between distributor and end-users. Precedent requires the Department, in situations where there are sales to differing levels of trade in both markets, to adjust for differences in prices between the two levels of trade in the Canadian market.

DOC Position: Departmental practice is that, in establishing whether there are differences in sales at varying levels of trade that affect price comparability, information substantiating that the differences in the price are the result of differences in the cost of selling at one level of trade as compared to the other must be submitted and verified. Algoma was unable to substantiate information on cost differences. Therefore, we made no adjustment for differeing levels of trade.

Comment 15: Algoma argues that we should make an adjustment for quantity discounts.

DOC Position: We agree. The verified data indicates that quantity discounts did exist for certain product. Therefore, we included the discount in our calculations for those products.

Comment 16: Algoma argues that, in its preliminary determination, the Department improperly excluded from its foreign market value sales made at below cost if these sales comprised more than 10 percent of Algoma's total sales of that product. The Department may not disregard any of Algoma's home market sales because there is no evidence on the record to show that sales of the entire class or kind of OCTG were "made over an extended period of time and in substantial quantities" at below cost.

DOC Position: In calculating weighted average home market prices, the Department took into consideration the provisions of section 773(b) of the Act which directs that home market sales below cost which are made over an extended period of time and in substantial quantities at prices which do not permit recovery of all costs over a reasonable period of time will be disregarded in the determination of foreign market value.

Thus, there are two stages in the calculation of foreign market value where there are sales below costs. First, the Department must determine whether to disregard below cost sales. Second, if it does disregard them, it must determine whether the remaining above cost sales provide an adequate basis for comparison.

In determining whether to disregard below cost sales, we have followed the precedent set in the antidumping cases involving carbon steel plate from Japan (43 FR 2033) and welded stainless pipe and tubing from Japan (48 FR 1206) in which sales below-cost were disregarded when they amounted to 10 percent or more of the total home market sales. In the case of Algoma, there were a few products that had more than 10 percent of the home market sales which were below cost. These below-cost sales were disregarded in the computation of foreign market value. In certain instances where a product had less than 10 percent of the total home market sales below cost, none of the below-cost sales were disregarded in the computation of foreign market value.

Welded Tube Comment 1: Welded Tube claims that their home market sales were at prices above the cost of production and, therefore, should be used as the basis of comparison for foreign market value.

DOC Position: We agree and have done so.

Comment 2: Welded Tube argues that, in its preliminary determination, the Department overstated the SG&A expenses attributable to OCTG because it included charges reported elsewhere and costs unrelated to OCTG production. The SG&A expenses submitted by Welded Tube accurately calculate those costs for OCTG production, and the Department should use them to determine Welded Tube's cost of production.

DOC Position: We agree. We used the verified SG&A expenses for the final determination.

Comment 3: Welded Tube claims that the Department should use its skelp cost because all purchases of skelp were arm's length transactions made at market prices.

DOC Position: We agree. The supplier's equity interest is under 20 percent and the information provided to the Department indicated that the Skelp price represented market prices. Therefore, these prices were used for the final determination.

Comment 4: Welded Tube has provided the Department with accurate yield loss amounts, The Department has sufficient information with which to calculate Welded Tube's net yield loss for the period of investigation.

DOC Position: During the verification, the Department reviewed Welded Tube's yields and related costs for each product for the period of investigation. These yields were used for the final determination.

Comment 5: Welded Tube's slitting labor and overhead costs should be computed by first allocating the cost to the mill that produces OCTG and then by dividing by that mill's finished tube production output. The submission methodology of allocating the cost to finished production based on total tons slit should not be used.

DOC Position: We agree. The allocation method based on finished tube production tonnage by mill was used for the final determination.

Comment 6: Welded Tube argues that it has accurately reported SG&A expenses. Commission, warehousing expenses, and bad debt expenses were correctly excluded from the submission. Welded Tube provided worksheets at verification which corrected SG&A expenses for the first quarter of 1985.

DOC Position: We agree that the

VOL 51 ISS 77 AP 22 1986 UMI

above expenses were properly excluded because such expenses were not related to OCTG. However, SG&A expenses were allocated based on production. We used cost of goods sold as the allocation basis for SG&A expenses for the final determination.

Ipsco Comment 1: Ipsco argues that the Department should adjust the foreign market value to reflect rebates provides in the home market.

DOC Position: We agree. Such rebates were verified and allowed.

Comment 2: Ipsco argues that the Department should make a circumstance of sale adjustment for commissions that Ipsco pays to distributors when it sells directly to end-users. These commissions were verified and are appropriately considered a circumstance of sale.

DOC Position: We agree and the adjustments were made for the final determination.

Comment 3: Ipsco contends that the Department should adjust its foreign market value to reflect bad debt expenses directly related to sales of the product under investigation.

DOC Position: We disagree. See our response to Petitioner's Comment 12.

Comment 4: Ipsco states that the Department should adjust for warranty expenses now that it has verified those expenses. Further, that adjustment should cover all warranty expenses claims by Ipsco.

DOC Position: We agree. See our response to Petitioner's Comment 13.

Comment 5: Ipsco argues that, in adjusting United States price for Canadian inland freight, the Department should use actual freight costs rather than average costs. These freight costs are easily ascertainable and would prevent over-or understatement of the costs.

DOC Position: We disagree. See our response to Petitioner's Comment 14.

Comment 6: Ipsco argues that all extraordinary costs attributable to equipment start-up, product development, and limited test runs should be amortized over the useful life of the equipment or technology involved, rather than fully assessed against products produced in this start-up phase. Ipsco provides and urges the Department to use this normalized cost instead of the actual production costs.

DOC Position: The normalized cost information submitted by Ipsco is based on standard costs contained in Ipsco's annual management budget adjusted for inflation using a broad index of price levels. The standard costs contained in the budget are not used by Ipsco in its cost accounting sytem. This information is not sufficient to substantiate the level of production costs under normal operating conditions. However, as stated in our response to Petitioner's Comment 16, we have amortized costs related to low yield rates on initial production runs over present and estimated future production, where yield rates for subsequent production were available and were lower.

Comment 7: Ipsco offers two possible methods of determining foreign market value for comparison purposes for its sale of off-spec merchandise. First, Ipsco suggests the Department use the uniform per ton value which Ipsco ascribes to such by-products in calculating the cost of prime material. If not, the Department should use the actual selling price for such off-spec merchandise. In either case, Department practice, generally accepted accounting principles, and industry practice require that the cost of production of the prime product should reflect the costs of all production net of the reject value.

DOC Position: Because the off-spec merchandise is used as OCTG and can be very similar to prime merchandise, we have included it in this investigation and made comparisons of United States price with foreign market value for sales of off-spec merchandise. In order to allow such comparisons, we rejected Ipsco's methodology of treating off-spec production as a by-product.

Comment 8: Ipsco contains that the Department improperly excluded sales of oilwell tubing from its calculations of foreign market value in the preliminary determination. The Department should correct this error for the final determination.

DOC Position: We agree and have done so.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to continue to suspend liquidation of all entries of OCTG from Canada (with the exception of those OCTG produced by Welded Tube) that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Weighted-average margin percentage
Algoma	14.28
Ipsco	40.65
Sonco	3.35
Welded Tube	0
All others	19.38

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided that the ITC confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry, within 45 days after our final determination.

If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will issue an antidumping duty order on the subject merchandise which was entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value of the merchandise exceeds the United States price.

This notice is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Paul Freedenberg,

Assistant Secretary for Trade Administration.

April 16, 1986.

[FR Doc. 86-8862 Filed 4-21-86; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

[A-479-502]

Termination of Antidumping Duty Investigation; Welded Carbon Steel Pipe and Tube Products From Yugoslavia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On March 27, 1986, the Standard Pipe and Tube Subcommittee of the Committee on Pipe and Tube Imports (CPTI), withdrew its antidumping petition, filed on July 16, 1985, on certain welded carbon steel pipe and tube products from Yugoslavia. Based on the withdrawal, we are terminating the investigation.

EFFECTIVE DATE: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Mary Clapp, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769.

SUPPLEMENTARY INFORMATION:

Case History

On July 16, 1985, we received a petition from the Standard Pipe and Tube Subcommittee of the Committee on Pipe and Tube Imports (CPTI) filed on behalf of the U.S. industry producing certain standard pipe and tube and line pipe.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We notified the ITC of our action and initiated the investigation on August 5, 1985, (50 FR 32248). On August 30, 1985, the ITC determined that there is a reasonable indication that imports of standard pipe and tube from Yugoslavia are materially injuring a United States industry. On August 30, 1985, the ITC also determined pursuant to section 733(a) of the Act (19 U.S.C. 1673b(a)) that there is no reasonable indication that an industry in the United States is materially injured, or threatened with material injury by imports of line pipe. On December 23, 1985, we made a preliminary determination that certain welded carbon steel pipe and tube products from Yougoslavia were being, or were likely to be, sold in the United States at less than fair value. On March 10, 1986, we made a final determination that certain welded carbon steel pipe and tube products from Yugoslavia were being, or were likely to be, sold at less than fair value (51 FR 8863).

Scope of Investigation

The merchandise covered by this investigation is welded carbon steel pipe and tube products with an outside diameter of 0.375 inch or more but not over 16 inches, of any wall thickness, currently classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA) under items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3256, 610.3258, and 610.4925.

Withdrawal of Petition

On March 27, 1986, petitioner notified us that it was withdrawing its petition and requested that the investigation be terminated. Under section 734(a) of the Act, as amended by section 604 of the Trade and Tariff Act of 1984, upon withdrawal of a petition, the administering authority may terminate an investigation after giving notice to all parties to the investigation. This withdrawal is based on arrangements with the Government of Yugoslavia to limit the volume of imports of this product. We have assessed the public interest factors set out in section 734(a)(2) of the Act and consulted with potentially affected producers, workers, and consuming interests. On the basis of our assessment of the public interest factors and our consultations with affected interests, we have determined that termination would be in the public interest.

We have notified all parties to the investigation of petitioner's withdrawal and our intention to terminate. For these reasons we are terminating our investigation.

Dated: April 16, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-122-505]

Final Affirmative Countervailing Duty Determination; Oil Country Tubular Goods From Canada

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters of oil country tubular goods (OCTG) in Canada. The estimated net subsidy is 0.72 percent *ad valorem* for all companies except those specifically excluded from this detefmination. In addition, we determine that "critical circumstances" do not exist with respect to the subject merchandise.

We have notified the United States International Trade Commission (ITC) of our determination. We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of OCTG from Canada that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice, except for companies that have been excluded from this determination, and to require a cash deposit or bond on entries of this product in an amount equal to the estimated net subsidy as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Steven Morrison or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-1248 (Morrison) or (202) 377-2438 (Tillman).

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we determine that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters of OCTG in Canada. For purposes of this investigation, the following programs are found to confer subsidies:

- Certain Types of Investment Tax Credits;
- Regional Development Incentives Program; and
- General Development Agreement/ Canada-Saskatchewan Subsidiary Agreement on Iron, Steel and Other Related Metal Industries.

We determine the estimated net subsidy for OCTG to be 0.72 percent *ad valorem* for all companies except those specifically excluded from this determination.

Case History

On July 22, 1985, we received a petition filed in proper form by the Lone Star Steel Company and CF&I Steel Corporation, producers of OCTG. In compliance with the filing requirements of §355.26 of our regulations (19 CFR 355.26), the petition alleged that manufacturers, producers or exporters of OCTG in Canada directly or indirectly receive benefits which constitute subsidies within the meaning of section 701 of the Act, and that these imports materially injure, or threaten material injury to, a U.S. industry. In addition, the petition alleged that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act. We found that the petition contained

VOL 51 ISS 77 AP 22 1986 UMI

sufficient grounds upon which to initiate a countervailing duty investigation, and on August 12, 1985, we initiated the investigation (50 FR 33369).

Since Canada is a "Country under the Agreement" within the meaning of section 701(b) of the Act, the ITC is required to determine whether imports of the subject merchandise from Canada materially injure, or threaten materials injury to, a U.S. industry. Therefore, we notified the ITC of our initiation. On September 5, 1985, the ITC determined that there is a reasonable indication that these imports materially injure a U.S. industry (50 FR 37066).

On August 21, 1985, we presented a questionnaire concerning the petitioners' allegations to the government of Canada. Responses to the questionnaire were received on September 23 and 24, 1985, from the government of Canada, the provinces of Alberta, Ontario and Saskatchewan and from producers who account for substantially all exports of OCTG from Canada to the United States.

There are eleven known producers and/or exporters of OCTG to the United States from Canada. These are Siegfried Kreiser Pipe and Tube; IPSCO, Inc.; Stelco Inc.; Sonco Steel Tube (a division of Ferrum, Inc.); Algoma Steel Corp. Ltd.; Welded Tube of Canada, Ltd.; Prudential Steel, Ltd.; Frank Pipe Co.; Christianson Pipe, Ltd.; Dominion Steel Export Co., Ltd.; and Matthew Tube & Pipe Supply Inc. We received timely requests for exclusion from these companies. We sent them copies of the detailed questionnaire. We verified that eight respondents received no benefits. In addition, Algoma Steel Corporation received benefits which we determine are *de minimis*. Therefore, these nine companies are excluded from this final determination. IPSCO received countervailable benefits above the *de minimis* rate of 0.50 percent. Siegfried Kreiser Pipe and Tube did not respond to our questionnaire.

On September 23, 1985, we received a timely request by petitioners for a extension of the deadline date for the preliminary determination. An extension was granted on September 26, 1985 (50 FR 40209). We made our preliminary determination on December 19, 1985 (50 FR 53172).

Verification was conducted in Canada from October 23, 1985 to November 14, 1985. After verification, supplemental responses were received revising and adding information as requested at verification. Prehearing briefs were submitted on January 9, 1986. The hearing was held on January 14, 1986. Post-hearing briefs were received by the Department on February 3, 1986.

On February 7, 1986, we received a request from petitioners to extend the final countervailing duty determination on OCTG from Canada to coincide with the final antidumping duty determination on a simultaneously initiated investigation of the same merchandise from the same country. This request was made pursuant to section 705(a)(1) of the Tariff Act of 1930, as amended. Pursuant to petitioners' request we extended the date of the final countervailing duty determination on OCTG from Canada until not later than April 16, 1986, to correspond to the date of the final antidumping duty determination (51 FR 7977).

Under Article 5.3 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement of Tariffs and Trade (1979), we would have to terminate the suspension of liquidation of countervailing duties if the final injury determination date, as extended, was more than four months after the date of publication of the preliminary affirmative countervailing duty determination, December 30, 1985 (50 FR 53172). Therefore, we will terminate the suspension of liquidation ordered in our preliminary affirmative countervailing duty determination on May 1, 1986. We will reinstate the suspension of liquidation if the ITC makes a final affirmative injury determination in this investigation.

Because of the extension of the final determination, we were able to conduct a supplemental verification of information submitted by IPSCO after our preliminary determination. This suplemental verification was conducted in Washington, D.C. on March 21, 1986.

Scope of Investigation

The products covered by this investigation are "oil country tubular goods," which are hollow steel products of circular cross-section intended for use in drilling for oil or gas. These products include oil well casings, tubing and drill pipe of carbon or alloy steel, whether welded or seamless, manufactured to either American Petroleum Institute (API) or non-API (such as proprietary) specifications as currently provided for in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.3218, 610.3219, 610.3233, 610.3234, 610.3242, 610.3243, 610.3249, 610.3252, 610.3254, 610.3256, 610.3258, 610.3262, 610.3264, 610.3721, 610.3722, 610.3751, 610.3925, 610.3935, 610.4025, 610.4035, 610.4210, 610.4220, 610.4225, 610.4230, 610.4235, 610.4240, 610.4310, 610.4320, 610.4325, 610.4335, 610.4942, 610.4944, 610.4946, 610.4954, 610.4955, 610.4956, 610.4957, 610.4966, 610.4967, 610.4968, 610.4969, 610.4970, 610.5221, 610.5222, 610.5226, 610.5234, 610.5240, 610.5242, 610.5243, 610.5244. This investigation includes OCTG that are in both finished and unfinished condition.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published on April 20, 1984 (49 FR 16008).

For purposes of this final determination, the period for which we are measuring subsidies (the review period) is calendar year 1984. Based upon our analysis of the petition, the responses to our questionnaires submitted by the federal and provincial governments as well as those of the ten responding companies as amended, the verifications, and comments submitted by the petitioners and the respondents, we determine the following:

I. Programs Determined To Confer Subsidies

We determine that subsidies are being provided to manufacturers, producers or exporters of OCTG in Canada under the following programs:

A. Certain Types of Investment Tax Credits

There are several categories of Investment Tax Credits (ITCs) in Canada. Two ITC programs are directed at encouraging capital investment in certain regions of the country. One category of ITC is for investment in "qualified property," such as new plant and equipment used for manufacturing or processing. The basic ITC for investment in qualified property is seven percent. An additional three or 13 percent is available for qualified property used in certain regions. IPSCO and Algoma each claimed the additional three percent ITC for qualified property used in Saskatchewan and Sault Ste. Marie, respectively.

We verified that the basic seven percent rate for "qualified property" is not limited to a specific industry or region. We, therefore, determine that it is not countervailable. However, because the additional rate of three percent for qualified property can only be claimed on investments in assets used in certain regions, we determine that this additional benefit is countervailable. We also verified that the additional 13 percent rate was not used by manufacturers, producers or exporters of OCTG in Canada.

A second category of ITC is for investment in "certified property." The distinguishing factor between "certified property" and "qualified property" is that the former must be located in prescribed regions characterized by high levels of unemployment and low per capita income. The ITC rate for certified property is 50 percent. We verified that no manufacturer, producer or exporter of OCTG in Canada used certified property ITCs in the review period.

A third category of ITC is for scientific research. Eligible expenditures under this category include the cost of capital equipment used for scientific research and expenses attributable to scientific research. A basic 20 percent ITC rate is available for qualifying scientific research expenditures to all companies in Canada. For small Canadian-controlled private corporations, the rate is 35 percent. For all other corporations, the rate is 30 percent, if the expenditure is made in certain regions. From April 1983 to May 1985, manufacturers incurring scientific research expenses, receiving scientific research and operating at a tax loss could sell these ITCs to companies owing taxes. Algoma and Stelco used 20 percent scientific research ITCs. We determine that 20 and 35 percent scientific research ITCs, whether sold or used by the company performing the research, do not confer domestic subsidies because they are not limited to a specific enterprise or industry, or group of enterprises or industries, or to companies in specific regions. We did not discover any corporations manufacturing, producing, or exporting OCTG in Canada that were eligible for the 30 percent regional benefit. We verified that the 35 percent scientific research ITC for small business was not used.

A fourth category of ITC is for qualified transportation and construction equipment. It is also a nationwide program. We verified that no manufacturer, producer or exporter of OCTG used this particular tax credit.

In our "Final Affirmative Countervailing Duty Determination: Certain Fresh Atlantic Groundfish from Canada" ("Groundfish") (51 FR 10041), we stated that there were four categories of ITCs. We have since become aware of a fifth category which is for research and development. During the review period, a company could receive ITCs for ten percent of its research and development expenses (20 percent for small businesses). This provision is available to companies nationwide. IPSCO received tax deductions under this provision in 1984. We determine that research and development ITCs do not confer domestic subsidies because they are not limited to a specific enterprise or industry, or group of enterprises or industries, or to companies in specific regions.

Canadian tax law provides that ITCs may be subtracted from taxes owed, but if no taxes are owed (either because a company is initially in a tax loss position or because only some of the ITCs have been used to satisfy all tax liability), those excess ITCs earned after April 19, 1983, have a refundable, one-time cash value of equal to 20 percent of the initial, face value of the ITC (40 percent for small businesses). We verified that Algoma did get refunds for some post-April 19, 1983 qualified property ITCs for cash on tax returns filed in 1984.

To calculate the benefit from the "qualified property" ITCs, we followed our standard tax methodology. Under our tax methodology, we allocate an income tax benefit to the year in which the tax return was filed. Thus, we looked at the tax return filed in 1984, covering fiscal year 1983. We examined IPSCO's and Algoma's tax returns filed during the review period and found the value of "qualified property" ITCs in excess of the seven percent threshold. We then divided that amount by each company's total sales to calculate a net subsidy of 0.01 percent *ad valorem* for Algoma and 0.01 percent *ad valorem* for IPSCO.

B. Regional Development Incentive Program (RDIP)

The RDIP, which was the predecessor of the Industrial and Regional Development Program, was administered by the Department of Regional Economic Expansion (DREE) for the purpose of creating stable employment opportunities in areas of Canada where employment and economic opportunities were chronically low. The program provided development incentive (usually grants) to manufacturers whose capital investment projects for establishing new facilities or expanding or modernizing existing facilities would create jobs and economic opportunities in areas designated as economically disadvantaged.

Because benefits were limited to companies located within specific regions in Canada, we determine that grants provided through the RDIP program of DREE are countervailable. We verified that the only manufacturers, producers or exporters of OCTG located in regions of Canada eligible for RDIP were IPSCO and Algoma.

Each company received one RDIP grant for facilities not used in the production of OCTG. Consistent with our methodology, when a grant is tied specifically to a production not under investigation, we do not include it in our calculation of benefits. In addition, we verified that one RDIP grant, reported by the government of Canada as paid to IPSCO, was actually paid to a scrap metal company subsequently acquired by IPSCO. The money was paid to the scrap metal company more than a year before its assets were acquired by IPSCO. We verified that IPSCO did not receive any funds under this grant.

IPSCO also received a large grant under RDIP and a Saskatchewan subsidiary agreement which is discussed in the next section of this notice. The benefit from this joint grant is included in the subsidy calculation for this RDIP program. Finally, IPSCO and Algoma each received RDIP grants which were used for several facilities producing both OCTG and other products. Since these grants were used in the production of OCTG, among other products, we included the full amount of these grants in our calculations.

To calculate the benefits from these RDIP grants, we used the methodology for grants outlined in the Subsidies Appendix. Because RDIP grants are not provided automatically every year, we allocate the benefits received over time. The average useful life of equipment in the steel industry is 15 years as determined by standard Internal Revenue Service tables. Thus, for all grants received by each company in the past 15 years, we aggregated all grants received by each company in each year and divided by the company's total sales in that year. If the result was less than 0.50 percent (*de minimis*), we expensed the full amount of the grant(s) in the year of receipt. If the result was 0.50 percent or greater, we allocated the grant over the average useful life of equipment using our declining balance methodology.

We applied the methodology outlined in the Subsidies Appendix. Using this methodology, we determine the estimated net subsidy to be 0.71 percent *ad valorem* for IPSCO and 0.04 percent *ad valorem* for Algoma. The amount calculated for IPSCO includes the full amount of a grant jointly funded by RDIP and a subsidiary agreement discussed below.

VOL 51 ISS 77 AP 22 1986 UMI

C. General Development Agreement (GDA) and the Canada-Saskatchewan Subsidiary Agreement on Iron, Steel and Other Related Metal Industries

GDAs, which were umbrella agreements stating general economic development goals, provided the legal basis for departments of the federal and provincial governments to cooperate in the establishment of economic development programs. Ten-year GDAs were signed with all the provinces in 1974, except P.E.I., which had signed its own Comprehensive Development Plan in 1969. Five-year GDAs were signed with the Yukon Territory in 1977 and with the Northwest Territories in 1979.

Pursuant to GDAs, subsidiary agreements were signed. The subsidiary agreements were generally between particular federal and provincial government departments (*e.g.*, DREE and the Ministry of Industry and Commerce in Saskatchewan). These agreements established various individual programs, delineated administrative procedures and set out the relative funding commitments of the federal and provincial governments. Subsidiary agreements were typically directed at establishing traditional government programs (*i.e.*, extension services, developing infrastructure, providing for economic development assistance for certain regions within the province and creating programs for specific industries).

The iron and steel subsidiary agreement in Saskatchewan was intended to enhance the viability of the existing iron and steel industry in the province, to expand and diversify iron and steel production, and to increase employment opportunities in the iron, steel and other related metal industries in Saskatchewan. IPSCO was and still is the only producer in Saskatchewan of pipe (including OCTG) in addition to being the sole steel producer in the province. IPSCO received most of the funds the province budgeted for primary and secondary steel facilities under the subsidiary agreement. As such, we determine this subsidiary agreement to be countervailable because it provided direct financial assistance that was limited to a specific enterprise or industry, or group of enterprises or industries.

IPSCO received two grants under the subsidiary agreement. These two grants were jointly approved and funded through RDIP and the subsidiary agreement. IPSCO received funds under one grant in 1976 and 1978. These were the only grant funds IPSCO received in each of those years. The funds received under this grant were less than 0.50 percent of total IPSCO sales in each of those years. Thus, we expensed the amount of each of these grants to the year of receipt. IPSCO received funds under the other grant in 1980, 1981, 1982 and 1983. The amount of these disbursements exceeded 0.50 percent of total IPSCO sales in each of those four years. Therefore, we allocated each of these disbursements over time and have included the benefits in our calculation of the estimated net subsidy under RDIP.

II. Programs Determined Not To Confer Subsidies

We determine that subsidies are not being provided to manufacturers, producers or exporters of OCTG in Canada under the following programs:

A. Grant Under the Enterprise Development Program (EDP)

The EDP was established to provide loans, loan guarantees and contributions to those engaged in manufacturing or processing. In the "Final Negative Countervailing Duty Determinations: Certain Softwood Products from Canada" ("Softwood") (48 FR 24159 (1983)), we found EDP grants not countervailable and EDP loan programs not used. Based on that determination, we initiated an investigation only on EDP loan programs and not EDP grants. However, IPSCO's 1984 annual report stated that the company was being assisted by an EDP grant for research on a new alloy while the government of Canada response said the EDP program was terminated in 1983. Because of this inconsistency in the information provided in the two responses, we asked for additional information in order to determine whether a new EDP program has been established.

We verified that companies could continue to receive funds for projects approved prior to the termination of the EDP program and that there was no new EDP program. In addition, although project funding for the grant has been approved, we verified that IPSCO has not yet received any funding under this program. Accordingly, we have no information changing our prior conclusion that EDP grants are not limited to a specific enterprise or industry, or group of enterprises or industries, or to companies in specific regions. EDP loan programs were not used as explained in section III. I. of this notice.

B. Employment Development Fund (EDF)

The Employment Development Fund (EDF), which was terminated in 1982, was an Ontario provincial grant program intended to increase long-term investment and employment in the province. In its response, one OCTG manufacturer reported receipt of an EDF grant. During verification, we saw that as part of the application procedure, applicants are required to predict the growth of production and exports. However, the default provisions of the application form are not triggered if the projected export goals are not met.

We determine that EDF was not an export subsidy because these grants were provided to producers for the domestic market as well as to exporters, and receipt of EDF grants was not contingent on export performance. Based on our examination of a report on recipients of EDF, funding was provided to a wide range of industries in Ontario including general manufacturing, automotive, high-technology electrical products, wood products, tourism, textiles, transport, chemicals, agriculture, and pulp and paper. Therefore, we also determine that EDF grants do not confer domestic subsidies because they are not limited to a specific enterprise or industry, or group of enterprises or industries, or to companies in specific regions.

C. Alberta Opportunity Loan to IPSCO

The Alberta Opportuntiy Company (AOC), a crown corporation, issues loans and loan guarantees to companies in Alberta in order to stimulate new businesses and assist expansion of existing enterprises when financing from other sources is unavailable. In *Softwood*, we determined that AOC loans were not limited to a specific enterprise or industry, or group of enterprises or industries, or to companies in specific regions. However, we initiated an investigation on this program because we had information that AOC loans may be intended for export promotion. According to the responses, IPSCO had a loan outstanding from the AOC during the review period.

IPSCO's AOC loan is not a part of normal loan program; it is part of a settlement reached in court for IPSCO's purchase of physical assets of Ram Steel (Ram), a company placed into receivership by its primary secured creditor. Thus, even though we found no linkage of this loan to exports, we examined whether the loan was granted on terms inconsistent with commercial considerations.

Normally, we determine this by comparing the interest rate and other charges to comparable, commercial loans. To find comparable, commerical loans, we look first to the company's debt experience. If it has no comparable, commercial debt outstanding, we look to the national experience. The circumstances surrounding this loan were unusual. The lending institution faced large losses, absent a favorable resolution of Ram's financial difficulties. Because of this, normal loans from a commercial bank that is not exposed in a similar manner are not comparable. We were unable to find comparable, commercial loans to determine the appropriate benchmark.

Thus, we had to determine whether a commercial lender would act as AOC did. AOC was the secondary, secured creditor of Ram at the time the court placed Ram in receivership. The court assigned an officer of Peat Marwick, Ltd. (a neutral, private party) as the receiver to negotiate the best deal possible on behalf of Ram's creditor and storkholders. According to the receiver, the company could not be operated by the receiver or by Ram at a profit, and the price offered by IPSCO was the highest price they could obtain (it was also the only offer they received). It included payoff of the primary creditor which was a pre-condition of AOC receiving anything at all. The assets of Ram were appraised by an independent appraiser acting on behalf of the Court. The appraiser evaluated the assets of Ram, purchaser by IPSCO, as if they were used in a profitable business. The final price offered by IPSCO was seven percent more than the value that the appraisor placed on the assets. IPSCO made its offer to buy contingent upon receiving a loan from AOC to cover part of the purchaser price. The receiver determined that IPSCO' offer, including the AOC loan terms, was in the best interest of all of Ram's creditors, including AOC. By granting that loan, AOC was able to recover most of the money owed it by Ram and to receive the full principal and interest of this loan to IPSCO on deferred terms, as was a condition of IPSCO's offer.

Given the above information, we determine that AOC's loan to IPSCO was not inconsistent with commercial considerations. It is commercially reasonable to accept deferred repayment terms on a portion of the purchase price in this situation, whether or not the lender is a government-funded company, especially if acceptance of such terms is part of a settlement recommended by a court-appointed receiver. By accepting deferred repayment on the remainder of the price, the lender avoided major financial losses, otherwise reasonably expected, had it not accepted the deferral. (We note that banks, in particular, are willing to renegotiate loan terms in order to avoid having to write off large amounts of bad debt.)

Additionally, it is commercially reasonable for IPSCO to negotiate the best terms possible for itself when borrowing. In a situation where IPSCO make the only offer for Ram's assets, it is reasonable for IPSCO to look for credit from the lender who stands to lose the most if the purchase falls through. IPSCO is still required to repay interest and principal on this loan and has made all payments required thus far.

Therefore, since we have determined that the AOC loan was not provided on terms inconsistent with commercial considerations, we determine that this loan does not confer a subsidy.

III. Programs Determined Not To Be Used

We determine that the following programs are not used by manufacturers, producers, or exporters of OCTG in Canada:

A. Loans Under Subsidiary Agreements

Petitioners allege that under the GDA and federal-provincial subsidiary agreement, loans were provided on terms inconsistent with commercial considerations. We verified that the GDA was not itself a program and that none of the companies had outstanding loans under the subsidiary agreements during the review period.

B. Defense Industry Productivity Program (DIPP)

The DIPP, administered by the Department of Regional and Industrial Expansion (DRIE), has several purposes. Among these purposes are the stimulation of exports of military hardware and the provision of assistance to upgrade equipment, processes and facilities to make companies more competitive in bidding for military hardware contracts.

We verified that Algoma is the only manufacturer, producer or exporter of OCTG that received a DIPP grant. The grant was for a facility to desulfurize steel, which is used in producing OCTG and other steel products. DIPP funds were paid to Algoma in 1980 and 1981. Although the Department may determine that DIPP grants serve as export subsidies in other cases, we verified that there were no conditions in the Algoma DIPP grant agreement which were tied to export performance or which made the grant contingent upon exporting. Algoma has a large home market for desulfurized steel and products made from desulfurized steel. This DIPP grant benefits Algoma's entire production, and not exports alone. Thus, we determine that this grant was not an export subsidy.

Although we have determined that this program is not an export subsidy, we must still determine whether any benefits were received during the review period and, if so, whether this program is limited to a specific enterprise or industry, or group of enterprises of industries. Consistent with the Subsidies Appendix, we divide the sum of all grants received in each year by the total sales of the company in the same year. Algoma received no other grants in the two years DIPP funds were received. The calculated benefits in each year were *de minimis*; therefore we expensed them in the year of receipt. Because the DIPP grants received by Algoma were expensed prior to the review period and because no DIP grants were received by Algoma during the review period, we determine this program was not used.

C. Community-Based Industrial Adjustment Program of the Industry and Labor Adjustment Program (CIAP/ILAP)

This program, now terminated, provided loans and grants to firms in designated communities affected by high unemployment. We verified that 12 identified communities were eligible for CIAP during the life of the program. None of the OCTG respondents were located in these communities.

D. Promotional Projects Program (PPP)

The PPP is run by the Department of External Affairs. At selected foreign trade shows, the government of Canada rents space, furniture, and facilities which it subleases at minimal charge to Canadian exhibitors. The government of Canada reported that one OCTG respondent, Stelco, used the PPP in 1983 and 1985 (but not 1984) at a trade show in the United States. This benefit was received outside the review period. We verified that no benefit was received by OCTG companies during the review period.

E. Program for Export Market Development (PEMD)

The PEMD program is also run by the Department of External Affairs. One PEMD subprogram was reportedly used by Stelco, Algoma and IPSCO to recover certain transportation expenses incurred in selling specific products in potential markets. We verified that none of these trips were for selling OCTG in the United States. Therefore, we determine that this program was not used.

VOL 51 ISS 77 AP 22 1986 UMI

F. Industrial and Regional Development Program (IRDP)

Under the administration of DRIE, IRDP was established in 1983 as the successor to the RDIP. Its purpose is to increase industrial development and improve the overall economic climate in Canada. To accomplish this goal, grants are provided for four major purposes: (1) To encourage the development of new products and new processes and to increase industrial productivity and industrial competitiveness; (2) to assist in the establishment of new production facilities in less developed areas; (3) to increase industrial productivity through the improvement, modernization and expansion of existing manufacturing and processing operations; and (4) for marketing purposes. Each census district in Canada is classified into one of four tiers based on its level of economic development. The level of benefit varies inversely with employment, population density, and existing facilities.

The petitioners alleged that DRIE provides discretionary grants, interest-free loans and loan guarantees under IRDP. We verified that no IRDP loans or loan guarantees were provided to manufacturers, producers or exporters of OCTG. We have, however, verified that IPSCO and Siegfried Kreiser have been approved for specific IRDP grants, but have not yet received any funds. Therefore, we determine that this program was not used in the review period. We will examine any future provisions of money under IRDP in any section 751 review that may be requested.

G. Saskatchewan Economic Development Commission (SEDCO)

SEDCO issues loans, loan guarantees and in some cases invests in Saskatchewan industries and commerce. We verified from company financial records that, in the review period, none of the OCTG respondents had any outstanding loans, loan guarantees, investments or other assistance from SEDCO.

H. Ontario Development Corporation (ODC) Export Support Loans, Other Loans and Loan Guarantees

The ODC controls, approves and administers loan and loan guarantee programs in addition to administering, but not approving, grant programs (such as the Employment Development Fund, discussed earlier in this notice). We verified that no OCTG producer has received assistance under these programs.

I. Enterprise Development Program (EDP) Loans

Petitioners alleged that loans were provided on terms inconsistent with commercial considerations under EDP. Based on information in the records we inspected, none of the manufacturers, producers or exporters of OCTG had EDP loans outstanding during the review period.

J. Interest-Free Loans and Below-Commercial Rate Loans

Petitioners alleged that loans have been provided on terms inconsistent with commercial considerations by the government or at the direction of the government. We have verified that no government-funded or directed loan programs were used by manufacturers, producers or exporters of OCTG other than those programs already addressed in this notice.

K. Government Grants for Purchase of Fixed Assets

Petitioners alleged that government grants have been provided to IPSCO for purchase of fixed assets. We have verified that IPSCO and Algoma received grants for acquisition of fixed assets under the RDIP, DIPP and a subsidiary agreement. These grant programs are addressed elsewhere in this notice. The verified financial records of the governments and the companies indicate that there are no other government grant programs used by manufacturers, producers or exporters of OCTG, other than those previously discussed.

Negative Determination of Critical Circumstances

Petitioners alleged that imports of OCTG from Canada present "critical circumstances." Under section 703(e)(1) of the Act, critical circumstances exist when the Department has a reasonable basis to believe or suspect that (1) the alleged subsidy is inconsistent with the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement of Tariffs and Trade ("the Subsidies Code"), and (2) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period. Based upon our analysis, there were no export subsidies bestowed upon OCTG in Canada during the review period. Accordingly, we determine that the subsidies received are not inconsistent with the Subsidies Code.

Since we have determined that the subsidies are not inconsistent with Code commitments, we need not determine whether there have been massive imports. Accordingly, we determine that "critical circumstances" do not exist with respect to OCTG from Canada.

Petitioners' Comments

Comment 1: Petitioners argue the original AOC loan to Ram Steel provided a countervailable benefit to IPSCO. Petitioners have two major concerns. First, they argue that the loan to Ram was given on terms inconsistent with commercial considerations. Second, they argue that AOC provided another countervailable subsidy through its apparent forgiveness of two million dollars of Ram's outstanding debt. In both situations, petitioners argue that since the funds were provided to Ram, the subsidies accure to Ram's assets. Therefore, by purchasing Ram's subsidized assets, IPSCO is benefitting from those subsidies. Petitioners argue that the Department should find that AOC's subsidization of Ram's assets did not cease to confer a benefit to those assets once IPSCO purchased them.

DOC Position: Petitioners are asking the Department to determine that AOC loans to Ram conferred a subsidy that was passed through to IPSCO. We looked at the pass-through issue first.

Funds for the AOC loan were received by Ram Steel in January 1983, well after Ram had acquired its plant and equipment and was manufacturing steel pipe. As a factual matter, the loan was not tied to purchase of specific assets. In fact, Ram was manufacturing pipe before it obtained the loan. Further, IPSCO's purchase of Ram's assets was an arm's length transaction. IPSCO purchased Ram's assets at a price above the appraised value. The appraisal of the assets was conducted independently for the Court as part of the receivership proceedings. In an arm's length transaction, such as this one, subsidies, if there are any, are not passed through.

Finally, the other possibility is that IPSCO, in some way, benefitted from a reduction of Ram's liabilities through a forgiveness of debt. IPSCO purchased only Ram's physical assets; it did not purchase Ram itself. Since IPSCO was not responsible to Ram's creditors (Ram's stockholders were), it could not benefit from a reduction in Ram's liabilities.

Thus, since any subsidy to Ram was not passed through to IPSCO, the question of whether Ram received any subsidies is moot.

Comment 2: The petitioners note that the AOC loan to IPSCO, which financed part of the IPSCO purchase price for Ram Steel's plant and equipment, was provided on deferred repayment terms. Therefore, the loan was on terms inconsistent with commercial considerations. Petitioners suggest that we compare the actual payments terms to the payment terms normally offered by commercial banks.

DOC Position: We disagree. See section II.C., "Alberta Opportunity Company Loan to IPSCO," of this notice.

Comment 3: Petitioners note that for one IPSCO grant, approved in 1972, the Department allocated the benefit using a rate of interest on debt applicable to a long-term commercial loan taken out by IPSCO in 1972. They point out that IPSCO also issued bonds at a higher rate of interest in the same year in addition to the commercial loan. Petitioners suggest that we allocate the 1972 grant based on the bond interest rate.

DOC Position: While it is inappropriate to use only the higher interest rate on the bonds in the weighted cost of capital calculation, we have now included this higher interest rate in calculating the average long-term debt rate for the year in which the grant was approved. However, using this average long-term debt rate in IPSCO's weighted cost of capital had no effect on the *ad valorem* subsidy rate.

Respondents' Comments

Comment 1: The government of Canada and other respondents have observed that most of the OCTG manufacturers, producers or exporters received no countervailable subsidies and one company received subsidies which we calculated ad *de minimis*. (All these companies had requested exclusion from the determination.) One company, IPSCO, received countervailable subsidies. They claim that the Department incorrectly determined that the country-wide rate was the same rate applicable to the non-excluded company, and argue that the Department should have divided all subsidies to all companies by sales from these companies, including those not receiving subsidies, to determine the country-wide rate. If this were done, the country-wide rate would be *de minimis*. Only after determining whether there will be an order should companies be excluded.

DOC Position: The purpose of our determination is to find a bonding or deposit rate equal to the average level of subsidization of imports subject to an order, assuming that average rate is above *de minimis*. The way we calculate this country-wide average is to take the subsidies found and divide by either the value of export sales of all firms subject to the investigation, or their total sales (depending on whether it is an export or a domestic subsidy). We do not normally calculate specific rates for each company.

In the case on OCTG, all the respondent firms requested exclusion from the determination. Kreiser chose not to respond to our questionnaire; therefore it could not be excluded and we had to use best information as representing its level of subsidization (*i.e.*, the highest subsidy found for other companies, in this case, IPSCO). The other exclusion requests required us to look at each company individually. All the respondents except IPSCO qualified for exclusion. Their imports will not be subject to a countervailing duty order, if the ITC issues an affirmative injury determination. Thus, IPSCO became the basis for our country-wide average.

Section 701 of the Act directs the Department (upon determination that a subsidy exists) to impose a countervailing duty equal to the amount of the net subsidy. If the Department averaged benefits to companies which are excluded from the collection of countervailing duties, as the government of Canada requests, with countervailing duties collected only from companies which are receiving subsidies, the aggregate amount of countervailing duties collected would be less than the net subsidy. Therefore, the Department will continue its practice of only using rates applicable to firms receiving more than *de minimis* benefits when computing country-wide rates.

Comment 2: The government of Canada and IPSCO state that the provincial portion of the GDA grant is "not targeted at specific regions or industries." Within Saskatchewan, the scope of this and other subsidiary agreements under the GDA and its successor act means that the entire economy of Saskatchewan has access to such funding under very general eligibility criteria.

DOC Position: As we stated in *Groundfish*, GDAs are not programs *per se*. They do not establish government programs, nor do they provide for the administration and funding of government programs. They are merely legal agreements under which departments of the federal and provincial governments may cooperate in establishing and administering joint economic development programs in spheres of dual or conflicting jurisdiction. The implementation, administration, and funding of industry and regional-specific programs occurs exclusively through subsidiary agreements. Therefore, we decided that in determining whether a subsidiary agreement is limited to specific enterprises or industries, the proper level of analysis is the subsidiary agreement.

In this case, the Saskatchewan Iron, Steel and Other Related Metal Industries Subsidiary Agreement in question was targeted specifically to the iron, steel, and other related metal industries. Even more specifically, in Saskatchewan, only one company, IPSOC, constitutes the entire industry which could have availed itself of a major portion of the subsidiary agreement benefits, those targeted at primary and at secondary steel producers. As such, the subsidiary agreement is clearly limited to a specific enterprise or industry.

Comment 3: IPSCO claims that the Department's method for apportioning the value of grants used by IPSCO for the capital improvement of its steel facilities (by sales value rather than by weight) unfarily biases the subsidy to products, such as OCTG, with a relatively high unit value per ton. IPSCO suggests that since the money was granted for steel making capital equipment, it would be fairer to allocate the benefits on the basis of weight rather than value.

DOC Position: Except in certain involving agricultural products, the Department has consistently allocated the value of grants received based on the value of products sold. We cannot determine, *a priori*, if a cash grant is more beneficial to the volume than the value of the goods produced. Therefore, we utilize a standard method to avoid biasing the outcome.

Comment 4: The Department of Commerce calculated the value of the benefit of an IPSCO grant based on the published debt to equity ratio for IPSCO in the year that the grant was approved. IPSCO contends that we should have used IPSCO's average debt to equity ratio between IPSCO's first year of operation and the year the grant was provided.

DOC Position: As we stated in the Subsidies Appendix, the discount rate applied in our grant methodology is a measure of the company's time preference for money. We further stated that a company's time preference for money is determined by its expected rate of return on investments at the time the subsidy was received. Since that rate of return is not easily quantifiable, we considered the company's actual cost of raising money (weighted cost of capital) at the time the grant was bestowed. Using a debt to equity ratio affected by other time periods would not reflect the cost to the company of raising money at the time the subsidy was

VOL 51 ISS 77 AP 22 1986 UMI

approved. Furthermore, the proposed method does not use standardized times over which one company's time preference for money could be compared to another.

Comment 5: IPSCO argues that the Department was incorrect to use national average cost of debt in calculating the value of a benefit for an IPSCO grant. IPSCO argues that we should use IPSCO's short-term interest rate that it would have paid in the year the grant was approved. IPSCO further argues that without the grant, it would have used short-term financing and it would have received the same rate as for other short-term borrowings that year.

DOC Position: The project, partially funded by the grant, was built over several successive years. It was a major capital expansion. During the years that the project was being built, IPSCO floated two 15-year debenture issues at higher interest rates than IPSCO suggests we use for calculation purposes. To say that this large capital expansion project would have been financed by short-term borrowings is purely speculative and unsupported by any verified facts. In general, firms use long-term debt or equity to finance such long-term projects.

Comment 6: IPSCO claims that DOC should have used 25 years rather than 15 years as the period over which to amortize the grants. It claims that it uses 25 years for financial reporting purposes, that this period has been accepted by its external auditors and that the steel industry in Canada generally writes off its capital assets in this time.

DOC Position: In the Subsidies appendix, we state that we will allocate grants over the average useful life of a company's renewable physical assets as determined by the U.S. Internal Revenue Service (IRS) in the 1977 Class Life Asset Depreciation Range System. That is the source of the 15-year allocation period used in this case. We feel the use of the IRS tables provides a consistent and predictable standard for allocating grants. If we were to use different countries' tax tables or different companies' amortization periods for allocating grant benefits, we might arrive at different subsidy rates for equal grants due solely to the different periods of allocation. (In addition, this method provides petitioners, before filing a petition, with a consistent and publicly-available standard for determining whether programs potentially provide countervailable benefits.)

In this case we have found that, while IPSCO and other Canadian primary and secondary steel producers may amortize capital equipment expenditures over 25 years, we are aware of nothing that requres them to do so. Accepting that IPSCO depreciates capital equipment for financial statement purposes over a 25-year period, the majority of this equipment is depreciated for tax purposes by IPSCO over a two-year period with the remainder depreciated for tax purposes over other intervals. The Canadian government accepts these various methods. So even if we did attempt to find a company-or country-specific allocation period, there is often no clear choice of what that period should be. Therefore, we continue to rely on the IRS tables as a reasonable measure of the average life of a company's renewable physical assets.

Comment 7: IPSCO argues that the Department should reduce the value of the grants by the tax savings which IPSCO gave up in accepting grants. IPSCO states that it does not receive a capital cost allowance (depreciation) on grant money. If it had paid for the assets out of company funds instead of accepting a grant, it would have received a non-countervailable capital cost allowance which could have been deducted from taxable income. Using an incremental tax rate, IPSCO contends that it would have reduced its taxes owed by a percentage of the full capital cost allowance that it would have receive if the full value of the assets purchased by the grant money had been subject to capital cost allowance.

DOC Position: It has been our consistent policy not to take into account the secondary effects, including tax effects, of subsidies. Any offsets to a countervailable subsidy are strictly limited by section 771(6) of the Act. Furthermore, the review period for this investigation was calendar year 1984. During the review period, IPSCO filed its fiscal year 1985 tax return. IPSCO had negative taxable income on its 1985 tax return. Thus, assuming the facts as IPSCO presents them, additional capital cost allowance would not result in tax savings during the review period.

Comment 8: IPSCO argues that if it had invested its own money in lieu of grant funds on the project, it would have had to borrow the money. If it had borrowed the money, it would have incurred an interest expense, which it could have taken as a tax deduction. The tax deduction (which IPSCO did not get because it accepted the grant), IPSCO postulates, would have resulted in a tax savings which they contend should be used to reduce the value of the grant.

DOC Position: As stated above, we do not consider the secondary effects of subsidy. Since IPSCO did, indeed, accept the grant funds, the hypothesis it poses is speculative.

Comment 9: IPSCO argues that the use of the Subsidies Appendix, published in 1984, may have been warranted in the case for which it was first published since the parties to that case had opportunity to present their views on the proposed methodologies. They contend that the use of the Subsidies Appendix in subsequent cases constitutes rulemaking and is in violation of the Administrative Procedure Act (APA). Since the parties in this investigation did not have an opportunity to submit comments and be heard prior to publication of the Subsidies Appendix, they argue that it should not be applied to the present case.

DOC Position: IPSCO is in error when it states that it had no notice or opportunity to comment on the methodologies from the Subsidies Appendix that were employed in the present case. It admits that notice and comment are adequately provided for in the case where the methodologies are formulated. However, IPSCO fails to recognize that the same justification applies to subsequent cases where such methodology may be employed. In this case, IPSCO has been provided with notice and opportunity to comment on the methodologies used even though they were first formulated in an earlier case. It has, in fact, commented on them in its prehearing brief, at the hearing and in its post-hearing brief.

Furthermore, an investigative agency such as the Department of Commerce, has the discretion to develop general policies on a case-by-case basis rather than through rulemaking procedures. (See *NLRB* v. *Bell Aerospace Company*, 416 U.S. 267, 290–295 (1973)). IPSCO seeks to have the Department follow a fairly rigid standard with regard to all methodologies used. The responsibilities of the Department preclude strict compliance with the APA. Because of the large number of government programs that confer subsidies, the Department needs the flexibility to formulate and adjust methodologies that are applicable to the various government programs. Strict compliance with the APA formal rulemaking procedures, including the requirement that rules go into effect at least 30 days after publication, would severely retard the Department's ability to meet its obligations with regard to the countervailing duty law. Such a result could not have been intended by Congress. Therefore, the Department does not consider formulation of methodology to be formal rulemaking.

Congressional authority for this position is apparent in the legislation governing the Department's duties in the area of countervailing duties. Congress has provided strict requirements in every countervailing duty investigation or review proceeding for notice and opportunity for comment from all parties, as well as a hearing, if requested. Further evidence of Congressional intent can be found in 19 U.S.C. 1677(c)(b), where adherence to the APA is waived for these hearings. Congress would not have waived the APA requirements for hearings, where the parties are invited to comment, if it expected compliance with the APA concerning the methodology employed. It is clear that Congress, recognizing the nature of countervailing duty proceedings, provided a system of notice and comment that protects the same rights protected under the APA, without hampering the work of the Department.

Comment 10: IPSCO claims that the application of the procedures published in the Subsidies Appendix, for grants approved in 1978 and received between 1980 and 1983, amounts to the imposition of a retroactive tax. IPSCO feels that the Subsidies Appendix should apply only to grants received after its publication. IPSCO claims that it studied our past countervailing duty practices and would never have applied for or accepted a grant which it understood to be countervailable when it chose to apply for the grants in question.

DOC Position: We disagree. Since at least 1974, we have been allocating the value of Canadian subsidies over time. The Subsidies Appendix altered our prior valuation method of a subsidy, not our determination of its countervailability. Grants approved in 1978 and received in 1980, 1981, 1982 and 1983 would be countervailable according to the 1973 methodology we used for Michelin Tires from Canada (3 ITRD 1177 (CIT, 1981)) or the latter method published in the Subsidies Appendix. There is no evidence that IPSCO relied on past practices, as it claimed. If IPSCO has relied on past practices, the subsidy it received would still have been countervailable.

The countervailing duty imposed is prospective, affecting merchandise entered or withdrawn from warehouse after the date of the preliminary determination or order. IPSCO has confused the method of valuation of a subsidy, which is necessarily based on activities in an earlier period, with the merchandise on which the countervailing duty is imposed.

The Trade Agreement Act of 1979 redefined the term "subsidy" in relation to the General Agreement on Tariffs and Trade. It did not constrain us to apply this new standard only to subsidies received after the date of enactment. To do so would have vitiated the effective use of the countervailing duty law for several years. This was clearly not the Congressional intent.

Comment 11: The respondents request that the Department take steps to subdivide the TSUSA classification numbers to segregate non-OCTG pipe and tube products now in mixed classifications with OCTG. Otherwise, liquidation of these non-OCTG products would be unfairly delayed by U.S. Customs.

DOC Position: The prime responsibility for establishing TSUSA classifications is that of the ITC. We see no reason for the ITC to make the requested breakouts in the TSUSA. We have had affirmative antidumping and/or countervailing duty determinations on OCTG from other countries. These have been administered using the existing TSUSA. Based on this experience, there is no need for the proposed modifications.

Verification

In accordance with section 776(a) of the Act, we verified the information used in making our final determination. During verification, we followed standard verification procedures, including meeting with government officials, inspection of documents and ledgers, and tracing the information in the responses to source documents, accounting records, and financial statements.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to continue to suspend liquidation of all unliquidated entries of OCTG from Canada which are entered, or withdrawn from warehouse, for consumption, on or after December 30, 1985 and before May 1, 1986. On May 1, 1986, the suspension of liquidation, ordered in our preliminary affirmative countervailing duty determination, will be terminated. As of the date of publication of this notice in the **Federal Register**, The Customs Service should require a cash deposit or bond for each such entry of this merchandise equal to 0.72 percent *ad valorem* except for OCTG from Stelco Inc., Sonco Steel Tube (a division of Ferrum Inc.), Algoma Steel Corp., Ltd., Welded Tube of Canada, Ltd., Prudential Steel Ltd., Frank Pipe Co., Christianson Pipe, Ltd., Dominion Steel Export Co., Ltd., and Matthew Tube & Pipe Supply Inc. We will reinstate the suspension of liquidation if the ITC makes a final affirmative injury determination in this investigation.

ITC Notification

In accordance with section 705(c) of the Act, we will notify the ITC of our determination In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

The ITC will determine whether these imports materially injure, or threaten material injury to a U.S. industry within 45 days after the date of publication of this notice. If the ITC determines that material injury, or the threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that injury exists, we will issue a countervailing duty order, directing Customs officers not to assess a countervailing duty on shipments from the nine firms with zero or *de minimis* assessment rates during the period of review, and to assess a countervailing duty on all other oil country tubular goods from Canada entered, or withdrawn from warehouse, for consumption, on or after the date of the suspension of liquidation, as indicated in the "Suspension of Liquidation" section of this notice.

This notice is published pursuant to section 705(d) of the Act [19 U.S.C. 1671d(d)].

Paul Freedenberg,

Assistant Secretary for Trade Administration.

April 16, 1986.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Financial Assistance Application Announcement; Louisiana

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate an MBDC for a *three (3) year period*, subject to

VOL 51 ISS 77 AP 22 1986 UMI

available funds and satisfactory performance. The cost of performance for the first *twelve (12) months* is estimated at *$154,547* for the project's performance period of *September 1, 1986 to August 31, 1987*. The MBDC will operate in the *Shreveport, Louisiana Metropolitan Statistical Area (MSA)*.

The funding instrument for the MBDC will be a cooperative agreement and competition is open to individuals, nonprofit and for-profit organizations, local and state governments, American Indian Tribes and educational institutions.

The MBDC will provide management and technical assistance (M&TA) to eligible clients for the establishment and operation of businesses. The MBDC program is designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance (M&TA); and serve as a conduit of information and assistance regarding minority business.

Applications will be judged on the experience and capability of the firm and its staff in addressing the needs of minority business individuals and organizations; the resources available to the firm in providing management and technical assistance (M&TA); the firm's proposed approach to performing the work requirements included in the application; and the firm's estimated cost for providing such assistance. It is advisable that applicants have an existing office in the geographic region for which they are applying.

The MBDC will operate for a three (3) year period with periodic reviews culminating in annual evaluations to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA, based on such factors as an MBDC's satisfactory performance, the availability of funds, and Agency priorities.

Closing date: The closing date for application is May 19, 1986. Applications must be postmarked *on* or *before* May 19, 1986.

ADDRESS: MBDA—Dallas Regional Office, 1100 Commerce Street, Suite 7B23, Dallas, Texas, 75242–0790.

FOR FURTHER INFORMATION, CONTACT: Marie Hearne, Business Development Clerk, Dallas Regional Office, 214/767–8001.

SUPPLEMENTARY INFORMATION: Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained at the above address.

Dated: April 15, 1986.

Maida Cabezon,

Acting Regional Director, Minority Business Development Agency, Dallas Regional Office.

[FR Doc. 86–8973 Filed 4–21–86; 8:45 am]

BILLING CODE 3510–21–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Restraint Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in Romania

April 17, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 23, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

On December 20, 1985 a notice was published in the **Federal Register** (50 FR 52829), which announced establishment, under the Bilateral Wool and Man-Made Fiber Textile Agreement of November 7 and 16, 1984, between the Governments of the United States and the Socialist Republic of Romania, of the import limits for certain specified categories of wool and man-made fiber textile products, including man-made fiber sweaters in Category 645/646, produced or manufactured in Romania and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. Under the terms of the bilateral agreement the limit for Category 645/646 is being reduced from 220,154 dozen (corrected limit) to 208,750 dozen to account for 11,755 dozen of carryforward used in 1985.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19824), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44762), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 17, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 20, 1985, which directed you to prohibit entry of certain wool and man-made fiber textile products, produced or manufactured in Romania.

Effective on April 23, 1986, the directive of December 20, 1985 is hereby amended to include an adjusted restraint limit of 208,750 dozen [1] for man-made fiber textile products in Category 645/646.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86–8937 Filed 4–21–86; 8:45 am]

BILLING CODE 3510–DR–M

Import Limits for Certain Wool and Man-Made Fiber Textile Products From the Socialist Republic of Romania Effective on January 1, 1986

April 16, 1986.

On December 20, 1985 a notice was published in the **Federal Register** (50 FR 52829) which announced the import limits for specified categories of cotton and wool textile products, produced or manufactured in Romania and exported to the United States during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. The limit for man-made fiber textile products in Category 645/646 in the letter to the Commissioner of Customs which followed that notice should have been 220,514 dozen.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 86–8936 Filed 4–21–86; 8:45 am]

BILLING CODE 3510–DR–M

[1] The limit has not been adjusted to reflect any imports exported after December 31, 1985.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Open Meeting

April 16, 1986

The USAF Scientific Advisory Board Ad Hoc Committee on Review of Air Force Current and Long-Term Responses to Hazardous Materials/Waste Issues will meet May 6–7, 1986 at the Aeronautical Systems Division, Wright-Patterson AFB OH from 9:00 a.m. to 5:00 p.m. each day. The purpose of the meeting will be to review Air Force use of hazardous materials as pertains to system development and acquisition.

The meeting will be open to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–4811.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

[FR Doc. 86–9123 Filed 4–21–86; 10:44 am]

USAF Scientific Advisory Board; Meeting

April 14, 1986.

The USAF Scientific Advisory Board Ad Hoc Committee on Appropriate Air Force Technology efforts to Complement the Strategic Defense Initiative Program will meet at Peterson AFB, CO, on May 14, 1986, from 8:30 am to 5:00 pm and on May 15, 1986, from 8:00 am to 3:30 pm.

The purpose of the meeting will be for the Sensors/Kinetic Energy Subpanel to review, in detail, Air Force Space requirements and programs to satisfy them.

The meeting concerns matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202–697–8404.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910–01–M

DEPARTMENT OF THE ARMY

Military Traffic Management Command, Military Personal Property Symposium; Notice of Open Meeting

Announcement is made of meeting of the Military Personal Property Symposium. This meeting will be held on 15 May 1986 at the Stouffer Concourse Hotel, Crystal City, Arlington, Virginia, and will convene at 0830 hours and adjourn at approximately 1500 hours.

Proposed Agenda

The purpose of the symposium is to provide an open discussion and free exchange of ideas with the public on procedural changes to Personal Property Traffic Management Regulation (DoD 4500.34–R), and the handling of other matters of mutual interest concerning the Department of Defense Personal Property Movement and Storage Program.

All interested persons desiring to submit topics to be discussed should contact the Commander, Military Traffic Management Command, ATTN: MT–PPM, at telephone number 756–1600, between 0800–1530 hours. Topics to be discussed should be received on or before 2 May 1986.

Dated: April 1, 1986.

Joseph R. Marotta,

Colonel, GS, Director of Personal Property.

[FR Doc. 86–8897 Filed 4–21–86; 8:45 am]

BILLING CODE 3710–08–M

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Notice was published April 11, 1986, at 51 FR 12541, that the Naval Research Advisory Committee Panel on Soviet Submarine Threat will meet on April 28–29, 1986. The meeting location in the afternoon of April 29 has been changed to PRESEARCH, INC., 6500 Executive Park Avenue, Fairfax, Virginia 22031. All other information in the previous notice remains effective.

Dated: April 17, 1986.

William F. Rose, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810–AE–M

DELAWARE RIVER BASIN COMMISSION

Commission Meeting and Public Hearing

Notice is hereby given that the Delware River Basin Commission will hold a public hearing on Tuesday, April 29, 1986 beginning at 1:30 p.m. in the Goddard Conference Room of the Commission's offices at 25 State Police Drive, West Trenton, New Jersey. The hearing will be part of the Commission's regular business meeting which is open to the public.

An informal pre-meeting conference among the Commissioners and staff will be open for public observation at about 11:00 a.m. at the same location.

The subjects of the hearing will be as follows:

Current Expense and Capital Budgets. A proposed current expense budget for the fiscal year beginning July 1, 1986, in the aggregate amount of $2,161,000 and a capital budget for the same period in the amount of $837,500 in revenue and $716,800 in expenditures. Copies of the current expense and capital budget are available from the Commission on request. This hearing continues that of March 26, 1986.

Applications for Approval of the Following Projects Pursuant to Article 10.3, Article 11 and/or Section 3.8 of the Compact:

1. *Holdover Project: Hatfield Packing Company D–83–24.* A ground water withdrawal project to supply approximately 0.16 million gallons per day (mgd) of water to the applicant's meat packing facility in Hatfield Township, Montgomery County, Pennsylvania. Well Nos. 1, 2, 3 and 4, located in Hatfield Township, were previously placed in service and have collectively withdrawn in excess of 100,000 gallons per day (gpd) without approval of the Delaware River Basin Commission. Ground water from the wells is used in conjunction with water purchased from the North Penn Water Authority. This hearing continues that of March 26, 1986.

2. *Cressona Aluminum Company D–82–5 RENEWAL.* An application for the renewal of a ground water withdrawal project to supply up to 21.6 million gallons (mg)/30 days of water to the applicant's industrial facility from Well Nos. 1 and 3. Commission approval on June 23, 1982 was limited to five years and will expire unless renewed. The applicant requests that the total withdrawal from all wells remain limited to 21.6 mg/30 days. The project is located in Cressona Borough, Schylkill County, Pennsylvania.

3. *Upper Saucon Township D–85–57 CP.* A ground water withdrawal project to supply up to 1.0 mgd of water to the applicant's distribution system from the abandoned New Jersey Zinc Company mine shaft. The project is located in Upper Saucon Township, Lehigh County, Pennsylvania.

4. *U.S. Steel Corporation—Fairless Hills Works D–85–72.* A 40,000 gpd wastewater treatment package plant is proposed to serve an industrial park now under construction by U.S.S. Realty Development, a division of U.S. Steel. The proposed plant would be installed

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

adjacent to the existing 20,000 gpd plant within the U.S. Steel Fairless Works site in Falls Township, Bucks County, Pennsylvania. The plant would treat domestic wastewater only. The effluent would flow to the existing outfall line, which discharges to an unnamed tributary of Biles Creek.

5. *U.S. Army Corps of Engineers, Philadelphia District (Wilmington Harbor South) D–85–88 CP.* Approval is sought to convert a 326-acre riverine site into a disposal area for material dredged during the Wilmington Harbor Federal Navigation Project. The site (Wilmington Harbor South) extends from near the mouth of the Christina River to Pigeon Point, New Castle County, Delaware. Utilization of the proposed site in conjunction with the existing disposal sites on nearby Cherry Island would provide capacity for dredged materials at least until the year 2040. The site consists of 87 acres of uplands, 12 acres of vegetated wetlands, 85 acres of intertidal mudflats and 142 acres of shallow water. Twelve acres of wetland vegetation would be planted at the site and artificial reefs would be established off Slaughter Beach in Delaware Bay to mitigate the filling of wetland habitat.

6. *Magnesium Elektron, Inc. D–86–1.* An application for modification of an existing wastewater discharge at the Magnesium Elektron, Inc. (MEI) facility in Kingwood Township, Hunterdon County, New Jersey. Presently, wastewaters containing excessive dissolved solids are stored in holding basins and then discharged in proportion to streamflow in Wickecheoke Creek. The applicant is proposing to install a reverse osmosis treatment system to concentrate the dissolved solids in the wastewater and thereby increase the length of time that the production facility can operate with no discharge. The concentration of dissolved solids in the effluent would increase from 30,000 mg/1 to 60,000 mg/1. However, the effluent will continue to be proportioned with streamflow to meet existing requirements on Wickecheoke Creek and in the Delaware and Raritan Canal.

7. *Honesdale Borough D–86–9 CP.* A sewage treatment project to serve the Borough of Honesdale and a portion of Texas Township in Wayne County, Pennsylvania. The application consists of a proposal to expand the capacity of the existing sewage treatment facility's chlorine contact tank and to rerate the plant's capacity from 0.92 mgd to 1.18 mgd. The treatment effluent will continue to be discharged to the Lackawaxen River.

8. *Borough of Stroudsburg D–86–11 CP.* A sewage treatment project to serve the Borough of Stroudsburg and Stroud Township in Monroe County, Pennsylvania. The existing plant will be expanded to 2.5 mgd and upgraded to tertiary level treatment by constructing several new facilities. Treated effluent will continue to discharge to McMichaels Creek at River Mile 213.0–4.0–0.2.

9. *Cranberry Hill Corporation/Penn Estates D–86–16.* An application for expansion of the applicant's sewage treatment plant serving a housing development located in Stroud Township, Monroe County, Pennsylvania. The existing 50,000 gpd plant will have a design capacity of 100,000 gpd. The treated effluent will continue to be discharged to an unnamed tributary of Brodhead Creek.

10. *Draper King Cole, Inc. D–86–18.* An application to replace the withdrawal of water from Well No. 12 in the appliant's water supply system which has become an unreliable source of supply. The applicant requests that the withdrawal from replacement Well No. 12A be limited to 11.7 mg/30 days, and that the total withdrawal from all wells remain limited to 75 mg/30 days. The project is located in the Town of Milton, Sussex County, Delaware.

Documents relating to these items may be examined at the Commission's offices. Preliminary dockets are available in single copies upon request. Please contact David B. Everett. Persons wishing to testify at this hearing are requested to register with the Secretary prior to the hearing.

Susan M. Weisman,
Secretary.

BILLING CODE 6360–01–M

DEPARTMENT OF EDUCATION

Office of Educational Research and Improvement

Research and Development Centers Program

AGENCY: Department of Education.

ACTION: Application notice for new award under the Research and Development Centers Program for fiscal year 1987.

Programmatic and Fiscal Information

The Secretary of Education announces a competition for a cooperative agreement to operate a Reading Research and Education Center. The contract for the current Center for the Study of Reading, funded by the Office of Educational Research and Improvement (OERI), is scheduled to expire in fiscal year 1988. In order to ensure a continued focus on reading beyond that date, Congress has recommended that OERI conduct an open competition to support a research center whose primary focus is research on and the study of reading. See the Committee Report accompanying Pub. L. 99–178 (H.R. Rep. No. 289, 99th Cong., 1st Sess. 137 (1985)). To complement the research program engaged in by the Reading Research and Education Center, OERI will hold a grants competition for research on other, related topics in reading and literacy. The announcement for the grants competition is published elsewhere in this issue of the Federal Register.

The Secretary of Education has selected reading as the absolute priority for this competition from among the priorities listed in 34 CFR 706.12. Only those applications that propose a research center for the study of reading will be considered.

The Secretary is particularly interested in research in the following areas. However, applications that address these invitational priorities will not be given competitive advantage over other applications to establish a research center for the study of reading.

1. *Acquisition of Knowledge and Skills:* how students learn the skills that enable them to acquire knowledge from textbooks in different academic subjects.

2. *Instruction in Reading:* how teachers can become more effective in helping students learn to read.

3. *Text Structure:* how textbooks can be improved to optimize student learning.

4. *Testing of Reading Proficiency and Evaluation of Instruction:* how reading proficiency can be better measured and how various instructional approaches can be validated.

OERI expects to collaborate with the recipient in carrying out the mission of the Reading Research and Education Center. This collaboration will include some involvement in developing the research agenda, specifying anticipated outcomes, setting research priorities, altering research objectives on the basis of preliminary findings, and reviewing final results. The intent of the collaboration is to reach mutually agreeable decisions on these research matters, with the recipient being given full opportunity to express its views.

Research and development centers established by institutions of higher education or by interstate agencies established by compact which operate subsidiary bodies established to conduct postsecondary educational research and development are eligible to apply for a cooperative agreement for institutional operations.

The Secretary anticipates that one cooperative agreement in the amount of $1.2 million will be awarded. The project period is expected to be five (5) years, with the first year beginning no earlier than November 15, 1986, and with four (4) continuation years thereafter. The Secretary anticipates that the total award will not exceed $6.0 million. These estimates are based on anticipated Congressional appropriations and on the assumption that an application of satisfactory quality will be received. These estimates do not bind the U.S. Department of Education to a specific number of cooperative agreements or to the amount of any cooperative agreement, unless that amount is otherwise specified by statute or regulations.

Closing Date for Transmittal of Applications

Applications for the new award must be mailed or hand-delivered on or before July 21, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA No. 84.117, 400 Maryland Avenue SW., Washington, DC 20202.

Each late applicant will be notified that its application will not be considered.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets SW., Washington, DC. The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC, time) daily, except Saturdays, Sundays, and Federal holidays.

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Research and Development Centers Program in 34 CFR Parts 706 and 708.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

Application Forms

Application forms and program information packages are available. These may be obtained by writing to Research and Development Centers Program, Office of Educational Research and Improvement, U.S. Department of Education, 2100 19th Street NW., Washington, DC 20208.

Questions regarding the application notice and the information package will be answered on Wednesday, May 21, 1986, 1:00 p.m. to 4:30 p.m., at the Brown Building, Room 832B, 1200 19th Street NW., Washington, DC. This session will answer any question and clarify any issue regarding information already made available to applicants, in particular, the information in this application notice and in the program information package. For this reason, prospective applicants are urged to read the application notice and the program information package provided by OERI before attending the session. *Potential applicants who are unable to attend the information session are invited to contact Anne Sweet (telephone: (202) 254–5706) after June 4, 1986, for a written summary of the proceedings.*

Further Information

For further information, contact Anne Sweet, Office of Educational Research and Improvement, 1200 19th Street NW., Washington, DC 20208. Telephone: (202) 254–5706.

Authority: 20 U.S.C. 1221e (c) and (f).

Office of Elementary and Secondary Education

Indian Education Programs—Formula Grants—Local Educational Agencies and Tribal Schools

AGENCY: Department of Education.

ACTION: Notice of Extension of Closing Date for Transmittal of New Applications for Fiscal Year 1986 Assistance under the Formula Grants—Local Educational Agencies and Tribal Schools Program.

SUMMARY: This notice extends the closing date of February 13, 1986 to May 22, 1986, for the transmittal of new applications under the Formula Grants—Local Educational Agencies and Tribal Schools Program (84.060A). The application notice for this program published in the Federal Register on October 16, 1985 (50 FR 41934) provides detailed information concerning this program.

SUPPLEMENTARY INFORMATION: Section 453(a) of the Indian Education Act establishes eligibility requirements for participation in programs funded under Part A of the Indian Education Act. The Department has addressed this provision by requiring that local educational agencies participating in the Part A program keep on file completed Indian Student Certification forms for each Indian child claimed for purposes of payment.

On April 10, 1986, the Department informed districts that submitted applications under this program by the February 13, 1986 deadline that they may continue to count eligible students for whom the district is seeking to obtain completed forms to generate fiscal year 1986 funds for use in the 1986–1987 academic year.

The Department has determined that many eligible school districts were unaware that they may include students for whom they are in the process of obtaining information in the count for fiscal year 1986 funds, and as a consequence, did not submit applications by the February 13, 1986 closing date. The extension of the closing date to May 22, 1986, will enable all eligible applicants to apply or to amend their applications at their discretion. This extension will not substantially alter the schedule for issuance of grant awards.

FOR FURTHER INFORMATION: Inquiries concerning this extension should be addressed to Ervin Keith, Indian Education Programs, U.S. Department of Education, Office of Elementary and Secondary Education, Room 2177, FOB–6, 400 Maryland Avenue SW., Washington, DC 20202. Telephone (202) 732–1887.

Education Statistics Advisory Council; Meeting

AGENCY: Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Advisory Council on Education Statistics. This notice also describes the functions of

VOL 51 ISS 77 AP 22 1986 UMI

the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: May 12, 1986.

ADDRESS: 1200 19th Street NW., Room 823, Washington, DC, 20208.

FOR FURTHER INFORMATION CONTACT: Iris Silverman, Executive Director, Advisory Council on Education Statistics, 1200 19th Street NW., (Brown Building) Room 600–D, Washington, D.C. 20208. Telephone: (202) 254–5284.

SUPPLEMENTARY INFORMATION: The Advisory Council on Education Statistics is established under section 406(c)(1) of the Education Amendments of 1974, Pub. L. 93–380. The Council is established to review general policies for the operation of the Center for Statistics (CS) in the Office of Educational Research and Improvement and is responsible for establishing standards to insure that statistics and analyses disseminated by the Center are of high quality and are not subject to political influence.

The meeting of the Council is open to the public. The proposed agenda includes the following:

- The Director's report.
- Technical decisions in two major surveys: (1) National Education Longitudinal Study: 1988, and (2) Remedial education (Fast Response Survey System).

A discussion of elementary/secondary data redesign issues.

Records are kept of all Council proceedings and are avaiable for public inspection at the Office of the Executive Director, Advisory Council on Education Statistics, 1200 19th Street NW. (Brown Building), Room 600–D, Washington, DC 20208.

Dated: April 14, 1986.

Chester E. Finn, Jr.,

Assistant Secretary for Educational Research and Improvement.

Office of Education Research and Improvement

Application Notice for New Awards Under the Educational Research Grant Program for Fiscal Year 1987

Programmatic and Fiscal Information

The Secretary of Education announces a competition, under the Educational Research Grant Program, for educational research grants in reading and literacy. The purpose of the awards is to support studies that will further our knowledge about the acquisition and development of the skills necessary to help us become a more literate American society. This competition is intended to yield research projects that will complement the work of the Reading Research and Education Center. The announcement for the research center competition is published elsewhere in this issue of the **Federal Register**.

A Notice of Proposed Rulemaking (NPRM) for the Educational Research Grant Program (ERGP) was published in the **Federal Register** on March 12, 1985 (50 FR 9970). From the broader priority "English literacy, including reading, writing, and language skills," section 700.12(a)(18) of the NPRM for the ERGP, the Secretary has chosen English literacy and, in particular, reading as absolute priorities for this grants competiton. Only applications proposed research projects on literacy and reading will be considered.

The Secretary particularly invites applications for funding for the following activities. However, as these are not required activities, applications that propose these activities will not be given competitive advantage over other applications that address the priorities, English literacy and reading, cited above.

1. *Literacy Research, Programs, and Practices:* syntheses and analyses of research and of activities pertaining to literacy. Purpose: to help define the "proficient reader," identify effective teaching practices, describe and examine obstacles to universal reading proficiency, and project literacy requirements for the future.

2. *Adult Literacy:* comparative analyses of how adults and children acquire literacy skills and investigations into the literacy needs of adults. Purpose: to provide insight into the ways in which adults can strengthen their literacy skills as well as to give direction for the improvement of adult learning programs.

3. *Reading Achievement of Students from Low Socio-economic Backgrounds:* investigations into the relationship between the reading achievement of children from the lower socio-economic backgrounds, particularly those in grades 2 through 6, and the degree to which these children may lack both specific literacy-related knowledge and other background knowledge that students from middle and upper socio-economic backgrounds are more apt to possess. Purpose: to suggest more effective ways to teach literacy-related skills to all students.

4. *Implementation of Current Research Knowledge of Reading and Literacy:* examinations of the degree to which teachers use current research knowledge of reading and literacy and of the factors that prevent their doing so; investigations into the ways in which the use of current research knowledge affects reading achievement, particularly of students in the elementary grades who are from middle socio-economic backgrounds. Purpose: to suggest more effective teaching strategies and more effective methods of training teachers.

Public or private organizations, institutions, agencies, or individuals are eligible to apply for the research grants.

In accordance with section 700.10(b) of the NPRM for the ERGP, the Secretary has chosen to establish separate competitions for small and large grants. The maximum amount for a small grant is $50,000. An application requesting more than $50,000 in funding will be considered to be an application for a large grant. The Secretary anticipates making no award greater than $150,000.

The Secretary plans to award three (3) small grants and three (3) large grants. The Secretary suggest that an applicant who seeks funding for activities under invitational priority #1 (Literacy Research, Program, and Practices) apply for a small grant. An applicant who seeks funding for activities under invitational priorities #2, #3, and #4 (Adult Literacy; Reading Achievement of Students from Low Socio-economic Background; and Implementation of Current Research Knowledge of Reading and Literacy) should apply for a large grant.

The project periods will vary, from no more than twelve (12) months for small grants to up to three (3) years for large grants. The first year for both small and large grants will begin no earlier than February 1, 1987, with up to two (2) continuation years thereafter for large grants.

These estimates are based on anticipated Congressional appropriations and on the assumption that applications of satisfactory quality will be received. These estimates do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specificed by statute or regulations.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand-delivered on or before November 7, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA No. 84.117, 400 Maryland Avenue SW., Washington, DC 20202.

Each late applicant will be notified that it application will not be considered.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets SW., Washington, DC. The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC, time) daily, except Saturday, Sundays, and Federal holidays.

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Educational Research Grant Program, proposed to be codified in 34 CFR Part 700. The proposed regulations were published on March 12, 1985, at 50 FR 9970. If any substantive changes are made in the final regulations for this program, applicants will be given an opportunity to revise or resubmit their applications.

(b) The Education Department General Administration Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

Application Forms

Application forms and program information packages are expected to be available by August 8, 1986. These may be obtained by writing to Educational Research Grant Program, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue, NW., Washington, DC 20208.

Further Information

For further information, contact Eleanor Chiogioji, Office of Educational Resarch and Improvement, U.S. Department of Education, 555 New Jersey Avenue NW., Washington, DC 20208. Telephone (202) 254–5766.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[Docket No. ERA C&E–86–30; OFP Case No. 51209–9309–20, 21–24]

Powerplant and Industrial Fuel Use; Gulf States Utilities Co.

AGENCY: Economic Regulatory Administration, Energy.

ACTION: Notice of Order Granting to Gulf States Utilities Company Exemption From the Prohibition of the Powerplant and Industrial Fuel Use Act of 1978, for its Louisiana Station, Baton Rouge, Louisiana, and a Rescission of a Prior Order Granting a Permanent Peakload Exemption for a Portion of That Facility.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby notice that it has granted a permanent cogeneration exemption from the prohibitions of Title II of the Powerplant and Industrial Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"), to Gulf State Utilities Co. (GSU), Louisiana Station, Baton Rouge, Louisiana. The permanent cogeneration exemption permits the use of natural gas as the primary energy source for a 258 net megawatts (MW) combined cycle cogeneration facility designed to produce electricity and process steam at the Louisiana Station powerplant, Baton Rouge, Louisiana. The final exemption order and detailed information on the proceeding are provided in the **SUPPLEMENTARY INFORMATION** section, below.

DATE: The order shall take effect on June 23, 1986.

The proposed powerplant for which the petition was filed and which GSU is planning to construct is a cogeneration facility at the existing Louisiana Station powerplant in Baton Rouge, Louisiana. The facility will consist of two gas turbine electric generating units, each with an associated heat recovery steam generator (HRSG). The fuels for the gas turbine/HSRG units will be natural gas and process gas from the adjacent Exxon refinery/chemical plant complex. The units will provide electric energy and steam to the Exxon Complex. The cogeneration facility is referred to as the "Gas Turbine/HSRG Project."

One of the gas turbine units for the project will be an existing Westinghouse Model 501D5 gas turbine unit, which will be moved from its current location at GSU's Roy S. Nelson Station in Westlake, Calcasieu Parish, Louisiana. This turbine was installed in 1982 as a new peakload powerplant and was

VOL 51 ISS 77 AP 22 1986 UMI

granted a Permanent Peakload Exemption under the Fuel Use Act (Docket No. ERA-PC-80-002; ERA Case No. 51209-1393-27-22). At this time, the second turbine unit has not been selected but is expected to be similar in size and configuration. The Gas Turbine/HSRG Project will generate up to 258 megawatts (MW) of electric power (two units, each generating 129 MW) and up to 1,200,000 lb/hr of steam for use at the Exxon Baton Rouge Complex.

The petition for exemption was filed with a request that ERA, pursuant to 10 CFR 501.100 et seq., rescind a permanent peakload exemption granted by ERA to GSU on May 18, 1981, applicable to their Roy S. Nelson Station in Westlake, Louisiana. GSU's request for rescission was contingent upon the granting by ERA of the permanent exemption for its Louisiana Station pursuant to 10 CFR § 508.32.

The public file containing a copy of the order, other documents, and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independents Avenue, SW, Room 1E-190, Washington, DC 20585, Monday through Friday, 9:00 a.m. to 4:00 p.m., except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

George G. Blackmore, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-045, Washington, DC 20585, Telephone (202) 252-1774

Steven E. Ferguson, Esq., Office of General Counsel, Department of Energy, Forrestal Building—Room 6A-113, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: On January 14, 1986, GSU petitioned ERA under section 212(c) of FUA and 10 CFR 503.37 for a permanent cogeneration exemption to permit the use of natural gas in a 258 MW (net) combined cycle cogeneration facility.

Basis for Permanent Exemption Order

The permanent exemption order is based upon evidence in the record including GSU's certification to ERA, in accordance with 10 CFR 508.32(a)(1), that:

1. The oil or natural gas to be consumed by the cogeneration facility will be less than that which would otherwise be consumed in the absence of such cogeneration facility, in accordance with 10 CFR 503.37(a)(1)(i); and

2. The use of a mixture of natural gas and coal or oil and coal in the cogeneration facility, will not be technically feasible, in accordance with 10 CFR 503.37(a)(1)(ii).

Procedural Requirements

In accordance with the procedural requirements of section 701(c) of FUA and 10 CFR 503.3(b), ERA published its Notice of Acceptance of Petition and Availability of Certification in the Federal Register on February 28, 1986, (51 FR 7108), commencing a 45-day public comment period.

A copy of the petition was provided to the Environmental Protection Agency for comments as required by section 701(f) of the Act. During the comment period, interested persons were afforded an opportunity to request a public hearing. The comment period closed on April 14, 1986; no comments were received and no hearing was requested.

NEPA Compliance

After review of the petitioner's environmental impact analysis, together with other relevant information, ERA has determined that the granting of the requested exemption does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of the National Environmental Policy Act (NEPA).

Order Granting Permanent Cogeneration Exemption

Based upon the entire record of this proceeding, ERA has determined that GSU has satisfied the eligibility requirements for the requested permanent cogeneration exemption, as set forth in 10 CFR 503.37. Therefore, pursuant to section 212(c) of FUA, ERA hereby grants a permanent cogeneration exemption to GSU to permit the use of natural gas as the primary energy source for its cogeneration facility at its Louisiana Station, Baton Rouge, Louisiana.

Rescission request

ERA hereby grants GSU's request for Rescission of a Permanent Peakload Exemption applicable to GSU's Roy S. Nelson Station Unit 7. GSU's request for rescission was based on its determination that significantly changed circumstances as defined in 10 CFR 501.102(b) exist with respect to the applicability of the peakload exemption to GSU. Accordingly, pursuant to 10 CFR 501.101(f), GSU submitted documentation supporting its Request for Rescission.

The Rescission Order is to take effect when physical disassembly is begun on Nelson Unit 7 to prepare it for movement to Louisiana Station. ERA feels that this is necessary to protect GSU's right to operate this unit in the event plans for the Louisiana Station project change unexpectedly.

Pursuant to section 702(c) of the Act and 10 CFR 501.69, any person aggrieved by this order may petition for judicial review thereof at any time before the 60th day following the publication of this order in the Federal Register.

Issued in Washington, DC, on April 15, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

Hydroelectric Application Filed With the Commission

April 18, 1986.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection:

a. Type of Application: Amendment of License.

b. Project No.: 6058-002.

c. Date Filed: February 19, 1986.

d. Applicant: Hydro Development Group inc.

e. Name of Project: Hailesboro No. 4.

f. Location: Oswegatchie River, St. Lawrance County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. John T. Bedard, Vice President, Hydro Development Group, Inc., P.O. Box 58, Dexter, NY 13634, (315) 639-6700.

i. Comment Date: May 22, 1986.

j. Description of Amendment: Hydro Development Group inc., the licensee for the Hailesboro No. 4 project, proposes to amend the license by (1) changing the project description (Exhibit A) to reflect the seasonal use of 22-inch-high flashboards on Dam #1 and 24-inch-high flashboards on Dam #2; (2) changing the environmental exhibit (Exhibit E) to describe the use and impact of flashboards; and (3) changing the project drawings (Exhibit F) to show the flashboards.

The licensee states that the flashboards have been used for at least the past nine years and that the flashboard description was inadvertently omitted when the application for license was made. The licensee further states that the flashboard design has been modified from earlier practice in response to flooding that occurred in December, 1984, and January, 1985.

k. This notice also consists of the following standard paragraphs: B,C, and D2.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "Comments", "Notice of Intent To File Competing Application", "Competing Application", "Protest" or "Motion to Intervene", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203-RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. SA85-4-001]

Apache Powder Co.; Petition for Exemption and Interim Relief

Issued: April 16, 1986.

On March 13, 1986, Apache Powder Company (Apache) filed a peition pursuant to section 208(d) of the Natural Gas Policy Act of 1978 (NGPA) [1] and § 282.208(b) of the Federal Energy Regulatory Commission's regulations,[2] for interim and temporary relief from the Commission's incremental pricing regulations issued under Title II of the NGPA.[3] Apache was previously granted temporary relief from incremental pricing surcharges on the basis of severe hardship for the nonexempt use of gas at its industrial chemicals and explosives manufacturing facility near Benson, Arizona, for a period of twelve months, terminating with the March 1986 billing period.[4] In its instant petition, Apache seeks continuance of the temporary relief previously granted for an additional twelve months, and interim relief pending the Commission's action on its request.

In support of its petition, Apache cites a severe and continuing depression in a major market for its explosives, the domestic copper mining industry, as well as in other mining industries for which Apache is a supplier. It further states that economic problems in Mexico have "shut off" its market for mining products there, that lower oil prices have adversely affected its sales to oil exploration firms, and that the market for its agricultural fertilizer is also depressed. Apache states that these factors have prevented its financial performance from improving significantly during 1985, even though it had undertaken a number of cost and efficiency improvement measures.

The procedures applicable to the conduct of this proceeding are set forth in Subpart K of the Commission's Rules of Practice and Procedure.[5] Any person desiring to participate in this proceeding must file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene in accordance with Subpart K within 15 days after publication of this notice in the Federal Register.

Kenneth F. Plumb,

Secretary.

[Docket No. RP86-52-002]

Kentucky West Virginia Gas Co.; Proposed Changes in FERC Gas Tariff

April 16, 1986.

Take notice that on April 10, 1986, Kentucky West Virginia Gas Company ("Kentucky West") tendered for filing proposed changes to the following tariff sheets of its FERC Gas Tariff First Revised Volume No. 1:

Substitute First Revised Sheet No. 6
Superseding First Revised Sheet No. 6
Substitute First Revised Sheet No. 7
Superseding First Revised Sheet No. 7
Substitute Ninth Revised Sheet No. 8
Superseding Ninth Revised Sheet No. 8
Substitute Thirty-Fifth Revised Sheet No. 27
Superseding Thirty-Fifth Revised Sheet No. 27
Substitute Thirty-Sixth Revised Sheet No. 27
Superseding Thirty-Sixth Revised Sheet No. 27 (Tariff sheet reflected in Kentucky West's PGA filing for rates effective May 1, 1986)
Substitute Eighteenth Revised Sheet No. 27A
Superseding Eighteenth Revised Sheet No. 27A

The proposed changes are filed in compliance with ordering paragraph (C) of the Commission's order issued March 28, 1986, in the referenced proceeding.

Kentucky West Further states that copies of its filing have been served upon each of its customers and the Public Service Commissions of Kentucky, Pennsylvania and West Virginia.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before April 23, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

VOL 51 ISS 77 AP 22 1986 UMI

[Project No. 6511-000]

Seaward Development-Red Rock Associates; Availability of Environmental Assessment and Finding of No Significant Impact

April 15, 1986.

In accordance with the National Environmental Policy Act of 1969, the Office of Hydropower Licensing, Federal Energy Regulatory Commission (Commission), has reviewed the applications for major and minor licenses (or exemptions) listed below and has assessed the environmental impacts of the proposed developments.

LICENSEES

Project No.	Project name	State	Water body	Nearest town	Applicant
6511-000	Red Rock Hydro-electric	VA	Dan Moines River	Marion County	Seaward Development-Red Rock Associates.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared. Copies of the EA's are available for review in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NW., Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 6278-003]

Town of Grafton, MA; Surrender of Exemption

April 10, 1986.

Take notice that the Town of Grafton, Massachusetts, Exemptee for the proposed Lake Ripple Project No. 6278, requested by letter dated March 19, 1986, that its exemption be terminated. The exemption was issued on October 6, 1982. The project would be located on the Quinsigamond River in Worcester County, Massachusetts.

The Exemptee filed the request on March 24, 1986, and the exemption for Project No. 6278 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday, or holiday as described in 18 CFR 385.2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-8615 Filed 4-21-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. ER86-300-000 and ER84-571-001]

Utah Power and Light Co.; Order Accepting for Filing and Suspending Rates, Noting Intervention, Granting Waiver of Notice Requirement, Establishing Hearing Procedures, and Consolidating Dockets

Issued: April 15, 1986.

Electric Rates: Suspension; Waiver of Notice, Consolidation; Change in Rate.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On February 14, 1986, Utah Power and Light Company (UP&L) tendered for filing three agreements: the Bonanza Wheeling Agreement, the Mona Substation Agreement, and the Bonanza Interconnection Agreement.[1] These agreements would amend the existing wheeling arrangements between UP&L and the Deseret Generation and Transmission Cooperative (Deseret) to account for the entitlements of Deseret in the Bonanza Power Project and the Intermountain Power Project. The agreements would also revise the billing and scheduling procedures for all Deseret resources wheeled by UP&L to: (1) schedule and bill for power separately for each of the twenty-seven Deseret delivery points instead of as if the power were delivered to a single delivery point, as is now the case; and (2) consider power to be delivered first from the Hunter II generating station, second from Bonanza, third from Intermountain, and fourth from Western Area Power Administration. UP&L requested waiver of the 60-day notice requirement in order to allow the proposed rate schedule changes to become effective as of the date on which they are accepted for filing.[2]

Notice of UP&L's filing was published in the **Federal Register**, [3] with comments due on or before March 10, 1986. The Intermountain Consumer Power Association, Deseret Generation & Transmission Cooperative, and Utah Associated Municipal Power System (referred to jointly as "Deseret") jointly filed a timely motion to intervene. Deseret requests that the filing be suspended for one day and that a hearing be ordered to permit it to file evidence in support of its position. It requests that the Agreements be made effective coincident with the dates on which service began or begins under them.[4] Deseret states that UP&L does not object to these effective dates. Deseret also requests consolidation of this docket with UP&L's pending wheeling rate case in Docket No. ER84-571-001. In support of its request for suspension, Deseret raises a number of specific objections.[5]

On March 10, 1986, UP&L filed an answer. While not opposing the motion to intervene, the request for consolidation, the request for expedited consideration, or the requested effective dates, UP&L disputes Deseret's substantive allegations.

Discussion

Under Rule 214 of the Commission's Rules of Practice and Procedure,[6] the timely, unopposed motion to intervene serves to make Deseret a party to this proceeding.

We note initially that UP&L has characterized its submittal as an initial rate schedule filing. However, it is clearly a rate schedule change inasmuch as it would provide for additional transmission service and would supplement or amend contracts already on file. 18 CFR 35.1(c).

Our preliminary examination of UP&L's submittal and the pleadings indicates that the submittal has not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the submittal for filing and suspend it as ordered below.

In *West Texas Utilities Company*, 18 FERC ¶ 61,189 (1982), we explained that, where our preliminary review indicates that proposed rates may be unjust and unreasonable, but not be substantially excessive as defined in *West Texas*, we would generally impose a nominal suspension. We also stated that a nominal suspension may be warranted when the customers specifically request such a suspension. 18 FERC ¶ 61,189 at 61,376 n.6. Here, Deseret supports UP&L's request for a waiver of notice and asks for only a one day suspension in order that the additional wheeling may be promptly available. Given this affirmative customer concurrence, we find that good cause exists to waive the notice requirements and to suspend the submittals for a nominal period. It is not clear from the pleadings exactly when service commenced or will commence under each of the three Agreements. Therefore, in order to ensure that the Agreements are available when they are needed, each Agreement shall become effective, subject to refund, on the earlier of (1) the date on which service under that Agreement commenced, or (2) the date of this order. UP&L shall inform the Commission as to when service commenced or commences under each Agreement.

We find that common questions of law and fact may be presented in Docket Nos. ER86-300 and ER84-571. As a result, we shall consolidate these proceedings for purposes of hearing and decision.

The Commission orders:

(A) UP&L's request for waiver of the notice requirements is hereby granted.

(B) UP&L's submittal is hereby accepted for filing and is suspended, with each Agreement to become effective, subject to refund, on the earlier of (1) the date on which service under that Agreement commenced, or (2) the date of this order. UP&L shall inform the Commission as to the dates when service commenced or commences under each Agreement within 15 days after (1) issuance of this order or (2) service begins under each Agreement.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of UP&L's submittal.

(D) Subdocket -000 in Docket No. ER86-300-000 is hereby terminated. The evidentiary hearing established herein is assigned Docket No. ER86-300-001.

(E) Docket No. ER86-300-001 is hereby consolidated with Docket No. ER84-571-001 for purposes of hearing and decision.

(F) The administrative law judge designated to preside in Docket No. ER84-571-001 shall determine procedures, including the submission of a case-in-chief by UP&L, best suited to accommodate consolidation of this docket with the pending proceeding.

(G) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

UTAH POWER AND LIGHT COMPANY

[Docket No. ER86-300-000]

Rate Schedule Designations

Designation	Description
(1) Supplement No. 2 to Service Agreement No. 18 under FERC Electric Tariff, Fourth Revised Volume No. 1.	Bonanza Transmission Agreement.
(2) Supplement No. 3 to Service Agreement No. 18 under FERC Electric Tariff, Fourth Revised Volume No. 1.	Preliminary Mona Substation Interconnection Agreement.
(3) Supplement No. 4 to Service Agreement No. 18 under FERC Electric Tariff, Fourth Revised Volume No. 1.	Bonanza Interconnection Agreement.

[FR Doc. 86-8618 Filed 4-21-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-406-000, et al.]

Natural Gas Certificate Filings; Transcontinental Gas Pipe Line Corporation, et al.

Take notice that the following filings have been made with the Commission:

1. Transcontinental Gas Pipe Line Corporation

[Docket No. CP86-406-000]

April 15, 1986.

Take notice that on March 28, 1986, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP86-406-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon partially certain service to Union Gas Company (Union), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that under a service agreement dated November 2, 1970, it presently renders natural gas service to Union under Rate Schedule CD-3 in the quantity of 19,560 dt equivalent per day, delivered at five separate points on Applicant's Leidy line in Pennsylvania. Applicant further states that due to the loss by Union of two large industrial loads on its system, Union has requested that effective January 1, 1986 its allocation of CD-3 gas from Applicant be reduced from 19,560 dt equivalent per day to 10,350 equivalent dt per day.

Applicant avers that such partial abandonment of service to Union would not result in the abandonment of any of Applicant's facilities presently in use.

Comment date: May 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Trunkline Gas Company

[Docket No. CP86-410-000]

April 16, 1986.

Take notice that on March 31, 1986, Trunkline Gas Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP86-410-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of Transcontinental Gas Pipe Line Corporation (Transco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Pursuant to a transportation agreement between Applicant and Transco dated July 5, 1985, Applicant explains that it has agreed to transport up to 7,000 Mcf of gas per day on an interruptible basis on behalf of Transco.

[1] *See* Attachment for rate schedule designations.

[2] As discussed below, UP&L has evidently agreed to make the proposed changes effective as of the dates on which service began or begins under each Agreement.

[3] 51 FR 7,320 (March 3, 1986).

[4] Deseret said that service has already begun under the Bonanza Interconnection Agreement.

[5] The issues raised include: (1) Allegations that UP&L forced Deseret to sign the Bonanza Interconnection Agreement under duress; (2) arguments that the terms of the Bonanza Interconnection Agreement are unjust and unreasonable because of the point-by-point scheduling and the order in which power from the different generating plants is considered to be delivered; and (3) arguments that the rate under the Bonanza Wheeling Agreement is based on an excessive return on equity, includes an improper cash working capital allowance, allocates general plant improperly, and should not be on a "Postage-stamp" basis.

[6] 18 CFR 385.214.

VOL 51 ISS 77 AP 22 1986 UMI

It is explained that such gas is purchased by Transco from Arco, pursuant to an agreement dated November 25, 1985. Applicant states that Transco intends to use the gas to meet its system requirements. Applicant states it would receive volumes for Transco's account, utilizing its capacity in the system of Tarpon Transmission Company, at an existing point of receipt in Eugene Island Block 361, offshore Louisiana and would redeliver such volumes at an existing point of interconnection with Transco in Beauregard, Louisiana. Applicant states that Transco would pay a unit charge of 26 cents per Mcf of the proposed service. Applicant explains that the transportation charge is based on the applicable costs underlying its currently effective rates as established in Docket No. RP83-93-000.

Comment date: May 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Freeport Interstate Pipeline Company

[Docket No. CP86-420-000]

April 15, 1986.

Take notice that on April 8, 1986, Freeport Interstate Pipeline Company (Freeport Interstate), P.O. Box 61520, New Orleans, Louisiana 70161, filed in Docket No. CP86-420-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas in order to make a direct sale of 700 million Btu's of natural gas per day to Freeport Sulphur Company (Freeport Sulphur) and the acquisition and operation of line looping facilities for the transportation of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Freeport Interstate states that the natural gas would be used for emergency maintenance operations of Freeport Sulphur at its Caminada Mine, which is located in the Guld of Mexico, in the Federal domain, offshore of Grand Isle, Louisiana. Freeport Interstate further states that there is no other natural gas pipeline connection at the Caminada Mine and the subject direct sale is necessary to replace the emergency assignment and incidental transportation whcih Freeport Interstate is presently performing for the Caminada Mine pursuant to § 157.45 through 157.52 of the Commission's Regulations (18 CFR 157.45-157.52).

Freeport Interstate indicates that it would acquire the gas supply with which to make the proposed sale and incidental transportation from Louisiana Intrastate Gas Corporation (LIG) acting under authority of section 311(b) of the Natural Gas Policy Act (NGPA). Freeport Interstate further indicates that the sale price to Freeport Sulphur would consist of the LIG sale price under NGPA section 311(b); plus Freeport Interstate's transportation rate, as provided in its special rate schedule authorized in *Freeport Interstate Pipeline Company*, Docket No. CP85-874-000, January 17, 1985 [34 FERC ¶61,030]; plus any assessed charge, of which there is none, assessed by Freeport Pipeline Company for transportation of the sale volumes, on behalf of Freeport Interstate, from the LIG point of sale to Freeport Interstate.

Freeport Interstate states that it proposes to acquire from Freeport Minerals Company (Freeport Minerals) and to operate a line which is 5⅝s inches in diameter and approximately 9 miles in length. Freeport Interstate further states that such line would be purchased at Freeport Minerals' original cost, less depreciation, which was estimated to be $85,585 as of February 28, 1986. Freeport Interstate indicates that the acquisition and operation of the looping line would increase the reliability of its natural gas service to the Caminada Mine.

Comment date: May 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR doc. 86-8991-Filed 4-21-86; 8:45 am]

BILLING CODE 6717-01-M

[Project Nos. 8085-001, et al.]

Surrender of preliminary permits; Birch Power Company, Inc., et al.

Take notice that the following preliminary permits have been surrendered effective as described in Standard Paragraph I at the end of this notice.

1. Birch Power Company, Inc.

[Project No. 8085-001]

April 16, 1986.

Take notice that Birch Power Company, Inc., permittee for the proposed Grey's River Water Power Project No. 8085, has requested that its preliminary permit be terminated. The preliminary permit was issued on August 2, 1984, and would have expired on July 31, 1987. The project would have been located on Grey's River in Lincoln County, Wyoming. The permittee states that a preliminary permit study found that the project would not be economically feasible to develop at this time.

The permittee filed the request on March 17, 1986.

2. Lewis County Public Utility District No. 1

[Project No. 6013-001]

April 15, 1986.

Take notice that Lewis County Public Utility District No. 1, permittee for the Summit/Carlton Creeks Project No. 6013, has requested that its preliminary permit be terminated. The preliminary permit for Projet No. 6013 was issued on February 3, 1986, and would have expired on January 31, 1989. The project would have been located on Summit and Carlton Creeks in Lewis County, Washington.

The permittee filed the request on March 28, 1986.

Standard Paragraphs:

I. The preliminary permit shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007 in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-8990 Filed 4-21-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. QF86-661-000, et al.]

Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc., FSC Paper Corporation, et al.

Comment date: Thirty days from publication in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

1. FSC Paper Corporation

[Docket No. QF86-661-000]

April 15, 1986.

On March 27, 1986, FSC Paper Corporation (Applicant), of 13101 South Pulaski Road, Alsip, Illinois 60658, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at Applicant's Alsip plant in Alsip, Illinois. The facility will consist of a combustion turbine generator with a supplementary-fired waste heat recovery boiler and necessary auxiliary equipment. The primary energy source will be natural gas. The maximum electric power production capacity of the facility will be 10 MW. The process steam will be utilized at Applicant's paper plant.

2. Chevron U.S.A., Inc.

[Docket No. QF86-662-000]

April 16, 1986.

On March 31, 1986, Chevron U.S.A., Inc. (Applicant), of P.O. Box 1392, Bakersfield, California 93302, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located two miles west northwest of Coalinga, California. The facility will consist of two topping cycle units, each consisting of a gas turbine-driven 2,400 kilowatt electric generator and a 55,000 lb/hr waste heat recovery steam generator. The steam is injected for tertiary petroleum production. The primary energy source will be natural gas. Construction of the facility was scheduled to begin in the first quarter of 1986.

3. Pacific Lighting Energy Systems

[Docket No. QF86-666-000]

April 16, 1986.

On April 4, 1986, Pacific Lighting Energy Systems (Applicant), of 6055 East Washington Boulevard, Suite 600, City of Commerce, California 90040, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility will be located at Casa Diablo, Mammoth Lakes, California. The primary energy source will be geothermal resources. The electric power production capacity will be 15,000 kilowatts. No use of natural gas, oil, or coal is planned in this facility.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-8989 Filed 4-21-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RM85-1-000 (Parts A-D)]

Order Granting Requests for Clarification

Issued: April 15, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

Regulation of Natural Gas Pipelines after partial wellhead decontrol (Monterey Pipeline Co.) (Rosewood Resources, Inc.)

On March 25, 1986, Monterey Pipeline Company (Monterey) and Rosewood Resources, Inc. (Rosewood) each filed a request for clarification of § 284.125 of the regulations adopted in Order No. 436.[1] Monterey and Rosewood outlined the same facts and circumstances in their respective petitions. We are granting their requests.

On November 16, 1984, Monterey, an intrastate pipeline, entered into a transportation agreement with Columbia Gulf Transmission Company (Columbia) whereby Monterey agreed to transport gas on behalf of Columbia from Rosewood's E.A. Mouton No. 1 Well (Mouton well) under section 311(a)(2) of the Natural Gas Policy Act. Transportation pursuant to the agreement commenced on December 10, 1984. The transportation agreement is for an indefinite term.

In its petition, Rosewood states that the level of production from the Mouton well has been significantly reduced by production-related and drainage problems at the well location. As a result of these engineering problems, Rosewood must shut-in the Mouton well on April 15, 1986, the date on which state permits relating to the engineering problems expire.

On April 11, 1985, Rosewood began drilling the Edia H. Richard No. 1 Well (Richard well) as a replacement for the Mouton well, since it was known at that time that engineering problems existed at the Mouton well. Rosewood expended substantial funds on drilling expenses prior to October 9, 1985. The Richard well and the Mouton well are both located in the Marg Tex Reservoir A, Sand Unit B, West Ridge Field (Marg Tex Unit), in Lafayette Parish, Louisiana.

Monterey and Rosewood seek clarification that the transportation agreement between Monterey and Columbia can be amended to substitute the Richard well as the source of gas under the transitional provisions of Order No. 436.

---

[1] 33 FERC ¶ 61,007 50 FR. 42408 (October 18, 1985).

The transportation service under the November 16 contract, upon commencement of delivery from the Richard well, will remain essentially unchanged. The gas will be transported between the same points of delivery and receipt at the same transportation rate and at the same maximum daily quantities (30,000 Mcf/day). Indeed, the only change contemplated by the parties will be that the gas will be produced from the Richard well at a location which will hopefully avoid the production-related problems encountered by the Mouton well. Additionally, under Louisiana state law, the Richard well will be subject to the same allowable applicable to the Mouton well prior to its being shut-in.

Substitution of the Richard well for the Mouton well is technical in nature [2] and would not affect the qualifying of the transportation under the transitional provisions of Order No. 436. Accordingly, we grant Monterey's and Rosewood's requests for clarification.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Energy Research

High Energy Physics Advisory Panel; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: High Energy Physics Advisory Panel (HEPAP).

Date and time: Thursday, May 15, 1986, 8:00 am-5:00 pm; Friday, May 16, 1986, 8:00 am-12:00 noon.

Place: Lawrence Berkeley Laboratory, Building 50A, Room 5132, Berkeley, CA 94720.

Contact: Dr. P.K. Williams, Executive Secretary, High Energy Physics Advisory Panel, U.S. Department of Energy, ER-221, Washington, DC 20545, Telephone: 301/353-4529.

Purpose of panel: To provide advice and guidance on a continuing basis with respect to the high energy physics research program.

Tentative Agenda

Thursday, May 15, 1986

—Discussion of the National Science Foundation/Elementary Particle Physics FY 1987 Budget Status
—Discussion of the Department of Energy/High Energy Physics FY 1987 Budget Status
—Discussion of the National Academy of Sciences Physics Survey Committee Report on High Energy Physics (Brinkman Report)
—Discussion of the Conceptual Design Report for the Superconducting Super Collider (SSC)
—HEPAP Review of the SSC Conceptual Design and R&D Program of the Central Design Group (CDG)
5—HEPAP Review of the High Energy Physics Program at Lawrence Berkeley Laboratory (LBL)
—Public Comment (10-minute rule)

Friday, May 16, 1986

—Discussion on International Collaboration
—Further Discussion on HEPAP Reviews of CDG and LBL/HEP Programs
—Public Comment (10-minute rule)

Public Participation

The meeting is open to the public. The Chairperson of the panel is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to make oral statements pertaining to agenda items should contact the Executive Secretary at the address or telephone number listed above. Requests must be received at least five days prior to the meeting and reasonable provision will be made to include the presentation on the agenda.

Minutes

Minutes are available for public review and copying at the Public Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC between 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 17, 1986.

J. Robert Franklin,

Deputy Advisory Committee Management Officer.

[FR Doc. 86-8696 Filed 4-17-86; 8:45 am]

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding to adversely affected parties $2,500 obtained as a result of a consent order which the DOE entered into with Reynolds Oil Company, a reseller-retailer of petroleum products located in Kremmling, Colorado. The money is being held in escrow following the settlement of enforcement proceedings brought by the DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the Federal Register and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585. All comments should conspicuously display a reference to case number HEF-0164.

FOR FURTHER INFORMATION CONTACT: Walter J. Marullo, Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-6602.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision sets forth procedures and standards that the DOE has tentatively formulated to distribute to adversely affected parties $2,500 plus accrued interest obtained by the DOE under the terms of a consent order entered into with Reynolds Oil Company (Reynolds). The funds were provided to the DOE by Reynolds to settle all claims and disputes between the firm and the DOE regarding the manner in which the firm applied the federal price regulations with respect to its sales of motor gasoline during the period September 1, 1979, through November 30, 1979.

OHA proposes that a two-stage refund process be followed. In the first stage, OHA has tentatively determined that a portion of the consent order funds should be distributed to firms and individuals that made wholesale purchases of motor gasoline from Reynolds during the consent order period. Subsequent repurchasers are also eligible to claim a portion of the escrow funds. In order to obtain a refund, each claimant will be required to submit a schedule of its monthly purchases of Reynolds motor gasoline during the consent order period. Since the consent order amount in this case is itself less than the small claims threshold, all applicants that were not spot purchasers will be presumed to have been injured by Reynolds' pricing practices. Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Some residual funds may remain after all meritorious first-stage claims have been satisfied. OHA invites interested parties to submit their views concerning alternative methods of distributing any remaining funds in a subsequent proceeding.

Any member of the public may submit written comments regarding the proposed refund procedures. Such parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice. All comments received in this proceeding will be available for public inspection between 1:00 and 5:00 p.m., Monday through Friday, except Federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, DC 20585.

Dated: April 15, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

April 15, 1986.

Name of Firm: Reynolds Oil Company.

Date of Filing: October 13, 1983.

Case Number: HEF-0164.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals (OHA) formulate and implement special procedures to distribute funds received as a result of an enforcement proceeding in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. In accordance with the provisions of Subpart V, on October 13, 1983, ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Reynolds Oil Company (Reynolds).

I. Background

Reynolds is a "reseller-retailer" of refined petroleum products as that term was defined in 10 CFR 212.31 and is located in Kremmling, Colorado. A DOE audit of Reynolds' records revealed possible violations of the Mandatory Petroleum Price Regulations. 10 CFR Part 212, Subpart F. The audit alleged that between September 1, 1979, and November 30, 1979, Reynolds committed possible pricing violations amounting to $7,961.38 with respect to its sales of motor gasoline.

In order to settle all claims and disputes between Reynolds and the DOE regarding the firm's sales of motor gasoline during the period covered by the audit, Reynolds and the DOE entered into a consent order on October 28, 1980. The consent order refers to ERA's allegations of overcharges, but notes that there was no finding that violations occurred. Additionally, the consent order states that Reynolds does not admit that it violated the regulations.

Under the terms of the consent order, Reynolds was required to directly refund $798.58, plus interest, to its retail customers.

In addition, as settlement of the alleged overcharges to its wholesale customers, the firm agreed to deposit $2,500 into an interest-bearing escrow account for ultimate distribution by the DOE. Reynolds remitted this sum to the DOE on January 16, 1981.[1]

II. Proposed Refund Procedures

The procedural regulations of the DOE set forth general guidelines to be used by OHA in formulating and implementing a plan of distribution for funds received as a result of an enforcement proceeding. 10 CFR Part 205, Subpart V. The Subpart V process may be used in situations where the DOE is unable to identify readily those persons who likely were injured by alleged overcharges or to ascertain readily the amount of such persons' injuries. For a more detailed discussion of Subpart V and the authority of OHA to fashion procedures to distribute refunds, *see Office of Enforcement*, 8 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 9, DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (*Vickers*).

Our experience with Subpart V cases leads us to believe that the distribution of refunds in this proceeding should take place in two stages. In the first stage, we will accept claims from wholesale puchasers of motor gasoline that may have been injured by Reynolds' pricing practices during the period September 1, 1979, through November 30, 1979. If any funds remain after all meritorious first-stage claims have been paid, they may be distributed in a second-stage proceeding. *See, e.g., Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (*Amoco*).

A. Refunds to Wholesale Purchasers

In the first stage of the Reynolds refund proceeding, we propose to distribute the funds currently in escrow to wholesale purchasers who demonstrate that they were injured by Reynolds' alleged overcharges. As we have done in many prior refund cases, we propose to utilize certain presumptions which will help to determine the extent of a purchaser's alleged injury.

The presumptions we plan to adopt are also used to permit claimants to participate in the refund process without incurring inordinate expenses and to enable OHA to consider the refund applications in the most efficient way possible in view of the limited resources available. First, we plan to adopt a presumption that the alleged overcharges were dispersed evenly in all of Reynolds' sales of motor gasoline made to wholesale customers during the consent order period. In the past, we have referred to a refund process that uses this presumption as a volumetric method. Second, we propose to adopt a presumption that claimants seeking small refunds ($5,000 or less) were injured by the alleged overcharges. Finally, we plan to adopt a presumption that spot purchasers were not injured by Reynolds' pricing practices.

The pro rata, or volumetric, refund presumption assumes that alleged overcharges by a consent order firm were spread equally over all gallons of product covered by the consent order. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. This presumption is rebuttable, however. A claimant which believes that it incurred a disproportionate share of the alleged overcharges may submit evidence proving this claim in order to receive a larger refund. *See, e.g., Sid Richardson Carbon and Gasoline Co. and Richardson Products Co./Siouxland Propane Co.*, 12 DOE ¶ 85,054 at 88,164 (1984), and cases cited therein.

[2] Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Entrade Corporation) 33 FERC ¶ 61,370 (issued December 13, 1985). *Cf.* Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Sohio Petroleum Company and Sohio Chemical Company, *et al.*) 33 FERC ¶ 61,448 (issued December 30, 1985), 51 FR. 440. (The addition of a well behind a central delivery point qualified under the transitional provisions of Order No. 436, where the transportation contract did not have to be amended to accommodate the change).

[1] The total value of the Reynolds escrow account stood at $4,373.11 as of March 31, 1986.

VOL 51 ISS 77 AP 22 1986 UMI

Under the volumetric method we plan to adopt, a claimant will be eligible to receive a refund equal to the number of gallons of Reynolds motor gasoline that it purchased during the consent order period times the volumetric factor. The volumetric factor is the average per gallon refund and in this case equals $0.015222 per gallon.[2] In addition, successful claimants will receive a proportionate share of the accrued interest.

The second presumption we plan to use is that purchasers of Reynolds motor gasoline seeking small refunds were injured by the firm's pricing practices. There are a variety of reasons for adopting this presumption. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 (1982). These firms were in the chain of distribution where the alleged overcharges occurred and therefore bore some impact of the alleged overcharges, at least initially. In order to support a specific claim of injury, a firm would have to compile and submit detailed factual information regarding the impact of alleged overcharges which took place many years ago. This procedure is generally time-consuming and expensive. With small claims, the cost to the firm of gathering the necessary information and the cost to OHA of analyzing it could exceed both the expected refund and the benefits from any additional precision. As a result, without simplified procedures injured parties could effectively be denied the opportunity to receive a refund.

Under the small-claims presumption, a claimant who is a reseller or retailer would not be required to submit any additional evidence of injury beyond volumes of Reynolds motor gasoline purchased if its refund claim is below a certain sum. Several factors determine the value of this threshold. For example, the cost to the applicant and the government of compiling and analyzing information sufficient to show injury should not exceed the amount of any relevant refund. As in previous cases, we are setting the threshold at $5,000. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,069 at 88,210 (1984); *Office of Special Counsel*, 11 DOE ¶ 85,228 (1984) (*Conoco*), and cases cited therein. Since the consent order amount in this case is itself less than this sum, all applicants will be filing small claims.

If a reseller, or retailer made only spot purchases, we propose that it should not receive a refund since it is unlikely to have been injured. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers, 8 DOE at 85,396–97. The same rationale applies in the present case. Therefore, we propose that firms which made only spot purchases of Reynolds motor gasoline not receive refunds unless they present evidence which rebuts the spot purchaser presumption and establishes the extent to which they were injured as a result of their purchases of Reynolds motor gasoline during the consent order period.

As in other cases, only claims for at least $15 will be processed. This minimum has been adopted in prior refund cases because the cost of processing claims for refunds of less than $15 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE at 85,225. *See also* 10 CFR 205.286(b). The same principle applies here.

If valid claims exceed the funds available in the escrow account, all refunds will be reduced proportionately. Actual refunds will be determined after analyzing all appropriate claims.

B. Applications for Refund

Any wholesale purchaser claiming a portion of the consent order funds will be required to file an Application for Refund pursuant to 10 CFR 205.283. In its application, a claimant must include a schedule of its monthly purchases of Reynolds motor gasoline during the consent order period as well as all relevant information necessary to support its claim in accordance with the presumptions outlined above. A claimant must also state whether it has previously received a refund, from any source, with respect to the alleged overcharges underlying this proceeding. Each applicant must also state whether there has been a change in ownership of the firm since the audit period. If there has been a change in ownership, the applicant must provide the names and addresses of the other owners, and should either state the reasons why the refund should be paid to the applicant rather than to the other owners or provide a signed statement from the other owners indicating that they do not claim a refund. Finally, an applicant must report whether it is or has been involved as a party in DOE enforcement or private actions filed under section 210 of the Economic Stabilization Act. If these actions have been concluded the applicant should furnish a copy of any final order issued in the matter. If the action is still in progress, the applicant should briefly describe the action and its current status. The applicant must keep OHA informed of any change in status while its Application for Refund is pending. *See* 10 CFR 205.9(d).

C. Distribution of Remaining Consent Order Funds

In the event that money remains after all meritorious claims have been satisfied, residual funds could be distributed in a number of ways in a subsequent proceeding. However, we will not be in a position to decide what should be done with any remaining funds until the initial stage of this refund proceeding has been completed. We encourage the submission by interested parties of proposals which address alternative methods of distributing any remaining funds.

It is Therefore Ordered That:

The refund amount remitted to the Department of Energy by Reynolds Oil Company pursuant to the Consent Order executed on October 28, 1980, will be distributed in accordance with the foregoing decision.

[FR Doc. 86-8994 Filed 4-21-86; 8:45 am]
BILLING CODE 6450-01-M

[2] This figure is computed by dividing the $2,800 received from Reynolds by the 184,222 gallons of motor gasoline sold by the firm to its wholesale customers during the consent order period.

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of implementation of special refund procedures.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy announces the procedures for filing Applications for Refund from a fund of $1,800,000 obtained from GCO Minerals Company in settlement of enforcement proceedings brought by DOE's Economic Regulatory Administration.

DATE AND ADDRESS: Applications for refund must be filed by July 21, 1986, should conspicuously display a reference to case number HEF–0570, and should be addressed to: Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 252–2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(c) of the procedural regulations of the Department of Energy, 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set out below. The Decision and Order establishes procedures to distribute funds obtained as a result of settlement between GCO Minerals Company and DOE. The Consent Order entered in the case settled all disputes between DOE and GCO Minerals Company concerning possible violations of DOE price regulations with respect to the firm's sales of petroleum products to its customers, and possible violations of the regulations governing the Crude Oil Entitlements program, during the period August 1973 through June 1979.

Any members of the public who believe that they are entitled to a refund in this proceeding may file Applications for Refund. All Applications should be filed by July 21, 1986, and should be sent to the address set forth at the beginning of this notice. Applications for refunds must be filed in duplicate and these applications will be made available for public inspection between the hours of 1:00 and 5:00 p.m, Monday through Friday, except Federal holidays, in the Public Reference Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Dated: April 15, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

April 15, 1986.

Name of Firm: GCO Minerals Company.

Date of Filing: March 11, 1985.

Case Number: HEF–0570.

On March 11, 1985, the Economic Regulatory Administration (ERA) filed a Petition for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA) pursuant to the procedural regulations of the Department of Energy (DOE), 10 CFR Part 205, Subpart V. The petition requests that the OHA formulate and implement procedures for distributing funds obtained pursuant to a consent order entered into with GCO Minerals Company to remedy the effects of alleged violations of DOE regulations.

I. Background

GCO Minerals Company (GCO), formerly known as General Crude Oil Company, was a gas plant owner and operator within the meaning of 10 CFR 212.162, and a refiner as defined in 10 CFR 212.31. The Company was a subsidiary of International Paper during the period covered by the consent order. GCO sold various covered products, including crude oil, condensate, natural gas liquids, (NGLs), and natural gas liquid products (NGLPs); therefore it was subject to the Mandatory Petroleum Price and Allocation regulations set forth in 6 CFR Part 150 and 10 CFR Part 212.[1] Those regulations, in effect from August 19, 1973 until January 27, 1981, governed prices charged in first sales of crude oil, including condensate, by defining ceiling prices for various tier classifications of crude oil.[2] They also governed the pricing of refined petroleum products, including NGLs and NGLPs. *See* 10 CFR Part 212, Subparts E and K.

A DOE audit of GCO's records revealed possible regulatory violations with respect to the firm's pricing of NGLs, NGLPs, and condensate during the period August 19, 1973 through June 30, 1979 (hereinafter referred to as the consent order period). The audit disclosed the possibility that condensate prices at two of GCO's plants exceeded the old/lower tier prices and were not justified based on base production control level computations.[3] The alleged NGL/NGLP overcharges related to GCO's calculation and reporting of increased costs and its calculation of allowable cost recoveries. *See id.*

In order to settle all claims and disputes between GCO and the DOE regarding the firm's compliance with the regulations; the two parties entered into a consent order on June 7, 1984. Pursuant to the consent order, GCO remitted $1,800,000 to the DOE on November 20, 1984. These funds have been held in an interest-bearing escrow account pending a determination by the OHA of their final distribution. This Decision concerns the distribution of those funds, which totaled $1,999,511.34, including interest, as of February 28, 1986.

On June 13, 1985, we issued a Proposed Decision and Order which set forth a tentative plan for distributing the GCO settlement funds. *See* 50 FR 25771 (June 21, 1985). In the Proposed Decision, we described a two-stage process for disbursing refunds. Specifically, we proposed to destribute funds in the first stage to identifiable purchasers of GCO covered products who could demonstrate that they were injured by the firm's pricing practices during the consent order period. We further stated that if funds remain after these meritorious claims have been paid, a second-stage refund procedure may become necessary. *See generally Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (hereinafter cited as *Amoco*).

The purpose of this Decision and Order is to establish the final procedures to be used for filing and processing claims in the first stage of the GCO refund proceeding. This Decision sets forth the information that a purchaser of GCO products should submit in order to establish eligibility for a portion of the consent order fund. Because our determination concerning the final disposition of any remaining funds will necessarily depend on the size of the fund, we will not establish second-stage procedures in this Decision. *See Office of Enforcement*, 9 DOE ¶ 82,508 (1981) (hereinafter cited as *Coline*). Accordingly, it would be premature for us to address at this time issues raised by commenters concerning second-stage refunds.[4]

II. Jurisdiction

The Subpart V regulations set forth general guidelines by which the OHA may formulate and implement a plan to

[1] For the purposes of the mandatory petroleum price regulations, the term "crude oil" included condensate recovered by mechanical separation. 10 CFR 212.31. Thus, condensate was to be treated as crude oil under Subpart D of the price regulations, rather than as NGLs of NGLPs, which were treated under Subpart K of the price regulations. DOE Ruling 1975–16, 40 FR 55820 (December 2, 1975).

[2] The regulations generally required crude oil producers to determine the first sale price of crude oil on the basis of the level of production from a property during a specified base period, i.e., the base production control level (BPCL). *See* 6 CFR 150.354; 10 CFR 212.72 and 212.76. Crude oil production that did not exceed the BPCL for a particular property was generally subject to the lower tier ("old" oil) ceiling price rule. 6 CFR 150.354; 10 CFR 212.73. Crude oil production that exceeded the BPCL ("new" oil) could generally be sold without regard to the ceiling price rule prior to February 1, 1976, and at the upper tier ceiling price after that date. 6 CFR 150.354(c)(2); 10 CFR 212.74(a). In addition, during most of the price control period, crude oil produced from a "stripper well property" was exempt from price controls. 6 CFR 150.54(5); 10 CFR 212.54. A stripper well property was a property whose average daily production of crude oil did not exceed ten barrels per well. 10 CFR 210.32(b) and 212.54(c).

[3] In order for plant condensate to qualify for prices in excess of the old/lower tier price, the volumes were to be allocated on a proportional basis to the producing property and compared to the recorded BPCL. If condensate volumes exceeded the BPCL, new/upper tier prices were justified. Or, if the average daily production rate of an existing property was no more than 10 barrels a day, stripper oil prices were allowed. *See* note 2, *supra*, and accompanying text.

[4] We received comments from nine states in response to the Proposed Decision and Order, all concerning second-stage procedures. The commenters were the States of Arkansas, California, Delaware, Iowa, Louisiana, North Dakota, Rhode Island, Texas, and West Virginia.

VOL 51 ISS 77 APR 22 1986 UMI

distribute funds received as a result of an enforcement proceeding. The Subpart V process may be used in situations where the DOE is unable to identify readily the persons who may eligible to receive refunds or to ascertain readily the amounts that such persons should receive. 10 CFR 205.280. For a more detailed discussion of Subpart V and the OHA's authority to fashion procedures to distribute refunds, *see Coline* and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (hereinafter cited as *Vickers*).

We have reviewed the record in the present case and have determined that a Subpart V proceeding is an appropriate mechanism for distributing the GCO consent order fund. We therefore grant the ERA's petition and assume jurisdiction over this fund.

III. Refund Procedures

The Proposed Decision noted that the GCO Consent Order resolves possible regulatory violations concerning all of GCO's products, including both crude oil and refined products. Therefore, we proposed to divide the consent order fund into separate crude oil and non-crude oil pools of refund monies. Accordingly, a pool of $864,000 has been set aside to satisfy claims filed by NGL and NGLP customers of GCO. In addition, a crude oil pool of $936,000 has been set aside and will be disposed of as discussed below.[5]

A. Crude Oil Claims

In the Proposed Decision, we proposed that the crude oil pool be set aside to satisfy claims filed by participants in the Crude Oil Entitlements Program and their downstream customers. We announced our intention to implement refund procedures for crude oil claims modeled on those outlined in *A. Johnson & Co.*, 12 DOE ¶ 85,102 (1984); *Office of Enforcement*, 9 DOE ¶ 82,521 (1982) (*Alkek*); and *Office of Enforcement*, 9 DOE ¶ 82,553 (9182) (*Adams*). Specifically, we proposed to require an applicant to demonstrate that it was injured by the alleged overcharges.

After the Proposed Decision was issued, we issued a report in the *Stripper Well* proceeding. *See Report of the Office of Hearings and Appeals, In re The Department of Energy Stripper Well Exemption Litigation*, MDL No. 378 (D. Kan., filed June 21, 1985), Fed. Energy Guidelines ¶ 90,507 (1985) (hereinafter cited as the OHA Stripper Well Report). Because of our findings in that case and subsequent developments in DOE's policy regarding refunds in crude oil overcharge cases, we have determined that it is appropriate to revise the refund procedures which we previously had proposed in this case.

Inder the Mandatory Petroleum Price Regulations, when a producer sold crude oil, it was required to certify in writing to the purchaser the respective volumes of crude oil belonging to each tier classification in each purchase. 10 CFR 212.31. When a refiner processed the crude oil, it was required to report these certifications to the DOE to enable the agency to administer the Crude Oil Entitlements Program, 10 CFR 211.67. To the extent that GCO miscertified old crude oil as new or stripper well crude oil, the impact of the violations was spread throughout the domestic refining industry by the operation of the Entitlements Program 10 CFR 211.67. *See, e.g., Union Oil Co. v. DOE*, 688 F.2d 797 (Temp. Emer. Ct. App. 1982), *cert. denied*, 459 U.S. 1202 (1983).

As a result of the findings in the OHA Stripper Well Report, the DOE issued a Statement of Restitutionary Policy for crude oil overcharge funds, 50 FR 27400 (July 2, 1985), Fed. Energy Guidelines ¶ 90,508 (1985). The policy statement announced that no claims for direct restitution would be accepted, and the Department would maintain such overcharge funds in escrow to afford the Congress the opportunity to select the means for distributing the funds.

In light of the DOE policy statement, we issued an order announcing that we intended to apply the policy in special refund proceedings involving overcharge funds attributable to Entitlements-period crude oil certification violations. 50 FR 27402 (July 2, 1985). After soliciting comments from potentially aggrieved parties regarding our application of the policy to pending refund proceedings, we stated in *Amber Refining, Inc.*, 13 DOE ¶ 85,217 (1985), that we will apply the DOE policy in all crude oil refund cases.

Accordingly, the crude oil portion of the funds obtained from CGO will be pooled with other crude oil consent order funds for distribution in accordance with department policies. *See* 50 FR 27402 (July 2, 1985); 50 Fed. Reg. 27460 (July 2, 1985); 50 FR 1919 (January 14, 1985).

B. Refunds to NGL and NGLP Purchasers

During the first stage of the refund process, the remainder of the GCO consent order funds, $864,000 plus accrued interest, will be distributed to GCO's NGL and NGLP customers who satisfactorily demonstrate that they were injured by CGO's alleged pricing violations. As we stated in the Proposed Decision, we do not have the names and addresses of all of the firm's customers.[6] However, from our experience we believe that the claimants in this proceeding will fall into the following categories: (1) Resellers and retailers of NGLs and NGLPs, (2) petroleum refiners who used NGLs and NGLPs as a fuel source or a blending stock, and (3) firms, individuals, or organizations who were consumers of those products (end-users). The refined petroleum products must have been purchased either directly from GCO or in a chain of distribution leading back to GCO.

As in many prior special refund cases, we will adopt certain presumptions and make certain findings which will permit claimants to participate in the refund process without incurring inordinate expense and will enable OHA to process the refund applications in the most efficient manner possible.[7]

We are adopting a presumption that the alleged overcharges were dispersed equally in all sales of products made by GCO during the consent order period and that refunds should therefore be made on a pro-rata or volumetric basis. In the absence of better information, this assumption is sound because the DOE price regulations generally required a regulated firm to account for increased costs on a firm-wide basis in determining its prices. However, we also recognize that the impact on an individual purchaser might have been greater. Therefore, any purchaser may file a refund application based on a claim that it suffered a disproportionate share of the alleged overcharges. *See, e.g., Standard Oil Company (Indiana)/ Army and Air Force Exchange Service*, 12 DOE ¶ 85,014 (1984).

Under the volumetric refund approach, a successful refund applicant will receive a refund equal to the total number of gallons purchased times the volumetric refund amount, plus a pro rata share of accrued interest. The volumetric refund amount is calculated by dividing the amount of money in the NGL/NGLP pool by our estimate of the total gallonage of NGLs and NGLPs sold by GCO during the consent order period. This results in a volumetric refund amount of $.004729 ($864,000 divided by 182,697,290 gallons). As of February 28, 1986, accrued interest increased the volumetric refund amount to $.005253.

[5] The amounts in each pool differ from those indicated in the Proposed Decision. Upon further analysis of the file in this case, we have concluded that a fairer and more equitable allocation of the consent order funds results by splitting the fund according to percentage of alleged overcharges, rather than according to percentage of total production *See, e.g.*, VGS Corp., 13 DOE ¶ 85,155 (1985); Bayou State Oil Corp., 12 DOE ¶ 85,197 (1985). *See generally*, Mobil Oil Corp., 13 DOE ¶ 85,339 (1985). In this case, 48% of the total dollar amount of the alleged overcharges concerned NGLs and NGLPs. The remaining 52% of the alleged overcharges concerned condensate. Notice of Proposed Consent Order, 49 Fed. Reg. 32788, 32797 (August 16, 1984)

[6] The Appendix to this Decision contains a list of GCO customers who were identified in the case file.

[7] The Subpart V regulations specifically authorize the use of presumptions in special refund proceedings. *See* 10 CFR Part 205, Subpart V.

1. Specific Application Requirements for Each Category of Refined Product Refund Applicant

a. *End-users.* In addition to the presumptions we are adopting in this proceeding, we are adopting our proposed finding that end-users or ultimate consumers whose businesses are unrelated to the petroleum industry were injured by the alleged overcharges settled by the GCO consent order. Unlike regulated firms in the petroleum industry, members of this group generally were not subject to price controls during the consent order period and were not required to keep records which justified selling price increases by reference to cost increases. For these reasons, an analysis of the impact of the increased cost of refined petroleum products on the final price of non-petroleum goods and services would be beyong the scope of a special refund proceeding. *See Texas Oil & Gas Corp.*, 12 DOE ¶ 85,099 (1984); *Office of Enforcement*, 10 DOE ¶ 85,072 (1983) (*PVM Oil Associates*). We have therefore concluded that end-users of GCO NGLPs need only document their purchase volumes from GCO in order to make a sufficient showing that they were injured by the alleged overcharges.

However, crude oil refiners who purchased NGLs or NGLPs that were consumed as fuel or as raw material in a refining process will not be considered to be "consumers" for this purpose. Rather, the exception from the requirement of a separate, detailed showing of injury for end-users or ultimate consumers wil be limited to those whose business operations were unrelated to the petroleum industry and whose prices were therefore not subject to the DOE regulatory scheme. A refund applicant who was subject to the DOE regulatory program will be required to provide a detailed demonstration of injury with respect to the purchase of NGLs and NGLPs of which it was an end-user. *See People's Energy Corp.*, 12 DOE ¶ 85,129 (1984).

b. *Regulated Firms or Cooperatives.* In addition, we are adopting the presumption that agricultural cooperatives and regulated firms, such as public utilities, that are required to pass on to their customers the benefit of any refund received will be exempted from the requirement that they make a detailed showing of injury. *See Office of Special Counsel*, 9 DOE ¶ 82,538 (1982) (*Tenneco*); *Tenneco Oil Company/ Farmland Industries, Inc.*, 9 DOE ¶ 82,597 (1982). Instead, those firms and cooperative groups should provide with their applications a full explanation of the manner in which refunds would be passed through to their customers and how the appropriate regulatory body or membership group will be advised of the applicant's receipt of refund money. We note, however, that a cooperative's sales of GCO products to non-members will be treated in the same manner as sales by other resellers.

c. *Refund Applications by Refiners, Resellers, and Retailers.*—(i) *Spot Purchasers.* If a claimant made only spot purchases, we believe that in most circumstances it shoud not receive a refund since it is unlikely to have experienced injury. Spot purchasers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of GCO products at increased prices unless they were able to pass through the full amount of the quoted selling price at the time of purchase to their own customers. *See Vickers*, 8 DOE at 85,396–97. Therefore, a firm which made only spot purchases from GCO will not receive a refund unless it presents evidence rebutting the spot purchaser presumption and establishes the extent to which it was injured as a result of its purchases of GCO products during the consent order period. *See Amoco*, 10 DOE at 88,200.

(ii) *Refiners, Resellers, Retailers, Seeking Refunds of $5,000 or less.* We are also adopting the presumption that purchasers of GCO NGLs or NGLPs seeking small refunds were injured by GCO's pricing practices. *See, e.g., Uban Oil Co.*, 9 DOE ¶82,541 (1982) (hereinafter cited as *Uban*). With small claims, the cost to the firm of gathering evidence of injury to support a refund claim could exceed the expected refund. Consequently, without simplified procedures, some injured parties would be effectively denied an opportunity to obtain a refund. Under the small-claims presumption, a claimant seeking a refund of $5,000 or less will not be required to submit any evidence of injury beyond establishing the volume of GCO products it purchased during the consent order period.[8] *See Texas Oil & Gas Corp.*, 12 DOE at 88,210; *Marion Corp.*, 12 DOE ¶85,014 (1984).

(iii) *Refiners, Resellers and Retailers Seeking Refunds greater than $5,000.* Unlike small-claims applicants, a reseller or retailer who claims a refund in excess of $5,000 will be required to establish that it was injured by the alleged overcharges. To make this showing, a reseller or retailer claimant will first be required to show that it maintained "banks" of unrecovered increased product costs in order to demonstrate that it did not subsequently recover those costs by increasing its prices. *See Ada, supra* note 8, 10 DOE at 88,125.

The maintenance of a bank will not, however, automatically establish injury. *See Coline Gasoline Corp./Petrolane, Inc.*, 12 DOE ¶85,029 (1984). In addition to showing it maintained banks, a claimant must show that it experienced a competitive disadvantage because GCO's prices were higher than the prevailing price for the same products in the market area. *See Texaco Oil & Gas Corp.; National Helium Corp./Atlantic Richfield Corp.*, 11 DOE ¶85,257 (1984).

IV. How To Apply for a Refund

Applications for refund will now be accepted from parties who purchased GCO NGLs or NGLPs during the consent order period, August 19, 1973 through June 30, 1979. In addition to the specific requirements outlined above, all refund applicants should furnish the information set forth below.

A. An application must be in writing, signed by the applicant, and specify that it pertains to the GCO Minerals Company Consent Order Fund, Case No. HEF–0570.

B. Each applicant should furnish its name, street or post office address, and its telephone number. If the applicant is a business firm, it should furnish all other names under which it operated during the period for which the claim is being filed.

C. Each applicant should specify how it used the product(s)—i.e., whether it was a refiner, reseller, retailer, or an end-user.

D. Each applicant should submit a schedule which shows the volumes of GCO NGLs and NGLPs purchased during each month for which the applicant is claiming a refund.

[8] Claimants whose monthly purchases during the period for which a refund is claimed result in a volumetric refund of greater than $5,000 but who cannot establish that they did not pass through the price increases to their customers, or who limit their claims to the threshold amount, will be eligible for a refund of the $5,000 threshold amount without being required to submit additional evidence of injury. *See* Office of Enforcement, 10 DOE ¶85,029 at 88,122 (1982) (hereinafter cited as Ada); Vickers, 8 DOE at 85,396.

VOL 51 ISS 77 APR 22 1986 UMI

E. If an applicant purchased GCO products from a reseller, it must establish its basis for belief that the producers originated with GCO and identify the reseller from whom the product was purchased. Indirect purchasers who either fall within a class of applicant whose injury is presumed, or who can prove injury, may be eligible for a refund if the reseller of GCO products passed through the alleged GCO overcharges to its own customers.

F. The application for refund should contain the name, address, and telephone number of the person who prepared the application. If the preparer was someone other than the applicant, the applicant should furnish us with the name and telephone number of a contact person familiar with the facts set forth in the application who we may contact for additional information concerning the application. Unless otherwise specified, the refund check will be issued to the preparer.

G. If the applicant is affiliated or associated with GCO in any manner, it must so indicate and provide information explaining the nature of its relationship with GCO.

H. Each applicant should report whether it is or has been involved as a party in any DOE or private section 210 enforcement actions. If these actions have terminated, the applicant should furnish a copy of any final order issued in the matter. If the action is ongoing, the applicant should briefly describe the action and its current status. Of course, the applicant is under a continuing obligation to keep the OHA informed of any change in status during the pendency of its application for refund. *See* 10 CFR 205.9(d).

I. Each application must also include the following statement: I swear (or affirm) that the information submitted is true and accurate to the best of my knowledge and belief. *See* 10 CFR 205.283(c); 18 U.S.C. 1001.

J. All applications for refund must be filed in duplicate. A copy of each application will be available for public inspection in the Public Reference Room of the Office of Hearings and Appeals, Room 1E–234, 1000 Independence Avenue SW., Washington, D.C. Any claimant whose application contains confidential information must so indicate on the first page of its application and submit two additional copies of its application from which the information which the applicant claims is confidential has been deleted, together with a statement specifying why any such information is believed to be privileged or confidential.

K. All applications should be sent to: GCO Minerals Company Consent Order Refund Proceeding, Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20585.

L. Applications must be postmarked within 90 days after publication of this Decision and Order in the Federal Register. *See* 10 CFR 205.286. All applications for refund received within the time limit specified will be processed pursuant to 10 CFR 205.284 and the procedures set forth in this Decision and Order.

It Is Therefore Ordered That:

(1) Applications for Refunds from the fund remitted to the Department of Energy by GCO Minerals Company pursuant to the Consent Order executed on June 7, 1984 may now be filed.

(2) All applications must be filed no later than 90 days after publication of this Decision and Order in the Federal Register.

Dated: April 15, 1986.

George B. Breznay,

Director, Office of Hearings and Appeals.

Fuels and Fuel Additives; Reconsideration of Waiver Granted Under Section 211(f) of the Clean Air Act

AGENCY: Environmental Protection Agency.

ACTION: Reconsideration of Waiver.

SUMMARY: The Environmental Protection Agency (EPA) is granting a petition to reconsider a conditional waiver granted under section 211(f) of the Clean Air Act to E.I DuPont de Nemours and Company, Inc. (DuPont) on January 10, 1985. This reconsideration is based on EPA's analysis of relevant data and information in light of a petition for reconsideration by the Oxygenated Fuels Association (OFA) received on March 18, 1985.

DATE: Comments should be submitted on or before May 22, 1986.

ADDRESS: Copies of the non-confidential information relative to this waiver application and subsequent submissions are available for inspection in public docket EN–84–06 at the Central Docket Section (LE–131) of EPA, Gallery 1—West Tower, 401 M Street, SW., Washington, D.C. 20460, (202) 382–7548 between the hours of 8:00 a.m and 4:00 p.m. Any comments from interested parties should be addressed to this docket, with a copy forwarded to Richard G. Kozlowski, Director, Field Operations and Support Division (EN–397), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying materials in the docket.

FOR FURTHER INFORMATION CONTACT: Sylvia I. Correa, Attorney/Advisor, Field Operations and Support Division (EN–397F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 382–2835.

SUPPLEMENTARY INFORMATION:

I. Background

Section 211(f)(1) of the Clean Air Act, 42 U.S.C. 7545(f)(1), states that effective March 31, 1977, it shall be unlawful for any manufacturer of any fuel or fuel additive to first introduce into commerce or to increase the concentration in use of any fuel or fuel additive for general use in light-duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Section 211(f)(4) of the Act, 42 U.S.C. 7545(f)(4), provides that the Administrator of EPA upon application of any manufacturer of any fuel or fuel additive may waive the prohibitions established under section 211(f)(1), if the Administrator determines that the applicant has established that such fuel or fuel additive or a specified concentration thereof, or the emission products of such fuel or additive or specified concentration thereof, will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to

section 206 of the Act. If the Administrator does not act to grant or deny an application within 180 days of receipt of the application, the waiver authorized by section 211(f)(4) shall be treated as granted.

DuPont submitted an application for a waiver fuel on July 16, 1984. A Federal Register notice was published August 9, 1984, acknowledging receipt of the application and soliciting comments. 49 FR 31947. On January 10, 1985, the Administrator granted the waiver, subject to certain conditions. A Federal Register notice of this decision was published on January 17, 1985. 50 FR 2615.

On March 18, 1985, OFA on behalf of its member companies filed timely petitions for reconsideration and for judicial review of the conditional waiver grant with the EPA and with the U.S. Court of Appeals for the District of Columbia Circuit, respectively. Subsequently, OFA also requested that EPA immediately stay a particular condition of the waiver—the Evaporative Index (EI) condition. Over the next several months, OFA and EPA discussed approaches to resolve the outstanding issues. On November 29, 1985, OFA petitioned the same Court of Appeals for a stay of the EI condition pending judicial review of the waiver decision.

On January 22, 1986, however, EPA and OFA filed a joint motion to defer further proceedings in the Court of Appeals for 120 days and OFA withdrew its motion for a stay of the EI condition pending review.

II. EPA's January 10, 1985 Decision

DuPont submitted an application to EPA requesting a waiver for the introduction into commerce of a gasoline-alcohol fuel consisting of a maximum of 3.7 weight percent fuel oxygen with a maximum of 5.0 percent by volume methanol and a minimum of 2.5 percent by volume cosolvent(s), with a proprietary corrosion inhibitor, or its equivalent, to be used in unleaded gasoline. The application specified that the blend would have to conform to American Society for Testing and Materials (ASTM) standard D439 for automotive gasoline volatility, including the June 1984 proposed revision.

At the time of the DuPont application, EPA had information concerning the relationship between evaporative emissions and fuel volatility. In evaluating DuPont's application in light of this information, the Agency concluded that control of volatility only to ASTM specifications appeared to provide insufficient control to assure that a methanol blend would not cause or contribute to excessive evaporative emissions. Moreover, evidence gathered in connection with the proposed revocation of the Petrocoal waiver tended to contradict DuPont's proposition that controlling volatility to ASTM specifications only would hold evaporative emissions to the levels obtained with conventional gasoline. *See* Proposed Revocation of Petrocoal waiver, 49 FR 11879 (March 28, 1984).

The Agency therefore believed that producing that blend in accordance with only the requirements specified by DuPont (ASTM specifications) would require a denial of the application since those specifications alone would not provide sufficient control of the volatility of the final fuel to warrant a finding that the fuel would not cause or contribute to failures of the evaporative emission standard.

However, in its application, DuPont had developed a tool to correlate the fuel volatility characteristics and the evaporative emissions of gasoline-alcohol fuels, the Evaporative Index,[1] which DuPont claimed would control the volatility of the blend so that its evaporative emissions levels would not be significantly different from those of commercial gasoline. Since the Agency believed that ASTM D439 would not adequately control evaporate emissions of the DuPont blend, the Administrator decided to grant the waiver on the condition that the finished fuel be blended to meet volatility specifications determined by the EI to ensure that the fuel would be no more volatile than the commercial gasoline it would displace from the market. The Administrator also placed limits on the maximum EI levels according to the ASTM schedule of seasonal and geographic volatility classes. 50 FR 2615; DuPont Decision Document at pp. 22–23.

Two other conditions were placed on the DuPont waiver. The first was the limitation that only DuPont's DGOI–100 corrosion inhibitor be used in the final fuel, with no allowance for an equivalent corrosion inhibitor. The second was the requirement that the methanol used in the blend meet a 99.85 percent purity level. 50 FR 2615.

As to the corrosion inhibitor formulation, although DuPont had requested the use of DGOI–100 or its equivalent in the waiver application, no information was provided to EPA by DuPont or any commenter on a procedure for determining equivalency. Given this lack of information, the agency had no recourse but to limit the corrosion inhibitor to that which had been tested by the applicant. Decision Document at pp. 25–26.

As to the specification for methanol purity, DuPont had stated in section XV of its application that the properties of the alcohols used could have important effects on the properties of the finished fuel. In response to queries from the Agency regarding the necessity to control the alcohols used in the blend, DuPont submitted the alcohol purity specifications referred to in the decision. Since alcohols meeting these specifications were used in the test fuel, the Agency had no basis for adopting less restrictive alcohol specifications, and thus adopted the specifications recommended by DuPont, Decision Document at page 30.

III. Discussion

A. OFA Petition

In its petition for administrative reconsideration of the DuPont waiver conditional grant, OFA sought removal of the EI condition as a volatility control. OFA argued that the removal of the EI limitation was essential to opening the market place to alcohol fuels. OFA asserted that the EI was unfair and discriminatory, since no other automotive fuel had to meet this stringent volatility control. Further, OFA believed that the EI condition placed the DuPont blend at a significant competitive disadvantage, so severe as to be tantamount to a denial of the waiver.

OFA argued that there is a limited "window" of opportunity for marketing DuPont blends as a result of EPA's lead phasedown regulations. OFA claimed that refiners were examining alternative octane enhancers to use in place of lead, and that refiners were, in general, already making decisions about how to replace the octane capability lost as a result of the lowered lead standard.

OFA also argued that ASTM specifications were sufficient to control volatility of the blend, reasoning that since ASTM included the basic control parameter for volatility, the Reid Vapor Pressure (RVP), the EI was unnecessary to control the vehicle's evaporative emissions.

OFA also claimed that EPA gave no weight to the difference in chemical reactivity of methanol blends. It claimed that methanol is significantly less reactive than gasoline, and thus would, even with equal total evaporative

[1] The Evaporative Index is defined by DuPont in Section X of its waiver application as: EI = 0.65 RVP + 0.14 (percent evaporated at 200° F) — 0.32 (percent evaporated at 158° F); where RVP = Reid Vapor Pressure as measured by Annex A3 of ASTM's "Proposed Specification for Automotive Spark-Ignition Fuel" (Dry Method).

VOL 51 ISS 77 AP 22 1986 UMI

emissions, result in less environmental harm.

In addition, OFA claimed that the DuPont blend would reduce hydrocarbon (HC) tailpipe emissions by 10 to 25 percent and reduce carbon monoxide emissions by 25 to 40 percent compared to commercial gasoline. Thus, OFA argued that EPA should have given some weight to the claimed substantial reductions in tailpipe emissions from the DuPont blend. When both evaporative emissions and tailpipe emissions (particularly for open-loop, carbureted vehicles) are considered, OF claims the use of DuPont waiver fuels would produce significantly lower HC emissions than use of commercial gasoline.

Moreover, OFA claimed that the DuPont blend (without the EI condition) would be limited to a three percent share of the total gasoline market, and that such a small share would have little, if any, net effect on the environment. It is also OFA's position that there are no available data indicating the DuPont blend fuels would result in greater evaporative emissions than commercial fuels of equivalent volatility (as measured by ASTM D–439).

Finally, OFA argued that the EI is unusable. OFA asserted that the EI's reproducibility is poor. Moreover, according to OFA, the EI is an unsuitable manufacturing parameter because it cannot be reliably measured or controlled. The practical effect of this uncertainty, OFA argued, was that the refiner would have to produce a product with an RVP about 1.0 to 1.4 pounds per square inch (psi) less than allowed. This reduces the potential market for DuPont blends to between the tenth and 25th percentile of fuels in use, and a refiner would not produce a product serving such a minor fraction of the refinery market.

OFA also challenged two other conditions of the DuPont waiver—the requirement for use of the DuPont proprietary corrosion inhibitor (DGOI–100) and the alcohol purity specifications for methanol. As to the corrosion inhibitor, OFA argued that EPA should have established specific criteria for the demonstration of the equivalency of other corrosion inhibitors to DuPont's proprietary formulation.

With regard to the alcohol purity specifications, OFA argued that a level of 90 to 95 percent purity for methanol (which it claimed was the normal methanol specification for use as an automotive fuel) would be sufficient to meet the requirements of the Clean Air Act, rather than the 99.85 percent level specified in the waiver decision.

OFA also raised some legal issues regarding the requirements of section 211(f) of the Clean Air Act. It pointed out that EPA's regulations require that vehicles certified under the evaporative emission standard have to be tested with Indolene 07 (which meets the fuel specifications in the certification regulations). Thus, OFA asserted, there is no standard to violate when other fuels are used, and it is unnecessary to demonstrate that a vehicle can pass the emission test while using the waiver fuel. OFA's other legal argument was that section 211(f) was aimed only at those fuels or fuel additives that cause physical damage to emission control systems, such that the vehicle could not meet emission standards if subsequently retested using Indolene, and that those fuels that cause excess emissions in use without such damage are to be regulated only under section 211(c).

B. EPA's Decision to Reconsider

1. Basic Assumptions

At the time of the original decision, the Administrator had concluded that the DuPont blend would be approvable only if the average volatility of fuels sold under the waiver were equal to the average volatility of the fuels they displaced, with the measure of volatility defined so that equality of evaporative emissions was ensured. *See* DuPont Decision Document, pg. 15. In this manner, the DuPont fuel would not cause more vehicles to exceed the applicable emissions standard.

Since the DuPont waiver was granted on January 10, 1985, however, information has been obtained which has a bearing on at least two of the basic assumptions made by the Agency at that time. First, in order to determine the EI values, the Agency originally analyzed data from the 1981, 1982 and 1983 Motor Vehicle Manufacturers' Association (MVMA) surveys of summer grade gasoline. Data from the 1984 survey were not available for analysis. Recently, summer MVMA data have been obtained for both 1984 and 1985. On the basis of MVMA's 1984 and 1985 data, EPA has determined that the average RVP of in-use gasolines is very close to the ASTM maximum limits for RVP. For example, for Class C cities, the average RVP numbers for *all* in-use gasolines (as opposed to only that percentage that actually met ASTM standards, as used in the DuPont waiver decision) in 1984 was 10.9 psi. Preliminary analysis of the MVMA summer 1985 data indicates that the average RVP of all in-use gasolines for Class C cities is 11.3 psi (the ASTM RVP limit for this class is 11.5).

Since the upper limit set by ASTM is not very far above the mean or median volatility of gasolines now being marketed, the question is whether a removal of the EI, and substitution of ASTM D439 in its place, would cause more vehicles to exceed the applicable emission standards.

Second, EPA's November 1985 Study of Gasoline Volatility and Hydrocarbon Emissions from Motor Vehicles (Notice of Availability published November 21, 1985, 50 FR 48100) has generated questions regarding the theoretical basis for the EI as a tool for predicting evaporation emissions. This study considered RVP as possibly the single most important parameter in assessing evaporative emissions.

Moreover, previous gasoline-alcohol waivers approved by EPA contained ASTM limitations, rather than the more stringent EI. The Agency is now involved in preliminary proceedings under section 211(c), which may result in promulgation of more uniform volatility limitations for all fuel types, including ones which have been granted waivers under section 211(f)(4).

2. Other Issues Related to Reconsideration

In arguing for the removal of the EI, OFA asserted that even if there were higher total evaporative emissions with the DuPont blend, the net environmental impact was minimal because those evaporative increases were first, less photochemically reactive and thus less dangerous to the environment; second, set off by the 10 to 25 percent decreases in tailpipe hydrocarbon emissions; and third, unimportant because of the small market share it protected for the DuPont blend.

EPA agrees that the general assumption has been that methanol is relatively low in photochemical reactivity. However, the measured decrease in ractivity have been estimated from photochemical modeling projections and smog chamber experiments based on data from a single day. There are some indications that the reactivity of methanol may increase the second or third day. Further, the industry-wide test used, Flame Ionization Detector (FID), does not measure all of the methanol molecules present. Thus, any consideration given to the lower reactivity of methanol emissions would have to take into acount the errors associated with the FID test as well as the uncertainties of the second and third day measurements.

As to the decrease in hydrocarbon tailpipe emissions, although there is evidence to suggest that there is some lowering of such emissions with blends, it is not clear that the reduction is as high as 10 to 25 percent. EPA's present estimate is that it would be a 3 percent reduction. Also, available data suggest that this reduction occurs primarily on cars built before 1981. Further, there is a question as to whether the Act allows EPA to grant a waiver if any standard (i.e., the evaporative HC standard) is violated, even if the net emissions of the pollutant are reduced.

OFA also argued that the market share of the blend would be only about three percent, and thus, that any environmental impact would be minimal. Such estimates are, of course, uncertain and EPA believes the share could be in excess of three percent, perhaps as much as six percent nationwide, (based on the share of other gasoline-alcohol blends presently sold). Further, because of current private restrictions on the pipeline shipment of alcohol-containing fuels and on the trading of such fuels, and because of the need for carefully prepared and supervised shipment and storage facilities, it is likely that a refiner or blender using the DuPont waiver would market in a narrow geographic area. If so, localized market shares could go well above the three percent envisioned by OFA. Finally, there is a question as to whether the Act allows EPA to grant a waiver that would cause violations of a standard even if the number of vehicles affected were small.

With regard to the other two conditions of the DuPont waiver challenged by OFA, the corrosion inhibitor formulation and the alcohol purity specifications, EPA has the following observations.

OFA's position regarding the alcohol purity specifications was that a 99.85 percent level of purity for the methanol was unnecessary to assure that the requirements of section 211(f) were met. OFA argued that the normal methanol specification for use as an automotive fuel was a 90 to 95 percent purity level, and pointed out that the 90 to 95 purity level was deemed adequate for the cosolvents. EPA requests additional information on this subject. Specifically, EPA requests information on whether, in light of DuPont's reliance on highly purified methanol in its test fuel, a lower purity level would affect the emissions product of the final fuel.

As to the corrosion inhibitor formulation, OFA sought the creation of a procedure by which the equivalency of other corrosion inhibitors could be established. As stated in the January 10, 1985 DuPont decision document, EPA agrees that the arguments for the use of other such formulations have merit. *See* DuPont Decision Document, p. 25. However, the Agency is unaware of a methodology for establishing such equivalency, but would welcome information as to how to establish such a methodology.

IV. Today's Action

Although EPA believes that the original DuPont waiver decision was correct based on the record existing at that time, for the reasons discussed in Part III above, the Agency is granting OFA's administrative petition for reconsideration of the waiver. The issues that have been raised, and which the Agency is today requesting comments on, are as follows:

1. Whether the EI should be adjusted or removed to respond to the rise in gasoline volatility since the original waiver grant. That is, is the EI still necessary or appropriate (vs. ASTM) given:
   - –The rise in volatility causing the difference between EI and ASTM to be greatly reduced;
   - —EPA's preliminary actions under section 211(c) which ultimately may deal with the volatility issue across the board;
   - —Questions raised by EPA's volatility study.

2. The prospective usage of the DuPont blend.

3. The environmental impact of using the waiver blend without an EI, including the issues raised by OFA regarding the emissions factor of the blend, such as:
   - —Lowered tailpipe hydrocarbon emissions,
   - —Lowered photochemical reactivity of methanol emissions.

4. Whether the specifications for methanol purity should be modified.

5. Whether an allowance should be provided for the demonstration of equivalency of other corrosion inhibitor formulations to DuPont's DGOI–100. If such allowance is made, should material testing alone (without vehicle mileage accumulation tests) suffice.

All information received pursuant to this notice will be placed in the docket.

Because there are still open quesions on the issues described above, however, I have decided to deny OFA's request for an immediate stay of the EI condition. In any event, I believe it would be inappropriate under the circumstances of this case to stay that condition without prior public participation.

In taking these actions, I have concluded that the decision of the District of Columbia Circuit Court of Appeals in the Petrocoal case—*American Methyl Corp.* v. *EPA*, 749 F.2d 826 (1984)—does not restrict my authority to reconsider the DuPont waiver under the present circumstances. In the *American Methyl* case, the court held that EPA did not have authority to reconsider or revoke the Petrocoal waiver under section 211(f) of the Act.[2] However, in that case EPA had not proposed revocation until several years after the waiver was granted and the fuel was already on the market, and after the waiver holder had invested substantial resources in developing and marketing the fuel. Moreover, the waiver applicant in that case vigorously opposed the proposed revocation.

The court apparently believed that Congress meant to protect the waiver holder's expectations and investments in such a situation by requiring EPA to regulate such a fuel in the same way it regulated other fuels already in the market—i.e., by rulemaking under section 211(c) of the Act.

In the present case, however, the changes OFA seeks and that EPA is considering would be beneficial to the parties most interested in producing DuPont fuel. Moreover, to the best of our knowledge, the fuel that would be permitted under the waiver has not yet been introduced into commerce, and neither the waiver holder, DuPont, nor any other interested party has invested in the marketing of this additive fuel. Indeed, the parties most interested in relying on the waiver, those represented by OFA, have urged EPA in a timely manner to reconsider the waiver. For these and similar reasons, I do not believe that the holding in *American Methyl* applies to facts such as these and, thus, does not limit my authority under section 211(f) in this case.

Dated: April 10, 1986

Lee M. Thomas

Administrator.

BILLING CODE 6560–50–M

[2] In a later opinion, the court itself vacated the Petrocoal waiver and remanded for new proceedings under section 211(f) Motor Vehicle M'frs A'ssn v. EPA, 768 F.2d 385 (1985), *cert. don.*, ——— U.S. ———.

FEDERAL COMMUNICATIONS COMMISSION

Routine Licensing of Large Networks of Small Antenna Earth Stations Operating in the 12/14 GHz Frequency Bands

AGENCY: Federal Communications Commission.

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

ACTION: Declaratory order.

SUMMARY: This document sets out processing procedures for applications requesting authorization of satellite communications networks operating in the 12/14 GHz frequency bands and employing large numbers of technically identical earth station antennas less than 5 meters in diameter. It also sets technical criteria for the routine licensing of antennas as small as 1.2 meters in diameter in these bands.

EFFECTIVE DATE: This order is effective upon release.

ADDRESS: Federal communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Rosalee C. Gorman or Joe Harcarufka, Common Carrier Bureau, (202) 634–1824.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Declaratory Order, adopted April 3, 1986, and released April 9, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the Domestic Facilities Public Reference Room, (Room 6220), 2025 M Street NW., Washington, DC 20554. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

The Chief, Common Carrier Bureau, acting pursuant to delegated authority, has adopted a Declaratory Order which sets out processing procedures for applications requesting authorization of satellite communications networks operating in the 12/14 GHz frequency bands which employ large numbers of technically identical earth station antennas. In addition, this declaratory order sets initial technical criteria for the routine authorization of the particular class of earth station antennas as small as 1.2 meters in these bands for narrowband data rate transmissions.

Pursuant to the conditions and procedures established by this order, several pending applications will be granted by separate authorization in which a blanket license will be issued for the overall network without requiring site specific information on each individual antenna. Future applications for networks of this type or any other requests for authorization of a large number of technically identical facilities using antennas of less than 5 meters in diameter must include the information listed below. In addition, applications requesting authorization of "hub" networks must also comply with the technical specifications given below.

The following information is required: a general narrative statement describing the applicant and overall system operation, including Form 430; a Form 403 and associated technical specifications for each large (i.e., 5 meters or more in diameter) hub station; one Form 403 and associated technical specifications for each representative type of small (i.e., diameter of less than 5 meters) earth station; designation of a point of contact to maintain records of location and frequency use; and description of a safety interlock system if remote control authority is requested.

To be routinely authorized, a "hub" network authorized on a blanket basis in the 12/14 GHz band must not exceed the following parameters: power density of −14.0 dBW/4 KHz into a 1.2 meter earth station and a gross bit rate of 512 Kbps for the inbound uplink; for the outbound link, a maximum satellite carrier EIRP density of +8.0 dBW/4 KHz, a gross bit rate of 3.088 Mbps from a central hub earth station with at least a 5.0 meter antenna and an EIRP of 78.3 dBW. Other antennas 1.2 meters or greater in diameter will also be routinely licensed for transmissions in the 14 GHz band if the earth station and satellite parameters do not exceed those for a blanket hub network authorization. Any application for a system exceeding these parameters must make a showing that its operations will not cause interference under conditions of uniform 2° satellite orbital spacing.

Each pending and future applicant will be authorized to construct and operate a specified number of earth stations with construction to be completed within 48 months of the date of authorization. The license term for a blanket authorization will be ten years and licensees will be required to specify the number of stations actually constructed on a yearly basis. Requests for authority to construct additional stations for networks given a blanket authorization will be treated as minor modifications and will be given a corresponding extension of time to complete construction, but the license will not be extended beyond the original ten year term.

Accordingly, pursuant to Section 0.291 of the Commission's rules on delegations of authority, it is ordered that the foregoing procedures will be applied to the grant of pending applications for networks of the type described herein. Future applications for these types of systems or others employing large numbers of technically identical facilities will be processed routinely in accord with these procedures.

It is further ordered that earth station antennas 1.2 meters and larger will be routinely licensed in the domestic Fixed-Satellite Service for transmission in the 14.0–14.5 GHz band in accordance with the conditions specified above.

Albert Halprin,
Chief, Common Carrier Bureau.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: New Information Collection
Title: Civil Rights Higher Education and Rehabilitation Act Survey

Abstract: Annually evaluates compliance with nondiscrimination regulations by State emergency management agencies. Administered by FEMA program personnel. Areas covered: administrative procedures, training, construction, and planning. Will be used to provide technical assistance to accomplish voluntary compliance and as basis for budgetary recommendations to the Director of FEMA.

Type of Respondents: State or Local Governments
Number of Respondents: 55
Burden Hours: 138

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646–2624, 500 C Street, SW., Washington D.C. 20472.

Comments should be directed to Mike Weinstein, Desk Officer for FEMA, Office of Information and Regulatory Affairs, OMB, Rm. 3235, New Executive Office Building, Washington, D.C. 20503.

Walter A. Girtenstas,
Director, Administrative Support.

BILLING CODE 6718-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in section 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 021–000661–004.
Title: The Port Authority of New York and New Jersey Terminal Agreement.
Parties:
The Port Authority of New York and New Jersey
Universal Maritime Service Corporation

Synopsis: The proposed amendment would: (1) Provide for an addition to the leased premises: (2) provide for the use of the "Second Additional Crane" upon completion; and (3) provide for the use of areas prior to the completion of construction work. The parties have requested a shortened review period.

Agreement No.: 202–010025–007
Title: Red Sea Rate Agreement.
Parties:
A.P. Moller-Maersk Line NedLloyd Lijnen, B.V.
Barber Blue Sea.

Synopsis: The proposed amendment would modify the scope of the agreement to eliminate ports in Saudi Arabia. The parties have requested a shortened review period.

By order of the Federal Maritime Commission.

Dated: April 17, 1986.

Tony P. Kominoth,
Assistant Secretary.

[FR Doc. 86-8946 Filed 4-21-86; 8:45 am]
BILLING CODE 6730-01-M

Peruvian Cargo Reservation, Supreme Decree No. 009–86–TC: Request for Comments

April 17, 1986.

The Federal Maritime Commission has received a number of letters and telexes from shippers and shipper organizations expressing concern about the impact of the Government of Peru's Supreme Decree No. 009–86–TC (Decree) on shipping in the United States trades with Peru. The Decree was issued on February 28, 1986 and, *inter alia*, reserves to Peruvian-flag vessels 100 percent of import or export cargo generated by Peru's foreign trade. Some reduction of the amount of cargo reserved is apparently contemplated under certain circumstances for shipping lines of the "flag of reciprocity," and with specific authorization by the Peruvian Office of Aquatic Transport when no national-flag vessel is available.

Union Carbide Corporation has, by telex dated March 12, 1986, expressed grave concern regarding the effect of this Decree upon the level of shipping service and rates in the U.S./Peru trade and asked the Commission to institute an investigation into possible conditions unfavorable to shipping in the U.S. foreign trade resulting from this Decree, pursuant to section 19(1)(b) of the Merchant Marine Act, 1920, 46 U.S.C. app. 876(1)(b).[1] Similar concerns and requests for Commission action have been received from Shippers for Competitive Ocean Transportation, the New York Chamber of Commerce and Industry, the National Export Traffic League, and the Monsanto Corporation. These communication allege that the Peruvian Decree prevents competition among shipping lines, denies the shipping public the ability to use the carriers of their choice, and has created a great deal of current confusion among shippers as to which vessels they may use and whether they may be subject to substantial penalties for use of non-Peruvian-flag vessels. Copies of these letters and telexes are available for examination at the Washington, DC office of the Commission, 1100 L Street NW., Washington, DC, Room 11101.

On its face, Supreme Decree No. 009–86–TC would preclude the use of U.S.-flag vessels or third-flag vessels for shipments between Peru and the United States by American importers and exporters. To that extent, at least, the Decree appears to create conditions unfavorable to shipping in the U.S. trade with Peru. In order for the Commission to make a thorough evaluation of conditions in the trade and assess the actual impact of Peruvian Supreme Decree 009–86–TC, interested persons are requested to submit views, arguments or data relating to this matter no later than May 18, 1986. Responses shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573 in an original and 15 copies.

The Commission has also requested that the Department of State continue and intensify its efforts to reach a resolution of this matter through diplomatic channels with the Government of Peru, and to inform the Commission within 30 days of the prospects for such a resolution. Based upon the comments received and the response of the Department of State, the Commission will promptly consider what, if any, further action should be taken in this matter. Such further action could include the promulgation of appropriate rules to meet any conditions unfavorable to shipping in the U.S. trade with Peru which may be found to exist as a result of Supreme Decree 009–86–TC.

By the Commission.

Tony P. Kominoth,
Assistant Secretary.

[FR Doc. 86-8982 Filed 4-21-86; 8:45 am]
BILLING CODE 6730-01-M

[1] Section 19(1)(b) of the Merchant Marine Act, 1920 authorizes and directs the Federal Maritime Commission to "make rules and regulations affecting shipping in the foreign trade not in conflict with law in order to adjust or meet general or special conditions unfavorable to shipping in the foreign trade, . . . which arise out of or result from foreign laws, rules, or regulations . . ."

[Docket No. 86–13]

Application of Tariff Filing Requirements to the Carriage of Forest Products Under the Shipping Act of 1984; Notice of Filing of Petition for Declaratory Order, U.S. Atlantic and Gulf/Australia-New Zealand Conference

Notice is given that a petition for declaratory order has been filed by the U.S. Atlantic & Gulf/Australia-New Zealand Conference seeking that the Commission determine the applicability of the tariff-filing exemption for forest products in section 8 of the Shipping Act of 1984, 46 USC app. 1707(a)(1), as it relates to the movement of such cargoes in containers.

Interested persons may inspect and obtain a copy of the petition at the Washington Office of the Federal Maritime Commission, 1100 L. Street, NW., Room 11101. Interested persons may submit replies to the Secretary, Federal Maritime Commission, Washington, DC 20573 on or before May 14, 1986. An original and fifteen copies of such replies shall be submitted and a copy thereof served on the filing party, Marc J. Fink, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street, NW., Washington, DC 20006. Replies shall contain the complete factual and legal

VOL 51 ISS 77 APR 22 1986 UMI

presentation of the replying party as to the desired resolution of the petition.

Tony P. Kominoth,
Assistant Secretary.

BILLING CODE 6720-01-M

FEDERAL RESERVE SYSTEM

Applications To Engage de Novo in Permissible Nonbanking Activities; Algemene Bank Netherland N.V. et al.

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in section 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 12, 1986.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Algemene Bank Netherland N.V.*, Amsterdam, The Netherlands, *A.B.N.—Stichting*, Amsterdam, The Netherlands, *ABN Company, Inc.*, Wilmington, Delaware, and *LaSalle National Corporation*, Chicago, Illinois; to engage *de novo*, through their subsidiary LaSalle Brokerage Services, Inc., Chicago, Illinois, in discount securities brokerage activities pursuant to section 225.25(b)(15) of the Board's Regulation Y.

B. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *San Diego Financial Corporation*, San Diego, California; to engage through its subsidiary SDT Discount Brokerage, Inc., San Diego, California, in discount securities brokerage activities and underwriting and dealing in government obligations and money market instruments pursuant to §§ 225.25(b) (15) and (16) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 17, 1986.

James McAfee,
Associate Secretary of the Board.

BILLING CODE 6210-01-M

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; Investors Trust Financial Corporation et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 16, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street NW., Atlanta, Georgia 30303:

1. *Investors Trust Financial Corporation*, Duluth, Georgia; to become a bank holding company by acquiring 100 percent of the voting shares of Investors Trust Bank, Duluth, Georgia (currently, the Investors Trust Savings & Loan Association, Duluth, Georgia).

B. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Illinois Corporation*, Evanston, Illinois; to merge with First Burlington Corporation, LaGrange, Illinois, thereby indirectly acquiring LaGrange Bank and Trust Company, LaGrange, Illinois, and First Burlington Bank, Willowbrook, Willowbrook, Illinois.

2. *First Wilmington Corp.*, Wilmington, Illinois; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Wilmington, Wilmington, Illinois.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Ben Wheeler Bancshares, Inc.*, Ben Wheeler, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of First State Bank of Ben Wheeler, Ben Wheeler, Texas.

2. *Texas Community Bancshares, Inc.*, Dallas, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of BancTexas Sulphur Springs, N.A., Sulphur Springs, Texas.

Board of Governors of the Federal Reserve System, April 17, 1986.

James McAfee,
Associate Secretary of the Board.

BILLING CODE 6210-01-M

Ameritrust Corp. et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 14, 1986.

A. Federal Reserve Bank of Cleveland (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Ameritrust Corporation*, Cleveland, Ohio, and *First Indiana Bancorp*, Elkhart, Indiana; to acquire 100 percent of the voting shares of State Bank of Lima, Howe, Indiana.

B. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Spurgeon Financial Corporation*, Spurgeon, Indiana; to merge with Pike Bancshares, Inc., Petersburg, Indiana, thereby indirectly acquiring Pike County Bank, Petersburg, Indiana.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *First Eastern Bancshares of Texas, Inc.*, Eustace, Texas; to become a bank holding company by acquiring 89.6 percent of the voting shares of First State Bank, Eustace, Texas.

Board of Governors of the Federal Reserve System, April 16, 1986.

James McAfee,
Associate Secretary of the Board.

BILLING CODE 6210-01-M

First Commerce Corp. et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 14, 1986.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *First Commerce Corporation*, New Orleans, Louisiana; to engage *de novo* through its subsidiary First Commerce

VOL 51 ISS 77 APR 22 1986 UMI

Service Corporation, New Orleans, Louisiana, in data processing and data transmission services pursuant to § 225.25(b)(7) of the Board's Regulation Y.

B. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Victoria Bankshares, Inc.*, Victoria, Texas; to expand the geographic scope of its subsidiary Transact Financial Corporation, Victoria, Texas, to include the entire United States. Transact Financial Corporation engages in lending activities pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 10, 1986.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

NIOSH Board of Scientific Counselors; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control (CDC) announces the following National Institute for Occupational Safety and Health (NIOSH) committee meeting:

Name: Board of Scientific Counselors.
Date: May 13-14, 1986.
Place: Auditoriums A and B, Centers for Disease Control, 1600 Clifton Road, NE., Atlanta, Georgia 30333.
Time and Type of Meeting:
Closed: 9:00 a.m.—12:00 noon, May 13, 1986—Auditorium A
Open: 1:00 p.m.—4:30 p.m., May 13, 1986—Auditorium A
Open: 9:00 a.m.—Adjournment, May 14, 1986—Auditorium B.

Contact Person: Elliott S. Harris, Ph.D., Executive Secretary, NIOSH Board of Scientific Counselors, NIOSH, CDC, Building 1, Room 3007, 1600 Clifton Road, NE, Atlanta, Georgia 30333. Phone: (404) 329-3773.

Purpose: The Board is charged with advising the Director of the National Institute for Occupational Safety and Health on the scientific quality and efficacy of the Institute's research as related to the Institute's goals.

Agenda: Agenda items for the meeting will include announcements, consideration of minutes of the previous meeting, report of the Subcommittee appointed to evaluate the NIOSH grants program, NIOSH cooperative agreements, NIOSH health promotion activities, and subjects for future Board agendas. Beginning at 9:00 a.m. through 12 noon, May 13, Bard members will discuss certain NIOSH program resources (both financial and personnel) and the allocation thereof. This portion of the meeting will be closed to the public in accordance with the provisions set forth in Sections 552b(c)(6) and (c)(9)(B), Title 5 U.S. Code, and the Determination of the Director, Centers for Disease Control, pursuant to Pub. L. 92-463.

The portion of the meeting so indicated is open to the public for observation and participation. Anyone wishing to make an oral presentation should notify the contact person listed above as soon as possible before the meeting. The request should state the amount of time desired, the capacity in which the person will appear, and a brief outline of the presentation. Oral presentations will be scheduled at the discretion of the Chairperson and as time permits. Anyone wishing to have a question answered during the meeting by a scheduled speaker should submit the question in writing, along with his or her name and affiliation, through the Executive Secretary to the Chairperson. At the discretion of the Chairperson, and as time permits, appropriate questions will be asked of the speakers.

Agenda items are subject to change as priorities dictate.

A roster of members and other relevant information regarding the meeting may be obtained from the contact person listed above.

Dated: April 11, 1986.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-19-M

Food and Drug Administration

Top Hand Iron Injection; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) sponsored by Boehringer Ingelheim Animal Health, Inc., providing for use of Top Hand Iron Injection (colloidal ferric oxide in dextrin solution) for prevention and treatment of iron deficiency anemia in baby pigs. The sponsor requested the withdrawal of approval.

EFFECTIVE DATE: May 2, 1986.

FOR FURTHER INFORMATION CONTACT: Vitolis E. Vengris, Center for Veterinary Medicine (HFV-214), Food and drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3163.

SUPPLEMENTARY INFORMATION: Boehringer Ingelheim Animal Health, Inc., 2621 North Belt Highway, St. Joseph, MO 64502, is sponsor of NADA 39-281 which provides for use of Top Hand Iron Injection (colloidal ferric oxide in dextrin solution) for prevention and treatment of iron deficiency anemia in baby pigs. The application was originally approved January 10, 1969. In a letter dated January 29, 1986, the firm requested withdrawal of approval of the NADA because the drug product is no longer being marketed and waived an opportunity for hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 *Withdrawal of approval of applications* (21 CFR 514.115), notice is given that approval of NADA 39-281 and all supplements thereto for Top Hand Iron Injection is hereby withdrawn, effective May 2, 1986.

In a final rule published elsewhere in this issue of the **Federal Register**, the regulation reflecting this approval is removed.

Dated: April 15, 1986.

Gerald B. Guest,

Acting Director, Center for Veterinary Medicine.

BILLING CODE 4160-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

School Construction Priority List, FY 1987

April 17, 1986.

SUMMARY: This notice is published in exercise of authority delegated by the Secretary of Interior to the Assistant Secretary—Indian Affairs by 209 DM8. The school construction priority list has been revised for FY 1987 as required by Pub. L. 95-561 (92 Stat. 2319 section 1125(O)) which requires that: At the time any budget request for school construction is presented, the Secretary shall publish in the **Federal Register** and submit with the budget request the current list of all school construction priorities.

This notice for FY 1987 provides the current revised list of proposed construction projects.

Construction of these projects is subject to the availability of funds and/or the status of currently committed construction projects approved by Congress. Committed projects are Two Eagle River Indian High School, Montana, and Rocky Boy High School, Montana.

The current list of school construction projects applies to FY 1987 based upon the Bureau's criteria for ranking projects using "unhoused" students. A revised list is developed and published for each succeeding fiscal year. The BIA, Contract and Previously Private School Construction Ranking—FY 1987 is:

1. St. Francio Indian School, SD.
2. Turtle Mountain Middle School, ND.

A reivew of the Oglala Community High School is underway, as directed by Congress, to determine whether or not it should be ranked. No other applications are ranked pending the development of a master plan for the Bureau of Indian Affairs Education. The plan will be developed during FY 1987 so that new applications for construction can be considered for FY 1988.

FOR FURTHER INFORMATION CONTACT: Deputy Director, Office of Facility Management, Box 1248, Albuquerque, New Mexico 87103, (505) 766-2825.

Ross O. Swimmer,

Assistant Secretary—Indian Affairs.

BILLING CODE 4310-02-M

Bureau of Land Management

New Mexico; Availability of Draft Roswell Resource Area Management Framework Plan Amendment (MFPA)/ Environmental Assessment (EA)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability of draft MFPA/EA.

SUMMARY: Pursuant to section 102(2) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management, Roswell Resource Area, Roswell, New Mexico, has prepared a Draft EA to amend the Fort Stanton MFP.

The Draft MFPA/EA analyzes the environmental impacts that would result from designating a right-of-way corridor for facilities associated with a new regional airport, and from designating a site for a community material pit. A no-action alternative is also analyzed in the document.

FOR FURTHER INFORMATION CONTACT: Copies of the document are being made available to the public who are invited to express their comments on the Draft MFPA/EA. Written comments must be received by June 20, 1986.

Comments should be sent to: Phil Kirk, Area Manager, BLM, Roswell Resource Area, P.O. Box Drawer 1857, Roswell, NM 88201.

Dated: April 14, 1986.

Monte G. Jordon,

Associate State Director.

BILLING CODE 4310-FB-M

Carson City District Advisory Council; Meeting

DATE: May 22, 1986.

ADDRESS: 1535 Hot Springs Road, Suite 300, Carson City, Nevada.

SUMMARY: The Council will meet at 9:00 a.m. The agenda will include election of officers, multiple-use resource management, and comments from the public (11:00 a.m.). A field trip of public firewood cutting areas near Carson City will follow in the afternoon. Anyone may attent the meeting and field trip but must provide their own transportation.

FOR FURTHER INFORMATION CONTACT: Steve Weiss, BLM Public Affairs Officer, 1535 Hot Springs Road, Suite 300, Carson City, NV, (702) 882-1631.

Dated: April 11, 1986.

Thomas J. Owen,

District Manager.

BILLING CODE 4310-HC-M

Bureau of Reclamation

Mid-Pacific Region, CA; Intent To Prepare an Environmental Statement/ Environmental Impact Report

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 and the provisions of the California Environmental Quality Act, the Department of the Interior and the Stockton East Water District, Central Joaquin Water Conservation District and Oakdale Irrigation District will prepare a joint Environmental Impact Statement/Environmental Impact Report (EIS/EIR) on the Farmington Canal Project located in Stanislaus, Calaveras and San Joaquin Counties, California. The EIS/EIR is being prepared in response to a request by Stockton East and Central San Joaquin for Pub.L. 84-984 loans for the Bureau of Reclamation. The loan will be used to construct storage and conveyance facilities to deliver 305,000 acre-feet of water per year from the Stanislaus River to agricultural, municipal and industrial water users in the Districts. Stockton East would get 75,000 acre-feet; Central San Joaquin, 80,000 acre-feet; and Oakdale 150,000 acre-feet. The joint environmental document would address the impacts of construction and operating the project.

The purpose of the proposed project for Stockton East and Central San Joaquin would be to substitute surface water for groundwater, currently being drawn from over-drafted ground-water basins. Oakdale would use the project to divert its own Stanislaus River water rights water in place of its North Main flume to an existing distribution system serving 25,500 acres. Water captured in New Melones Reservoir, would be diverted from the Stanislaus River at Goodwin Dam and conveyed to the service area. Facilities which would be constructed include a diversion at Goodwin Dam, approximately 3 miles of tunnel to convey water for all three districts, and 8 miles of joint-use canal to convey water to a 12,000 acre-foot storage reservoir located at Shirley Gulch from which Central San Joaquin will distribute water to its 30,000 acre service area. Another 12 miles of canal and a small section of tunnel would be built to transport Stockton East's water from Shirley Gulch to the Calaveras River. An ancillary system would then distribute the water to users in the 22,500-acre service area.

Alternatives which are under consideration in the EIS/EIR include various canal and tunnel alignments, designs, sources of water supplies, and types of storage requirements.

A workshop to solicit information from public entities and persons for determining the scope of the environmental document and the significant issues related to the proposed action will be held at the Farmington Elementary School, 25233 East Highway 4, Farmington, California, on May 21, 1986, at 7:30 p.m. Persons unable to attend the meeting are invited to submit written comments by May 26, 1986, to any of the addresses listed below. For further information on the meeting or the project, please contact:

William D. Payne, Environmental Specialist, Bureau of Reclamation, Mid-Pacific Region, MP-750, 2800 Cottage Way, Sacramento, CA 95825-1898, Telephone: 916/978-4954

Reid W. Roberts, Secretary, Central San Joaquin Water Conservation District, 311 East Main Street, Suite 203, Stockton, CA 95202, Telephone: 209/941-6714

Edward M. Steffani, General Manager, Stockton East Water District, P.O. Box 5157, Stockton, CA 95205-0157, Telephone: 209/948-0333.

VOL 51 ISS 77 AP 22 1986 UMI

Dated: April 17, 1986.

C. Dale Duvall,

Commissioner.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30803]

Southwestern Michigan Railroad Co., Inc., d/b/a Kalamazoo, Lake Shore & Chicago Railway; Acquisition and Operation Exemption; Chesapeake and Ohio Railway Co.

Southwestern Michigan Railroad Company, Inc., d/b/a Kalamazoo, Lake Shore & Chicago Railway (KLSC) has filed a notice of exemption to acquire and operate the line of The Chesapeake and Ohio Railway Company between MP 17.27, east of Hartford, and MP 30.55 at Paw Paw, a distance of 13.28 miles in Van Buren County, MI. KLSC has also acquired incidental trackage rights over 1.6 miles of track between its line and Hartford for connection with the C&O's Chicago-Grand Rapids main line. Any comments must be filed with the Commission and served on John D. Heffner, Esq., Gerst & Heffner, 1133 15th Street NW., Suite 1100, Washington, DC 20005.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: April 4, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30725]

Indiana Hi-Rail Corp.;—Exemption

AGENCY: Intestate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempts: (a) The Garden Spot & Ohio (HS&O) from the requirements of 49 U.S.C. 10901 for its acquisition of certain rail lines now owned by Illionis Central Gulf Railroad Company (ICG) in Illinois, Indiana, and Kentucky; (b) Indiana Hi-Rail Corporation (IHR) from the requirements of 49 U.S.C. 11343 for its acquisition of these lines from ICG and its control (if any) of GS&O after GS&O aquires carrier property; and (c) IHR from the requirements of 49 U.S.C. Subtitle IV, except sections 10903–10906, for its operation of the lines after transfer of ownership to GS&O. The lines extend from: milepost 204.90 at Browns, IL to milepost 246.22 in Evansville, IN; from milepost 0.0 milepost 3.32 in Evansville; and from milepost 10.4 at Henderson, KY to milepost 15.85 at Wilson, KY. IHR will grant ICG trackage rights over that portion of the line between Browns and Grayville, IL, and IHR will acquire from Seaboard System Railroad, Inc. trackage rights between Evansville and Henderson. These transactions are exempt under the class exemption in 49 CFR 1180.2(d)(7).

DATES: The exemption for the purchase by IHR will be effective May 2, 1986. Petitions to reopen must be filed by May 12, 1986.

ADDRESSES: Send pleadings referring to Finance Docket No. 30725 to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission Washington, DC 20423.

(2) Petitioners' Representative: Richard A. Allen, Suite 300, 2033 K Street NW., Washington, DC. 20006.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area) or toll free, (800) 424–5403.

Decided: April 1, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Commissioner Lamboley concurred in part and dissented in part with a separate expression.

James H. Bayne,

Secretary.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet in Room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, NW. in Washington, DC on May 20, 1986, beginning at 8:30 a.m.

The purpose of the meeting is to discuss topics and questions which may be recommended for inclusion on future Joint Board examinations in actuarial mathematics and methodology referred to in Title 29 U.S. Code, section 1242(a)(1)(B).

A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) has been made that the subject of the meeting falls within the exceptions to the open meeting requirements set forth in Title 5 U.S. Code, section 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Dated: April 16, 1986.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

BILLING CODE 4810-25-M

DEPARTMENT OF JUSTICE

Office of Justice Programs

President's Child Safety Partnership; Meeting

AGENCY: Office if Justice Programs, Justice.

ACTION: Notice of Hearings.

SUMMARY: The Office for Victims of Crime announces the second in a series of hearings to be held by the President's Child Safety Partnership.

SUPPLEMENTARY INFORMATION: The President's Child Safety Partnership (hereafter referred to as the Partnership) will hold a series of five public hearings on the issue of child safety. The Partnership, which was announced by the President on April 28, 1985, and which held its initial meeting on January 16, 1986, consists of 26 members from the public, private (both corporate and nonprofit), state and local, and Federal sectors, and includes a wide range of expertise in fields related to child safety. It's first public hearing was held on April 15-16 in New York City.

The Partnership functions solely as an advisory committee in full compliance with the provisions of the Federal Advisory Committee Act.

The Partnership members recognize the magnitude and complexity of the child safety problem, and realize that the only way to effectively address it is through the help and support of a wide group of organizations, agencies, and individuals. Consequently, the Partnership will seek the input of these groups on a broad range of issues. The input received through both written and oral testimony will be used by the Partnership to make recommendations to the President on ways in which we can both prevent the victimization of our country's children and more fully involve the private sector in responding to the problem.

The scope of the Partnership inquiry and the recommendations the Partnership will make will be concerned with a broad range of offenses against children, specifically: Child physical abuse and neglect; child sexual abuse and molestation; theft, assault, robbery, and murder of children; parental and stranger abduction of children; exploitation of children (prostitution, pornography), runaway children (recognizing the extreme vulnerability of runaways to victimization); and drug abuse.

The hearing will seek to examine child safety initatives involving or supported by the private sector and to idendify specific issues of child safety requiring priority attention. The hearing will also examine model program approaches to prevent and respond to child victimization as well as legislative and Federal coordination issues.

Oral and written testimony will be solicited from the public. The estimony will be used as a basis for making recommendations to the President.

Location/Dates

The second public hearing of the Partnership will be held:

May 1, 1986, at the Dr. Martin Luther King Unit of the Chicago Boys and Girls Clubs, 2950 West Washington Boulevard, Chicago, Illinois 60612
Seats available to the public: 200
The hearing will be held from 9:00 a.m. to approximately 6:00 p.m.

Additional regional hearings will be held in Austin, Texas (late May), Denver, Colorado (mid-June), and Seattle, Washington (mid-July). Specific hearing locations and dates for these hearings will be announced in a subsequent Federal Register Notice.

Procedure

The Partnership invites all interested parties to submit written testimony or program information regarding any of the aforementioned aspects of child safety. Persons interested in providing written testimony should submit it to: Lois Haight Herrington, Assistant Attorney General, Office of Justice Programs, 633 Indiana Avenue NW., Washington, DC 20531. If possible, all written testimony should be typed and submitted in duplicate. All written testimony is due not later than September 30, 1986, but should be submitted as soon as possible for maximum consideration.

Persons interested in providing oral testimony at the hearing in Chicago should notify Assistant Attorney General Herrington in writing (same address as above), as soon as possible, and in no event later than April 25, 1986. The Partnership will make the final determinations as to what persons/organizations will be invited to provide oral testimony.

Conduct of Hearings

The hearings, which will be open to the public, will begin at 9:00 a.m. The Chairman of the Partnership, or his designee, will preside at the hearings. Other members of the partnership will join the Chairman. These will not be judicial or evidentiary-type hearings and there will not be any cross-examination. However, clarifying questions and discussion by Partnership members may follow each presentation. There will be time set aside at the conclusion of the hearings for brief comments by members of the public.

Any further precedural rules needed for the proper conduct of the hearings will be annouced by the presiding official.

A transcript of the hearings will be made. The entire record of the hearings, including transcript, will be retained by the Partnership, and will be available to the public. Any person may purchase a copy of the transcript from the transcribing organization.

For further general information of the Partnership hearings contact: Mr. William Modzeleski, President's Child Safety Partnership, 633 Indiana Avenue, NW., Washington, DC 20531. Phone: (202) 272-6500.

Dated: April 17, 1986.

Lois Haight Herrington,

Assistant Attorney General, Office of Justice Programs.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-16,328]

Black & Decker Company, Inc., Allentown, PA; Negative Determination Regarding Application for Reconsideration

By an application dated March 18, 1986, counsel for the United Electrical Workers of America, Local 128, requested administrative reconsideration of the Department of Labor's notice of determinations of trade adjustment assistance to workers of Black & Decker Company, Inc., Allentown, Pennsylvania. The notice of determinations was published in the Federal Register on January 28, 1986 (51 FR 3524).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted when:

(1) if it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) if, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

Counsel for the union claims that the Allentown workers cannot be separately identified by product. Counsel also claims that toasters and toaster ovens are not different products and that foreign competition which impacts on toasters would impact on toaster ovens as well. Counsel asserts that the Department's investigation should have considered U.S. exports of toastes ovens and waffle irons. Finally, its claimed that production of waffle irons and toaster oven components will be moved overseas.

Findings in the investigative case file show that all of the statutory criteria of the Trade Act of 1974 were met for workers producing coffee percolators and toasters at Black & Decker's Allentown, Pennsylvania plant. However, the findings did not substantiate that increased imports of toaster ovens and waffle irons contributed importantly to worker separations.

The primary product manufactured at the Allentown plant was toaster ovens. The production of coffee percolators and toasters did not represent a significant portion of Allentown's production and, therefore, workers producing components for these products would not have qualified under worker eligibility requirements of the Trade Act of 1974 for trade adjustment assistance.

Toaster ovens and toasters are not the same product especially with regards to the impact of foreign competition. Workers producing toaster ovens were denied because the findings showed that increased imports did not contribute importantly to worker separations at Allentown. The "contributed importantly" test is generally demonstrated through the Department's survey of the subject firm's customers. The Department's survey showed that responding customers did not increase imports of toaster ovens while reducing purchases from Black & Decker in 1984 compared to 1983 or in the first eight months of 1985 compared to the same period in 1984.

The survey also showed that respondents accounting for the preponderant share of the subject firm's sales decline of waffle irons in 1985 compared to 1984 reported no import purchases during that period. The few customers who reported import purchases of waffle irons accounted for an insignificant amount of the survey group's purchase decline from Black & Decker in 1984 compared to 1983.

U.S. exports of toaster ovens and waffle irons were not addressed in the investigation, since exports are not a criterion for group certification.

Findings show that the overseas transfer of heating elements and waffle iron production from Allentown occurred in March, 1985 and November, 1985, respectively. As of this date no company imports of heating elements or waffle irons have occurred. Toaster oven production was transferred from Allentown to North Carolina in 1985.

VOL 51 ISS 77 AP 22 1986 UMI

Conclusion

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.
Signed at Washington, DC., this 14th day of April 1986.

Carolyn M. Golding,

Director, Unemployment Insurance Service, UIS.

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 2, 1986.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 2, 1986.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street NW., Washington, DC 20213.

Signed at Washington, DC this 14th day of April 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Warner Brothers, Incorporated Music Professional Department New York, NY; Termination of Investigation

Pursuant to section 221 of the Trade Act of 1974, an investigation was initiated on January 21, 1986 in response to a worker petition received on November 20, 1985 which was filed by the International Alliance of Theatrical and Stage Employees on behalf of workers at Warner Brothers, Incorporated, Music Professional Department, New York, New York.

All workers were separated from the subject firm more than one year prior to the date of the petition. Section 223 of the Act specifies that no certification may apply to any worker whose last separation occurred more than one year before the date of the petition. Consequently, further investigation in this case would serve no purpose, and the investigation has been terminated.

Signed at Washington, DC. this 14th day of April 1986.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Humanities Panel; Meetings

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice of Meetings.

SUMMARY: Pursuant to the provisons of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20508.

1. Date: May 5-6, 1986.
Time: 8:30 to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for the Public Humanities Projects and Humanities Projects in Libraries Programs, Divisions of General Programs, for projects beginning after October 1, 1986.

2. Date: May 1-2, 1986.
Time: 8:30 to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for the Public Humanities Projects Program, Division of General Programs, for projects beginning after October 1, 1986.

3. Date: May 16, 1986.
Time: 8:30 to 5:00 p.m.
Room: M-14.
Program: This meeting will review applications submitted for the "Humanities Instruction in Elementary and Secondary Schools" programs, for projects beginning after September 1986.

4. Date: May 15, 1986.
Time: 9:00 to 5:00 p.m.
Room: 316-2.
Program: This meeting will review Fellowships for Faculty Graduate Study applications submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1988.

5. Date: May 12, 1986.
Time: 8:30 to 5:30 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers in Politics and Society, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1986.

6. Date: May 13, 1986.
Time: 8:30 to 5:30 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers in Foreign and Comparative Languages and Literatures, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1986.

7. Date: May 14, 1986.
Time: 8:30 to 5:30 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers in British and American Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1986.

8. Date: May 15, 1986.
Time: 8:30 to 5:30 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers in Philosophy and Religion, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1986.

9. Date: May 16, 1986.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers in History, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1986.

10. Date: May 19, 1986.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers in Arts, submitted to the Division of Fellowships and Seminars, for projects beginning after June 1, 1986.

11. Date: May 19-20, 1986.
Time: 9:00 a.m. to 5:00 p.m.
Room: M-14.
Program: This meeting will review applications submitted for Central Disciplines in Undergraduate Education—Improving Introductory Courses, Division of Education, for projects beginning after April 1, 1986.

12. Date: May 22-23, 1986.
Time: 9:00 a.m. to 5:00 p.m.
Room: 315.
Program: This meeting will review applications submitted for Central Disciplines in Undergraduate Education—Promoting Excellence in a Field, and Fostering Coherence Throughout an Institution, Nontraditional Learners, for projects beginning after April 1, 1986.

13. Date: May 5-6, 1986.
Time: 8:30 a.m. to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for the Humanities Projects in Media, Division of General Programs, for projects beginning after October 1, 1986.

14. Date: May 13-14, 1986.
Time: 8:30 a.m. to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for the Humanities Projects in Media, Division of General Programs, for projects beginning after October 1, 1986.

15. Date: May 19-20, 1986.
Time: 8:30 to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for the Humanities Projects in Media, Division of General Programs, for projects beginning after October 1, 1986.

The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial, assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

VOL 51 ISS 77 AP 22 1986 UMI

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for Humanities, Washington, DC 20506, or call (202) 786–0322.

Susan H. Metts,

Acting Advisory Committee Management Officer.

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Proposed Meetings

In order to provide advance information regarding proposed public meetings of the ACRS Subcommittee and meetings of the full Committee, the following preliminary schedule is published to reflect the current situation, taking into account additional meetings which have been scheduled and meetings which have been postponed or cancelled since the last list of proposed meetings published March 25, 1986 (51 FR 10287). Those meetings which are definitely scheduled have had, or will have, an individual notice published in the Federal Register approximately 15 days (or more) prior to the meeting. It is expected that the sessions of the full Committee meeting designated by an asterisk (*) will be open in whole or in part to the public. ACRS full Committee meetings begin at 8:30 A.M. and Subcommittee meetings usually begin at 8:30 A.M. The time when items listed on the agenda will be discussed during full Committee meetings and when Subcommittee meetings will start will be published prior to each meeting. Information as to whether a meeting has been firmly scheduled, cancelled, or rescheduled, or whether changes have been made in the agenda for the May 1986 ACRS full Committee meeting can be obtained by a prepaid telephone call to the Office of the Executive Director of the Committee (telephone: 202/634–3265, ATTN: Barbara Jo White) between 8:15 A.M. and 5:00 P.M., Eastern Time.

ACRS Subcommittee Meetings

Waste Management, April 24 and 25, 1986, Washington, DC. The Subcommittee will review various topics in the High-Level and Low-Level Radioactive Waste Programs. Topics currently identified for review at the April meeting are: (1) Modeling Strategy for HLW performance assessment, (2) Quality Assurance (addressing safety issues of geologic repositories), (3) the NRC LLW program, (4) several research efforts, including international programs and cooperative agreements, results of modeling,workshop, and setting priorities for HLW research, and (5) the Salvaging of Contaminated Smelted Alloys.

Thermal Hydraulic Phenomena, April 29 and 30, 1986, Washington, DC. The Subcommittee will: (1) Continue its review of the NRC's proposal to revise 10 CFR 50.46 and Appendix K, and (2) continue discussions on defining the thermal hydraulic safety issues of most importance that need to be addressed in the future.

Severe (Class 9) Accidents, May 1, 1986, Albuquerque, NM. The Subcommittee will review rebaselining studies for four or five reference plants; part of studies for NUREG–1150, "Nuclear Power Plant Risks and Regulatory Applications."

Scram Systems Reliability, May 6, 1986, Washington, DC. The Subcommittee will continue its review of the ATWS Rule implementation effort.

Safety Research Program, May 7, 1986, Washington, DC. The Subcommittee will discuss the proposed NRC Safety Research Program and Budget for FY 1988 and 1989, and gather information for use by the ACRS in its preparation of the annual report to the Commission on the related matter.

Safety Philosophy, Technology, and Criteria, May 7, 1986, Washington, DC. The Subcommittee will review the NRC Staff's proposed resolution of USI A–17, "Systems Interactions in Nuclear Power Plants."

Babcock and Wilcox (B&W) Reactor Plants, May 19, 1986, Washington, DC. The Subcommittee will consider the B&W Owners Group plan to reassess the long-term safety of B&W reactors, including the implications of operating experience on the adequacy of B&W plant designs. The Subcommittee will also be briefed on the NRC Staff's Incident Investigation Team's (IIT) findings related to the 12/26/85 loss of integrated control system power and overcooling transient at the Rancho Seco nuclear power plant.

Ad Hoc Subcommittee on TVA, May 20, 1986, Washington, DC. The Subcommittee will discuss TVA reorganization and related technical and management issues.

Regulatory Policies and Practices, May 27, 1986, Washington, DC. The Subcommittee will discuss the IIT Process after the issuance of the San Onofre and Davis-Besse IIT reports and the report of the Ad Hoc Independent Review Group on the Davis-Besse Incident.

South Texas Units 1 and 2, May 29 and 30, 1986, Bay City, TX. The Subcommittee will review Houston Lighting and Power Company's application for an operating license.

Reactor Operations, June 2, 1986, Washington, DC. The Subcommittee will review recent events at operating plants.

Severe (Class 9) Accidents, June 3, 1986, Washington, DC. The Subcommittee will review a final draft of NUREG–0956, "Reassessment of the Technical Bases for Estimating Source Terms."

Safety Research Program, June 4, 1986, Washington, DC. The Subcommittee will continue its discussion on the proposed NRC Safety Research Program and Budget for FY 1988 and 1989. It will discuss also a Draft ACRS report to the Commission on this matter.

Long Range Plan for the NRC, June 4, 1986, Washington, DC. The Subcommittee will continue discussions related to long range planning for the NRC. Portions of this meeting may be closed to discuss internal ongoing draft documents.

Westinghouse Reactor Plants, June 26 1986 (tentative), Washington, DC. The Subcommittee will continue discussions and comment on NRC Staff actions taken with respect to the SONGS–1 water hammer/loss of AC power event which occurred on November 21, 1985. This is a follow-up meeting to the February 12, 1986 Subcommittee meeting on the same subject.

Auxiliary Systems, June 26, 1986, Washington, DC. The Subcommittee will discuss: (1) The status of the Appendix R compliance, (2) differing technical views among the Staff, (3) proposed research and associated budget for FY 1988 and 1989 in the fire protection area, and (4) updates on the progress being made in the Sandia experimental program on fire protection.

Davis-Besse, June 27, 1986, Washington, DC. The Subcommittee will review start-up activities for Davis-Besse.

Joint Occupational and Environmental Protection Systems and Auxiliary Systems, June 27, 1986, Washington, DC. The Subcommittees will: (1) Review a draft AEOD report on the effects of ambient temperature on I&C Systems, (2) be briefed on the status of various control room HVAC Systems problems and the Staff's control room habitability improvement effort, (3) discuss with the Staff the 1 mrem/yr "cutoff" dose rate for the calculation of collective population doses, and (4) be briefed on the Staff's evaluation of the Shearon Harris Chilled Water Systems.

Reliability Assurance, July 8, 1986, Washington, DC. The Subcommittee will review the final resolution of USI A–46, "Seismic Qualification of Equipment in Operating Plants."

Extreme External Phenomena, August 5 and 6, 1986, Washington, DC. The Subcommittee will conduct a workshop to review the importance of seismic risk to nuclear power plants.

Spent Fuel Storage, Date to be determined (May/June), Washington, DC. The Subcommittee will continue its review of 10 CFR Part 72 and Monitored Retrievable Storage (MRS).

Decay Heat Removal Systems, Date to be determined (June), Washington, DC. The Subcommittee will review NRR's Action Plan to address concerns with the reliability of certain plants' AFW systems.

Metal Components, Date to be determined (June, tentative), Pittsburgh, PA or Charlotte, NC. The Subcommittee will review the status of NDE of cast stainless steel.

Gas Cooled Reactor Plants, Date to be determined (June), Washington, DC. The Subcommittee will review the applicability of NRC requirements for equipment qualification and cable testing to Fort St. Vrain, an HTGR.

Thermal Hydraulic Phenomena, Date to be determined (June/July), Washington, DC. The Subcommittee will review General Electric's application for use of the SAFER/CORECOOL ECCS Code on BWR nonjet pump plants.

Metal Components, Date to be determined (June/July), Richland, WA. The Subcommittee will visit and review steam generator, degraded piping, and NDE facilities and programs.

Structural Engineering, Date to be determined (June/July), Albuquerque, NM. The Subcommittee will visit and review containment integrity and Category I structures, facilities, and programs.

Decay Heat Removal Systems, Date to be determined (July), Washington, DC. The Subcommittee will begin its review of NRR's proposed resolution position for USI A–45, "Shutdown Decay Heat Removal System."

Seabrook Units 1 and 2, Date to be determined (late summer/early fall), Washington, DC. The Subcommittee will review the application for a full power operating license for Seabrook 1 and 2.

Probabilistic Risk Assessment, Date and location to be determined. The Subcommittee will review the probabilistic risk assessment for Millstone 3.

ACRS Full Committee Meeting

May 8–10, 1986: Items are *tentatively* scheduled

*A *Meeting with NRC Commissioners*—discuss ACRS reports on Implementation of Quantitative Safety Goals and the General Electric Standard Safety Analysis Report (GESSAR–II) (tentative).

*B. *Meeting with Representatives of the Federal Republic of Germany (closed)*—discuss proposed standards, models and plans for the management and disposal of high-level wastes.

*C. *NRC Safety Research Program*—discuss the proposed scope format and schedule for the annual ACRS report to the NRC on the proposed NRC safety research budget for FY 1988 and 1989.

*D. *Reactor Operating Experience*—report of ACRS subcommittee and representatives of the NRC Staff regarding recent incidents and events at nuclear facilities (tentative).

*E. *Systems Interaction*—discuss proposed NRC action plan for resolution of USI A–17, Systems Interactions.

*F. *Decay Heat Removal*—discuss ACRS consideration of activities regarding use of a system making use of bleed and feed operations to remove decay heat directly from the primary coolant systems of PWRs.

*G. *Management and Disposal of Radioactive Waste*—discuss several matters relating to the management and disposal of radioactive waste including salvage of contaminated alloys, modeling strategy for HLW performance assessment, quality assurance for geologic repositories, research efforts and international programs for HLW and LLW. Representatives of the NRC Staff will participate as appropriate.

H. *New ACRS Member (closed)*—discuss qualifications, non ACRS activities and availability of candidates proposed for membership on the ACRS.

*I. *Report of ACRS Subcommittee Activities*—hear and discuss reports of designated ACRS subcommittees regarding related activities including proposed revisions to 10 CFR 50.46, Acceptance Criteria for ECCS for Light Water Nuclear Power Reactors and Appendix K, ECCS Evaluation Models; scram system reliability/implementation of corrective action for ATWS; report of ACRS Management Group regarding meetings on April 9, 1986 and May 7, 1986; and proposed risk rebaselining study for selected nuclear plants.

*J. *Emergency Operating Procedures and Safety Parameter Display Systems*—discuss proposed ACRS comments/recommendations to the NRC regarding these matters.

*K. *Future Activities*—discuss anticipated ACRS activities and proposed items for full committee consideration.

L. *Activities of ACRS Members (closed)*—discuss non-ACRS activities of ACRS members and their impact on Committee activities as appropriate.

June 5–7, 1986—Agenda to be announced.

July 10–12, 1986—Agenda to be announced.

Dated: April 17, 1986.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

Draft Regulatory Guide; Issuance, Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, CE 306–4 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Standard Format and Content for a Topical Safety Analysis Report for a Dry Spent Fuel Storage Cask" and is intended for Division 3, "Fuels and Materials Facilities." It is being developed to provide guidance on the type of information needed by the NRC staff for its evaluation of a Topical Safety Analysis Report for a spent fuel storage cask. The guide also provides a format for submitting this information.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory

VOL 51 ISS 77 AP 22 1986 UMI

Commission, Washington, DC 20555. Comments may also be delivered to Room 4000, Maryland National Bank Building, 7735 Old Georgetown Road, Bethesda, Maryland from 8:15 a.m. to 5:00 p.m. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. Comments will be most helpful if received by June 23, 1986.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future draft guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 15th day of April 1986.

For the Nuclear Regulatory Commission.

Guy A. Arlotto,

Director, Division of Engineering Technology, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-15053; 812-6317]

State Mutual Life Assurance Co. et al.; Application for Order Pursuant to Sections 6(c) and 17(d) of the Act, and Rule 17d-1 Thereunder, Amending Prior Order Permitting Certain Joint Transactions

April 15, 1986.

Notice is hereby given that State Mutual Life Assurance Company of America ("State Mutual"), a Massachusetts mutual life insurance company, SMA Life Assurance Company ("SMA"), a Delaware stock life insurance company and a wholly-owned subsidiary of State Mutual, The Hanover Insurance Company ("Hanover"), a New Hampshire stock insurance company 81%-owned by State Mutual, Citizens Insurance Company of America ("Citizens"), a Michigan Insurance Company and a wholly-owned subsidiary of Hanover, (together, "Insurance Companies"), and State Mutual Securities, Inc. ("Fund"), registered under the Investment Company Act of 1940 ("Act"), as a diversified, closed-end management investment company (together, "Applicants"), 440 Lincoln Street, Worcester, Massachusetts 01605, filed an application on March 13, 1986, for an order of the Commission pursuant to sections 6(c) and 17(d) of the Act, and Rule 17d-1 thereunder, amending the conditions prescribed in a prior blanket order originally issued in 1973, and subsequently amended by orders issued in 1976 and 1981 (the "Order"). All interested persons are referred to the application on file with Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the pertinent statutory provisions.

Applicants state that as amended on July 8, 1981, the Order permits State Mutual, subject to certain conditions, to invest concurrently for its general account in each issue of securities purchased by the Fund at direct placement, and to exercise warrants, conversion privileges and other rights concurrently with the Fund. The Order presently does not apply to SMA, Hanover, or Citizens, and therefore Applicant's amendatory request would necessarily include the extension of the scope of the Order to encompass these insurance affiliates of State Mutual. The conditions contained in the Order now require, among other things, that State Mutual offer one-half of all appropriate direct placement investments to the Fund. If the Fund wishes to participate in such investments, it must either participate equally, or obtain an order of the Commission allowing the Fund to acquire a lesser (or greater) than equal percentage than State Mutual. Applicants assert that this advance filing requirement could result in the loss of appropriate investment opportunities because of the substantial time and expense involved in obtaining a Commission exemptive order. On the other hand, Applicants believe that if the Fund were to be able to participate in direct placement opportunities by purchasing less than the entire amount of securities offered to it, the Fund would be able to make investments of a size appropriate for its portfolio.

In order to allow the Fund to continue to participate in appropriate joint investments, while ensuring that the Fund's investment portfolio remains in compliance with diversification requirements, Applicants desire to amend the conditions contained in the Order to allow the Fund to participate in direct placements on a less-than-equal percentage basis with State Mutual and the other Insurance Companies. The Insurance Companies would continue to offer one-half of all appropriate investments to the Fund, and a further order of the Commission would be required specifically allowing the Fund to acquire a percentage of any investment greater than that of the Insurance Companies.

Applicants submit that the order so amended would continue adequately to effectuate the purposes of the Act, and Rule 17d-1 thereunder. Therefore, Applicants request that the Order be amended to rescind all conditions presently set forth therein, and substitute, in lieu thereof, the following conditions:

1. Each time an Insurance Company proposes to participate in a direct placement involving purchase of securities the purchase of which would be consistent with the investment policies of the Fund, the Fund will be offered the opportunity to purchase an amount of each class of such direct placement securities equal to the amount of such direct placement securities proposed to be purchased by the Insurance Company. The Fund may choose to purchase none of such direct placement securities, or any amount of such direct placement securities up to the entire amount of direct placement securities offered to it.

2. If the Fund chooses to participate in such direct placement with such Insurance Company, the Fund may purchase such securities at the same times and at the same unit prices without further order of the Commission. If the Fund chooses to participate in such direct placement but to purchase less than the entire amount of securities offered to it, the Fund's decision must be approved by the board of directors of the Fund, including a majority of the directors who are not "interested persons" of the Fund. The Fund's determination to purchase none or less than all of such direct placement securities and the reasons therefor will be recorded and become a part of the permanent records of the Fund.

3. From time to time two or more Insurance Companies may wish to invest concurrently in a direct placement of securities the purchase of which would be consistent with the investment policies of the Fund. In such cases the Fund will be offered the opportunity to purchase an amount of each class of such direct placement securities equal to the aggregate amount purchased by the Insurance Companies. If the Fund chooses to invest an amount in such securities which is less than the amount invested by the Insurance Companies, the investment transaction may proceed under (2) above without further order of the Commission. Unless otherwise permitted by special order of the Commission, the Fund will not participate in a direct placement by investing an amount greater than the aggregate amount invested by the Insurance Companies.

4. Unless otherwise permitted by special order of the Commission, neither the Insurance Companies nor the Fund will exercise warrants of a class held by both the Fund and the Insurance Companies, or conversion privileges, or other rights relating to direct placement securities of a class concurrently acquired and held by the Fund and the Insurance Companies, except at the same times and in amounts proportionate to their respective holdings of such securities.

5. Unless otherwise permitted by special order of the Commission, neither the Insurance Companies nor the Fund will sell, exchange, or otherwise dispose of any interest in any direct placement security of a class concurrently acquired and held by both the Fund and the Insurance Companies, unless such dispositions are made at the same times, for the same unit consideration, and in amounts proportionate to their respective holdings of such direct placement securities.

6. The expenses, if any, of the distribution of any securities registered for sale under the Securities Act of 1933 and sold by the Insurance Companies and the Fund at the same time will be shared by the Insurance Companies and the Fund in proportion to the respective amounts they are selling.

For purposes of the Order, any direct placement securities purchased or held by Applicants which are identical in all aspects except for the fact that only the Fund's securities have voting rights shall be considered to be of the same class of securities.

Applicants submit that Order as they propose to amend it will provide the Fund with the necessary flexibility to invest in direct placement securities on an other than equal basis with the Insurance Companies. Applicants submit that it is in the best interest of the Fund to have the flexibility to acquire up to one-half of all direct placement investment opportunities offered to it and the Insurance Companies. If the Fund has the discretion to invest a lesser percentage than the Insurance Companies, it may immediately take advantage of any such opportunity while insuring that its investment in any one issuer is in compliance with diversification requirements and is otherwise prudently proportionate to its own asset base. Since any decision to invest in a lesser percentage than the Insurance Companies must be approved by the board of directors of the Fund, including a majority of the directors who are not interested persons of the Fund, and since the Insurance Companies will always have the same or a greater amount as the Fund "at risk" in each investment, Applicants submit that there are ample safeguards to assure that any participation by the Fund in such direct placements will not be on a basis less advantageous than that of the Insurance Companies.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 9, 1986, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, DC 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate), shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 86-8972 Filed 4-21-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23131; File No. SR-Amex-86-4]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 19, 1986, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange is proposing to amend its schedule of approved member firm charges for handling proxy solicitations (Rule 576) to: (1) Add the second of a two-part start-up cost reimbursement "surcharge" and (2) fix the reimbursement rate for the periodic furnishing of shareholder information, in connection with the new SEC Shareholder Identification Rule. The text of the proposed rule change is available at the Exchange, care of the Office of the Secretary, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) Purpose

The new SEC Shareholder Identification Rule (Rule 14b-1(c)) became effective on January 1 of this year. The rule requires broker-dealers, upon request and assurance of reimbursement of reasonable expenses, to provide issuers with the names, addresses, and security positions of their non-objecting customers whose securities are held in "street name". The rule is intended to improve the process by which issuers identify and communicate with their "street name" shareholders.[1]

An ad hoc committee composed of corporate, banking, and brokerage firm representatives under the direction of the New York Stock Exchange, Inc. ("NYSE") was formed to consider the

[1] *See* note 4, *infra.*

VOL 51 ISS 77 AP 22 1986 UMI

issue of compensating brokers for the costs incurred in obtaining and furnishing the required shareholder information to issuers. In December 1984, the Ad Hoc Committee recommended that broker start-up costs for soliciting consents from "street name" holders and establishing the basic data files, estimated at between $18 to $25 million, be recouped at least in part through a surcharge on issuers of $.20 for each set of proxy materials processed by member firms during 1985 and 1986 proxy seasons. To provide for this surcharge, the NYSE and Amex were asked to amend their schedules of approved member firm charges for handling proxy solicitations (NYSE Rule 451 and Amex Rule 576). The Amex Board approved the two-part surcharge last February.

After review, the Commission agreed to approve the first stage of the proposed surcharge ($.20 for 1985),[2] but asked for further supporting evidence of start-up costs before approving the second stage surcharge for 1986. A survey was conducted for the Ad Hoc Committee by the NYSE to obtain the latest available data on start-up costs incurred by member firms as well as the amount of these costs recouped by firms through the initial 1985 proxy surcharge. Following its review of the study, the Committee recommended a second (and final) surcharge of 18¼¢ per proxy for the 1986 proxy season, rather than the 20¢ charge originally recommended. It is believed that the aggregate surcharge of 38½¢ for both 1985 and 1986 will be sufficient to reimburse the brokerage industry as a whole.

The Ad Hoc Committee also considered the reimbursement of brokers' reasonable costs for maintaining and providing beneficial owner data to issuers on an on-going basis. The Committee recommended that the charge for providing beneficial owner information to requesting issuers be set at 6¼¢ per customer name. Again, this amount is expected to provide fair reimbursement to the industry.[3]

[2] The Amex's initial $.20 surcharge on proxy materials was approved by the Commission in Securities Exchange Act Release No. 34-21915 (April 1, 1985), 50 FR 14009 (File No. SR-Amex-85-2).

[3] The Independent Election Corporation of America ("IECA") has been approved by the Ad Hoc Committee to serve as the primary intermediary between issuers and brokers in supplying beneficial owner information. The fee the intermediary charges the issuer will be in addition to the 6¼¢ fee charged by the broker.

The Ad Hoc Committee's recommendations, both the 18¼¢ surcharge and the 6¼¢ recurring fee, have been endorsed by the Securities Industry Association ("SIA") and the American Society of Corporate Secretaries, and an amendment to the applicable NYSE rule was approved by that exchange's Board in December. A proposed amendment to Amex Rule 576 incorporating these recommendations is now being presented to the SEC for its approval.

(2) Basis

The statutory basis for the proposed rule change in section 6(b)(5) of the Securities Exchange Act of 1934 as amended ("the Act") which, among other things requires exchange rules to be designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers, or to regulate by virtue of any authority conferred by this title matters not related to the purposes of this title or the administration of the Exchange.

In addition, the rule change is intended to enhance the requirements of Rules 17a-3(a)(9)(ii) and 14b-1(c) under the Act concerning the reimbursement to brokers of costs associated with those rules, including start-up and overhead costs and the costs of providing beneficial ownership information to requesting issuers.

B. Self-Regulatory Organizations's Statement on Burden on Competition

The proposed rule change will have no adverse impact on competition.

C. Self-Regulatory Organizations Statement on Comments on the Proposed Rule change Receive from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 13, 1986.

IV. Date of Effectiveness of the Proposed Rule Change

On February 11, 1986, the Commission approved a proposal by the NYSE to implement charges by member organizations to issuers in connection with their compliance with the requirements of Rules 14b-1(c) and 17a-3(a)(9)(ii) under the Act.[4] In that proposal the NYSE sought authorization for a second and final $.185 surcharge on proxy solicitations to complete recoupment of startup costs incurred in connection with complying with shareholder notification requirements and also sought approval for a rate of reimbursement for costs incurred in providing beneficial ownership information to requesting issuers of $.065 per name. In reviewing the basis for these proposed charges, the Commission considered that data collected for the Ad Hoc Committee by the NYSE in support of a final surcharge of $.185 to reimburse brokers for startup costs and the estimate given by representatives of the SIA to the Ad Hoc Committee of a cost of $.065 per name for providing beneficial ownership information to requesting issuers. The Commission determined that the need for the second and final surcharge was supported by the data and that the estimates from the SIA would provide a reasonable rate of reimbursement for brokers providing beneficial ownership information to requesting issuers.

The Amex proposal would implement the same types of charges in the same amounts that the Commission approved in the prior NYSE proposal. Further, in support of its proposed charges, Amex uses the same cost data and estimates relied upon by the NYSE in its proposal. The Commission continues to believe that the cost data developed by the NYSE and the cost estimates of the SIA support the requested second and final proxy surcharge and establish a reasonable rate of reimbursement for brokers providing beneficial ownership information to requesting issuers.

The Commission therefore finds that the proposed rule change is consistent with the requirements of the act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6, and the rules and regulations thereunder.

The Commission further finds good cause for approving the proposed rule change prior tothe thirtieth day afte rthe date of publication of notice of filing thereof, in that the Commission, as discussed above, already has approved a similar proposal from the NYSE and it is necessary and appropriate for the proposed proxy surcharge to be implemented in time to accmmodate proxy activity of the current proxy season.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rules change be, and hereby is, approved.

[4] Securities Exchange Act Release No. 22989 (February 11, 1986) 51 FR 5023 (File No. SR-NYSE-85-49). The Commission approved an initial one year $.20 surcharge for annual meeting proxy solicitations in Securities Exchange Act Release No. 21900, March 20, 1985, 50 FR 13297.

In July, 1983, the Commission adopted new paragraph (c) of Rule 14b-1 under the Act to improve the process whereby issuers communicate with shareholders whose securities are held in street name. Securities Exchange Act Release No. 20021 (July 28, 1983), 48 FR 35082. New paragraph (c) required brokers to provide issuers, upon request and assurance of reimbursement of reasonable expenses (direct and indirect), with the names, addresses and securities positions of customers who are beneficial owners of the issuers' securities and who have not objected to such disclosure. The Commission also adopted a corresponding amendment to Rule 17a-3(a)(9) under the Act to require that the customer records maintained by brokers for street name holders include whether the beneficial owner has objected to the disclosure to issuers of his or her identity, address, and securities positions.

In October 1985, the Commission further amended the shareholder communication rules. Rule 14b-1 was amended to allow a broker or dealer to employ an intermediary to act as its designated agent in performing its obligations under the rules. The amendments further specified the time frames within which brokers must perform these actions requested by the issuer as required under the rules. *See e.g.*, Rule 14b-1 (a), (b), (c). New Rule 14b-1(d) makes clear that, without assurance of reimbursement by the issuer of reasonable direct and indirect expenses incurred in connection with performing its obligations under the rules, a broker or dealer need not satisfy its obligations under Rule 14b-1 (b) or (c). These amendments become effective January 1, 1986. Securities Exchange Act Release No. 22539 (October 15, 1985), 50 FR 42672.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 15, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-23128; File No. SR-OCC-86-06]

Self-Regulatory Organizations; Options Clearing Corporation; Proposed Rule Change Amending Stock Option and Index Option Escrow Receipt Forms

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 24, 1986, Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission the proposed rule change described below. The proposal would amend OCC's index option and stock option escrow receipt forms[1] to provide an alternative formula for calculating the amount of escrow receipts that a custodian bank may have outstanding at any one time. The proposal also would update the stock option escrow receipt form adopting improved language from the more recently drafted index option escrow receipt form. OCC requested that the Commission approve the proposal on an accelerated basis under section 19(b)(2) of the Act. The Commission is publishing this notice to solicit comment.

I. Description of the Proposal

To place an outer limit on OCC's known financial exposure if a bank issuing escrow receipts for OCC Clearing Members should fail, OCC currently requires OCC-approved escrow banks, when issuing an escrow receipt, to warrant that the total value of collateral, *i.e.*, cash, cash equivalents and securities (at market value), deposited under all outstanding escrow receipts and option guarantee letters does not exceed 25% of the bank's shareholders' equity.[2] Escrow banks agree to this limitation, among others, by executing an OCC Escrow Receipt Form.[3]

OCC's proposal would revise its escrow receipt forms to provide escrow banks an alternative, less restrictive formula for limiting the amount of escrow receipts that they may have outstanding. Specifically, new clause (c)(ii) would use the escrow-related option's "intrinsic" value *i.e.*, the "in-the-money" amount, as the formula's basis. Thus, escrow banks could continue to issue escrow receipts until the "in-the-money" value of the escrow-related short options reach 25% of shareholders' equity. Banks choosing to use the new formula would be required to calculate daily the percentage of the aggregate "in-the-money" amount of the escrow-related options to shareholders' equity and to provide the results of the calculations to OCC each month.

The proposal also would make several technical revisions in OCC's stock option escrow receipt. Specifically, the proposal expressly recognizes that: (i) An escrow bank can be authorized to act on behalf of a customer's agent (the form currently provides that the bank is authorized by the customer); (ii) a short options position covered by an escrow receipt may be assigned in part; and (iii) an escrow bank may issue escrow receipts on securities held in its account at a financial intermediary (*e.g.*, a securities depository). Finally, the amended form would expressly prohibit an escrow bank from asserting any lien or right of offset with respect to securities underlying escrow receipts, and would require the bank to notify OCC and other interested parties if any third party asserts a claim against those securities.

II. OCC's Rationale for the Proposal

OCC states in its filing that covered index call writing among institutional customers has become popular, largely due to the introduction of the index

[1] *See* Securities Exchange Act Release No. 22324 (August 13, 1985), 50 FR 33443 (August 19, 1985) amending OCC Rule 1801 to permit, on a pilot basis, OCC Clearing Members to deposit with OCC escrow receipts, collateralized by any combination of cash, cash equivalents, and exchange-listed or OTC margin stocks, in lieu of OCC margin on short index call option positions carried for customer accounts. Under the terms of the escrow receipt, the customer on whose behalf a Clearing Member makes a deposit authorizes the liquidation of the deposit to the extent necessary to perform the issuing bank's obligations to OCC. The bank must monitor the value of deposited property and notify OCC if the property's value falls to less than 50% of the number of option contracts covered by the deposit times the aggregate current index value of the underlying index. At that time, OCC may disregard the escrow receipt and require the Clearing Member to deposit OCC margin regarding the short positions previously covered by the escrow receipt. *See also* OCC Rule 610 which governs generally the deposit of underlying securities for margin purposes.

[2] In calculating the value of deposited property, cash equivalents and common stocks are valued at their closing sale prices (if subject to last sale reporting) or closing bid prices (if not subject to last sale reporting) on the day the bank issues an escrow receipt.

[3] OCC currently has two Escrow Receipt Forms: one for index option escrows and another for stock option escrows. The proposal amends both forms.

VOL 51 ISS 77 AP 22 1986 UMI

option escrow receipt in 1985.[4] This popularity, in turn, has led to a substantial increase in escrow deposits. OCC represents that, because of this increased activity, some escrow banks have exhausted their capacity for issuing escrow receipts under OCC's present "gross collateral valuation" formula. OCC designed that formula to limit OCC's exposure in the event an escrow issuing bank were to fail without properly segregating collateral underlying its outstanding escrow receipts. OCC now believes that its exposure in this circumstance would be measured more accurately by using the intrinsic value, *i.e.*, the "in-the-money" amount of the options covered by the escrow receipt, rather than the gross value of the deposited collateral. Because the proposed formula is more complex than the existing formula, some escrow banks may be unable or unwilling to modify their automated systems to perform the necessary calculations. Therefore, OCC is proposing the new formula as an alternative to the original formula. Thus, escrow banks wishing to stay with the existing formula and lower ceiling on their escrow activity may do so.

OCC believes the proposal is consistent with the purposes and requirements of section 17A of the Act because it would increase escrow banks' capacity for issuing escrow receipts, thereby facilitating greater institutional participation in the index options markets, while providing reasonable safeguards for OCC's protection. OCC further states that the proposed changes in the stock option escrow receipt form would eliminate unnecessary inconsistancies between the language of OCC's two forms of escrow receipt.

III. Request for Comment.

Within 35 days of the date of the publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will by order approve such proposed change or institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons can submit written comments about the proposal by filing six copies of their comments with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the filing also will be available for inspection and coping at OCC's principal office. All comments should refer to the file number in the caption above and should be submitted by May, 13, 1986.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Dated: April 15 1986.

John Wheeler,

Secretary.

[FR Doc. 86-8969 Filed 4-21-86; 8:45 am]

BILLING CODE 8010-01-M

[4] *See* note *supra*. The ability to cover short index options positions with escrow receipts has enabled institutional investors with diversified stock portfolios to adopt large-scale covered index call writing programs. In this manner, institutional investors not only have increased their returns on their portfolios, but their call writing strategies have served as a limited hedge against downward portfolio price movements.

[Release No. 34-23129; File No. SR-Phlx-86-12]

Self-Regulatory Organizations; Filing and Order Granting Accelerated Approval of Proposed Rule Change by Philadelphia Stock Exchange, Inc. Relating to Extension of the Pilot Program for Procedures for Pricing Standard Odd-Lot Market Orders of the American Telephone and Telegraph Divestiture Issues

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), ("Act") notice is hereby given that on April 2, 1986, the Philadelphia Stock Exchange, Inc. ("Phlx") filed with the Securities Exchange Commission the proposed rule change, described in Items I, II and III below. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of an extension of a pilot program relating to procedures regarding the pricing of standard odd-lot market orders in American Telephone and Telegraph Co. divestiture issues. The pilot program was approved originally for nine months, commencing November 21, 1983, and extended another six months to February 21, 1985.[1] At this time, the Phlx is requesting an additional eighteen month extension of the pilot to August 21, 1987.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item III below.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose.

The Exchange requests the extended period in order to further assess the results of the pilot pricing system under actual market conditions.

(2) Statutory Basis for Proposed Rule Change.

Extension of the pilot program will be consistent with those provisions of the Act, which encourage the use of new data processing and communications techniques which create the opportunity for more efficient and effective market operations.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange states that the proposed rule change will not impose any burden on competition that is not justified in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received writtten comments on the proposed rule change.

[1] *See* Securities Exchange Act Release Nos. 20398 (November 16, 1983), 48 FR 5377 and 21337 (September 20, 1984), 49 FR 37886. The Exchange did not file a proposed rule change with the Commission for an extension of the pilot program after the original extension expired on February 21, 1985.

III. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the Phlx. All submissions should refer to the file number in the caption above and should be submitted by May 13, 1986.

IV. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of the notice of filing thereof, in that further extension of the pilot will permit the program to continue uninterrupted and will permit the Phlx to evaluate the need for specific systems enhancements to the odd-lot execution process in connection with any future proposals to the Commission for changes to the Phlx odd-lot procedures. Further, the Commission notes that it has approved, on an accelerated basis, a substantially similar proposal for the New York Stock Exchange.[2]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

BILLING CODE 8010-01-M

[Release No. 34-23130; File No. PHLX 86-11]

Self-Regulatory Organizations; Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to Minor Disciplinary Action Plan

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 21, 1986, the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("Exchange") proposes to revise its disciplinary procedures for the disposition of violations of Options Floor Procedure Advices ("Advices"). A summary of the revised procedure is set forth below.

Under the Exchange's proposed minor rule violation plan, the Advices will be deemed to be minor rules. Alleged violations of any of these Advices may result in the staff of the Exchange Market Surveillance Department serving the alleged violator with notice of the alleged violation.[1] The form for notice of violations will set forth the name of the member or member organization, or any partner, officer, director or person employed by or associated with any member or member organization, alleged to have violated any such Advice, the date of the notice to such alleged violator, the violation at issue, and the fine for such violation.[2]

The alleged violator will be provided not less than seven business days to decide whether to contest the violation or pay the fine. If the alleged violator decides not to contest such violation, under the Commission's amendments to Rule 19d-1 and the minor rule violations plan, these violations will not be deemed "final" disciplinary action for the purpose of Rule 19d-1 and the violator's own records. If the alleged violator decides to contest the violation, the matter will be referred to the Business Conduct Committee ("Committee") for their consideration and determination.

The Committee may then (a) decide that the matter be dismissed and the notice of alleged violation be rescinded; (b) decide that the notice, as issued, is valid, whereupon the alleged violator could either pay the fine or contest the matter before a hearing panel; (c) decide that the notice, as issued, should be modified to specify either a higher or lower fine than the one on the notice as issued, whereupon the alleged violator could either pay the new fine or contest the matter before a hearing panel; or (d) decide that the matter merits formal disciplinary action and authorize issuance of a Complaint, pursuant to Exchange Rule 960.2.

If a disciplinary proceeding thereafter results, and the Hearing Panel determines that the alleged violator has violated the Advice(s), the Hearing Panel shall (a) be free to impose any disciplinary sanction provided for in Exchange Rules 960.1-960.12 and (b) determine whether the violation is minor in nature. If determined to be minor in nature, the violation(s) giving rise to the penalty shall not be publicly reported by the Exchange to its membership, except as may be required pursuant to Rule 19d-1, or as may be required by any other regulatory authority; if determined not to be minor in nature, the decision of the Hearing Panel and any penalty imposed shall be publicly reported to the Exchange membership, in addition to any filing required by Rule 19d-1, or any other regulatory authority, once such decision becomes "final" under Exchange Rules 960.1-960.12.

Under this plan, before notice is given of the alleged violation to the alleged violator on said form, the Exchange staff will reserve the right to recommend to the Committee in any given matter that the violation at issue should not be deemed "minor," in the context of this plan, but should rather be formal disciplinary action authorized by the Committee under Exchange Rule 960.2. The Committee may, in turn, accept or reject this recommendation. If the

[1] The Exchange submitted, in conjunction with the Proposed Rule Change, the complete text of the revised procedure, a complete list of the Options Floor Procedure Advices and the proposed form for notice of alleged violations of the Advices. These forms are available for inspection and copying at the places specified in Item IV of this notice.

The Exchange anticipates adding other minor rules to this list of Advices and fines from time to time. After such additions have been appropriately approved by the Exchange, such additions will be submitted to the Commission as amendments to this filing for Commission review.

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

Committee rejects the recommendation, the staff will serve the said notice; if the Committee accepts the recommendation, it will authorize that a formal Complaint be issued for such violation as prescribed by Exchange Rule 960.2.

If the alleged violator decides to pay the fine imposed under said disciplinary notice, his violation will be deemed to have been minor in nature and the violation will be reported to the Commission on a quarterly basis on the reporting form.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change

The purpose of the minor rule violation plan is to provide for the fair, effective, and expeditious dispoaition of violations of said Advices. The implementation of such a plan would benefit the Exchange in several ways: (a) Violators of such Advices could be summarily cited for violations without the Business Conduct Committee having to exercise its discretion on a case-by-case basis (though in every case this Committee would maintain discretion to authorize formal disciplinary action under Exchange Rule 960.2); (b) the imposition of pre-set sanctions for violation of these Advices would promote fair treatment of violators; and (c) if the alleged violator of an Advice did not contest the allegation and the sanction imposed were a fine of less than $2,500, the Exchange could report these violations to the Commission quarterly and in abbreviated fashion.

B. Self-Regulatory Organizations Statement on Burden on Competition

The minor rule violation plan is consistent with section 6(b) of the Act, in general, and furthers the objectives of section 6(b) (1) and (7), in particular, in that it enhances the effectiveness and fairness of its procedures for the disciplining of members and member firms.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The plan has been approved by the Exchange's Options and Business Conduct Committees as well as the Exchange Board of Governors.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 13, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

ACTION: Notice of Reporting Requirements Submitted for Review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments should be submitted within 21 days of this publication in the **Federal Register**. If you intend to comment but cannot prepare comments promptly, please advise the OMB Reviewer and the Agency Clearance Officer before the deadline.

Copies: Copies of forms, request for clearance (S.F. 83), supporting

VOL 51 ISS 77 AP 22 1986 UMI

statements, instructions, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Submit comments to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Richard Vizachero, Small Business Administration, 1441 L Street, NW., Room 200, Washington, DC 20416, Telephone: (202) 653–6538

OMB Reviewer: Patricia Aronsson, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503, Telephone: (202) 395–7231

Title: Governor's Request for Disaster Declaration
Frequency: On occasion
Description of Respondents: The Governor of the affected states makes a written request stating the incident that occurred, the time and place and certify that SBA criteria have been met.
Annual Responses: 110
Annual Burden Hours: 2200
Type of Request: Extension
Title: Annual Update of 8(a) Application and Business Plan
Form no. SBA 1450
Frequency: Annually
Description of Respondents: Program participants are required to update their personal and business eligibility statements and business plan on an annual basis as a condition of program participation.
Annual Responses: 2400
Annual Burden Hours: 24,000
Type of Request: Reinstatement

Dated: April 15, 1986.

Richard Vizachero,

Chief, Administrative Procedures and Documentation Section; Small Business Administration.

BILLING CODE 8025–01–M

Business Loans; Change of FTA Contractor and Announcement of New Fee Schedule

AGENCY: Small Business Administration.

ACTION: Notice of new contractor and fee schedule.

SUMMARY: The Small Business Administration has permitted Fidata Trust Company of New York (Fidata) to assign the fiscal and transfer agency contract for the secondary market in guaranteed portions of loans made pursuant to section 7(a) of the Small Business Act to Colson Acquisitions Corporation (Colson). The effective date of the assignment was April 7, 1986.

SBA agreed as a condition of acceptance of the Contract by Colson Acquisitions Corporation to a new fee schedule. The new schedule is effective immediately upon publication in the Federal Register and is described below.

FOR FURTHER INFORMATION CONTACT: Jim Hammersley (202) 653–6064 or Alan Mandel (202) 653–6696, Room 800, 1441 L St. NW., Washington, DC 20416.

SUPPLEMENTARY INFORMATION: SBA has agreed to the imposition of the new fee schedule as a condition of its contract with Colson, a result of the problems generated by the current fee schedule. Service has deteriorated to a level considered unacceptable by SBA and the lending and investment community.

The current contractor, Fidata Trust Company, has indicated that the company has suffered significant losses on the contract during the past year. Neither SBA nor the contractor was able to locate an assignee that would accept the contract on its current terms. Acceptance of the contract by Colson was conditioned upon negotiation of new terms with SBA. It should be noted that while SBA did have to grant approval for assignment of the contract, Fidata had the responsibility for selecting a proposed assignee. SBA has met with the principals of Colson and is convinced that the company can provide a superior level of service at a fair price. The new fee shcedule is as follows:

(a) For individual guaranteed interests sold using the FTA system prior to January 7, 1985.

(i) an original issuance fee of 1/16th of 1% of the Guaranteed Interest as of the date of sale to the purchaser, payable by the Purchaser or Holder, as the case may be, at the time of presentation to the FTA of each SBA form 1085 or 1086, as the case may be, with request to issue a Certificate;

(ii) a servicing fee of ⅛ of 1% per annum computed on the unpaid balance of the Guaranteed Interests for the period of actual services performed by the FTA, which fee is to be deducted by the FTA from the amount remitted by the lender to the FTA; and

(iii) A Certificate issuance fee payable by the transferee not to exceed $20.00 per transfer.

(b) For individual Guaranteed Interests in which the initial sale by the lender or the first transfer in which the transferor was required to register the guaranteed interest on the FTA system occurred between January 7, 1985 and prior to April 22, 1986, the FTA is authorized to collect the following fees:

(i) a Certificate issuance fee payable by the transferee not to exceed $20.00 per transfer.

(ii) a servicing fee of ⅛ of 1% per annum computed on the unpaid balance of any such Guaranteed Interest transferred on or after April 22, 1986, for the period of actual services performed by the FTA, which fee is to be deducted by the FTA from the amount remitted by the lender to the FTA;

(c) For individual Guaranteed Interests in which the initial sale by the lender or the first transfer in which the transferor was required to register the guaranteed interest on the FTA system occurs on or after April 22, 1986, the FTA is authorized to collect the following fees:

(i) an original issuance fee of $75.00, payable by the Purchaser or Holder, as the case may be, at the time of presentation to the FTA of each SBA form 1085 or 1086, as the case may be, with request to issue a Certificate;

(ii) a servicing fee of ⅛ of 1% per annum computed on the unpaid balance of the Guaranteed Interests for the period of actual services performed by the FTA, which fee is to be deducted by the FTA from the amount remitted by the lender to the FTA; and

(iii) a Certificate issuance fee payable by the transferee not to exceed $20.00 per transfer.

(d) For Guaranteed Interests included in pools, the FTA is authorized to collect the following fees:

(i) an application/pool formation fee of $30.00 per Guaranteed Interest for each Guaranteed Interest included in a particular pool, up to a maximum of $900 per pool for any pool application submitted on or after April 22, 1986; and

(ii) a servicing fee of ⅛ of 1% per annum computed on the unpaid balance of the Guaranteed Interests for the period of actual services performed by the FTA, which fee is to be deducted by the FTA from the amount remitted by the lender to the FTA, however, in no case will such FTA fee exceed ⅛ of 1% per annum for an individual guaranteed interest. If a servicing fee is being collected on a Guaranteed Interest prior to its inclusion in a pool, no additional servicing fee will be permitted when the Guaranteed Interest is put in a pool; and

(iii) a Certificate issuance fee payable by the transferee not to exceed $20.00 per certificate per transfer. Such $20.00 fee will be charged for all certificates issued, including dividing an existing certificate."

SBA will accept comments on this new fee schedule. They should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, Room 800, 1441 L St. NW., Washington, DC 20416.

(Catalog of Federal Domestic Assistance Programs, 59.012 Small Business Loans)

Dated: March 26, 1986.

James C. Sanders,

Administrator.

DEPARTMENT OF STATE

[Public Notice 960]

Agency Forms Submitted for OMB Review

AGENCY: Department of State.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, the Department has submitted proposed collections of information to the Office of Management and Budget for review.

SUMMARY: The following summarizes the information collection proposals submitted to OMB:

(1) *Title of information collection*—Application for Immigrant Visa and Alien Registration (OMB No. 1405–0015)
Form Number—OF–230
Type of request—Extension
Frequency—On occasion
Respondents—Foreign nationals
Estimated number of responses—350,000
Estimated number of hours needed to respond—116,666.

(2) *Title of information collection*—Notification of Appointment of Foreign Diplomatic Officer
Form Number—1497
Type of request—New
Frequency—On occasion
Respondents—Foreign government personnel
Estimated number of responses—800
Estimated number of hours needed to respond—200

(3) *Title of information collection*—Notice of Final Departure of Foreign Diplomatic Officer
Form Number—DS–1497A
Type of request—New
Frequency—On occasion
Respondents—Foreign government personnel
Estimated number of responses—800
Estimated number of hours needed to respond—67

(4) *Title of information collection*—Notification of Appointment of Foreign Government Employee
Form Number—DS–304
Type of request—New
Frequency—On occasion
Respondents—Foreign government personnel
Estimated number of responses—5,000
Estimated number of hours needed to respond—1,250

(5) *Title of information collection*—Notice of Termination of Employment with a Foreign Government.
Form Number—DS–394A
Type of request—New
Frequency—On occasion
Respondents—Foreign government personnel
Estimated number of responses—5,000
Estimated number of hours needed to respond—417.

(6) *Title of information collection*—Notification of Appointment of Foreign Consular Officer
Form Number—DSP–98
Type of request—New
Frequency—On occasion
Respondents—Foreign government personnel
Estimated number of responses—850
Estimated number of hours needed to respond—213

(7) Title of information collection—Notice of Termination of Employment of Foreign Consular Officer
Form Number—DSP–98A
Type of request—New
Frequency—On occasion
Respondents—Foreign government personnel
Estimated number of responses—850
Estimated number of hours needed to respond—71.

Section 3504(h) of Pub. L. 96–511 does not apply.

Additional Information or Comments: Copies of the proposed forms and supporting documents may be obtained from Gail J. Cook (202) 647–3538. Comments and questions should be directed to (OMB) Francine Picoult (202) 395–7231.

Dated: April 10, 1986.

Donald J. Bouchard,

Assistant Secretary for Administration.

BILLING CODE 4710–24–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA); Special Committee 156—Potential Interference to Aircraft Electronic Equipment From Devices Carried Aboard; Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Special Committee 156 on Potential Interference to Aircraft Electronic Equipment from Devices Carried Aboard, to be held on May 13–14, 1986, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC, commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Ninth Meeting's Minutes; (3) Review of Task Assignments: a. Validation, refinement and substantiation of path loss data, b. Report on further liaison with FCC, c. Vulnerable frequency selection, d. Review RTCA Paper No. 436–85/SC156–110 with regard to SATCOM, Glide Slope, TACAN and MLS data relative to how this information integrates with other collected material, e. Incorporate material from RTCA Paper No. 82–86/SC156–134 on comparison of RTCA and VDE standards into an appendix, f. Report on electric shavers, g. Provide a Part 15 FCC regulation briefing, h. Describe how the likely "vulnerable" communications and navigation frequencies were selected and why some frequencies were not included, i. Identify the tolerance of aircraft communications and navigation system to the type of spurious radiation that might be expected from passenger-operated devices, j. Develop a chart comparing FCC/DO–160B and VDE/B for frequencies of interest; (4) Integrate assigned sections into a first draft of the committee report; (5) Other business; and (6) Date and place of next meeting.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682–0266. Any member of the public may present a written statement to the committee at any time.

Issued In Washington, DC, on April 16, 1986.

S.B. Portisky,

Designated Officer.

Radio Technical Commission for Aeronautics (RTCA), RTCA Executive Committee; Notice of Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of RTCA Executive Committee to be held on May 16, 1986, in the RTCA Conference Room, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC, commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Chairman's Introductory Remarks; (2) Approval of Minutes of Meeting Held March 25, 1986; (3) Executive Director's Report; (4) Special Committee Activities Report for March-April 1986; (5) Consideration of Proposals to Establish New Special Committees; (6) Consideration of Approval of Reports by Special Committees: a. SC-137 Proposed "Minimum Operational Performance Standards for Airborne Area Navigation Equipment Using Omega/VLF Inputs." b. SC-154 Proposed "Minimum Operational Performance Standards for Airborne Thunderstorm Detection Equipment"; (7) Other Business; (8) Date and place of next meeting.

Attendance is open to the interested public but limited to space available.

With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, One McPherson Square, 1425 K Street, NW., Suite 500, Washington, DC 20005; (202) 682-0266. Any member of the public may present at written statement to the committee at any time.

Issued in Washington, DC, on April 16, 1986.

S.B. Poritsky,

Designated Officer.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: [To be published]

STATUS: Open/close meetings.

PLACE: 450 Fifth Street, NW., Washington, DC.

DATE PREVIOUSLY ANNOUNCED: Thursday, April 10, 1986.

CHANGE IN THE MEETING: Deletion/additional items.

An open meeting scheduled for Thursday, April 17, 1986, at 2:30 p.m. was cancelled.

Oral argument on appeals by Rooney Pace, Inc., a registered broker-dealer, Randolph K. Pace, its president, and the Commission's Division of enforcement, from an administrative law judge's initial decision. For further information, please contact R. Moshe Simon at (202) 272-7400.

A closed meeting scheduled for Thursday, April 17, 1986, following the 2:30 p.m. open meeting, was cancelled.

Post oral argument discussion.

The following item will be considered at an open meeting scheduled for Thursday, Aapril 22, 1986, at 2:30 p.m.

The Commission will consider accounting for oil price declines. For further information, please contact Howard Hodges at (202) 272-2553.

Commission Peters, as Duty Officer, determined that Commission business required the above changes and that not earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Kathryn Natale at, (202) 272-3195.

Dated: April 18, 1986.

John Wheeler,

Secretary.

Toxic Substances; Revisions of Premanufacture Notification Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This final rule revises certain premanufacture regulations that, under the Toxic Substances Control Act (TSCA), require any person who intends to manufacture or import a new chemical substance to notify EPA at least 90 days before manufacture or import begins. The revisions clarify and eliminate ambiguities in the stayed provisions of the rule (48 FR 41132; September 13, 1983), particularly the exemption for research and development, and they revise certain language in the rule to simplify the provisions affecting compliance and enforcement.

DATES: This rule shall be promulgated for purposes of judicial review at 1 p.m. eastern time on May 6, 1986. This rule is effective June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460, Toll-free: (800-424-9065). In Washington, DC: (202-554-1404). Outside the USA: (Operator 202-554-1404).

SUPPLEMENTARY INFORMATION: EPA is revising certain provisions in 40 CFR Part 720 concerning premanufacture notification requirements, most notably the exemption for research and development.

I. Background

Under section 5 of TSCA, any person who intends to manufacture or import a new chemical substance for commercial purposes must notify EPA at least 90 days before manufacture or import begins. This requirement has been in effect since July 1, 1979. Since then, EPA has received and reviewed more than 6,000 notices on such new substances.

EPA promulgated a final premanufacture notice (PMN) rule in the Federal Register of May 13, 1983 (48 FR 21722). After receiving comments from the public, EPA postponed the effective date of the rule so that it could review several provisions. In the Federal Register of September 13, 1983 (48 FR 41132), EPA stated that the rule would become effective on October 26, 1983, with the exception of four provisions: (1) § 720.3(y) (the definition of "possession or control"); (2) § 720.38 (procedural requirements concerning new chemical substances manufactured under the section 5(h)(3) exemption for R&D); (3) § 720.78(b) (recordkeeping requirements for R&D); and (4) § 720.50(c) (data requirements on related chemicals). It also issued a non-substantive amendment to § 720.102(b)(1) (timing of submission of the notice of commencement of manufacture). On December 27, 1984, EPA proposed modifications of the stayed provisions in the Federal Register (49 FR 50201), and proposed a modified definition of "manufacture solely for export" (§ 720.3(s)). EPA is now issuing these provisions as a final rule. It is also issuing a non-substantive amendment to § 720.102(a) to further clarify the timing of submission of the notification of commencement of manufacture.

II. Provisions of Final Rule

A. Exemption for Research and Development

1. *Summary of rule.* Section 5(h)(3) of TSCA exempts the manufacture or import of small quantities of new chemical substances produced solely for research and development (R&D) from the PMN requirements if the manufacturer or importer notifies persons engaged in R&D of any health risks that the company or EPA has reason to believe may be associated with the chemical substance.

The provisions promulgated in this notice, together with §§ 720.3(cc) and 720.3(ee), promulgated on May 13, 1983, define the scope of the R&D exemption and establish the requirements associated with it. Section 720.3(cc) defines the phrase "small quantities" as those quantities no greater than necessary for R&D purposes, and § 720.3(ee) provides a definition of the "technically qualified individual" who must supervise the R&D. Sections 720.36 and 720.78(b), issued as part of the rule published with this notice, clarify specific requirements associated with the section 5(h)(3) exemption for R&D.

Under § 720.36, manufacturers and importers must evaluate information in their possession or control to determine whether a new chemical substance manufactured under the section 5(h)(3) exemption poses a risk to health, and they must notify employees who are exposed to the substance of the risks associated with it. However, § 720.36(b)(2) exempts R&D conducted entirely in laboratories under prudent laboratory practices from the requirement for risk evaluation. Section 720.36(c)(2) provides that, if manufacturers and importers distribute an R&D substance to other persons, they must provide those persons with written notification of known hazards and of the requirement that the substance be used solely for R&D. Section 720.36(d) prohibits the processing, use, sale, or distribution for non-R&D uses of R&D substances and mixtures containing R&D substances without submission of a PMN and completion of PMN review. Sections 720.36 (d) and (e) do permit, however, the sale of articles containing the R&D substance and chemical substances containing the R&D substance as an impurity, disposal of the substance, and certain forms of commercial recycling, assuming that other requirements of the R&D exemption are met.

Section 720.78(b) establishes recordkeeping requirements for manufacturers and importers taking advantage of the R&D exemption.

The R&D exemption of section 5(h)(3) also applies to persons who manufacture, import, or process a chemical substance for a significant new use designated in a rule under section 5(a)(2). Section 5(a)(1)(B) requires submission of a notice to EPA at least 90 days before a person manufactures, imports, or processes a substance for a designated significant new use. However, section 5(h)(3) exempts the person if the substance is manufactured, imported, or processed in small quantities solely for R&D. Thus, such persons can conduct R&D concerning a significant new use without submitting a notice. Pending promulgation of the revisions of §§ 720.36 and 720.78(b), EPA did not promulgate specific rules applicable to the R&D exemption for significant new use rules (SNUR's) because EPA intended to make the R&D provisions for SNUR's as similar as possible to those for PMN's. Accordingly, now that §§ 720.36 and 720.78(b) have been revised, EPA intends to amend 40 CFR Part 721, Subpart A (the general provisions for SNUR's) to incorporate provisions similar to §§ 720.36 and 720.78(b). These provisions would cover manufacturers, importers, and processors of substances for significant new uses and would be altered as necessary to address the SNUR situation. EPA is soliciting comment on any modifications that may be needed to accommodate §§ 720.36 and 720.78(b) to R&D for SNUR's.

On December 31, 1984, EPA published a proposed policy regarding certain microbial products, focusing on the products of genetic engineering (49 FR 50880). In that proposed policy EPA discussed the need to alter the definition of "small quantities" for R&D to address the problem of release of microorganisms to the environment as part of R&D (field testing). EPA is still considering the need to amend the definition in § 720.3(cc), as well as the provisions of §§ 720.36 and 720.78(b), to meet the concerns about R&D activities conducted with microorganisms. These concerns have not been taken into account in promulgating §§ 720.36 and 720.78(b). Any such amendments to address R&D with microorganisms will be the subject of a future proposal with an opportunity for public comment.

2. *Scope of R&D.* a. *Definition.* In its notice of December 27, 1984, EPA proposed retaining the qualitative approach to defining "small quantities" solely for research and development used in § 720.2(cc) of the PMN Rule. EPA stated that there is no single quantitative limit that would allow for the variety of research taking place in the chemical industry, and commenters on the rule unanimously agreed. Therefore, this rule does not amend the definition of "small quantities" solely for R&D.

EPA has previously published considerable guidance on the scope of activities that fall within R&D, most recently in the notice in the Federal Register of December 27, 1984 (49 FR 50202). The Agency understands R&D activities to include tests of the physical, chemical, production, and performance characteristics of a chemical substance. The substance must be used directly by, or under the supervision of, a technically qualified individual, who must carefully monitor the tests and measure or assess their results. Chemical substances produced for R&D may be distributed in commerce, as long as the buyer uses them solely for purposes of R&D. However, distribution of a chemical substance to consumers removes it from the category of R&D.

EPA and TSCA also differentiate R&D from test marketing activities. The latter usually involve limited sale or distribution of a substance within a predetermined period of time to determine its competitive value when its market is uncertain. Test marketing activities require a manufacturer or importer to submit a PMN or an application for a test market exemption under § 720.38 of the PMN Rule.

EPA intends to summarize guidance on the definition of R&D in an information bulletin to be issued in the near future.

b. *Residual R&D material.* EPA recognizes that in some cases manufacturers and importers will have a surplus of a material produced for R&D after the R&D activities are complete. Section 720.36(d) of this rule prohibits the non-R&D commercial use or sale of this substance or of mixtures containing this substance before a PMN has been submitted and reviewed. If the manufacturer or importer intends to manufacture or import further quantities of the substance for non-R&D purposes, it can submit a PMN, a polymer exemption PMN under 40 CFR 723.250, or a low volume exemption notice under 40 CFR 723.500, as appropriate. Unless EPA acts to prevent manufacture or import, the manufacturer or importer would be free, upon completion of the relevant review period, to use the surplus R&D material for non-R&D purposes, as well as any additional quantities manufactured or imported afterwards.

In some situations, the manufacturer or importer does not intend to manufacture or import any additional quantities of the substance for non-R&D purposes. Rather, it seeks only to use up the material already produced during the R&D activities. Several commenters requested that EPA develop an expedited review procedure under section 5(h)(4) for such one-time use of R&D substances. EPA is not developing such a rule at this time because it believes that is not possible to make for all activities involving such R&D substances the "will not present an unreasonable risk" finding necessary for an exemption under section 5(h)(4). However, EPA has concluded that it is appropriate to allow manufacturers and importers in such situations to submit a PMN, a polymer exemption PMN, or a low volume exemption notice, as appropriate, to allow EPA to review the intended activities. If necessary, EPA could use its authority under section 5(e) or (f), or under the terms of the exemption rules, to prevent the intended activities if they may present an unreasonable risk. Substances described in such PMN's or exemption notices would not go on the inventory because they would not be manufactured or imported for nonexempt commercial purposes (see unit II.E. below for discussion of notice of commencement of manufacture or import).

Although persons conducting R&D may not sell or use R&D substances or mixtures for non-R&D purposes, § 720.36(d) permits the non-R&D use or sale of substances containing the R&D material as an impurity. For example, an R&D substance tested for its effectiveness as a process aid (e.g., a catalyst or a reagent) or an intermediate may exist as an impurity in the final product resulting from the R&D. If the final product is an existing chemical, it may be used for non-exempt commercial purposes without a PMN being submitted on the R&D substance, as long as the product was produced in the course of legitimate R&D, and the manufacturer or importer meets all the requirements of the exemption for R&D and the PMN rule. If the final product is not on the TSCA inventory, a PMN is necessary for that quantity of the substance before it can be sold or used in commerce, but no PMN is necessary for the R&D intermediate unless further non-R&D production is required.

In addition, § 720.36(d) permits manufacturers or importers to use or sell articles incorporating an R&D chemical substance without the submission of a PMN, as long as the article was produced in the course of legitimate R&D. EPA has received questions about the interpretation of the term "article," as defined in § 720.3(c). The Agency considers an item to meet the definition of an "article" if it is manufactured in a specified shape or design for a particular end-use application, and this design is maintained as an essential feature in the finished product. The item must have no change of chemical composition during its end-use, or only incidental changes. If an item is manufactured in a particular shape for the purpose of shipping convenience and the shape of the item has no function in the end-use, it would not be viewed as an article. Therefore, the category of articles includes an automobile painted with a coating containing an R&D pigment, and a moldable plastic sheet which incorporates an R&D stabilizer, but it does not include substances distributed in containers, e.g., paint containing an R&D pigment in a can, or such items as ingots, billets and blooms. Manufacturers and importers who use or sell articles produced for R&D should assess these activities for potential risks in accordance with the risk evaluation provision of § 720.36(b)(1). In addition, they must keep appropriate records of the disposition of R&D chemicals in articles, as required by § 720.78(b)(2).

Section 720.36(d) of the proposed rule, which specified commercial methods of recycling and disposal permissible under the R&D exemption, caused some confusion among commenters. EPA has reorganized the section and created § 720.36(e) to state more clearly that the rule does not prohibit disposal of wastes from R&D activities, and that it allows certain commercial uses of surplus R&D substances. However, all forms of disposal of waste from research and development activities must follow

VOL 51 ISS 77 AP 22 1986 UMI

local, state, and Federal regulations, and those wastes which meet the criteria for hazardous wastes under the Resource Conservation and Recovery Act must follow the procedures it requires. In addition, § 720.36(e) identifies other permissible commercial uses of surplus R&D substances: (1) Burning them as fuel, and (2) reacting or processing them to form other chemical substances.

Several commenters on the proposal raised specific questions about permissible methods of recycling or disposal of surplus R&D substances, including the recycling of small amounts of R&D substances into refinery feedstocks and the thermal oxidation of R&D substances to form commercially valuable substances. EPA has already clarified that small quantities of R&D fuels can be disposed of by blending small amounts into refinery streams without triggering PMN requirements (48 FR 7636). This constitutes disposal exempt under § 720.36(e)(1). In addition, EPA has modified the proposed rule to broaden the range of methods by which manufacturers may process chemical substances which remain after R&D activities are complete. In contrast to the proposal, which limited processing to extraction, the final rule, in addition, allows manufacturers and importers to react or otherwise process residual R&D substances to form other chemical substances for commercial use.

c. *Pesticides and pesticide intermediates.* In the Federal Register of December 27, 1984 (49 FR 50201), EPA stated that it considered chemical substances that were in the process of R&D as pesticides to be subject to TSCA, and therefore subject to the R&D rule. It referred to the Comment and Response Document accompanying the Inventory Reporting Requirements of December 23, 1977 (42 FR 64572), which stated the presumption that these chemical substances are subject to TSCA until their manufacturers or importers demonstrate intent to create a pesticide by submitting an application for an experimental use permit (EUP) or an application for registration under the Federal Insecticide, Fungicide, Rodenticide, and Insecticide Act (FIFRA).

Public comments on the R&D revision argued that FIFRA defines a pesticide as any chemical substance intended for pest control, and contended that R&D devoted solely to such pest control constituted evidence of intent to create a substance for pesticidal use. In addition, the comments indicated that it was unreasonable to subject pesticide R&D activities to TSCA R&D requirements when the final product would not be subject to TSCA.

EPA believes that the interpretation embodied in comment responses for the inventory reporting rule remains valid and that pesticide R&D activities are generally subject to TSCA jurisdiction until submission of an application for an EUP or a registration. While EPA recognizes that other activities may also evidence the "intent" to make a pesticide, it is very difficult to define such activities. Further, such activities take place after the substance is first manufactured—the event that triggers an obligation under section 5. However, EPA recognizes that requiring persons conducting strictly pesticide-oriented R&D to comply with §§ 720.36 and 720.78(b) for the period of time until an application for an EUP or a registration is submitted, but not after, may place an unnecessary burden on such activities. In general EPA believes that persons engaged in exclusively pesticide R&D activities are aware of the potential toxicity of the substances and that applying the specific requirements §§ 720.36 and 720.78(b) will not provide any additional protection. Further, the alternative to complying with the requirements of the rule would be the submission of a PMN. But in the case of a substance undergoing R&D for ultimate development of a pesticide, a PMN would be contradictory. Accordingly, EPA has decided, as a matter of policy, to exclude from the application of §§ 720.36 and 720.78(b) manufacture of a new chemical substance where the exclusive intention of the subsequent R&D activities of the person manufacturing the new substance and conducting the R&D activities is to develop the substance as a pesticide. This would apply even if the potential properties of the substance as a pesticide are unknown at the time it is first manufactured—a likely situation. The Agency considers the existence of a patent relating to use as a pesticide or the manufacture of the substance by a company or a laboratory wholly devoted to pesticide R&D and marketing as evidence of exclusive pesticide intent. In contrast, exclusive pesticide intent would not be conveyed by the manufacture of a substance by a company or in a laboratory whose R&D and marketing efforts ranged beyond pest control, unless the manufacturer or importer could present other positive evidence of express and exclusive pesticide intent for the substance. In such non-exclusive cases, R&D activities for the substance would be subject to §§ 720.36 and 720.78(b) until the submission of an application for an EUP or registration under FIFRA, or other activities begin which provide evidence of exclusive pesticide intent. Thus any R&D activities would be conducted in accordance with § 720.36 until the event evidencing exclusive pesticide intent occurs.

The other provisions of TSCA still apply to pesticide-oriented R&D activities, in particular the provisions of section 8(e) which require notice to EPA of information concerning substantial risks of such substances.

In addition, EPA has received several inquiries about the relevance of the R&D exemption to intermediates and inerts used in the production of pesticides. These chemical substances fall within the jurisdiction of TSCA and are eligible for the R&D exemption. A new chemical substance used in small quantities as a pesticide intermediate or inert is eligible for an R&D exemption (1) if research and development is conducted on the intermediate or inert substance itself, or (2) if the substance is used to produce a pesticide which is used only for R&D. In the latter case, the R&D status of the pesticide intermediate or inert depends on the commercial purpose of the pesticide it is used to produce.

If manufacturers or importers produce the final pesticide in small quantities, solely for purposes of R&D, the intermediate qualifies for the R&D exemption. If the pesticide falls outside the TSCA definition of R&D, EPA requires a PMN for the intermediates involved in its manufacture (unless, of course, the intermediates themselves are the subject of R&D activities).

In reaching a decision on whether a pesticide is manufactured for R&D purposes only, the manufacturer must consider the specifics of the use. Submission of an application for an experimental use permit on a pesticide does not automatically mean that the pesticide remains within the scope of R&D or has gone beyond it for TSCA purposes. If the purpose of the experimental use is to determine customer acceptance or economic viability, or if the pesticide is distributed to consumers, the pesticide would fall outside the scope of R&D under TSCA.

d. *Research for non-commercial purposes.* As EPA proposed on December 27, 1984, research conducted for non-commercial purposes, as described in § 720.30(i), lies outside the scope of section 5 and is not subject to the requirements of the R&D exemption. EPA considers non-commercial purposes to be research activities conducted by academic, government, or independent not-for-profit research organizations, unless the activity is intended for commercial use. If the research is funded by contract, joint venture, or other financial arrangement with the purpose of eventually producing a commercial product, the organization is not exempt from the requirements of section 5 for that substance. For example, research conducted under a research contract between a company and a university, where patent rights or trade secrets are held by the company, would be considered commercial R&D. In contrast, research funded by an outright gift from a company to a university, with no limitations on either the purpose for which the funds are to be used or the use to be made of the results of the research conducted, would be considered non-commercial R&D.

3. *Requirements.* a. *Evaluation and notification of risks.* Section 720.36(a)(2) of the proposed rule would have required manufacturers and importers to perform a risk evaluation of substances used for R&D, and to notify persons engaged in the R&D of any risks identified. Companies reviewing risks would have to consider information in their possession or control (see discussion in unit II.C.) and all proposed or final rules issued under sections 4, 5, or 6 of TSCA. EPA has retained this provision in the final rule, with one modification: Manufacturers are not required to consider proposed rules in their evaluation of risks. EPA has revised this provision because of the tentative nature of many proposals, and because of the difficulty manufacturers may have in ascertaining whether a specific substance is the subject of a proposal. However, those manufacturing chemical substances under the exemption for R&D should nevertheless consider all available information on potential health and environmental risks, including information accompanying proposed EPA rules and advanced notices of proposed rulemaking.

Section 720.36(b)(2) of this rule, like the proposal, exempts manufacturers of chemical substances used solely in laboratories operating according to prudent laboratory practices from the requirement to evaluate risks. EPA has defined the term laboratory for the purposes of this rule as a contained research facility where relatively small quantities of chemical substances are used on a non-production basis, and where activities involve the use of containers for reactions, transfers, and other handling of substances designed to be easily manipulated by a single individual. The Agency discussed the nature of prudent laboratory practices in the Federal Register notice of December 27, 1984 (49 FR 50204).

Several commenters on the proposed rule have asked about the application of this definition to particular circumstances. The definition emphasizes the controlled use of small quantities, and certainly applies to laboratory work conducted by a team of researchers using prudent laboratory practices. The definition does not apply to R&D conducted in pilot plants, because such activities involve relatively large quantities of new chemical substances in situations where workers may operate under reduced controls. Some commenters have inquired as to whether the definition of laboratory and the exclusion from risk assessment include the activities of workers who dispose of the chemical substance for a laboratory. In that case, no chemical-specific risk assessment is necessary, but disposal must follow prudent laboratory practice.

Other commenters asked EPA to clarify whether R&D substances transferred from one laboratory to another were subject to the requirement for risk evaluation. As long as the substance is transferred to a laboratory operating under prudent laboratory practices, no chemical-specific risk evaluation is required. However, the distributing laboratory is required, in accordance with § 720.36(c)(2), to notify the person receiving the R&D substance that the substance is to be used only for purposes of R&D.

b. *Recordkeeping.* In the Federal Register of December 27, 1984, EPA proposed a two-tiered system for recordkeeping to document compliance with the requirements of the exemption for R&D. It has decided to retain the proposed system, which divides the equired records into two categories: those which must be kept for all new substances produced for R&D, and those which must be kept for chemical substances produced in larger volumes. It has, however, modified the requirements to reduce the burden of recordkeeping as much as possible while still ensuring effective documentation of compliance. EPA also retains the requirement that manufacturers or importers keep the specified records for 5 years, a period consistent with other PMN requirements and necessary for the Agency to monitor compliance effectively.

All persons producing chemical substances under the exemption for R&D, regardless of the amount, must document compliance with requirements for evaluation and notification of risks. The proposed regulation would have required manufacturers and importers to maintain copies of information reviewed and evaluated, but the final rule allows them to keep citations to this information, such as references to internal files or unpublished data, and to keep a record of the nature and method of the notifications given to workers. Those manufacturers or importers who use chemical substances in laboratories must document the prudent laboratory practices that excuse them from the requirements for risk evaluation. EPA considers the use and presence of codes of laboratory standards or handbooks such as those cited in the Federal Register of December 27, 1984 (49 FR 50201) to constitute evidence of prudent laboratory practices. Finally, if a manufacturer or importer distributes a chemical substance for purposes of R&D to another person in any quantity, EPA requires a record of the identity of the substance to the extent known, the names and addresses of persons to whom the substance is distributed, documentation of the quantities distributed, and copies of the notifications required under § 720.36(c)(2).

EPA has restructured the second set of records required from certain manufacturers or importers of an R&D substance. If the total quantity of the R&D substance produced in a year exceeds 100 kg, the manufacturer or importer must record the identity of the substance to the extent known, the volumes produced, and the disposition of the substance.

In the proposed rule, companies were required to keep records of the "identity" of R&D substances, unless less than 100 kg per year were produced or the substances were distributed to other persons. Several commenters pointed out that in certain circumstances manufacturers or processors may not know the specific identity of an R&D substance. To address this concern, EPA has modified the recordkeeping provision to require that the identity of the substance be kept to the extent it is known. Where the specific substance of the substance is not known, the company may identify it by company code, generic name, or some other indicator or they are in the articles or products.

The provision in the proposed rule that manufacturers and importers record the "method of disposal" of substances used for R&D led to some confusion. To clarify its intent, EPA has modified the final rule to require records of the "disposition" of R&D substances, rather than of their "methods of disposal." Companies are responsible for

VOL 51 ISS 77 AP 22 1986 UMI

documenting their own activities. They are not required by this rule to maintain records documenting what becomes of an R&D substance after their own activities are complete and they no longer have control of the substance.

The provision that manufacturers retain specific records when an R&D substance is distributed to other persons does not apply if the substance is incorporated into an article or exists in a final product as an impurity. If an R&D substance produced at more than 100 kg per year is incorporated into articles in the course of R&D or is included in a product as an impurity, manufacturers must record the disposition of the substance in the article or the final product (assuming the substance is produced at more than 100 kg per year), but they are not specifically required to document the disposition of the articles or products themselves, or the names and addresses of the persons to whom they are distributed. In addition, the specific quantities involved are not subject to the notification requirements of § 720.36(c)(2).

Beyond the specific records required by the rule, manufacturers and importers who conclude they are exempt from PMN requirements for a chemical substance used for purposes of R&D should be prepared to justify the nature and scope of their activities. EPA notes here that, although the final rule does not require manufacturers and importers of R&D substances to maintain records demonstrating that their activities constitute legitimate R&D, the burden of proving eligibility for the R&D exemption, as for any specific exemption from an otherwise applicable general statutory requirement, rests with the person claiming the exemption. EPA advises manufacturers and importers of R&D substances to be prepared to meet this responsibility should a question arise concerning their compliance with the general requirements for PMN or the exemption for R&D.

B. Data on Related Chemicals

EPA has reexamined the proposed requirement in § 720.50(c), published in the Federal Register notice of December 27, 1984 (49 FR 50209), that persons submitting a PMN provide the Agency with unpublished data on the health and environmental effects of chemicals, such as byproducts and feedstocks, which are related in the course of production to the new chemical substance which is the focus of the PMN. While section 5(d)(1)(B) and (C) of TSCA grants the EPA broad authority to require such data, EPA finds that it is not necessary to exercise this authority in the case of every new chemical substance. For most reviews of new substances, published data on the health and environmental effects of related substances and data submitted under section 8(e) will suffice to enable EPA to evaluate risks.

Should the Agency determine that data on related chemicals are essential to its review of a particular new chemical substance, it will request the additional data from the submitter, a procedure recommended by the Chemical Manufacturers Association (CMA). In a comment on the proposed rule, CMA wrote that in the event EPA required unpublished data on related chemicals, "EPA could ask the PMN submitter to search for the data the Agency needed to complete its review. If such data are available, the PMN submitter could provide them to EPA on request." This approach will provide a flexible method of securing information necessary to conduct premanufacture reviews. Accordingly, the requirements of § 720.50(c) have been deleted. EPA points out, however, that it is in the interest of submitters to provide the Agency with a full description of all available data relevant to a risk assessment of the chemical substance that is the focus of the PMN. Failure to provide this information, where it is important to assessing risk, may unnecessarily delay review of the PMN, potentially leading to extension of the review period and possible action.

EPA also reminds manufacturers and importers that existing provisions of the PMN rule still require them to submit certain information about related chemicals. Under § 720.45 of the PMN rule, paragraph (b) requires reporting of the identity and volume of impurities, and paragraph (d) requires descriptions of byproducts resulting from the manufacture, processing, and use of the new chemical substance. In addition, section 8(e) of TSCA requires manufacturers and importers to provide EPA with any information which they obtain which supports the conclusion that a substance or mixture presents a substantial risk to health or the environment.

C. Possession or Control

Section 5(b)(1)(B) of TSCA and § 720.50 of the PMN rule require manufacturers and importers to submit all health and environmental effects test data on the new chemical substance in their "possession or control." In addition, § 720.36(b)(1)(i) requires manufacturers or importers of R&D substances to evaluate certain information in their "possession or control" to meet the requirements for the exemption for R&D. EPA has made a slight change in the language of § 720.3(y) from the proposed rule to clarify that data in a manufacturer's or importer's possession or control include data in the files of its agents who are engaged in R&D, test marketing, or commercial marketing of the substance to the extent that the files are kept in that person's capacity as an agent. EPA considers these selected groups of individuals, who work under contract or special arrangement for a manufacturer or importer on a specific project, to be under that company's control for the scope of the project. Companies must request that the files of the agents engaged in such work be searched for data on health and environmental effects relevant to the activities they are under contract to pursue. EPA also includes within the scope of data in "possession or control" the files of persons engaged in research, development, test marketing or commercial marketing of a new chemical substance, and who are employed by companies associated with the submitter of the PMN but which are located outside the United States, unless the laws of the foreign nation forbid such a search.

D. Export-Only Chemicals

Section 12(a) of TSCA exempts from PMN new chemical substances which are manufactured or processed for export only and will not be used in the U.S. The proposed revision of § 720.3(s) would have limited processing to activities occurring under the control of the manufacturer or importer. In this final rule, EPA modifies the definition of the term "manufacture solely for export" to include processing which is not under the direct control of a manufacturer or importer, as long as it occurs solely for export. (The rule cross-references the definition of "process solely for export" in 40 CFR 721.3.) However, the manufacturer must know, by means of a contract or some other evidence, that the processing is occurring for export only. For substances to qualify as export-only chemicals, their processing must also be limited to activities which do not involve use. For example, formulating a mixture constitutes a legitimate form of processing for export-only chemicals, but their use as intermediates in chemical production does not.

E. Notification of Commencement of Manufacture

As discussed earlier in this notice, EPA allows a manufacturer or importer to use R&D material for non-R&D commercial purposes only after completion of the PMN review period, except as described in § 720.36 (d) and (e). EPA has received queries about the timing of notification of commencement of manufacture in cases where PMN review has been completed, but the manufacturer intends to begin non-exempt commercial activities with quantities of the new chemical substance previously produced for purposes of R&D.

EPA requires persons to submit a notification of commencement of manufacture within thirty days of the start of non-exempt commercial manufacture of a new substance. If amounts of the new chemical produced for R&D already exist, a manufacturer or importer may use them for non-exempt commercial purposes as soon as the PMN review is complete, but that person may not submit a notification of commencement of manufacture until actual non-exempt manufacture begins. Section 720.102(a) has been revised to reflect this. In addition, even after the PMN review period ends, the new substance may be manufactured solely for R&D or solely for export. In that case, the manufacturer or importer should submit no notice of commencement of manufacture until non-exempt manufacture occurs.

III. Rulemaking Record

EPA has established a record for this rulemaking (docket number OPTS-50002L), which is available for inspection in Rm. E-107, 401 M St., SW., Washington, DC 20460, from 8 a.m. to 4 p.m. Monday through Friday, except legal holidays. Persons who do not have access to the record in the public reading room should contact Edward A. Klein, Director, TSCA Assistance Office (TS-799), at the above address for assistance.

The record includes information EPA considered in developing this rule. The record includes:

1. This notice and PMN documents cited in this notice.
2. Public comments.
3. Summaries of meetings with trade associations, public interest groups, and other groups.
4. Economic support documents.
5. Survey of research and development activities conducted by chemical firms.
6. All communications between EPA and persons outside the Agency pertaining to the development of the rule.
7. A document responding to public comments.

IV. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must determine whether a rule is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this rule is not major because it would not have an effect of $100 million or more on the economy. The rule will not have a significant effect on competition, costs, or prices. EPA submitted this rule to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

As required by the Regulatory Flexibility Act (5 U.S.C. 605(b)), EPA has assessed the impact of this rule on small businesses. EPA has determined that since the rulemaking involves relatively minor revisions to the final PMN rule, it will not create additional impacts on small businesses over those already identified in the final PMN rule, 48 FR 21722.

C. Paperwork Reduction Act

The information provisions in this rule are a subset of the information collection requirements of the PMN rule, which has already been cleared by OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* OMB control number is 2070-0012.

List of Subjects in 40 CFR Part 720

Chemicals, Environmental protection, Premanufacture notification, Hazardous materials, Recordkeeping and reporting requirements.

Dated: April 7, 1986.

Lee M. Thomas,
Administrator.

PART 720—[AMENDED]

Therefore, 40 CFR Part 720 is amended as follows:

1. The authority citation for Part 720 is revised to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2613.

2. In § 720.3, paragraphs (s) and (y) are revised to read as follows:

§ 720.3 Definitions.

* * * * *

(s) "Manufacture solely for export" means to manufacture or import for commercial purposes a chemical substance solely for export from the United States under the following restrictions on activities in the United States:

(1) Distribution in commerce is limited to purposes of export or processing solely for export as defined in § 721.3 of this chapter.

(2) The manufacturer or importer, and any person to whom the substance is distributed for purposes of export or processing solely for export (as defined in § 721.3 of this chapter), may not use the substance except in small quantities solely for research and development in accordance with § 720.36.

* * * * *

(y) "Possession or control" means in possession or control of the submitter, or of any subsidiary, partnership in which the submitter is a general partner, parent company, or any company or partnership which the parent company owns or controls, if the subsidiary, parent company, or other company or partnership is associated with the submitter in the research, development, test marketing, or commercial marketing of the chemical substance in question. (A parent company owns or controls another company if the parent owns or controls 50 percent or more of the other company's voting stock. A parent company owns or controls any partnership in which it is a general partner). Information is included within this definition if it is:

(1) In files maintained by submitter's employees who are:

(i) Associated with research, development, test marketing, or commercial marketing of the chemical substance in question.

(ii) Reasonably likely to have such data.

(2) Maintained in the files of other agents of the submitter who are associated with research, development, test marketing, or commercial marketing of the chemical substance in question in the course of their employment as such agents.

* * * * *

3. In § 720.30, paragraph (e) is revised and paragraph (i) is added to read as follows:

§ 720.30 Chemicals not subject to notification requirements.

* * * * *

(e) Any new chemical substance manufactured solely for export if, when the substance is distributed in commerce:

(1) The substance is labeled in accordance with section 12(a)(1)(B) of the Act.

(2) The manufacturer knows that the person to whom the substance is being distributed intends to export it or process it solely for export as defined in § 721.3 of this chapter.

* * * * *

VOL 51 ISS 77 AP 22 1986 UMI

(i) Any chemical substance which is manufactured solely for non-commercial research and development purposes. Non-commercial research and development purposes include scientific experimentation, research, or analysis conducted by academic, government, or independent not-for-profit research organizations (e.g., universities, colleges, teaching hospitals, and research institutes), unless the activity is for eventual commercial purposes.

* * * * *

4. Section 720.36 is revised to read as follows:

§ 720.36 Exemption for research and development.

(a) This Part does not apply to a chemical substance if the following conditions are met:

(1) The chemical substance is manufactured or imported only in small quantities solely for research and development.

(2) The manufacturer or importer notifies all persons in its employ or to whom it directly distributes the chemical substance, who are engaged in experimentation, research, or analysis on the chemical substance, including the manufacture, processing, use, transport, storage, and disposal of the substance associated with research and development activities, of any risk to health, identified under paragraph (b) of this section, which may be associated with the substance. The notification must be made in accordance with paragraph (c) of this section.

(3) The chemical substance is used by, or directly under the supervision of, a technically qualified individual.

(b)(1) To determine whether notification under paragraph (a)(2) of this section is required, the manufacturer or importer must review and evaluate the following information to determine whether there is reason to believe there is any potential risk to health which may be associated with the chemical substance:

(i) Information in its possession or control concerning any significant adverse reaction by persons exposed to the chemical substance which may reasonably be associated with such exposure.

(ii) Information provided to the manufacturer or importer by a supplier or any other person concerning a health risk believed to be associated with the substance.

(iii) Health and environmental effects data in its possession or control concerning the substance.

(iv) Information on health effects which accompanies any EPA rule or order issued under sections 4, 5, or 6 of the Act that applies to the substance and of which the manufacturer or importer has knowledge.

(2) When the research and development activity is conducted solely in a laboratory and exposure to the chemical substance is controlled through the implementation of prudent laboratory practices for handling chemical substances of unknown toxicity, and any distribution, except for purposes of disposal, is to other such laboratories for further research and development activity, the information specified in paragraph (b)(1) of this section need not be reviewed and evaluated. (For purposes of this paragraph, a laboratory is a contained research facility where relatively small quantities of chemical substances are used on a non-production basis, and where activities involve the use of containers for reactions, transfers, and other handling of substances designed to be easily manipulated by a single individual.)

(c)(1) The manufacturer or importer must notify the persons identified in paragraph (a)(2) of this section by means of a container labeling system, conspicuous placement of notices in areas where exposure may occur, written notification to each person potentially exposed, or any other method of notification which adequately informs persons of health risks which the manufacturer or importer has reason to believe may be associated with the substance, as determined under paragraph (b)(1) of this section.

(2) If the manufacturer or importer distributes a chemical substance manufactured or imported under this section to persons not in its employ, the manufacturer or importer must in written form:

(i) Notify those persons that the substance is to be used only for research and development purposes.

(ii) Provide the notice of health risks specified in paragraph (c)(1) of this section.

(3) The adequacy of any notification under this section is the responsibility of the manufacturer or importer.

(d) A chemical substance is not exempt from reporting under this Part if any amount of the substance, including as part of a mixture, is processed, distributed in commerce, or used, for any commercial purpose other than research and development, except where the chemical substance is processed, distributed in commerce, or used only as an impurity or as part of an article.

(e) Quantities of the chemical substance, or of mixtures or articles containing the chemical substance, remaining after completion of research and development activities may be:

(1) Disposed of as a waste in accordance with applicable Federal, state, and local regulations, or

(2) Used for the following commercial purposes:

(i) Burning it as a fuel.

(ii) Reacting or otherwise processing it to form other chemical substances for commercial purposes, including extracting component chemical substances.

(f) Quantities of research and development substances existing solely as impurities in a product or incorporated into an article, in accordance with paragraph (d) of this section, and quantities of research and development substances used solely for commercial purposes listed in paragraph (e) of this section, are not subject to the requirements of paragraphs (a), (b), and (c) of this section, once research and development activities have been completed.

(g) A person who manufactures or imports a chemical substance in small quantities solely for research and development is not required to comply with the requirements of this section if the person's exclusive intention is to perform research and development activities solely for the purpose of determining whether the substance can be used as a pesticide.

5. Section 720.50 is amended by removing and reserving paragraph (c) to read as follows:

§ 720.50 Submission of test data and other data concerning the health and environmental effects of a substance.

* * * * *

(c) [Reserved]

* * * * *

6. In § 720.78, paragraph (b) is revised to read as follows:

§ 720.78 Recordkeeping.

* * * * *

(b)(1) Persons who manufacture or import a chemical substance under § 720.36 must retain the following records:

(i) Copies of, or citations to, information reviewed and evaluated under § 720.36(b)(1) to determine the need to make any notification of risk.

(ii) Documentation of the nature and method of notification under § 720.36(c)(1) including copies of any labels or written notices used.

(iii) Documentation of prudent laboratory practices used instead of notification and evaluation under § 720.36(b)(2).

(iv) The names and addresses of any persons other than the manfacturer or importer to whom the substance is distributed, the identity of the substance to the extent known, the amount distributed, and copies of the notifications required under § 720.36(c)(2). These records are not required when substances are distributed as impurities or incorporated into an article, in accordance with paragraph (d) of this section.

(2) A person who manufactures or imports a chemical substance under § 720.36 and who manufactures or imports the substance in quantities greater than 100 kilograms per year must retain records of the identity of the substance to the extent known, the production volume of the substance, and the person's disposition of the substance. The person is not required to maintain records of the disposition of products containing the substance as an impurity or of articles incorporating the substances.

(3) Records under this paragraph must be retained for 5 years after they are developed.

* * * * *

7. In § 720.102, paragraph (a) is revised to read as follows:

§ 720.102 Notice of commencement of manufacture or import.

(a) *Applicability.* Any person who commences the manufacture or import of a new chemical substance for a nonexempt commercial purpose for which that person previously submitted a section 5(a) notice under this Part must submit a notice of commencement of manufacture or import.

* * * * *

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPTS-50527; FRL-2929-8]

Toxic Substances; Significant New Use Rules; Proposed Amendments to General Provisions and Individual Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing amendments to 40 CFR Part 721 and to four significant new use rules (SNURs) currently codified in Subpart B of Part 721, under section 5(a)(2) of the Toxic Substances Control Act (TSCA, 15 U.S.C. 2604(a)(2)). The Agency is proposing these amendments in order to clarify specific existing provisions, and to incorporate new sections developed in response to public comments.

DATE: Written comments should be submitted by June 23, 1986.

ADDRESS: Since some comments may contain confidential business information, all comments should be sent in triplicate to: Document Control Officer (TS-793), Office of Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460.

Comments should include the docket control number OPTS-50527. Nonconfidential comments and sanitized versions of confidential comments received on this proposal will be available for reviewing and copying from 8 a.m to 4 p.m., Monday through Friday, excluding legal holidays, in Rm. E-107 at the address given above.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-543, 401 M St., SW., Washington, DC 20460. Toll free: (800-424-9065). In Washington, DC: (554-1404). Outside the USA: (Operator 202-554-1404).

SUPPLEMENTARY INFORMATION:

I. Authority

Section 5(a)(2) of TSCA authorizes EPA to determine that a use of a chemical substance is a significant new use. EPA must make this determination by rule after considering all relevant factors, including those listed in section 5(a)(2). Once a use is determined to be a significant new use, persons must, under section 5(a)(1)(B), submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use.

II. Background

On September 5, 1984 (49 FR 35011), the Agency promulgated 40 CFR Part 721, Subpart A—General Provisions. Subpart A contains general reporting provisions that apply to all SNURs. In addition, the Agency has promulgated SNURs in the current Subpart B to Part 721, covering a number of specific chemical substances.

The Agency has received public comments on the general provisions in Subpart A and on certain SNURs in Subpart B (listed in Unit III of this preamble). EPA also has received comments proposing adoption in certain SNURs of the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (29 CFR 1900.1200). This rule is being proposed in response to all of these comments.

III. Summary of This Proposed Rule

The Agency is proposing the following amendments to 40 CFR Part 721: (1) Substantive revisions of §§ 721.5 and 721.10; (2) the addition of a new § 721.12 that would establish a mechanism whereby persons subject to SNURs in which worker exposure controls or environmental release controls are identified may seek an equivalency determination for alternative worker exposure and/or environmental release controls; (3) the redesignation of § 721.19 as § 721.18 and addition of a new paragraph that would establish procedures for advance compliance with SNURs; (4) the addition of a new § 721.19 that would establish risk evaluation, notification, and recordkeeping requirements applicable to the section 5(h)(3) research and development exemption for SNURs; (5) the addition of four sections that set forth hazard communication requirements for certain significant new uses, to be codified as a new Subpart B to be designated as Generic Requirements for Certain Significant New Uses; and (6) the redesignation of the existing Subpart B as Subpart C, and revisions of the following SNURs in that Subpart:

P-83-304 (§ 721.160, 49 FR 43653);
P-83-255 (§ 721.290, 49 FR 43064);
P-83-23, P-83-24, P-83-49, P-83-75, and P-83-272 (§ 721.615, 49 FR 50396);
P-82-664 (§ 721.975, 49 FR 42932).

IV. Agency Rationale

A. Persons Who Must Report

Section 721.5 describes those persons who must submit a significant new use notice. Paragraph (a)(2) requires each person who intends to manufacture, import, or process a SNUR substance for commercial purposes and who intends to distribute the substance in commerce to submit a significant new use notice. However, persons subject to paragraph (a)(2) currently are exempt from SNUR reporting requirements if they satisfy two requirements: (1) The person must not have a reasonable belief at the time of commercial distribution that customers intend to engage in a significant new use without submitting a notice to EPA, and (2) the person must be able to document that customers were notified in writing of the SNUR.

Subsequent to the promulgation of Subpart A, the Agency received comments requesting clarification of the responsibility of manufacturers, importers, and processors to submit significant new use notices as specified under the provisions of section 5(a)(1)(B) of TSCA and § 721.5(a)(2). Specifically questioned were the provisions of paragraph (a)(2). Concern was expressed that, as currently phrased, paragraph (a)(2) "might infer" an affirmative obligation upon manufacturers, importers, and processors to monitor or familiarize themselves with the activities of their customers. The Agency's intent, under this paragraph, was not the creation of an affirmative obligation for manufacturers, importers, and processors of SNUR substances to monitor or familiarize themselves with their customers' activities, when they would not do so as a normal course of business. The Agency simply intended to require a manufacturer, importer, or processor of a SNUR substance to submit a significant new use notice when that person has a reasonable belief that a customer intends to engage in a significant new use without submitting a notice to EPA.

Although the Agency believes this paragraph clearly exempts a manufacturer of a SNUR substance who has a reasonable belief that a customer does not intend to engage in a significant new use, there may be some ambiguity as to the circumstances when EPA will deem a manufacturer to have formed this "reasonable belief." To clarify its intent, the Agency is proposing to delete the phrase "reasonable belief" from § 721.5 and amend paragraph (a)(2) to specify that the Agency allows optional methods for SNUR compliance. Thus, a manufacturer, importer, or processor of a SNUR substance need not submit a significant new use notice if they do not intend to engage in the significant new use themselves, *and* they can document

(1) that they have provided all recipients of the substance with notice of the SNUR, (2) all recipients of the substance know of the SNUR, or (3) it is technically or otherwise infeasible for recipients of the substance to engage in the significant new use.

Under the revised § 721.5, then, the manufacturer, importer, or processor of a SNUR substance would have the flexibility of choice either to submit a significant new use notice, as required by TSCA (because recipients of the substance may engage in the significant new use) or to adopt EPA's optional method of compliance (by notifying recipients or by documenting that recipients otherwise know about the SNUR or cannot engage in the significant new use). The revised § 721.5 does not require customer notification, but instead offers an alternative means of compliance.

To provide consistency, the Agency is proposing to amend paragraphs (b), (c), (c)(1), and (2) of § 721.5 to reflect the changes in paragraph (a)(2). It is proposed that the phrase "reasonable belief" be deleted and replaced with the word "knowledge," and the word "customer" be deleted and replaced with the word "recipient."

B. Notice Requirements and Procedures

Section 721.10(d) provides that "any person submitting a significant new use notice in response to the requirements of this Part 721 shall not commence manufacture, import, or processing. . . ." Because a notice could be submitted under § 721.5 after manufacture, import, or processing has begun, the Agency intended that such manufacture, import, or processing not go on during the notice review period. Deleting the word "commence" clarifies this intention. The Agency is, therefore, proposing a technical amendment to § 721.10(d) to delete the word "commence" to clarify the meaning of this section.

C. Equivalency Determination

The Agency's approach to SNURs in which worker exposure or environmental release controls are identified for specific chemical substances is to ensure that: (1) Adequate measures are utilized to limit worker exposure and environmental release to reduce risk, or (2) EPA will receive notice of those circumstances when these controls may not be provided, and will have an opportunity to review the data in the notice before the significant new use occurs. These two Agency goals are attained when controls are employed which the Agency has previously reviewed and identified in a SNUR or when a SNUR notice is submitted and EPA has reviewed and acted upon the notice.

Comments to proposed SNURs which would require reporting for the failure to employ specific worker exposure controls or environmental release controls indicated a desire for EPA to create a means by which persons who manufacture, import, or process substances identified in SNURs could select alternative methods of controlling worker exposure or environmental releases (other than the methods identified in the SNUR). It was suggested that if alternative exposure or release control measures provided an "equivalent level of protection," such exposure or release controls might be allowed to begin without waiting 90 days for review of a SNUR notice.

There may be instances when alternative exposure or release controls that EPA has not considered are available to a manufacturer, importer, or processor. These exposure or release controls may provide protection from exposure or release that is substantially equivalent to or better than the controls identified in the SNUR. In those instances, the Agency is willing to evaluate those methodologies in an abbreviated fashion and possibly allow the substantially equivalent approach if it believes it reasonable to do so.

The Agency is proposing to amend certain SNURs and to add a new § 721.12 to the General Provisions for SNURs which would establish a mechanism by which manufacturers, importers, or processors of substances subject to SNURs may propose alternative exposure or release controls. Under this proposal, alternative controls which EPA determines provide substantially the same degree of protection against exposure or release would not constitute a significant new use because increased releases or exposure will not occur. The Agency would determine in each instance whether the alternative exposure or release controls provide protection substantially equivalent to those controls identified in the specific SNUR.

The Agency's new § 721.12 contains procedures for a manufacturer, importer, or processor to seek an EPA determination that the person's alternative exposure or release controls provide substantially the same degree of protection against exposure or release as the identified exposure or release controls in a specific SNUR—an "equivalency determination." The person would provide EPA information on the proposed exposure or release controls, and EPA would make a determination within 45 days. If EPA determined that the proposed alternative exposure or release controls provided substantially the same degree of protection as the specific controls in the SNUR, EPA would notify the person in writing, and the person could begin the activities using the alternative exposure or release controls. The person would not be in violation of the SNUR as long as the person continued to use those approved alternative exposure or release control measures.

A person asking EPA to determine whether alternative exposure or release controls provide substantially the same degree of protection as those in the SNUR would also be required to submit any test data in their possession or control or other data known to or reasonably ascertainable by them as they would in an SNUR notice (see § 750.50 (a) and (b) of the PMN rule). The person would not be required to submit any data which had already been submitted to the Office of Toxic Substances, for example, in a previous Premanufacture Notice (PMN) or SNUR notice or in a notice under section 8(e). EPA would not use this particular information to make the equivalency determination under the proposed § 721.12. Rather, the data would enable EPA to review whether the specific SNUR requires modification or whether other regulatory action might be necessary with respect to the specific chemical substance.

In addition, EPA is proposing that each provision of the affected SNURs which provides for specific controls to prevent worker exposure or environmental release be amended to include additional language which takes into account the new equivalency provision, § 721.12. These individual SNURs would identify the significant new use as the failure to use either the specified controls in the original SNURs or other exposure or release controls which EPA has determined provide substantially the same degree of protection against exposure or release as the original controls.

D. Research and Development Exemption

Section 5(h)(3) of TSCA exempts the manufacturer, importer, or processor of a chemical substance for a significant new use from the SNUR notification requirements if the substance is manufactured, imported, or processed only in small quantities solely for research and development (R&D), provided the manufacturer, importer, or processor notifies persons engaged in the R&D of any health risks that the company or EPA has reason to believe

VOL 51 ISS 77 AP 22 1986 UMI

may be associated with the chemical substance.

On May 13, 1983, EPA promulgated its general PMN rule (48 FR 21722) including § 720.3(cc) which defines "small quantities solely for research and development," § 721.0(ee) which defines "technically qualified individual," § 720.36 which set out the requirements to evaluate health risks and to notify persons engaged in the R&D activities of the risks, and § 720.78(b) which set out the associated recordkeeping requirements. After receiving comments from the public, EPA stayed §§ 720.36 and 720.78(b) pending further rulemaking. EPA proposed revisions of §§ 720.36 and 720.78(b) on December 27, 1984 (49 FR 50201), and is publishing these two provisions in a final rule elsewhere in this issue of the Federal Register.

Since §§ 720.36 and 720.78(b) were stayed at the time the general SNUR provisions were published in September 1984, EPA did not include specific requirements for SNUR-related R&D activities, pending the outcome of the PMN rulemaking activity. Now that the PMN rulemaking has been completed, EPA is proposing to redesignate § 721.19 as § 712.18, to modify § 721.18(b), and to add a new § 721.19 to specify the requirements that manufacturers, importers, and processors of a SNUR substance for a significant new use must meet to qualify for the section 5(h)(3) R&D exemption.

The proposed new § 721.19 is worded very closely to §§ 720.78 and 721.36. It applies only to persons who manufacture, import, or process a substance identified in a specific SNUR for a designated significant new use in small quantities solely for R&D. Proposed paragraphs (a), (b), and (c) relating to evaluation of risks and notification of persons conducting R&D activities and paragraph (e) containing recordkeeping requirements are virtually the same as §§ 721.36 (a), (b), and (c) and 721.78(b), respectively. A discussion of §§ 720.36 (a), (b), and (c) and 720.78 can be found in the final PMN rule preamble in this Federal Register.

No provision comparable to § 720.36(d) would be included in the new § 721.19 because the use of the substance would already be restricted by the other provisions of § 721.20 and the underlying SNUR.

Proposed § 721.19(d) would be comparable to § 720.36(e) but modified to allow quantities of the chemical substance, or of mixtures or articles containing the substance, to be disposed of, or used for commercial purposes other than R&D provided the disposal activity or use would not itself constitute a significant new use. If the disposal activity or the use would be a significant new use, a notice would be required.

No provision comparable to § 720.36(g) has been included. It is not necessary in a SNUR context because pesticide-related R&D activities would not constitute a significant new use.

The close correspondence between §§ 720.36 and 720.78(b) and the proposed new § 721.19 would ensure that persons engaging in R&D activities related to new chemical substances and to substances identified in SNURs would be able to conduct their risk evaluation, notification, and recordkeeping activities in the same manner, regardless of the type of substance, simplifying compliance.

E. Applicability of Proposed Rules to Uses Occurring Before Promulgation of Final Rules

In the preambles to previously proposed SNURs, the Agency described its finding that section 5(a)(1)(B) of TSCA is best served by determining whether a use is a significant new use as of the date of proposal. The Agency continues to maintain that this interpretation of section 5 reflects the intent of Congress with regard to SNURs; if uses begun during the proposal period of the SNUR were not considered to be significant new uses, it would be difficult for the Agency to establish SNUR notice requirements, because any person could defeat the SNUR by initiating a proposed significant new use before the rule became final.

Persons who engage in a proposed significant new use prior to promulgation of a final SNUR would be required to cease production and submit a SNUR notice as of the effective date of the final rule. However, it is not the intent of the Agency to unnecessarily disrupt the commercial activities of these persons. EPA therefore is proposing that such persons be allowed to comply with a SNUR before the rule is promulgated. If a company were to meet all of the conditions of advance compliance, as specified in the proposed new § 721.19(h) in Subpart A, the company would be exempt from the requirements of the final SNUR for those activities. It should be emphasized that EPA intends to use its full TSCA authority to control the company's activities should the Agency determine that such activities will present an unreasonable risk to human health or the environment.

The first requirement for advance compliance with a SNUR would be to submit a complete significant new use notice to EPA. Any person that submits an advance SNUR notice for a subject chemical substance would be required to follow the general notification requirements of § 721.10, except that the company would not have to submit the notice to the Agency at least 90 days before it begins manufacturing, importing, or processing. However, should the final SNUR be promulgated prior to completion of the Agency's review, the company would be required to cease manufacturing, importing, or processing for the remaining portion of the 90-day period. The notice would have to contain all requisite SNUR data, with limitations described in the applicable proposed SNUR.

EPA's procedures for the receipt, handling, and evaluation of advance significant new use notices under this rule generally would be the same as for any other significant new use notices. The Agency would publish a notice of receipt in the Federal Register, as required by section 5(d)(2) of TSCA. Nonconfidential data from the advance notice would be added to EPA's public file for SNUR notices. The Agency then would conduct an evaluation of all data from the advance SNUR notice, together with any other relevant data in EPA's possession. The Agency would determine whether the intended significant new use would adequately control exposure to and/or release of the substance (thus, preventing a potential unreasonable risk to health or the environment), and whether further regulatory action would be required.

There are four possible situations which may occur after EPA completes its review of an advance significant new use notice.

1. If there is sufficient information for EPA to conclude that the activities described in the notice would represent no unreasonable risk to human health or the environment under any reasonably foreseeable circumstances, the Agency would take no further regulatory action with regard to the proposed activities of the company. Under this option, EPA would notify the manufacturer, importer, or processor of its intent not to take further action. The company would be allowed to undertake the significant new use after the final SNUR became effective, without delay or the need to comply further with the rule for the activities described in the notice.

2. If there is not sufficient information for EPA to reasonabley determine whether the activities described in the notice would present an unreasonable risk under any reasonably foreseeable circumstances, but the Agency believes that the intended activities would not pose such a risk if certain procedures or restrictions are followed (until additional data demonstrated them to be unnecessary), the Agency would attempt to negotiate a section 5(e) consent order with the company. The consent order would specify that the manufacturer, importer, or processor must follow the restrictions or procedures while undertaking the activities. If a consent order is signed, it would go into effect on the effective date of the final rule. The company would not be able to deviate from the terms of the consent order after the effective date without being in violation of TSCA.

3. If there is not sufficient information for EPA to reasonably determine whether the activities described in the notice would present an unreasonable risk under any reasonably foreseeable circumstances, and EPA and the company are not able to negotiate acceptable terms of a section 5(e) consent order, the manufacturer, importer, or processor would not qualify for an advance compliance exemption under the SNUR. The company therefore would be subject to the requirements of the final SNUR as though it had not submitted an advance significant new use notice, including ceasing the activities until it complies with the notice requirements.

4. If there is sufficient information for EPA to reasonably conclude that the activities described in the notice will present an unreasonable risk to human health and the environment, the manufacturer, importer, or processor would not have met all of the conditions of the advance compliance exemption. The Agency would not pursue a section 5(e) consent order in this case. Instead, the company would be required to cease the significant new use (if not already done) on the effective date of the final SNUR, submit a significant new use notice, and wait until completion of the statutory review period before resuming the activities. If the Agency believes that the risk requires immediate control, EPA could take action under TSCA section 6(a) (made immediately effective under section 5(f)) or section 7 to control the risk.

The Agency believes that its approach to advance SNUR compliance is an acceptable means of accomplishing its risk assessment and risk management objectives regarding possible significant new uses, without causing members of the regulated community to suffer unnecessary delays in their business activities. The advance compliance exemption in this rule would not waive EPA's enforcement authority with regard to any SNUR notice submitter.

F. Hazard Communication Requirements

The Agency is proposing amendments intended to establish certain generic hazard communication requirements that can be incorporated subsequently, by cross-reference, into individual SNUR notice requirements. In particular, certain SNURs could require the submission of significant new use notices for the failure to implement a communication program that includes, among other things, the labeling of packages containing certain substances, the creation and maintenance of material safety data sheets (MSDSs) for substances, and employee information and training programs.

This proposal is in response to comments received on certain SNURs which contained hazard communication requirements. Commenters suggested that EPA adopt the OSHA Hazard Communication Standard rather than promulgate communication requirements unique to each rule. Because these comments were not submitted in a timely fashion, and the Agency believed it to be in the public interest not to delay promulgation of potentially affected SNURs, these SNURs were promulgated without the suggested changes. However, at this time the Agency is proposing to amend these and other SNURs to make specific aspects consistent, to the extent appropriate under TSCA, with the relevant provisions of the recently promulgated OSHA standard.

These proposed amendments of individual SNURs would, in effect, substitute uniform hazard communication requirements for those similar elements now contained in the individual SNUR reporting triggers. For example, the segments of the SNUR covering the substance F–83–304 (§ 721.180, 49 FR 43653), which pertain to informing workers of the reasons for the specified worker protection equipment, would be altered under the proposed amendments. The rule would require the submission of a significant new use notice by manufacturers (excluding importers) and processors of the substance if they fail to provide workers with the requisite information in accordance with the proposed § 721.27 of Subpart B.

OSHA's Hazard Communication Standard places the burden of identifying hazards and the appropriate protective measures on the employer; however, under these SNUR amendments EPA would specify which potential hazards must be communicated and what protective measures must be employed.

For the purposes of SNURs incorporating the proposed hazard communication requirements, manufacturers, importers, and processors subject to such a SNUR would have the option to either comply with these requirements or submit a significant new use notice prior to manufacturing, importing, or processing. EPA's hazard communication requirements would apply regardless of whether the manufacturer, importer, or processor is subject to the OSHA Hazard Communication Standard.

G. Recordkeeping

The Agency has two goals for recordkeeping provisions contained in SNURs. They are: (1) To encourage conscientious compliance with these rules, and (2) to provide written records for compliance monitoring activities.

Comments have indicated that certain sectors of the chemical industry would prefer a more flexible approach to recordkeeping than that contained in certain SNURs. The comments have stated that requiring the maintenance of records which would "demonstrate compliance" would allow that flexibility. In particular, persons would have the option of incorporating recordkeeping for substances subject to SNURs into their present recordkeeping systems, rather than having to implement a completely different method of recordkeeping to comply with specific requirements of the Agency's present SNURs.

The Agency agrees, in part, with these comments and has investigated alternative recordkeeping strategies. The Agency has not, however, arrived at a final position with regard to this issue. In lieu of proposing recordkeeping amendments at this time, the Agency is choosing instead to solicit additional public comment. The Agency encourages persons to provide comments regarding recordkeeping, and is particularly interested in receiving comments that address recordkeeping strategies for previously published significant new uses, i.e., waste disposal, employee training, use of protective equipment, etc.

H. Conforming Changes

EPA is proposing minor changes to §§ 721.1, 721.5, 721.6, 721.7, and 721.10 to conform to the other elements of this proposal.

Economic Analysis

Promulgation of these amendments will result in costs to both EPA and

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

industry. However, as will be addressed below, the costs are not expected to be more than without the proposed amendments, and in some cases may be less. Where quantification is possible, the costs associated with each proposed amendment are discussed. In some cases, only a qualitative discussion is possible. The costs of the relevant sections of previously proposed SNURs (in the absence of the proposed amendments) are also discussed.

1. *Section 721.5 Persons who must report.* Companies involved in the manufacture, import, or processing of a SNUR substance would incur costs of compliance with this section. The costs could range from those costs associated with a letter notifying the customer of the existence of the SNUR, up to the costs of filing a SNUR notice. The Agency has estimated the costs of filing a SNUR notice to be $1,400 to $8,000. Additional costs of filing a SNUR notice could be incurred up to a 3.2 percent reduction in profits due to delays in manufacturing or processing and the costs of regulatory follow-up, if any.

The actual costs of notifying customers of the existence of a SNUR are expected to be minimal, e.g., the cost of a letter to the customer. The Agency believes that most companies will choose to document that customers know of the rule via a notification letter as it is the least costly alternative.

This proposed amendment will not result in any additional cost to future proposed SNURs; rather it clarifies an existing section in Subpart A.

2. *Section 721.12 Equivalency determination.* Based on comments to proposed SNURs which would require reporting for failure to employ specific worker exposure or environmental release controls, the Agency believes that most companies seeking an equivalency determination would either already have or will have access to the alternative controls for which they are seeking an equivalency, such companies would either have to submit a SNUR notice ($1,400 to $8,000 plus up to a 3.2 percent reduction in profits) and/or incur the cost of instituting the control as specified in the SNUR.

The cost to companies of this proposed amendment would be the costs associated with the development of the data submitted to the Agency, i.e., justification that the alternative exposure or release controls provide at least the same degree of protection. The Agency cannot estimate the exact costs at this time. Other costs associated with equivalency determination involve filing the request for equivalency determination, and delay costs during Agency review. The Agency expects the costs of filing the equivalency notice to be equal to or less than the costs of filing a SNUR notice, since the data required in a request for an equivalency determination are less than that required in a SNUR notice. In addition, any potential loss in profits due to delays associated with Agency review would be less. Delay costs are estimated to be a 3.2 percent reduction in profits due to delays in manufacturing and processing during the 90-day Agency review of SNUR notices. Delay costs associated with an equivalency determination would be half of delay cost for a SNUR notice, or a 1.6 percent reduction in profits due to delays during the 45-day Agency review.

Therefore, while the Agency cannot quantify the exact costs, the total costs are expected to be less for an equivalency determination than for submitting a SNUR notice.

3. *Section 721.19 Advance compliance.* The procedures for advance compliance are generally the same as for any SNUR notice. The manufacturer, importer, or processor must submit a complete SNUR notice. This notice would not, however, need to be submitted 90 days prior to commencing manufacture, import, or processing but could be submitted anytime between proposal and promulgation of the SNUR. The costs to the company for filing a SNUR notice are estimated to be between $1,400 and $8,000.

The major difference is that if the Agency negotiates with the company to control or limit the significant new use, or does not ban, the company can continue production of the chemical without interruption when the SNUR is promulgated, thereby avoiding any loss in profits usually attributed to delays in manufacturing or processing during Agency review.

If the Agency takes action or is unable to negotiate a control or limit, or would ban the chemical, the effect of the request for advance compliance is little more than advance notice to the company or the Agency's intention should the company pursue the significant new use after promulgation.

4. *Subpart B: Hazard communication requirements.* Manufacturers, importers, and processors subject to a SNUR incorporating the proposed hazard communication requirements have the option of complying with these requirements or submitting a SNUR notice. The costs of complying with these requirements would not differ from the costs previously assumed in each proposed SNUR; these costs are summarized below. It is important to note that EPA would specify which potential hazards must be communicated and what protective measures must be employed, unlike OSHA's Hazard Communication Standard which places the burden of identifying the hazards and the appropriate protective measures on the employer.

The proposed amendment contains requirements for employee information, labeling containers, and MSDSs. As in previously proposed SNURs, the Agency has not separated the cost of informing employees of the potential hazards associated with the use of one chemical from the employee training program assumed to be already in place. The initial labeling costs are estimated to be between $135 and $500, which is the development cost of the label. Other labeling costs are expected to be minimal. An MSDS has been estimated to cost $20 (this cost is for preparation of the form only).

To the extent the proposed amendments would allow employers to merge the SNUR requirements with the employers system to comply with the OSHA Hazard Communication Standard, the overall costs of compliance with the SNURs may be reduced.

VI. Confidential Business Information

Any person who submits comments which the person claims as confidential business information (CBI) must mark the comments as "confidential," "trade secret," or other appropriate designation. Any comments not claimed as confidential at the time of submission will be placed in the public file. Any comments marked as confidential will be treated in accordance with the procedures in 40 CFR Part 2. EPA requests that any party submitting confidential comments prepare and submit a sanitized version of the comments which EPA can place in the public file.

VII. Rulemaking Record

EPA has established a record for this proposal (docket control number OPTS-50527). A public version of this record from which CBI has been deleted is available to the public from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the OTS Reading Room, Rm. E-107, 401 M St. SW., Washington, DC.

The record includes basic information considered by the Agency in developing this proposed rule. The record now includes the following:

1. The public comments which have prompted this action.

2. This proposal.

3. The economic analysis in support of this proposed rule.

VIII. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore requires a Regulatory Impact Analysis. EPA has determined that these proposed amendments are not "Major Rules" because they will not have an effect on the economy of $100 million or more and will not have a significant effect on competition, costs, or prices. While there is no precise way to calculate the potential annual cost of this proposal, for the reasons explained in this preamble, EPA believes that the cost will be low. In addition, because of the nature of the proposed amendments and the substances subject to them, EPA believes that there will be few significant new use notices and requests for equivalency determinations submitted.

These amendments were submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), EPA certifies that these amendments will not have a significant economic impact on a substantial number of small businesses. The Agency cannot determine whether parties affected by these amendments are likely to be small businesses. However, EPA believes that the number of small businesses affected by this proposed rule would not be substantial even if all the potential new uses were developed by small companies. EPA expects to receive few SNUR notices for the substances subject to the amendments.

C. Paperwork Reduction Act

OMB has approved the information collection requirements contained in the proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. and has assigned OMB control number 2070-0012. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB, marked Attention: Desk Officer for EPA. The final rule package will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Recordkeeping and reporting requirements, Significant new uses.

Dated: April 10, 1986.

J. A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

PART 721—[AMENDED]

Therefore, it is proposed that 40 CFR Part 721 be amended as follows:

1. The authority citation for Part 721 would continue to read as follows:

Authority: 15 U.S.C. 2604 and 2607.

2. In § 721.1 by revising paragraphs (a) and (b) to read as follows:

§ 721.1 Scope and applicability.

(a) This Part identifies uses of chemical substances which EPA has determined are significant new uses under the authority of section 5(a)(2) of the Toxic Substances Control Act. In addition, it specifies procedures for manufacturers, importers, and processors to report on those significant new uses. This Subpart A contains general provisions applicable to this Part. Subpart B of this Part identifies generic requirements for certain significant new uses cross referenced in specific provisions of Subpart C of this Part. Subpart C of this Part identifies chemical substances and their significant new uses.

(b) This Subpart A contains provisions governing submission and review of notices for the chemical substances and significant new uses identified in Subpart C of this Part. The provisions of this Subpart A apply to the chemical substances and significant new uses identified in Subpart C of this Part except to the extent they are specifically modified or supplanted by specific requirements in Subpart C of this Part. In the event of a conflict between the provisions of this Subpart A and the provisions of Subpart C of this Part, the provisions of Subpart C of this Part shall govern.

* * * * *

3. In § 721.5 by revising the entire section to read as follows:

§ 721.5 Persons who must report.

(a) The following persons must submit a significant new use notice as specified under the provisions of section 5(a)(1)(B) of the Act, Part 720 of this chapter, and § 721.10.

(1) A person who intends to manufacture, import, or process for commercial purposes a chemical substance identified in a specific section in Subpart C of this Part, and intends to engage in a significant new use of the substance identified in that section.

(2) A person who intends to manufacture, import, or process for commercial purposes a chemical substance identified in a specific section in Subpart C of this Part, and intends to distribute the substance in commerce. A person described in this paragraph is not required to submit a significant new use notice if that person can document one of the following:

(i) That the person has notified all recipients of the substance, in writing, of the specific section in Subpart C of this Part which identifies the substance and its designated significant new uses.

(ii) That the recipients have knowledge of the specific section in Subpart C of this Part which identifies the substance and its designated significant new uses.

(iii) That the recipients cannot undertake any significant new use described in the specific section in Subpart C of this Part.

(b) A person described in paragraph (a)(2) of this section must submit a significant new use notice if that person has knowledge at the time of commercial distribution of the substance identified in the specific section in Subpart C of this Part that a recipient intends to engage in a designated significant new use of that substance without submitting a notice under this Part.

(c) A person who processes a chemical substance identified in a specific section in Subpart C of this Part for a significant new use of that substance is not required to submit a significant new use notice if that person can document the following:

(1) That the person does not know the specific chemical identity of the chemical substance being processed, and

(2) That the person is processing the chemical substance without knowledge that the substance is identified in Subpart C of this Part.

(d) If at any time after commencing distribution in commerce of a chemical substance identified in a specific section in Subpart C of this Part a person described in paragraph (a)(2) of this section has knowledge that a recipient of the substance is engaging in a significant new use of that substance designated in that section without submitting a notice under this Part, the person is required to cease supplying the chemical substance to that recipient and to submit a significant new use notice for that chemical substance and significant new use, unless the person is able to document the following:

(1) That the person has ceased supplying the chemical substance to the

VOL 51 ISS 77 AP 22 1986 UMI

recipient when the person had knowledge that the recipient is engaging in a significant new use or processing the substance for a significant new use without submitting a notice under this Part.

(2) That the person has promptly notified EPA enforcement authorities that the recipient is engaging in a significant new use or processing the substance for a significant new use without submitting a notice under this Part.

(3) That the person has not resumed supplying the chemical substance to the recipient until all notices required under this Part have been submitted to EPA and the notice review periods have ended without regulatory action by EPA.

(e) Any significant new use notice relating to import of a substance must be submitted by the principal importer.

4. In § 721.6 by revising paragraphs (a) and (e) to read as follows:

§ 721.6 Applicability determination when the specific chemical identity is confidential.

(a) A person who intends to manufacture, import, or process a chemical substance which is described by a generic chemical name in Subpart C of this Part may ask EPA whether the substance is subject to the requirements of this Part. EPA will answer such an inquiry only if EPA determines that the person has a bone fide intent to manufacture, import, or process the chemical substance for commercial purposes.

* * * * *

(e) If the manufacturer, importer, or processor has shown a bond fide intent to manufacture, import, or process the substance and has provided sufficient unambiguous chemical identity information to enable EPA to make a conclusive determination as to the identity of the substance, EPA will inform the manufacturer, importer, or processor whether the chemical substance is subject to this Part and, if so, which section in Subpart C of this Part applies.

* * * * *

5. In § 721.7 by revising the entire section to read as follows:

§ 721.7 Exports and imports.

Persons who intend to export a substance identified in Subpart C of this Part, or in any proposed rule which would amend Subpart C of this Part, are subject to the export notification provisions of TSCA section 12(b). The regulations that interpret section 12(b) appear at 40 CFR Part 707. Persons who import a substance identified in a specific section in Subpart C of this Part are subject to the TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. The EPA policy in support of the import certification rquirements appears at 40 CFR Part 707b.

6. In § 721.10 by revising paragraphs (a), (b), and (d) to read as follows:

§ 721.10 Notice requirements and procedures.

(a) Each person who is required to submit a significant new use notice under this Part must submit the notice at least 90 calendar days before commencing manufacture, import, or processing of a chemical substance identified in Subpart C of this Part for a significant new use. The submitter must comply with any applicable requirement of section 5(b) of the Act, and the notice must include the information and test data specified in section 5(d)(1) of the Act. The notice must be submitted on the notice form in Appendix A to Part 720 of this chapter and must comply with the requirements of Part 720, except to the extent that they are inconsistent with this Part 721.

(b) If two or more persons are required to submit a significant new use notice for the same chemical substance and significant new use identified in Subpart C of this Part, they may submit a joint notice to EPA. Persons submitting a joint notice must individually complete the certification section of Part I of the required notification form. Persons who are required to submit individually, but elect to submit jointly, remain individually liable for the failure to submit required information which is known to or reasonably ascertainable by them and test data in their possession or control.

* * * * *

(d) Any person submitting a significant new use notice in response to the requirements of this Part 721 shall not manufacture, import, or process a chemical substance identified in Subpart C of this Part for a significant new use until the notice review period, including all extensions and suspensions, has expired.

7. By adding a new § 721.12 to read as follows:

§ 721.12 EPA approval of alternative control measures.

(a) In certain sections in Subpart C of this Part, significant new uses for the identified substances are described as the failure to establish and implement programs providing for the use of either: specific measures to control worker exposure to or environmental release of substances which are identified in such sections, or alternative measures to control worker exposure or environmental release, which EPA has determined provide substantially the same degree of protection as the specified control measures. Persons who manufacture, import, or process a chemical substance identified in such sections and who intend to employ alternative measures to control worker exposure or environmental release must submit a request to EPA for a determination of equivalency before commencing manufacture, import, or processing involving the alternative control measures.

(b) A request for a determination of equivalency must be submitted in writing and must contain:

(1) The name of the submitter.

(2) The specific chemical identity of the substance.

(3) The citation for the specific section in Subpart C of this Part which pertains to the substance for which the request is being submitted.

(4) A detailed description of the activities involved.

(5) The specifications of the alternative worker exposure control measures or environmental release control measures.

(6) An analysis justifying why such alternative control measures provide substantially the same degree of protection as the specific control measures identified in the specific section in Subpart C of this Part which pertains to the substance for which the request is being submitted.

(7) The data and information described in § 720.50 (a) and (b) of this chapter unless such data and information have already been submitted to the Office of Toxic Substances, EPA.

(c) Requests for determinations of equivalency will be reviewed by EPA within 45 days. Notice of the results of such determinations will be mailed to the submitter.

(d) If EPA notifies the submitter under paragraph (c) of this section that the Agency has determined that the alternative control measures provide substantially the same degree of protection as the specific control measures identified in the specific section of Subpart C of this Part which pertains to the substance for which the request is being submitted, then the submitter may commence manufacture, import, or processing in accordance with the specifications for alternative worker exposure control measures or environmental release control measures identified in the submitter's request, and may alter any corresponding notification to workers to reflect such alternative controls. Deviations from the activities described in the EPA notification constitute a significant new use and are subject to the requirements of this Part.

8. By redesignating § 721.19 as § 721.18, by revising the introductory text and paragraphs (a) and (b), and by adding a new paragraph (h), to read as follows:

§ 721.18 Exemptions.

The persons identified in § 721.5 are not subject to the notification requirements of § 721.10 for a chemical substance identified in Subpart C of this Part if:

(a) The person has applied for and has been granted an exemption for test marketing the substance for a significant new use identified in Subpart C of this Part in accordance with section 5(h)(1) of the Act and § 720.38 of this chapter.

(b) The person manufactures, imports, or processes the substance for a significant new use identified in Subpart C of this Part in small quantities solely for research and development in accordance with § 721.19.

* * * * *

(h) The person submits a significant new use notice for the substance prior to the promulgation date of the section in Subpart C of this Part which identifies the substance, and the person receives written notification of compliance from EPA prior to the effective dates of such section. The notice submitter must comply with any applicable requirement of section 5(b) of the Act. The notice must include the information and test data specified in section 5(d)(1) of the Act and must be submitted on the notice form in Appendix A to Part 720 of this chapter. For purposes of this exemption, the specific section in Subpart C of this Part which identifies the substance and §§ 721.1, 721.3, 721.6, 721.13, and 721.17 apply; after the effective date of the section in Subpart C of this Part which identifies the substance, §§ 721.5 and 721.7 also apply. EPA will provide the notice submitter with written notification of compliance only if one of the following occurs:

(1) EPA is unable to make the finding that the activities described in the significant new use notice will or may present an unreasonable risk of injury to health or the environment under reasonably foreseeable circumstances.

(2) EPA and the person negotiate a consent order under section 5(e) of the Act, such order to take effect on the effective date of the section in Subpart C of this Part which identifies the substances.

9. By adding a new § 721.19 to read as follows:

§ 721.19 Conditions for research and development exemption.

(a) A person who manufactures, imports, or processes a chemical substance identified in Subpart C of this Part for a significant new use identified in Subpart C of this Part is not subject to the notification requirements of § 721.10 if the following conditions are met:

(1) The person manufactures, imports, or processes the substance for the significant new use in small quantities solely for research and development.

(2) The manufacture, importer, or processor notifies all persons in its employ or to whom it directly distributes the chemical substance, who are engaged in experimentation, research, or analysis on the chemical substance, including the manufacture, processing, use, transport, storage, and disposal of the substance associated with research and development activities, of any risk to health, identified under paragraph (b) of this section, which may be associated with the substance. The notification must be made in accordance with paragraph (c) of this section.

(3) The chemical substance is used by, or directly under the supervision of, a technically qualified individual.

(b)(1) To determine whether notification under paragraph (a)(2) of this section is required, the manufacturer, importer, or processor must review and evaluate the following information to determine whether there is reason to believe there is any risk to health which may be associated with the chemical substance:

(i) Information in its possession or control concerning any significant adverse reaction by persons exposed to the chemical substance which may reasonably be associated with such exposure.

(ii) Information provided to the manufacturer, importer, or processor by a supplier or any other person concerning a health risk believed to be associated with the substance.

(iii) Health and environmental effects data in its possession or control concerning the substance.

(iv) Information on health effects which accompanies any EPA rule or order issued under sections 4, 5, or 6 of the Act that applies to the substance and of which the manufacturer, importer, processor has knowledge.

(2) When the research and development activity is conducted solely in a laboratory and exposure to the chemical substance is controlled through the implementation of prudent laboratory practices for handling chemical substances of unknown toxicity, and any distribution, except for purposes of disposal, is to other such laboratories for further research and development activity, the information specified in paragraph (b)(1) of this section need not be reviewed and evaluated. (For purposes of this paragraph (b)(2), a laboratory is a contained research facility where relatively small quantities of chemical substances are used on a non-production basis, and where activities involve the use of containers for reactions, transfers, and other handling of substances designed to be easily manipulated by a single individual.)

(c)(1) The manufacturer, importer, or processor must notify the persons identified in paragraph (a)(2) of this section by means of a container labeling system, conspicuous placement of notices in areas where exposure may occur, written notification to each person potentially exposed, or any other method of notification which adequately informs persons of health risks which the manufacturer, importer, or processor has reason to believe may be associated with the substance, as determined under paragraph (b)(1) of this section.

(2) If the manufacturer, importer, or processor distributes a chemical substance manufactured, imported, or processed under this section to persons not in its employ, the manufacturer, importer, or processor must in written form:

(i) Notify those persons that the substance is to be used only for research and development purposes.

(ii) Provide the notice of health risks specified in paragraph (c)(1) of this section.

(3) The adequacy of any notification under this section is the responsibility of the manufacturer, importer, or processor.

(d) Quantities of the chemical substance, or of mixtures or articles containing the chemical substance, remaining after completion of research and development activities may be:

(1) Disposed of as a waste in accordance with applicable Federal, State, and local regulations, to the extent the disposal activity is not identified as a significant new use in Subpart C, or

(2) Used for a commercial purpose, to the extent the use is not identified as a significant new use in Subpart C of this Part.

(e)(1) Persons who manufacture, import, or process a chemical substance under this section must retain the following records:

VOL 51 ISS 77 AP 22 1986 UMI

(i) Copies of or citations to information reviewed and evaluated under paragraph (b)(1) of this section to determine the need to make any notification of risk.

(ii) Documentation of the nature and method of notification under paragraph (c)(1) of this section including copies of any labels or written notices used.

(iii) Documentation or prudent laboratory practices used instead of notification and evaluation under paragraph (b)(2) of this section.

(iv) The names and addresses of any persons other than the manufacturer, importer, or processor to whom the substance is distributed, the identity of the substance, the amount distributed, and copies of the notifications required under paragraph (C)(2) of this section.

(2) [Reserved]

10. By redesignating existing Subpart B as Subpart C, without any change in existing section numbers, and by adding a new Subpart B to read as follows:

Subpart B—Generic Requirements for Certain Significant New Uses

Sec.

721.20 Applicability.
721.27 Employee information.
721.30 Labeling for distribution in commerce.
721.32 Labeling for use in the workplace.
721.35 Material safety data sheets.

Subpart B—Generic Requirements for Certain Significant New Uses

§ 721.20 Applicability.

This Subpart B identifies generic requirements for certain significant new uses of specific chemical substances identified in Subpart C of this Part. The provisions of this Subpart apply only when referenced in specific sections of Subpart C of this Part.

§ 721.27 Employee information.

Whenever referenced in a specific section in Subpart C of this Part, the requirements for providing employees with information on the identified chemical substance are as follows:

(a) The manufacturer, importer, or processor shall ensure that employees are provided with information, either in writing or through training, on the substance identified in the specific section in Subpart C of this Part, at the time of their initial assignment to a work area where the substance is present, and whenever the substance is introduced into their work area.

(b) Information provided to employees shall include:

(1) The potential human health and/or environmental hazards, as specified in the specific section in Subpart C of this Part.

(2) The personal protective equipment, engineering controls, and other measures to control worker exposure and/or environmental release identified in the specific section of Subpart C of this Part, or alternative control measures which EPA has determined under § 721.12 provide substantially the same degree of protection as the specified control measures.

(3) Identification of all operations in the employee's work areas where the substance is present.

(4) The location and availability of any material safety data sheets required for the substance by the specific section in Subpart C of this Part in accordance with § 721.35.

(5) Methods and observations that may be used to detect the presence or release of the substance in the employee's work area (such as monitoring conducted by the employer, continuous monitoring devices, visual appearance, or odor).

§ 721.30 Labeling for distribution in commerce.

Whenever referenced in a specific section of Subpart C of this Part, the requirements for labeling containers of the chemical substance for distribution in commerce are as follows:

(a) The manufacturer, importer, or processor shall ensure that each container of the substance leaving the workplace is labeled in accordance with this section.

(b) The label shall contain the following information:

(1) The first word on the label shall be the word "WARNING."

(2) The name of the substance as identified in the specific section in Subpart C of this Part and the trade name or names by which may be commonly recognized.

(3) The potential human health and/or environmental hazards as identified in the specific section in Subpart C of this Part.

(4) The personal protective equipment, engineering controls, and other measures to control worker exposure and/or environmental release identified in the specific section of Subpart C of this Part, or alternative control measures which EPA has determined under § 721.12 provide substantially the same degree of protection as the specified control measures.

(c) The first word on the label shall be capitalized, and the type size of the first word shall be no smaller than 6 point type for a label 5 square inches or less in area, 10 point type for a label above 5 but no greater than 10 square inches in area, 12 point type for a label above 10 but no greater than 15 square inches in area, 14 point type for a label above 15 but no greater than 30 square inches in area, or 18 point type for a label over 30 square inches in area, and the type size of the remainder of the warning statement shall be no smaller than 6 point type.

(d) The label shall not conflict with the requirements of the Hazardous Materials Transportation Act (18 U.S.C. 1801 et seq.) and regulations issued under that Act by the Department of Transportation.

(e) If the label is to be applied to a mixture containing a substance identified in a specific section in Subpart C of this Part, in combination with another substance identified in a specific section in Subpart C of this Part and/or a substance defined as a "hazardous chemical" for the purposes of the Occupational Safety and Health Administration's Hazard Communication Standard (29 CFR 1900.1200), the manufacturer, importer, or processor may prescribe on the label the measures to control worker exposure or environmental release which the manufacturer, importer, or processor determines provide the greatest degree of protection. However, should these control measures differ from those identified in the specific sections in Subpart C of this Part, the manufacturer, importer, or processor must seek a determination of equivalency for such alternative control measures pursuant to § 721.12 before prescribing them on a label.

(f) The label shall be in English and shall be prominently displayed on the container. The label may be in languages other than English as long as the information is presented in English as well.

(g) The label shall be made available, upon request, to designated representatives of EPA.

§ 721.32 Labeling for use in the workplace.

Whenever referenced in a specific section in Subpart C of this Part, the requirements for labeling containers for the use of the chemical substance in the workplace are as follows:

(a) The manufacturer, importer, or processor shall ensure that each container of the substance which is in the workplace is labeled, tagged, or marked in accordance with this section.

(b) The label, tag, or other method of warning shall contain the following information:

(1) The first word shall be the word "WARNING."

(2) The name of the substance as identified in the specific section of Subpart C of this Part and the trade name or names by which it may be commonly recognized.

(3) The potential human health and/or environmental hazards identified in the specific section in Subpart C of this Part.

(4) Any personal protective equipment, engineering controls, or other measures to control worker exposure and/or environmental release identified in the specific section in Subpart C of this Part, or alternative control measures which EPA has determined under § 721.12 provide substantially the same degree of protection as the specified control measures.

(c) If the label or alternative method of warning is to be applied to a mixture containing a substance identified in a specific section in Subpart C of this Part, in combination with another substance identified in a specific section in Subpart C of this Part and/or a substance defined as a "hazardous chemical" for the purposes of the Occupational Safety and Health Administration's Hazard Communication Standard (29 FR 1900.1200), the manufacturer, importer, or processor may prescribe on the label or alternative method of warning the measures to control worker exposure or environmental release which the manufacturer, importer, or processor determines provide the greatest degree of protection. However, should these control measures differ from those identified in the specific sections in Subpart C of this Part, the manufacturer, importer, or processor must seek a determination of equivalency for such alternative control measures pursuant to § 721.12 before prescribing them under this paragraph.

(d) Manufacturers, importers, and processors subject to this section may use signs, placards, process sheets, batch tickets, operating procedures, or other such written materials in lieu of affixing labels to individual stationary process containers, as long as the chosen method of warning identifies the containers to which it is applicable and conveys the information required by paragraph (b) (1) through (4) of this section. The written materials shall be readily accessible to the employees in their work area throughout each work shift.

(e) Manufacturers, importers, and processors subject to this section are not required to label portable containers into which substances identified in Subpart C of this Part are transferred from labeled containers, as long as the method chosen under paragraph (d) of this section identifies the containers to which it is applicable and conveys the information required by paragraph (b) (1) through (4) of this section.

(f) The manufacturer, importer, or processor subject to this section shall ensure that the label or other form of warning is legible, in English, and prominently displayed on the container, or readily available in the work area throughout each work shift. Employers with employees who speak languages other than English may provide the information in the employee's language, as long as the information is presented in English as well.

(g) The label or other form of warning shall be made available, upon request, to designated representatives of the EPA.

§ 721.35 Material safety data sheets.

Whenever referenced in a specific section in Subpart C of this Part, the requirements for obtaining or developing a material safety data sheet (MSDS) for the chemical substance are as follows:

(a) Each MSDS shall be in English and shall contain at least the following information:

(1) The name of the substance as identified in the specific section in Subpart C of this Part and the trade name or names by which it may be commonly recognized.

(2) The potential human health and/or environmental hazards as identified in the specific section in Subpart C of this Part.

(3) Any personal protective equipment, engineering controls, or other measures to control worker exposure and/or environmental release identified in the specific section in Subpart C of this Part, or alternative control measures which EPA has determined under § 721.12 provide substantially the same degree of protection as the specified control measures.

(4) Any time weighted average, threshold limit value, or other exposure limit identified in the specific section in Subpart C of this Part.

(b) If the MSDS is to be associated with a mixture that contains a substance identified in a specific section in Subpart C of this Part, in combination with another substance identified in a specific section in Subpart C of this Part and/or a substance defined as a "hazardous chemical" for the purposes of the Occupational Health and Safety Administration Hazard Communication Standard (29 CFR 1900.1200), the manufacturer, importer, or processor may prescribe in the MSDS the measures to control worker exposure or environmental release which the manufacturer, importer, or processor determines provide the greatest degree of protection. However, should these control measures differ from those identified in the specific sections in Subpart C of this Part, the manufacturer, importer, or processor must seek a determination of equivalency for such alternative control measures pursuant to § 721.12 before prescribing them under this paragraph.

(c) Manufacturers, importers, and processors subject to this section shall ensure that the information recorded in the MSDS accurately reflects the applicable terms and conditions provided in the specific section in Subpart C of this Part during the time that they manufacture, import, or process the substance identified in such section. Whenever the terms in the specific section of Subpart C of this Part are amended during the time that the manufacturer, importer, or processor is engaging in that activity, the manufacturer, importer, or processor shall revise the MSDS within 3 months of the effective date of such amendment.

(d) Manufacturers, importers, and processors subject to this section shall ensure that recipients of the substance identified in the specific section in Subpart C of this Part are provided an appropriate MSDS with their initial shipment and with the first shipment following the revision of an MSDS. The manufacturer, importer, or processor shall either provide the MSDS with the shipped containers or send the MSDS to the recipient prior to or at the time of shipment.

(e) The MSDS may be kept in any form, including operating procedures, and may be designated to cover groups of substances in a work area where it may be more appropriate to address the potential hazards of a process rather than individual substances. However, the manufacturer, importer, or processor shall ensure that, in all cases, the required information is provided for each substance and is readily accessible during each work shift to employees when they are in their work areas.

(f) The MSDS shall be made available, upon request, to designated representatives of EPA.

10. In § 721.160 by revising the introductory text of paragraph (a)(2) (ii) and (ii) (A), and (B), and (C) to read as follows:

§ 721.160 Substituted polyglycidyl benzenemine.

(a) * * *

(2) * * *

(ii) Manufacture (excluding import) or processing without:

(A) Requiring, during all stages of manufacture and processing of the

VOL 51 ISS 77 AP 22 1986 UMI

substance, and during response to emergencies or spills involving the substance, that any person employed by or under the control of the manufacturer or processor wear the following protective equipment, or employ other measures to control worker exposure which EPA has determined, in accordance with § 721.12, provide substantially the same degree of protection against exposure to the substance as the control measures described in this paragraph (a)(2)(ii)(A):

* * * * *

(B) Providing each employee described in paragraph (a)(2)(ii)(A) of this section with the following information in accordance with § 721.27: They should avoid all contact with this substance; structurally similar chemicals have been found to cause cancer and reproductive, kidney, and liver effects in laboratory animals, and allergic reactions in humans; this substance is a severe skin and eye irritant; and the use of impervious gloves, face shields, and other clothing to cover exposed areas of the arms, legs, and torso is required.

(C) Labeling containers for distribution of the chemical substance in commerce in accordance with § 721.30 to convey the information described in paragraph (a)(2)(ii)(B) of this section.

* * * * *

11. In § 721.290 by revising paragraph (a) (2)(ii) and (iii), to read as follows:

§ 721.290 Dicarboxylic acid monoester.

(a) * * *

(ii) Failure to require the use of gloves determined to be impervious to the substance, and/or failure to require the use of clothing to prevent dermal contact for any person involved in any processing or use operation where dermal contact may occur, or other measures to control worker exposure which EPA has determined, in accordance with § 721.12, provide substantially the same degree of protection against dermal exposure to the substance as the control measures described in this paragraph (a)(2)(ii). (Gloves may be determined to be impervious to the substance either by testing the gloves under the conditions of use or by relying on the manufacturer's specifications.)

(iii) Distribution in commerce without labeling containers in accordance with § 721.30 with the following information:

(A) The substance may be harmful if inhaled or absorbed through the skin.

(B) Persons must not breathe vapor, mist, spray, or dust containing the substance.

(C) Persons must not get any of the substance in the eyes, on skin, or on clothing.

(D) The substance is to be used only with adequate ventilation.

(E) Persons potentially exposed to the substance must wear impervious gloves and protective equipment to prevent contact or exposure and that contaminated non-impervious clothing must be promptly removed and washed before reuse.

(F) Contaminated leather shoes must be discarded.

(G) Persons exposed to the substance must wash thoroughly after handling the substance, and before eating, drinking, or smoking.

(H) All containers of the substance must be kept closed when not in use.

(I) The following first aid measures should be taken when necessary:

(*1*) In case of contact with eyes, immediately flush with water for at least 15 minutes.

(*2*) In case of contact with skin, promptly wash thoroughly with mild soap and water.

(*3*) In case of inhalation, remove the exposed person to fresh air. If breathing is difficult, give oxygen.

(*4*) In case of ingestion, and if conscious, give water and induce vomiting.

* * * * *

12. In § 721.615 by revising the entire section to read as follows:

§ 721.615 Substituted methylpyridine and substituted 2-phenoxypyridine.

(a) *Chemical substances and significant new uses subject to reporting.* (1) The following chemical substances referred to by generic chemical names and premanufacture notice numbers are subject to reporting under this section for the significant new uses listed in paragraph (a)(2) of this section: substituted methylpyridine (P–83–24, P–83–49, and P–83–272) and substituted 2-phenoxypyridine (P–83–23, and P–83–75).

(2) The significant new uses for P–83–49 and P–83–272 are manufacturing, importing, or processing without:

(i) Requiring use of the following personal protective equipment, or other measures to control worker exposure which EPA has determined, in accordance with § 721.12, provide substantially the same degree of protection against exposure to the substances as the control measures described in this paragraph (a)(2)(i), for persons involved in any operation where dermal contact and/or inhalation may occur, and where local exhaust ventilation is present at the site of the operation:

(A) Chemical cartridge respirator, approved by the National Institute for Occupational Safety and Health for protection from organic vapors, and used and fitted according to 29 CFR 1910.134 and 30 CFR Part 11.

(B) Chemical worker gloves and aprons or other equivalent personal protective clothing determined to be impervious to the particular substance in its conditions of use. (Equipment may be determined to be impervious either by testing under the conditions of use, including the duration of exposure, or by evaluating the specifications supplied by the supplier of the equipment.)

(ii) Requiring use of the following personal protective equipment, or other measures to control worker exposure which EPA has determined, in accordance with § 721.12, provide substantially the same degree of protection against exposure to the substances as the control measures described in this paragraph (a)(2)(ii), for persons involved in and in the immediate area of any operation where dermal contact and/or inhalation of the substances may occur, and where local exhaust ventilation is not present at the site of the operation:

(A) Full facepiece, positive pressure air-supplied respirator, approved by the Bureau of Mines, Department of Interior or by the National Institute for Occupational Safety and Health and fitted according to procedures established at 29 CFR 1910.134.

(B) Chemical worker gloves and aprons, or other equivalent personal protective clothing determined to be impervious to the particular substance in its conditions of use. (Equipment may be determined to be impervious either by testing under the conditions of use, including the duration of exposure, or by evaluating the specifications supplied by the supplier of the equipment.)

(iii) Providing each employee required to use the protective equipment described in paragraph (a)(2)(ii) of this section with the following information in accordance with § 721.27: Each of the substances may elicit liver, kidney, and nervous system effects in humans; P–83–23 and P–83–24 may cause skin and eye effects; P–83–23 and P–83–75 may cause reproductive effects; and the protective equipment described in paragraph (a)(2)(ii) of this section must be worn.

* * * * *

13. In § 721.975 by revising the introductory text of paragraph (a)(2)(i), and paragraph (a)(2)(i)(B) to read as follows:

§ 721.975 Derivative of tetrachloroethylene.

(a) * * *

(2) The significant new uses are:

(i) Manufacturing, importing, or processing without requiring use of the following protective equipment, or other measures to control worker exposure which EPA has determined, in accordance with § 721.12, provide substantially the same degree of protection against exposure to the substance as the control measures described in this paragraph (a)(3)(i), for persons involved in any operation where dermal contact may occur.

(A) Chemical goggles.

(B) Chemical worker gloves and aprons, or other equivalent personal protective clothing determined to be impervious to the particular substance in its conditions of use. (Equipment may be determined to be impervious either by testing under the conditions of use, including the duration of exposure, or by the supplier of the equipment.)

(ii) Providing each employee required to use the protective equipment described in paragraph (a)(3)(i) of this section with the following information in accordance with § 721.27: Each of the substances may elicit liver, kidney, and nervous system effects in humans; P–83–23 and P–83–24 may cause skin and eye effects; P–83–23 and P–83–75 may cause reproductive effects; and the protective equipment described in paragraph (a)(3)(i) of this section must be worn.

* * * * *

13. In § 721.975 by revising the introductory text of paragraph (a)(2)(i), and paragraph (a)(2)(i)(B) to read as follows:

§ 721.975 Derivative of tetrachloroethylene.

(a) * * *

(2) The significant new uses are:

(i) Manufacturing, importing, or processing without requiring use of the following protective equipment, or other measures to control worker exposure which EPA has determined, in accordance with § 721.12, provide substantially the same degree of protection against exposure to the substance as the control measures described in this paragraph (a)(2)(i), for persons employed by or under the control of the manufacturer, importer, or processor who are in the immediate area of any operation where dermal contact and/or inhalation of the substance may occur:

* * * * *

(B) Labeled for use of the substance in the workplace in accordance with § 721.32 to convey the following information:

(*1*) The substance should be handled only while using a NIOSH approved respirator and impervious gloves.

(*2*) [Reserved]

* * * * *

24 CFR Part 888

Section 8 Housing Assistance Payments Program; Fair Market Rent Schedules for Use in the Existing Housing Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program, and Housing Voucher Program; Final Notice.

VOL 51 ISS 77 AP 22 1986 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. N-86-1573; FR-2133]

Section 8 Housing Assistance Payments Program; Fair Market Rent Schedules For Use in the Existing Housing Certificate Program, Loan Management and Property Disposition Programs, Moderate Rehabilitation Program, and Housing Voucher Program

AGENCY: Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final notice.

SUMMARY: The Department published proposed Fair Market Rents on January 2, 1986, and solicited public comment. Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to publish Fair Market Rents periodically, but not less frequently than annually. The Department indicated in the proposed Notice that effective Fair Market Rents may be announced in one or more publications. Today's document is the first of two announcements of effective Fair Market Rents, which establishes Fair Market Rents for 2328 of the 2756 rent market areas in the country.

EFFECTIVE DATE: These Fair Market Rents are effective on April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Cecelia D. Livingston, Existing Housing Division, Office of Elderly and Assisted Housing, telephone (202) 755-6477. For technical information on the development of schedules for specific areas or the method used for the rent calculations, contact Michael R. Allard, Economic and Market Analysis Division, Office of Economic Affairs, telephone (202) 755-5577. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Background

Section 8 of the United States Housing Act of 1937 (the Act) (42 U.S.C. 1437f) authorizes a housing assistance program to aid lower income families in renting decent, safe, and sanitary housing. Assistance payments are limited by Fair Market Rents (FMRs) established by HUD for 2756 different rent market areas in the country. The final FMRs contained in this document amend portions of the schedules previously in effect for the Section 8 Existing Housing Certificate Program, including space rentals by owners of manufactured homes (Part 882, Subparts A, B, and F), for the Moderate Rehabilitation Program (Part 882, Subparts D and E), and for existing housing assisted under Part 886, Subparts A and C. FMRs also are used in determining the amount of subsidy for a family under the Section 8 Housing Voucher Program.

Proposed Fair Market Rents

The Department proposed fiscal year 1986 FMRs on January 2, 1986 (51 FR 75) [1], which reflect estimated rent levels as of April 1, 1986. The criteria and methodology used by HUD in developing the proposed FMRs are the same as those appearing at 24 CFR Part 888, Subpart A, which have been used since 1983. They include: (1) The 45th percentile rent (the rent below which 45 percent of the standard quality rental housing units in a market area are distributed); (2) Rents based on units occupied by recent movers (households who moved within two years before the date of the survey data used in these calculations); and (3) Exclusion from the data base of all public housing units and recently completed housing (units built within two years of the survey dates).

The Department used 1980 Census data for the first time when developing the 45th percentile standard FMRs for fiscal year 1986. These data resulted in proposed FMRs that were higher than the fiscal year 1985 FMRs in approximately 81 percent of the metropolitan FMR areas and 70 percent of the nonmetropolitan areas. The 1980 Census data also resulted in proposed reductions in the fiscal year 1985 FMRs in approximately 19 percent of the metropolitan areas and 30 percent of the nonmetropolitan areas. (In addition to the proposed FMRs published on January 2, 1986, see a correction document reproposing rents for 148 nonmetropolitan market areas published in the **Federal Register** on February 18, 1986, 51 FR 5804.)

In the January 2, 1986 proposed Notice, the Department indicated that it may announce fiscal year 1986 FMRs in one or more subsequent publications. The FMRs published for effect today do not constitute the complete listing of FMRs. The Department intends to publish another notice announcing final FMRs for *all* market areas. To help decided which FMRs could be published for effect in an expedited fashion, the Department requested that anyone planning to comment submit a Notice of Intent to Comment by February 18, 1986. The Department used these Notices to assist in determining which Fair Market Rents could be published for effect without waiting to complete the analysis of all the submitted comments. Any area which is not included in today's document will continue to use the FMRs previously published for effect pending the second final Notice announcing FMRs for all market areas.

[1] This notice was published in the "Notices" section of the **Federal Register** It should have appeared in the "Proposed Rule" section.

Fair Market Rent Schedules in This Document

This document announces FMRs for effect for 2328 market areas. All FMRs appearing in today's document are effective upon publication. The FMRs are listed in four parts—three in Schedule B (Fair Market Rents for Existing Housing) and one in Schedule D (Final Fair Market Rents for Manufactured Home Spaces in the Section 8 Existing Housing Certificate Program).

Schedule B, Part 1 contains FMRs for all areas for which no Notice of Intent was submitted by any party, including areas proposed for decreases as well as increases. Part 1 does *not* contain FMRs for any area for which a Notice of Intent or a comment was submitted (but see Part 2 and Part 3, which list FMRs for some areas for which Notices of Intent have been submitted).

Part 2 of Schedule B consists of FMRs for all market areas for which Notices of Intent have been received and that were proposed by HUD for no change or for increases for all bedroom sizes. These FMRs are now being made effective as proposed, although the Department may approve further changes, as warranted, in response to the comments and publish those changes in the second Notice of FMRs for effect.

Part 3 of Schedule B consists of FMRs for all market areas for which Notices of Intent have been received and for which the FMRs proposed by HUD consisted of a mixture of increases and decreases for the various bedroom sizes. For example, the Department may have proposed, for a single market area, an increase in the zero-bedroom FMR, but decreases in all other bedroom sizes. If a Notice of Intent to Comment was submitted for the area, FMRs for the area are included in Part 3, with the proposed increases published as final (in this case, the proposed zero-bedroom) and with FMRs for all other bedroom sizes remaining at the 1985 levels pending review of the public comment.

The areas omitted from Parts 1, 2, and 3 of Schedule B are those areas that submitted Notices of Intent to Comment and for which decreases (or a combination of decreases and no change) were proposed by HUD for all bedroom sizes. The 1985 FMRs will remain in effect until the Department reviews all comments and publishes the second Notice of FMRs for effect.

In addition, for purposes of publishing FMRs for effect, the Department considers the 148 areas that were the subject of the February 18, 1986 correction document (see 51 FR 5804) as market areas with proposed FMRs decreases for which Notices of Intent to Comment have been filed. Accordingly, none of the areas listed in the February 18, 1986 **Federal Register** Notice appear in final form in today's document. They will be processed and published as final with the second Notice of FMRs for effect.

Schedule D contains the Fair Market Rents for Manufactured Home Spaces in the Section 8 Existing Housing Program. Since all FMRs were proposed for an increase, the Department is publishing the entire schedule for effect today. There may be further changes for some market areas based on analysis of the comments submitted for specific market areas.

Applicability of Fair Market Rent Schedules

The final FMRs are used to determine assistance amounts for several HUD housing assistance programs. FMRs for the Moderate Rehabilitation Program are 120 percent of the Schedule B Existing Housing Fair Market Rents (see 24 CFR 882.408(a) and 888.113(e)(1)). FMRs for Single Room Occupancy (SRO) units are 75 percent of the applicable zero-bedroom FMR for the Existing Housing Certificate Program and the Moderate Rehabilitation Program. For the Housing Voucher Program, the Payment Standard for SRO units is between 75 and 100 percent of the applicable zero-bedroom FMR or exception rent. For example, the FMR limitation for an SRO unit in the Existing Housing Certificate program is 75 percent of the zero-bedroom FMR listed in Schedule B. The FMR limitation for an SRO unit in the Moderate Rehabilitation program is 75 percent of the Moderate Rehabilitation FMR for a zero-bedroom unit. For Housing Vouchers, the PHA may request an amount for HUD approval, within the range of 75 and 100 percent of the zero-bedroom FMR or exception rent, based on the presence or absence of kitchen and sanitary facilities.

Administrative Fees

The FMRs published for effect will be used to calculate the administrative fee in two phases. For a PHA administering a Section 8 program in a jurisdiction where the two-bedroom FMR has increased, the PHA's administrative fee will be adjusted as of the first day of the first month following the effective date (today) of the FMRs appearing in this document. For a PHA administering a Section 8 program in a jurisdiction where the two-bedroom FMR is decreased, the PHA's administrative fee will be adjusted as of the first day of the PHA's fiscal year that begins after the effective date (today) of the FMRs appearing in this document.

The Department is aware that comments being submitted under the notice and comment procedure for establishing the Fair Market Rents have raised the issue of changing the timing procedure for computing the administrative fee. The review of the public comments is proceeding, but the Department has decided to discuss all comments and the Department's response to the comments in the second final FMR notice. Accordingly, the procedure identified above should be used pending any modification in a future publication.

Future Publications

The Department will publish a second Notice announcing final FMRs for effect. This Notice will contain a complete listing of all FMRs for effect, as well as an analysis of and response to all public comments received.

In addition, the Department anticipates publishing another series of FMR documents this fiscal year (FY 86). Data received from HUD Field Offices seems to indicate localized changes in some housing markets. Accordingly, the Department may propose new FMRs, subject to public comment, for specific areas where it believes this new data provides a more accurate estimate of the 45th percentile rent level of standard quality rental units occupied by recent movers, excluding public housing units and units less than two years old.

Other Matters

A Finding of No Significant Impact with respect to the environment required by the National Environmental Policy Act (42 U.S.C. 4321-4374) is unnecessary, since the Section 8 Existing Housing program is categorically excluded under HUD regulations at 24 CFR 50.20(d).

Under 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this Notice does not have a significant economic impact on a substantial number of small entities because FMRs reflect the rents for similar quality units in the area. Therefore, FMRs do not change the rent from that which would be charged if the project were not in the Section 8 program.

The Catalog of Federal Domestic Assistance program number is 14.156, Lower-Income Housing Assistance Program (Section 8).

Accordingly, the Fair Market Rent Schedules are amended as follows:

Dated: April 15, 1986.

Silvio DeBartolomeis,

Acting General Deputy Assistant Secretary for Housing-Deputy Federal Housing Commissioner.

Fair Market Rents for Existing Housing—Schedules B&D—General Explanatory Notes

1. Geographic Coverage

a. FMRs for Existing Housing (Schedule B) are established for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), nonmetropolitan counties, and county equivalents in the United States, District of Columbia, Puerto Rico, the Virgin Islands, and Guam. FMRs also are established for nonmetropolitan parts of counties in the New England States.

b. FMRs for Manufactured Home spaces in the Section 8 Certificate Program (Schedule D) are established for all MSAs, PMSAs, selected nonmetropolitan counties, and the residual nonmetropolitan portion of each State.

c. The current 337 MSAs and PMSAs are those established by the Office of Management and Budget effective on or before June 30, 1985.

2. Arrangement of FMR Areas and Identification of Constituent Parts

a. The FMR areas in Schedules B and D are listed alphabetically by MSA-PMSA and nonmetropolitan county within each State.

b. The constituent counties (and New England towns and cities) included in each MSA and PMSA are listed immediately following the MSA-PMSA names in each State listed in Schedule B. All of the constituent parts of an MSA that are in more than one State can be identified by consulting the listings for each applicable State.

c. Two nonmetropolitan counties are listed alphabetically on each line of the nonmetropolitan county listings.

d. The New England towns and cities included in a nonmetropolitan part of a county are listed immediately following the county name.

e. The FMRs are listed by dollar amount on the first line beginning with the FMR area name.

24 CFR Part 888

Section 8 Housing Assistance Payments Program; Proposed Fair Market Rents for New Construction and Substantial Rehabilitation; Proposed Notice

VOL 51 ISS 77 AP 22 1986 UMI

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 888

[Docket No. N-86-1596; FR-2161]

Section 8 Housing Assistance Payments Program; Proposed Fair Market Rents for New Construction and Substantial Rehabilitation; All Markets

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed notice.

SUMMARY: Section 8(c)(1) of the United States Housing Act of 1937 requires the Secretary to develop Fair Market Rents periodically, but not less frequently than annually. This document proposes Fiscal Year 1986 Fair Market Rents for the Section 8 New Construction Program and the Section 8 Substantial Rehabilitation Program. These proposed Fair Market Rents are based primarily on the level of rentals paid for recently completed or newly-constructed dwelling units of modest design within each market area as determined by HUD Field Office staff. They also reflect the Department's cost containment efforts in relation to housing assistance provided in the Section 8 New Construction and Substantial Rehabilitation Programs.

DATE: Comment due date: May 22, 1986.

ADDRESS: Interested persons are invited to submit comments to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-0500. Each comment should include the commenter's name and address; must refer to the docket number indicated in the heading of this document and should give reasons for any recommendation. A copy of each comment submitted to the Rules Docket Clerk will be available for public inspection during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Edward M. Winiarski, Chief Appraiser, Valuation Branch, Technical Support Division, Office of Insured Multifamily Housing Development, 451 Seventh Street, SW., Washington, D.C. 20410-8000, telephone (202) 426-7624. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f) (the Act) authorizes a system of housing assistance payments to aid lower income families in renting decent, safe and sanitary housing. These programs, known collectively as the Section 8 Housing Assistance Payments Program, provide assistance payments for lower income families for a variety of housing options, including new construction and substantial rehabilitation.

Under these programs, HUD or public housing agencies (PHAs) make rental assistance payments on behalf of eligible families to owners. Total housing expense represents the total monthly cost of housing an eligible family, which is the sum of the contract rent and any utility allowance for the assisted unit occupied by the family. Where the unit is leased to an eligible family, the housing assistance payment represents the difference between the total housing expense and the total family contribution. Initial contract rents plus any allowances for utilities generally may not exceed area-wide Fair Market Rents (FMRs) established by the Department.

Section 8(c)(1) of the Act states that the Secretary shall establish FMRs periodically, but not less than annually. Section 8(c)(1) further provides that the Department shall publish FMRs in the Federal Register, with reasonable time for public comment and that the FMRs will become effective upon publication in final form in the Federal Register.

In previous years, the Department has issued FMRs in rulemaking documents. The Department recently determined that publication by rulemaking is not necessary and has delayed timely publication of the FMRs. Accordingly, the Department published a final rule on September 25, 1985 (see 50 FR 38791) changing the FMR publication procedure to a Notice procedure, effective October 30, 1985. Under this new procedure, FMRs are published in proposed form in a Notice with a minimum of 30 days for comment and then are published in final form in a Notice for immediate effect. This means FMRs may be effective the same day they appear in final form in the Federal Register.

This Notice

Today's document proposes the Fiscal Year 1986 FMRs for new construction and substantial rehabilitation and would apply to section 8 New Construction under Part 880, Substantial Rehabilitation under Part 881, Housing Finance and Development Agencies under Part 883, New Construction Set-Aside for section 515 Rural Rental Housing Projects under Part 884, Housing for the Elderly and Handicapped under Part 885 and Disposition of HUD-owned Projects under Part 886, Subpart C.

Fair Market Rents are based primarily on the levels of rent paid for recently completed or newly constructed dwelling units of modest design within each market area, as determined by HUD Field Office Staff, trended ahead to October 1, 1987, to allow for the period of construction or rehabilitation of the projects involved. They are estimates of rentals that prospective tenants who are not receiving Federal rent subsidies would be willing and able to pay for recently completed or newly constructed dwelling units of modest design, with suitable amenities. They do not necessarily represent rents needed to support construction and operating costs.

This proposed Notice includes Fair Market Rents for 0, 1, 2, 3, and 4 or more bedroom units in five structural categories (detached, semi-detached/row, walkup, 2-4 story elevator, and 5-plus story elevator buildings). Construction or rehabilitation of elevator projects for families with children is prohibited unless there is no practical alternative. Fair Market Rents for family units in elevator structures are proposed for appropriate market areas. However, the determination that there is "no practical alternative" must be made on project-by-project basis.

In addition, regulations provide that high-rise elevator projects *for the elderly* may be approved *only* if HUD determines that high-rise construction is appropriate after taking into account land costs, safety and security factors.

For the section 202/section 8 assistance program, the applicable Fair Market Rents are those in effect on the date that the proposal or application for assistance was submitted to HUD (or, in the case of assistance under Part 884, by FmHA, and in the case of assistance under Part 883, by the State Agency). The following exceptions apply:

1. For all projects where the FMRs are increased after the completion date of a processing stage, the increased FMRs will apply to all subsequent processing in reviewing contract rents and utilities. (This does not apply when the borrower agrees to limit the rents to 100 percent of the FMRs in effect at the time of fund reservation in order to enter into a negotiated construction contract, as permitted under the section 202 competitive bid procedure.) The decision concerning appropriate FMRs to use in project processing will be based upon an entire schedule, rather than selectively choosing the highest unit rents from the currently effective FMR schedule or a previously published schedule for that area.

2. For all projects where the FMRs are decreased after the completion date of a processing stage, the applicable FMR will be the higher of:

(a) The FMR set forth in Schedule A of the annual publication of Fair Market Rents or

(b) The FMR set forth in a previously published schedule that was in effect at the time that the application was submitted.

Interested persons will have a 30-day comment period after publication of this Notice in which to submit comments on the revised Fair Market Rents contained in Schedule A. All comments submitted during this period will be carefully considered and Fair Market Rents will be revised as appropriate.

Proposals may be submitted that involve combinations of structural types and unit sizes for which FMRs are not proposed in this document or for which there are not FMRs already in effect. However, no proposal of this type will be approved until the FMRs in this Notice have been published for effect.

In addition, interested persons may submit comments or other information (with adequate documentation) on Fair Market Rents at any time, even after expiration of the 30-day comment period provided in this Notice. Any data submitted will be considered in initiating interim revisions to the Fair Market Rent schedules. In order to expedite consideration of your submission, please send a copy to the HUD Field Office having jurisdiction for the market area involved, as well as to the Rules Docket Clerk.

HUD regulations in 24 CFR Part 50, implementing section 102(2)(C) of the National Environmental Policy Act of 1969, contain categorical exclusions from their requirements for the actions, activities and programs specified in § 50.20. Since the amendments made by this rule are within the exclusion set forth in § 50.20(*1*), no environmental assessment is required for this rule, and no environmental finding has been prepared.

The Catalog of Federal Domestic Assistance Program number and title for the activities covered by this Notice are 14.156, Lower Housing Assistance Program (section 8).

Dated: April 15, 1986.

Silvio J. DeBartolomeis,

Acting General Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

Schedule A—Proposed Fair Market Rents for New Construction—Substantial Rehabilitation

Notes

Special Category Computations

(1) FMRs for dwelling units designed for the elderly or handicapped are those for appropriate size units, not to exceed two bedrooms for the elderly, multiplied by 1.05.

(2) Congregate housing dwelling unit FMRs are the same as for non-congregate units.

(3) Single room occupancy dwelling unit FMRs (applicable only for Substantial Rehabilitation projects) are 75 percent of those for zero-bedroom units of the same structural type.

(4) FMRs for living units in a group home developed with a direct loan under section 202 of the Housing Act of 1959 are those for zero-bedroom or a one-bedroom unit of the walk-up structural type (or if the group home contains an elevator, of the 2-4 story elevator structural type). Each living unit in a group home is composed of a bedroom plus a proportionate part of common living space ordinarily included in a living unit. One-bedroom FMRs may be applied only when the bedroom space plus the proportionate part of the common space totals at least 450 square feet.

(5) Manufactured home (unit and space) FMRs shall be 95 percent of the rents for detached units of the appropriate bedroom size (except that where a manufactured home FMR is specified in the schedule for an area, the amount on the schedule shall be the FMR).

(6) FMRs for manufactured home spaces in newly constructed or substantially rehabilitated manufactured home parks are determined by multiplying by 1.25 the FMR for the spaces published for the Existing Housing Program. (For currently effective FMRs for the Existing Housing Program, see Federal Register documents published on July 5, 1984 (49 FR 27658); April 16, 1985 (50 FR 14922); and April 25, 1985 50 FR 16229.)

[Circular No. 2580]

Leasing of Solid Minerals Other Than Coal and Oil Shale; Revision of Regulations Covering Leasing of Solid Minerals Other Than Coal and Oil Shale

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking totally revises the provisions of 43 CFR Group 3500 concerning leasing of solid minerals other than coal and oil shale, to reduce the regulatory burden imposed on the public, to streamline and clarify the existing provisions, to change the format in order to address specific minerals individually and to achieve a number of miscellaneous purposes under the authority granted the Secretary of the Interior by various statutes.

EFFECTIVE DATE: May 22, 1986.

ADDRESS: Any suggestions or inquiries should be sent to: Director (650), Bureau of Land Management, Room 3600, Main Interior Bldg., 1800 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Zareh Mozian, (202) 343-2458.

SUPPLEMENTARY INFORMATION: A proposed rulemaking containing a revision of 43 CFR Group 3500 was published in the Federal Register on April 12, 1985 (50 FR 14512) with a 60-day comment period. During the comment period, which included an extension of 45 days, comments were received from 277 sources, with 194 coming from individuals, 38 from businesses, 7 from industry associations, 31 from Federal agencies, 4 from State and local governmental entities and 3 from attorneys. All of the comments were given careful consideration and will be addressed in the preamble in connection with the section commented upon. Only those sections that were the subject of comments are discussed in the preamble.

In general, the comments were favorable to the changes made by the proposed rulemaking, with a special endorsement for the proposed rulemaking's treatment of the minerals individually.

One comment requested that the final rulemaking contain a provision stating that the final rulemaking is only applicable to new or revised leases. This request has not been adopted by the final rulemaking. Nothing in the final relemaking is intended to change any specific terms and conditions of an existing lease, and in fact, many existing leases have an express provision to that effect. However, this final rulemaking contains many procedural and organizational statements which the Department of the Interior expects all lessees to follow.

Section 3500.0-3 Authorities.

Three comments were received on § 3500.0-3 of the proposed rulemaking. One comment questioned the listing of the Act of March 4, 1917 (16 U.S.C. 520) and recommended that the Act of March 1, 1911 (36 Stat. 961), be used instead because that was the authority for the purchase of Weeks Act lands. This recommendation was not adopted because except for the Act of June 28, 1952, the laws listed in the proposed rulemaking are identical to the laws listed in Reorganization Plan No. 3 (5 U.S.C. Appendix). It is under this cited authority that the Department of the Interior administers mineral leasing on these lands; the 1911 Act is not such authority for the Department. The Act of June 28, 1952, is listed because it refers back to Reorganization Plan No. 3. A second comment recommended that the Act of June 28, 1944 (58 Stat. 483, 483-485), relating to asphalt in Oklahoma be added to the special acts listed in the proposed rulemaking by the final rulemaking. This recommendation was not adopted because the Act of June 28, 1944, amended and supplemented the Mineral Leasing Act of 1920, although it has never been so codified. The final comment on this section of the proposed rulemaking questioned the elimination of a listing of conditions under which mineral leasing is permissible in those units of the National Park System where leasing is specifically authorized. The listing of conditions was eliminated by the proposed rulemaking and the final rulemaking because it has been moved to § 3582.3, where it is more appropriate. The final rulemaking adopts without substantive change § 3500.0-3 of the proposed rulemaking.

Section 3500.0-5 Definitions.

A general comment on § 3500.0-5 of the proposed rulemaking suggested the addition of the definitions of several terms to the section. All of the terms recommended for addition by the comment are defined in parts of the proposed rulemaking covering specific minerals if those terms are used in that part. The suggestion has not been adopted by the final rulemaking.

One comment questioned why the proposed rulemaking removed the definition of the term "rule of approximation" from the existing regulations. The definition of the term "rule of approximation" was removed by the proposed rulemaking because experience over the past several years has shown that it is no longer needed and its purpose can be accomplished administratively. The final rulemaking continues the exclusion of the definition of the term "rule of approximation."

One comment recommended that the final rulemaking make a change in the definition of the term "proper BLM office" as it appeared in the proposed rulemaking. The recommendation was not adopted by the final rulemaking because the change would have dealt with only a small portion of the extensive functions of a Bureau of Land Management office and those functions, as they relate to an applicant, are covered throughout the provisions of group 3500.

A comment questioned the addition of the phrase "and others specifically identified by Congress as part of the public domain" to the definition of the term "public domain lands" contained in the proposed rulemaking. This phrase, which is included in the final rulemaking, was used to indicate that Congress can designate reacquired lands as part of the public domain and if such an action is taken by the Congress, the fact that lands have been added to the public domain would be reflected on the official land records maintained by the Bureau of Land Management and open for public inspection.

One comment noted that the definition of the term "acquired lands" contained in the proposed rulemaking and adopted by the final rulemaking included the mineral estate of those lands and questioned how proof of ownership of the mineral estate would be shown. The document conveying the acquired lands to the United States would contain a recital of what interests were being conveyed and that document would be the basis of the interest of the United States.

A comment pointed out that the proposed rulemaking repeated the definition of the term "chiefly valuable" contained in the existing regulations (which was adopted in the Federal Register of April 25, 1984 (49 FR 17900)) and recommends that it be changed by the final rulemaking. After careful consideration of the recommended change, it was not adopted by the final rulemaking because the definition used in the proposed rulemaking is clearer than the recommended change.

Two final comments on this section of the proposed rulemaking suggested that the definition of the term "hardrock minerals" was confusing and recommended a change. The final rulemaking makes a change that clarifies the term.

Section 3500.5 Filing of documents.

Several comments questioned the need for paragraph (b) of the proposed rulemaking, with some of those making comments being concerned that the paragraph granted too much confidentiality. The section was carefully reviewed and the final rulemaking revises paragraph (b) to make it conform more precisely to the Freedom of Information Act requirements.

Section 3500.6 Multiple development.

One comment recommended that this section of the proposed rulemaking be changed by removing the ultimate phrase because it appears to broaden the requirement of the existing regulations. The final rulemaking has not adopted the recommendation because the language emphasizes the need for users of the same lands to not unreasonably interfere with the operations or other authorized uses of those lands.

Section 3500.7 Environmental considerations.

This section of the proposed rulemaking has been revised by the final rulemaking in response to a comment. The comment suggested that the proposed rulemaking failed to mention that leases and permits issued under group 3500 must conform to an approved land use plan.

Finally, the final rulemaking, in response to a comment, adds a new paragraph (c) that states that leasing will be consistent with unsuitability designations in accordance with the land use planning regulations and the Surface Mining and Reclamation Act.

Section 3500.8 Lands not subject to leasing.

One comment suggested that paragraph (a) of the proposed rulemaking did not conform with the provisions of the National Park Service Act of 1970, as amended (16 U.S.C. 1(c)). The final rulemaking has adopted a change to paragraph (a) that clearly states that lands within the National Park System are not subject to lease except as specifically authorized by law.

The final rulemaking has not adopted two changes suggested in the comments on this section of the proposed rulemaking because the references in this section are self explanatory and will eliminate far more confusion than they cause. The reference to lands acquired under the Act of March 1, 1911 (16 U.S.C. 513-519), was deleted because the lands, although not subject to leasing under the Mineral Leasing Act of 1920, are subject to leasing under the acquired lands authorities set forth elsewhere in the final rulemaking. The scope of paragraph (e) of the proposed and final rulemaking is based on the clear intent of the Congress as expressed in Senate Report No. 161, 80th Cong., 1st Sess. 3 (1947) and House Report No. 550, 80th Cong., 1st Sess. 3 (1947).

Section 3500.9-1 Consent and consultation.

There were several comments on this section of the proposed rulemaking. Some of the comments suggested that the specific status requiring consent be added to the final rulemaking. Other comments were of the view that the final rulemaking should include all surface management agencies, within, as well as outside, the Department of the Interior. Paragraphs (a) and (b) of the proposed and final rulemaking are advisory, while paragraph (c) is for the purpose of establishing a procedure for applicants to use in pursuing administrative remedies in agencies outside of the Department of the Interior. The requirement for consent on public domain lands is contained in numerous statutes that affect only a small amount of acreage, such as recreation areas within National Forest System lands. The most significant agency with statutory consent authority for public domain lands is the Department of Defense (43 U.S.C. 158). The final rulemaking would not be improved by listing all of these statutes. The final rulemaking adopts with only minor changes the language of the proposed rulemaking except that paragraph (b) pertaining to acquired lands has been amended to include permits in the requirement for consent by the surface management agency.

Section 3500.9-2 Ownership of surface overlying Federally-owned minerals by a State or charitable organization.

The final rulemaking has retitled this section for clarity.

Section 3500.9-3 Management of Federal minerals from reserved mineral estates.

In response to a comment, the final rulemaking has added a new section covering the right to prospect for, mine and remove minerals reserved to the United States under statutes set out in the section. This section is needed to clarify when those reserved minerals are subject to permitting or leasing.

Section 3501.1-1 Public domain.

Four comments were received on this section of the proposed rulemaking. The final rulemaking has not adopted the suggestion in one comment that would require an applicant to submit maps on unsurveyed public domain lands because such a requirement would place an unnecessary burden on the applicant. The final rulemaking has reinstated as a clarification the suggestion in one of the comments that unsurveyed public domain lands must be surveyed prior to the issuance of a lease.

One comment suggested that the provision of the final rulemaking adopt the provisions of the existing regulations for describing unsurveyed lands in Alaska. Such a provision has not been adopted by the final rulemaking because the lands in Alaska which have not been surveyed under the rectangular system of survey are covered by approved protraction surveys.

A final comment questioned whether omission of the 6-mile rule in the proposed rulemaking was intentional. The 6-mile rule has been omitted by both the proposed and final rulemaking because the requirement for reasonably compact form is sufficient.

Section 3501.1-2 Acquired lands.

One comment on this section of the proposed rulemaking suggested that the final rulemaking be changed to require an applicant for unsurveyed acquired lands to make application for only entire tracts. This suggestion has not been adopted by the final rulemaking because the final rulemaking requires the applicant to furnish an adequate description of the lands sought. Requiring the applicant to file an application for an entire tract would require the Bureau of Land Management to provide a description if only part of the lands in the tract are leased.

Section 3502.1 Who may hold leases.

A few of the comments on paragraph (a) of this section of the proposed rulemaking correctly stated that the Mineral Leasing Act of 1920 permits municipalities to hold mineral leases only for coal, oil, oil shale or gas. Therefore, the final rulemaking deletes the reference to municipalities in this section. A comment suggesting that the last sentence of paragraph (a) of the proposed rulemaking be moved to paragraph (b) was not adopted because paragraph (a) applies to all leases but

VOL 51 ISS 77 AP 22 1986 UMI

paragraph (b) applies only to leases of leasable minerals.

Section 3502.2 Qualifications and holding statements.

The concerns of one comment addressing the need for qualifications and holding statements have been carefully considered. Applications for a lease under group 3500 are not made on a form on which the applicant may simply sign a certification of his/her qualifications to hold a lease as is the situation for applications filed under group 3100 of this title. Moreover, the regulations in group 3100 were changed due to the burden created by the vast number of applications filed, as well as with the expressed intent of replacing the disclosure requirements with selective audits to verify compliance (47 FR 8544, February 26, 1982). In recognition of the above set out discussion, the final rulemaking does not adopt the comment's suggestion to delete the requirement for qualification and holding statements. The limited number of lease applications filed under group 3500 does not justify the expense of implementing the kind of changes devised for use in connection with the massive filings under group 3100. In response to a suggestion in a comment to delete § 3502.2–4(e) of the proposed rulemaking concerning aggregate foreign stockholding, the final rulemaking has limited the provision to instances where the holdings are greater than 10 percent. The change makes citizenship disclosures consistant with other provisions of the regulations, while allowing the Bureau of Land Management to obtain sufficient information to enable it to respond to concerns over foreign investment in Federal minerals.

Section 3503.1–2 Where remitted.

The final rulemaking has adopted a suggestion of one comment that the address for the Minerals Management Service should be set out in the regulations. The additional suggestion that the addresses of the proper BLM offices should be listed in the regulations was not adopted by the final rulemaking because those addresses for State offices are already set out in § 1821.2–1.

Section 3503.2–2 Minimum production and royalty.

Five comments on this section of the proposed rulemaking indicate some misunderstanding expressing the view that the section had been changed to require the payment of minimum royalty beginning with the first lease year instead of the sixth lease year as provided in the existing regulations. No such change was intended. The final rulemaking contains a revised section to eliminate any chance of misunderstanding.

Two comments objected to the requirement of the proposed rulemaking for written consent of the authorized officer before the lessee would be allowed to pay minimum royalty in lieu of production on an annual basis. The comments expressed concern that the proposed rulemaking appears to give the authorized officer the authority to force minimum production or relinquishment of their lease, placing a lessee's reserves in jeopardy, but felt that any such decision as to whether to produce from the lease or pay advance royalties should rest with the lessee. The final rulemaking has been amended to require minimum production or the payment of advance minimum royalty. The prior consent requirement has been eliminated. The Department of the Interior agrees with the view expressed in a comment that the decision whether to produce or pay minimum royalty is one that is primarily with the lessee. However, the final rulemaking does not adopt the view that this decision is an absolute right of the lessee.

One comment requested that any minimum royalty payment be recoverable from production royalties when production begins. The proposed rulemaking provides that minimum royalties paid for any year are to be credited only to that year. The final rulemaking has not adopted this request because allowing the minimum royalties to be credited to later years would defeat the purpose of requiring a minimum royalty, which is to encourage production, and because crediting is not authorized by the Mineral Leasing Act of 1920.

Section 3503.2–3 Limitation of overriding royalties.

Four comments opposed the inclusion in this section of the proposed rulemaking of the 1 percent limitation on overriding royalties. After a careful review of the comments, the final rulemaking has adopted the language of the proposed rulemaking with clarifying changes. However, the Department of the Interior will study the continuing need for these provisions and if a decision is made to eliminate them, the elimination will be the subject of a future rulemaking which will allow public comment.

Section 3503.3–4 Waiver, suspension or reduction of rental, minimum royalty or royalties.

One comment on this section of the proposed rulemaking recommended the elimination of the waiver and reduction of overriding royalty by the final rulemaking. The final rulemaking has not adopted the recommendation because the experience of the Department of the Interior in connection with the leasing of minerals on the public lands show that an excessive overriding royalty reduces the incentive of a lessee to produce from the lease. The excessive overriding royalty reduces the benefit the lessee obtains from production and can lead to an early abandonment of the lease. As the owner of the minerals covered by a lease, the United States is interested in obtaining maximum production and royalties from a lease and has an economic interest in all activities, including the imposition of an excessive overriding royalty that might reduce the level of production and benefit enjoyed by the public from the public lands and their resources. As discussed in the previous section, the issue of overriding royalty will be the subject of a study by the Department of the Interior.

Section 3503.3–1 Suspension of operations and production.

Three comments were received on this section of the proposed rulemaking. The comments questioned the authority for initiation of suspension of operations on a lease by the lessor. The authority to order or agree to a suspension of operations and production in the interest of conservation is found in 30 U.S.C. 209. Therefore, the final rulemaking adopts, without change, the language of the proposed rulemaking.

Section 3503.3–2 Suspension of operations.

Three comments on this section of the proposed rulemaking suggested that the final rulemaking add language that makes it clear that a suspension of operations is initiated by the lessee and such action is responded to by the authorized officer within 60 days. The final rulemaking has adopted this suggestion in part and amends the section to clarify who initiates the request for a suspension of operations and the response to be made by the authorized officer. The final rulemaking does not adopt the suggestion that the authorized officer must respond within 60 days. Under normal circumstances, an application will be processed in less than 60 days, but the processing work for very complex applications could require more than 60 days, thus no purpose would be served by placing the 60-day requirement in the regulations for such cases.

Subpart 3504—Bonds

Eight comments, including a comment under § 3562.7 of the proposed rulemaking, address bonding in the proposed rulemaking. One comment questioned the need for bonds, recommending instead that those permittees or lessees who default on the terms and conditions of a lease be prosecuted. Three comments requested that bonds not be required until after issuance of the permit or lease, but prior to entry on the lands covered by the permit or lease because of their view that no liability occurs until after surface disturbance has occurred. These comments also expressed the view that until an exploration plan or mining plan has been filed, the authorized officer does not have sufficient information on which to base the amount of the bond. Two comments suggested that the final rulemaking expand the bonding provisions of the proposed rulemaking to include self bonding similar to that permitted by the regulations of the Office of Surface Mining (30 CFR 800.5(c)). Another comment correctly pointed out that the proposed rulemaking erroneously shows the minimum nationwide bond amount as $150,000 rather than $75,000 now required by the existing regulations. A suggestion made by another comment was that the language of the proposed rulemaking covering termination of liability be changed to require the release of existing bonds within 30 days of filing an acceptable alternative bond(s). A final comment expressed the view that the final rulemaking should provide that bond liability would not be terminated without notification from the surface management agency that reclamation requirements have been met.

All of these comments were carefully considered during the decisionmaking process on the final rulemaking. Bonds are required to protect the United States in the event the permittee or lessee defaults in the performance or observance of any of the terms, conditions or stipulations of the permit or lease and the permittee or lessee is either financially unable, or otherwise refuses, to correct the default, e.g., if a lessee refuses to pay royalty, the United States can collect from the surety. Thus, to ensure that the United States is protected, the final rulemaking adopts the provisions of the proposed rulemaking requiring that a bond be filed prior to issuance of a permit or lease. However, the authorized officer will use sound judgment in not setting bond amounts over and above that which is necessary to adequately protect the United States. The authorized officer will be able to adjust bond amounts when it is deemed necessary because § 3504.1–4(b) has been changed by the final rulemaking to allow lowering of bond amounts, as well as increasing bond amounts, when conditions warrant. In order to clearly show the applicability to statewide and nationwide, as well to individual permit and individual lease bonds, the final rulemaking places § 3504.1–4(b) of the proposed rulemaking in a new § 3504.1–6.

The suggestion to include self bonding has not been adopted by the final rulemaking because the adoption of the requirements of the Office of Surface Management regulations, even with much lower dollar amounts for "tangible net worth" and "fixed assets" would permit qualification by only very large companies, thus excluding most individual companies and lessees. The bonding issue is presently being reviewed by a Bureau of Land Management task force and any changes made as a result of that review will be incorporated into group 3500 through the rulemaking process.

The final rulemaking amends the proposed rulemaking to show that the minimum nationwide bond is $75,000, the same amount as in the existing regulations.

The suggestion to require the authorized officer to release bonds within 30 days of the filing of an acceptable alternative bond, the phrase used in the proposed rulemaking, has not been adopted by the final rulemaking because the existing surety's period of liability is merely terminated as of the date of an acceptable replacement bond, the phrase that has been adopted by the final rulemaking, is filed. The permittee or lessee and the existing surety continue to be responsible for any and all obligations that may have accrued on the permit or lease prior to the filing of the acceptable replacement bond. Only when an acceptable replacement bond which has been conditioned to accept all outstanding obligations under a permit or lease is filed can an existing bond be released.

The final rulemaking has not adopted the suggestion that the surface management agency must be notified prior to the termination of bond liability. This change is not needed because under standard Bureau of Land Management procedures, the period of bonded liability is not terminated until the authorized officer is assured that all terms and conditions, including any special stipulations, such as reclamation requirements, have been met.

Section 3508.3–3 Overriding royalty interests.

At the suggestion of one comment, the final rulemaking expands the provisions of the proposed rulemaking to clearly show that a filing fee is required with the filing of an overriding royalty assignment.

Section 3508.4 Permit or lease account status.

The proposed rulemaking provided that an assignment cannot be approved unless the account is in good standing. The current position of the Minerals Management Service is that it cannot provide the current financial status of an account without an audit. One comment, in recognition of this situation, pointed out that the requirement for an audit will not permit timely processing of assignments. For this reason, the final rulemaking expands the proposed rulemaking to provide a procedure which allows an assignee and his/her surety to accept all outstanding liabilities of an assignor in order to facilitate the timely approval of an assignment.

Subpart 3507 Fractional and Future Interest Permits and Leases.

A couple of comments were received on this subpart of the proposed rulemaking. The comments indicated some confusion about these provisions. After careful review of the provisions of the proposed rulemaking, the final rulemaking has adopted several clarifying amendments. The principal clarification allows noncompetitive leasing of future interests for lands which are part of an existing mining operation upon payment of the fair market value of the minerals at the time of vesting of title of the minerals in the United States because it would be unfair to allow the possibility of loss of reserves where a party has expended money and effort in developing a mine. Protection of the public interest is assured by requiring the payment of the fair market value of the minerals as a condition for receiving a lease.

Subpart 3508 Mineral Lease Exchange.

One comment on this subpart of the proposed rulemaking suggested that the final rulemaking include a statement requiring surface management agency consultation/consent. The comment was not adopted by the final rulemaking

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

because this subpart has been clarified to provide that a lease will be issued only in accordance with the regulations in group 3500 which includes the surface management agency consent requirements. Another comment on this subpart of the proposed rulemaking suggested the addition of language dealing with the presence of hazardous waste on lands proposed for an exchange. The final rulemaking has adopted this suggestion and added language that would prohibit a proposed exchange of lands found to contain hazardous waste.

Section 3509.1–1 Prospecting permits.

Two comments on this section of the proposed rulemaking requested clarification of this section. The final rulemaking amends the last sentence of the section to clarify that lands covered by a relinquishment are available for new applications upon the notation of the relinquishment on the official status records. One comment wanted to know why relinquished lands are not available until notation of the relinquishment on the official status records. The reason for this requirement is to give everyone equal notice of the availability of the lands.

Section 3509.1–2 Leases.

A comment on this section of the proposed rulemaking suggested that the final rulemaking specify that lands subject to a relinquishment shall be available for lease sale by application or motion of the Bureau of Land Management immediately upon notation of the relinquishment on the official status records. This comment has not been adopted by the final rulemaking because it is not needed in instances of competitive leasing.

Section 3509.3–1 Prospecting permits.

One comment on this section of the proposed rulemaking suggested that the final rulemaking should, for consistency, provide for notation of the expiration of a prospecting permit on the official status records. The official status records show the presence of a prospecting permit or an extension of such a permit. Since all prospecting permits have an initial term of two years and the extension, if any, is set by statute or regulation, an applicant for a prospecting permit can determine the date of expiration of a prospecting permit or extension by reviewing the official status records and case file. Further, the Bureau of Land Management's regulations provide a 60-day period to allow the holder of a prospecting permit sufficient time to file an application for a preference right lease. During that 60-day period, the expiration of an existing prospecting permit or extension will be noted on the official status records, giving the public adequate time to file on the lands if no application for a preference right lease is filed.

Section 3509.4–1 Prospecting permits.

This section of the proposed rulemaking was the subject of two comments. The first comment suggested that the final rulemaking amend the first sentence of this section if a companion comment on section 3509.4–2 is adopted by the final rulemaking. The comment has not been adopted by the final rulemaking because the companion comment has not been adopted.

The second comment on this section of the proposed rulemaking, which has been adopted by the final rulemaking, suggested the addition of a new paragraph that provides for notation of the official status records of the cancellation of an outstanding prospecting permit to give the public notice of the availability of the lands for application for a like prospecting permit.

Section 3509.4–2 Leases.

This section of the proposed rulemaking was the subject of two comments. One comment recommended that final rulemaking insert the phrase "rents and royalties." This comment has not been adopted by the final rulemaking because rents and royalties are a term and condition of a lease and are covered by that phrase in this section. At the suggestion in a second comment on this section, the final rulemaking has been expanded to include a new paragraph (c) that includes the cancellation authority of the Secretary of the Interior. The administrative cancellation of leases improperly issued, e.g., a lease mistakenly issued for lands in a designated wilderness area, was recognized as proper by the Supreme Court in *Boesche* v. *Udall*, 373 U.S. 472 (1963).

Section 3509.4–3 Bona fide purchaser.

One comment on this section of the proposed rulemaking expressed the view that the bona fide purchaser provision of the Mineral Leasing Act of 1920 is not applicable to asphalt in Oklahoma or hardrock minerals. The law authorizing the leasing of asphalt in Oklahoma, the Act of June 28, 1944 (58 Stat. 483, 483), makes the general provisions of section 27 of the Mineral Leasing Act of 1920 (30 U.S.C. 184), applicable. This reference includes later amendments of section 27. With regard to hardrock minerals, the Secretary of the Interior may establish any reasonable procedures for the management of leases for these minerals. This comment has not been adopted by the final rulemaking.

The language of the proposed rulemaking that conditioned the assignee's status as a bona fide purchaser upon approval of the assignment by the Bureau of Land Management has been deleted by the final rulemaking because it is inconsistent with judicial interpretation of section 27(h) of the Mineral Leasing Act of 1920 (30 U.S.C. 184(H)) (e.g., *Winkler* v. *Andrus*, 614 F.2d 707, 711–712).

Section 3510.1 Leasing procedures.

One comment on this section of the proposed rulemaking suggested the deletion of the word "entities" and its replacement with the word "applicants." This suggestion has been adopted by the final rulemaking because it clarifies the intent of the section. The final rulemaking has adopted this suggestion in §§ 3520.1, 3530.1, 3540.1, 3550.1, 3560.1 and 3570.1 to make the related sections consistent.

Section 3511.4 Readjustment.

Several comments on this and related sections of the proposed rulemaking recommended the deletion of the requirement for a 2-year notification prior to the end of the 20-year lease period. The comments also suggested the final rulemaking add language that would make readjustment effective, unless the authorized officer determines otherwise, during the pendency of an objection or appeal. The comments further requested that the final rulemaking clarify that a lessee must pay rental, minimum royalties and royalties, during the pendency of an objection or appeal. The payments would be those required by the terms and conditions of the lease prior to readjustment. As a result of the review of the comments on this section, the final rulemaking totally revises this section and the related sections on readjustment to incorporate the changes suggested in the comments.

Section 3511.7 Special stipulations.

One comment requested the deletion of this section of the proposed rulemaking on the basis that it gives the authorized officer a "blank check" to require stipulations in a lease, stipulations that should be required only in the mining plan. This comment has not been adopted by the final rulemaking because this section is intended to provide maximum flexibility to the authorized officer because he/she is the official that is most knowlegeable on specific issues relating to a specific lease. Although the Bureau of Land Management also has the authority to place appropriate stipulations in a mining plan, including stipulations in a lease contract will condition the rights granted the lessee and provide greater protection to the resources involved.

Section 3512.1 Areas subject to prospecting.

Two comments on this section of the proposed rulemaking suggested that the final rulemaking retain the language of the existing regulations on this subject because of their view that the section in the existing regulations more adequately expresses the intent of the law. The final rulemaking has adopted a change in this section and related sections of the proposed rulemaking that clarifies which public domain and acquired lands are available for prospecting permits.

Section 3512.3–3 Exploration plans.

Several comments on this section and related sections of the proposed rulemaking recommended that the final rulemaking retain the provisions of the existing regulations which do not require the filing of an exploration plan until after issuance of the permit, but prior to entry on the lands covered by the prospecting permit. One comment suggested compromise language which has been adopted for this section and related sections by the final rulemaking.

The compromise requires the filing of the exploration plan when requested by the authorized officer, but only after preliminary adjudication of the application for the prospecting permit has been completed in order to determine such issues as the qualifications of the applicant, the availability of the lands covered by the application and the proper completion of the permit application form. Under this compromise, an applicant will not have to expend labor and money for developing an exploration plan until there is reasonable assurance that the permit can issue, but will allow the authorized officer to obtain the information needed for development of environmental studies. This process will also allow for the exploration plan and the prospecting permit to be approved simultaneously. In addition, the final rulemaking makes several changes for clarity.

Section 3512.8 Terms and conditions of permits.

Section 3512.8–1 of the proposed rulemaking has been amended by the final rulemaking to clarify that exploration operations that are part of an approved existing exploration plan may continue if the permittee has timely filed an application for extension of the permit. This change is necessary to comply with the law (see Solicitor's Opinion M–36943, 89 I.D. 173, 179 (1982); *Rosebud Coal Sales Co.* v. *Andrus*, Civil No. 78–281 (D. Wyo. October 17, 1979). This clarifying change is also made to the sections of the final rulemaking covering the duration of a permit for appropriate minerals to reflect this principle and to allow approved exploration activity to continue until the permit has been extended. Of course, any information obtained during this period may be used to support a preference right lease application.

This legal principle is also applicable to sodium, sulphur, asphalt and hardrock leases which reach their expiration date while a timely filed application for renewal is pending.

Section 3513.1–2 Contents of application.

One comment on this section of the proposed rulemaking recommended an amendment that would limit the application for a preference right lease to those lands reasonably needed to develop the discovery. The final rulemaking has not adopted the recommendation in this section or any of the related sections because the Mineral Leasing Act of 1920 and the regulations provide that a preference right lease applicant may have any or all of the lands covered by the prospecting permit that is the basis of the preference right lease, but no additional lands.

Subpart 3514—Exploration License

One comment on this subpart of the proposed rulemaking expressed concern that the rulemaking might be broadly applicable and recommended that the final rulemaking limit its applicability if this interpretation was correct. The final rulemaking has not adopted the recommended change in this subpart or any of the related subparts because they are only applicable to lands under the jurisdiction of the Bureau of Land Management and would not involve lands under the jurisdiction of another surface management agency.

Three comments on this subpart of the proposed rulemaking were directed to § 3514.5. One suggested that the information submitted in connection with an exploration license should remain proprietary for a period of 5 years. The other comment expressed the view that the final rulemaking should not require the submission of any information obtained in connection with an exploration license until the lease has issued or until one year after the expiration of the exploration license. The final rulemaking has not adopted either of the suggestions but does amend the proposed rulemaking in this and all related sections to make them consistent with the provisions of the Freedom of Information Act.

Section 3515.4 Bid opening.

One comment on this section of the proposed rulemaking suggested that the final rulemaking amend this section and all related sections to specifically include procedures for both sealed bids and public auctions. The final rulemaking has not adopted this suggestion because the rulemaking allows the authorized officer to determine what would be the best procedure to be used in connection with a lease sale and to set forth in the notice of competitive sale the bidding methods and the procedure that he/she determines to be the best bidding method for that particular sale.

Section 3517.1 Use permits.

One comment on this section of the proposed rulemaking indicated that the final rulemaking needed to clarify that the section is not applicable to lands within the boundaries of the National Forest System. The final rulemaking has adopted the recommended change and the section clearly states that it is not applicable to lands within the National Forest System

Section 3517.1–2 Rental.

A comment on this section of the proposed rulemaking, which has been adopted by the final rulemaking, expressed the view that the section could be clarified and suggested language to that end.

Section 3521.2–1 Rental.

The final rulemaking has adopted the suggestion of one comment on this section of the proposed rulemaking to clearly show that the rental for a lease is due annually on or before January 1. This same change has been made by the final rulemaking in the other related sections.

Section 3521.2–2 Production royalty.

A comment on this section of the proposed rulemaking expressed the view that the minimum production royalty required by the section was too high. The final rulemaking has adopted the language of the proposed rulemaking because the minimum production royalty required for a lease for sodium is set by the minimum production royalty required for a lease for sodium is set by

VOL 51 ISS 77 AP 22 1986 UMI

the Mineral Leasing Act of 1920 (30 U.S.C. 202) at a minimum of 2 percent. After the lease is issued, the lessee can apply under § 3508.2–4 for waiver, suspension or reduction of rental or minimum royalty or reduction of royalty.

Subpart 3536 Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

One comment on this subpart of the proposed rulemaking suggested that modified or fringe acreage lease applications be made public in the same manner as competitive leases to ensure that the final result of private negotiations in connection with such leases would be available to the public just as the conditions of competitive leases are known to the public. The final rulemaking has not adopted this suggestion because the case files on all leases and lease applications are open and available for public review. Further, the sales under this section are not negotiated sales, but are based on the payment of the fair market value of the mineral covered by the lease.

Section 3526.1 Applications.

There comments on this section and related sections of the proposed rulemaking questioned the need for the requirement to file an application for renewal at least one year before lease expiration. The final rulemaking has adopted this suggestion in this section and all related sections and requires the filing of the application at least 90 days before lease expiration, rather than the one year required by the proposed rulemaking.

Section 3530.3 Allowable acreage holdings.

The Bureau of Land Management received two hundred and twenty-three comments in response to its request for public comment on this section. All of the comments requested an increase in the allowable acreage for potassium. Two hundred six of the comments requested an increase in lease holdings to 51,200 acres in any one state in order to allow current lessees to obtain new leases while retaining their present lease holdings. This would permit them to be competitive with foreign markets. Seventeen comments requested the acreage be increased to 153,600 acres in any one state to allow adequate acreage for extraction from concentrated brines. These comments have been adopted in part by the final rulemaking, in that it allows 51,200 acres to be held under lease and prospecting permits. To provide for adequate acreage for extraction from concentrated brines, the final rulemaking permits the authorized officer to allow additional holdings, the acreage to be determined on a case-by-case basis.

Section 3533.3 Issuance of lease.

The comment on this section of the proposed rulemaking indicated that the proposed rulemaking contained a phrase that was not part of the existing regulations and requested that the final rulemaking delete it. A careful review of the comment and the existing regulations shows that the phrase in question is part of the existing regulations. Therefore, the final rulemaking has adopted the proposed rulemaking without change.

Part 3580—Asphalt in Oklahoma and Gilsonite (Including all Vein-Type Hydro-Carbons).

This part of the proposed rulemaking was the subject of five comments.The proposed rulemaking provided for all competitive leasing program for "Gilsonite" because of the assumption that all "Gilsonite" deposits were already known. Although most of the unleased Federal lands in the Uintah Basin near Bonanza, Utah, embrace known deposits of "Gilsonite," the comments received on this part indicate that there are other lands in Utah and Colorado which may contain "Gilsonite" deposits, but exploratory work is needed to determine their existence and workability. For this reason, the prospecting permit/preference right lease system used in other sections of the proposed rulemaking is being reinstituted by the final rulemaking in the revised part 3550. The provisions covering asphalt in Oklahoma have been moved to part 3570.

The preamble of the proposed rulemaking stated that as of the date of the publication of the proposed rulemaking, the Bureau of Land Management would no longer issue prospecting permits for "Gilsonite." This statement was the subject of several comments, all of which asked that all existing applications for prospecting permits be reviewed on a case-by-case basis and if the lands do not contain a known deposit of "Gilsonite," that the permits be issued, all else being proper. In response to these comments, the Bureau of Land Management will process all outstanding applications for prospecting permits under the procedures provided by the final rulemaking.

Two comments on this part of the proposed rulemaking were of the view that the maximum acreage set for a fringe acreage lease or lease modification for "Gilsonite" was excessive. The view expressed in the comments was not adopted by the final rulemaking because the maximum lease size for "Gilsonite" is set by statute and this limitation, together with the other requirements of this part for a fringe acreage lease and lease modification should prevent excessive lease acreage holdings. In addition, several comments pointed out that the acreage for a fringe acreage lease or a modified lease for asphalt was incorrect in the proposed rulemaking. The final rulemaking, in recognition of this error, changes the acreage figure to 640 acres for asphalt.

One of the comments pointed out the term "Gilsonite" is a registered trademark name. The owner of the trademark indicated in their comments that they would not object to the use of the term in the regulations if it were recognized as a registered trademark. The trademark registration papers indicate that the trademarked term is for a commercial product rather than for ore in the bround as the Congress used the term in the Combined Hydrocarbon Leasing Act of 1981 and in other statutes at least as far back as the Act of June 7, 1897 (30 Stat. 62, 87). The final rulemaking, when using the term "Gilsonite," capitalizes the word and sets it off in quotes to avoid controversy over the registered status of the term.

Part 3560—Hardrock minerals

The existing regulations on hardrock mineral leasing provide that the discovery of a valuable mineral deposit within the term of a prospecting permit entitles the permittee to a preference right lease. The proposed rulemaking reorganized and reformatted this provision but did not change the sense of that provision. A comment requested that the final rulemaking change this provision so that discovery of a valuable mineral deposit during the term of a prospecting permit would entitle the permittee to be preferentially considered for a lease only. The comment also requested that the final rulemaking provide for rejection of a preference right lease for lands under the jurisdiction of a surface management agency outside of the Department of the Interior if that agency withholds its consent to lease. The existing regulations and the proposed rulemaking both provide for prospecting permits, as well as preference right leases, to be stipulated so that lease issuance, exploration and/or development of any anticipated valuable mineral deposit are accomplished in an environmentally acceptable way and to ensure the adequate utilization of the lands for the primary purposes for which they have been acquired or are being administered. The concerns expressed in the comment were given careful consideration and the Bureau of Land Management determined that nothing in the proposed rulemaking was intended to change the current practice of requiring the inclusion of conditional stipulations in prospecting permits in appropriate cases. Because of the existence of this stipulation authority, the recommended changes contained in this comment have not been adopted by the final rulemaking.

Several comments on § 3560.3–1 of the proposed rulemaking pointed out that the citation of the Weeks Act was incorrect. The final rulemaking has amended the citations in paragraph (a) and set them off in quotes to show that they are a direct quotation from Reorganization Plan No. 3 of 1946.

The final rulemaking has adopted the suggestion from one comment on § 3560.3–3 of the proposed rulemaking to add the word "Alaska" to the title of the section to eliminate any possible confusion between lands with similar titles in Alaska and in New Hampshire.

Several comments on § 3560.4 of the proposed rulemaking objected to the proposed rulemaking's elimination of the phrase "in any one state" that appeared in the existing regulations. The final rulemaking has added this phrase which was inadvertently omitted by the proposed rulemaking.

Several comments on § 3560.7 of the proposed rulemaking objected to the section because it appeared to have broad application. This section of the proposed rulemaking was not intended to authorize specimen collection on Federal lands but to recognize that this activity is regulated by the appropriate surface management agency. A change has been adopted by the final rulemaking to reflect this intent.

A comment on § 3560.3–1 of the proposed rulemaking, as well as other related sections, suggested that the annual rental payments for prospecting permits be moved to part 3500. The final rulemaking has not adopted the suggestion because it is a logical portion of the filing requirements for a prospecting permit which is set forth in the part for each individual mineral.

Two comments on the acreage limitation provisions of § 3562.3–2 of the proposed rulemaking suggested that the acreage for a single prospecting permit be increased. The final rulemaking has not adopted this suggestion because a permittee can hold any number of permits as long as the total acreage of all leases and permits does not exceed 20,480 acres in any one state.

One comment on § 3562.8–4 of the proposed rulemaking expressed the view that a provision that appears in § 3501.2–6(b) of the existing regulations should be added to this section by the final rulemaking. The final rulemaking has not adopted this suggestion because the language discussed in the comment appears in § 3500.9–2 of the final rulemaking and does not belong in this section.

Several comments on § 3562.9–1 of the proposed rulemaking expressed the view that the requirement for proof for entitlement to an extension of a prospecting permit is too specific. The final rulemaking has not made any change in this section because the primary term of the prospecting permit allows sufficient time to begin exploration and any extension is discretionary and should only be granted upon an adequate showing that steps are being taken to determine the existence or workability of a valuable mineral deposit.

A few comments on § 3563.1–2 of the proposed rulemaking requested that the allowable acreage for a single hardrock preference right lease be increased to 5,120 acres. The final rulemaking has not adopted this request because a preference right lease holder can hold any number of leases as long as the total acreage for all leases and permits does not exceed 20,480 acres.

One comment on § 3563.2 of the proposed rulemaking, which was improperly numbered, suggested the addition of language permitting the Secretary of Agriculture to request from a preference right lease applicant supplemental data for use in preparing environmental analyses and special stipulations. The final rulemaking, in addition to properly numbering the section, has added language that adopts the comment's suggestions.

One comment specifically requested that subpart 3505 of the existing regulations be retained by the final rulemaking. Since subpart 3505 of the existing regulations affects only hardrock minerals, the proposed and final rulemakings have revised those provisions and moved them to subpart 3567, which is entitled "Development contracts."

Part 3570—Special leasing areas

The final rulemaking has renumbered this part as part 3580 in order to accommodate the addition of a new part 3550 for "Gilsonite," which has been included in part 3550 with asphalt in Oklahoma. The final rulemaking has moved asphalt in Oklahoma to a new part 3570.

Two comments on the part of the proposed rulemaking suggested that the leasing provisions for gold and silver in confirmed private land grants and the reserved minerals in certain lands patented to the State of California may no longer be needed. The comments requested figures on the number of applications filed under these provisions during the past 25 years. It is possible that the special leasing provisions are no longer needed. However, the final rulemaking continues the provisions in the event that an application is filed.

One comment on § 3572.3 of the proposed rulemaking requested that exploration licenses be included in the consent provisions of this part. The final rulemaking has not adopted this request because exploration licenses are only issued for lands under the jurisdiction of the Bureau of Land Management and no consent is required.

Two comments on § 3573.2 of the proposed rulemaking recommended that the phrase "or permit" be deleted. The final rulemaking has not adopted this recommendation in recognition of the fact that prospecting permits may be issued for leasable minerals in the Shasta and Trinity Units of the Whiskeytown—Shasta—Trinity National Recreation Area.

One comment on § 3573.4–3 of the proposed rulemaking suggested that the reference to the National Park Service in this section is incorrect. The final rulemaking has removed the reference to the National Park Service and replaced it with a reference to the United States Forest Service.

One comment on § 3575.3 of the proposed rulemaking requested that the special status afforded holders of unperfected mining claims in the White Mountains National Recreation Area—Alaska be recognized by the final rulemaking. The final rulemaking has adopted a number of changes in subpart 3575 to recognize the special status afforded holders of unperfected mining claims.

One comment on § 3575.3–2 of the proposed rulemaking expressed particular concern about the two-year time limit on the filing of mining claimant preference right lease applications. The final rulemaking has adopted a change to this section which makes it clear that the two-year period for filing of applications for mining claimant preference right leases commences on the date the Secretary of the Interior opens the lands to permit the removal of minerals, consistent with the provisions of the Alaska National Interest Lands Conservation Act. The Bureau of Land Management expects

VOL 51 ISS 77 AP 22 1986 UMI

that the lands will be opened in 1986 by publication of a public land order in the Federal Register, which order also will be posted in the Bureau's Alaska offices.

One comment on § 3575.4–1 of the proposed rulemaking expressed the view that the survey required for exploration licenses was excessive. The proposed rulemaking did not intend to require a survey for exploration licenses, but only for mining claim preference right leases because those leases may include only lands within mining claims. The proposed rulemaking has been adopted without change by the final rulemaking.

A comment on § 3575.5–6 of the proposed rulemaking opposed the requirement for publication and posting of the notice of participation and requested its deletion. The final rulemaking has not adopted this request in this or any of the related sections because the Bureau of Land Management, in meeting its responsibility for protecting the public lands and their resources, takes responsible steps to limit the number of entities that are engaged in activities that can cause needless damage to those lands and resources. Reducing, where possible, the number of individuals or corporations entering the same public lands for similar or identical exploration purposes assist in this effort.

Subpart 3576 Nevada

A comment on § 3576.1–1 of the proposed rulemaking requested that the final rulemaking allow the processing of all applications for sand and gravel in Nevada on file on April 12, 1985, the date of publication of the proposed rulemaking, be processed. The final rulemaking has adopted this request and all applications for sand and gravel in Nevada pending on April 12, 1985, will be processed under § 3563.2 of the existing regulations. Any leases issued as a result of these applications, will be subject to the provisions of this final rulemaking.

Two comments on § 3576.1–2 of the proposed rulemaking questioned the provision limiting the assignability of existing sand and gravel leases. The final rulemaking, in recognition of the question raised in the comments, deletes the language on limitation on assignments and adopts language which limits lease renewals to those leases producing sand and gravel or which are a part of an existing sand and gravel operation at the expiration of the lease term. The adoption of this language by the final rulemaking authorizes the renewal of a producing lease when the lessee agrees to any additional terms and conditions, a discretionary authority that was reserved to the authorized officer in § 3563.2–4(g) of the existing regulations.

In recognition of the addition of a new separate part for "Gilsonite," the final rulemaking has amended paragraph A of the first provision of the proposed rulemaking by deleting the phrase "part 3570 as part 3586" and replacing it with the phrase "part 3570 as part 3580". It also amends paragraph B of the proposed rulemaking by deleting the phrase "adding a new part 3570" and replacing it with the phrase "adding new parts 3570 and 3580".

Editorial and grammatical corrections have been made as needed.

The principal author of this final rulemaking is Marcia E. Rohn, Division of Solid Mineral Leasing, assisted by the staff of the Office of Legislation and Regulatory Management, both of the Bureau of Land Management, and the staff of the Office of the Solicitor, Department of the Interior.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The final rulemaking is a revision of existing regulations and will not change in any substantive manner the procedures imposed by the existing regulations. The principal purpose of the final rulemaking is to streamline and simplify the procedures contained in the existing regulations. This will benefit all users equally.

The information collection requirements in this final rulemaking have already been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004–0030, 1004–0121 and 1004–0142.

List of Subjects

43 CFR Part 3500

Mineral royalties, Public lands—classification, Public lands—mineral resources, Surety bonds.

Mineral royalties, Public lands—mineral resources.

Under the authority of the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), the Independent Offices Appropriation Act of 1952 (31 U.S.C. 483a), Reorganization Plan No. 3 of 1946 (16 U.S.C. 520), and the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–2—460mm–4), Parts 3500, 3510, 3520, 3530, 3540, 3550, 3560, 3570, 3580 and 3590, Group 3500, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations are amended as set forth below.

J. Steven Griles,

Assistant Secretary of the Interior.

March 24, 1986.

Group 3500—[Revised]

1. Group 3500 is revised:

A. By redesignating Part 3570 as part 3590;

B. By Revising Parts 3500, 3510, 3520, 3530, 3540, 3550, and 3560, and adding new Parts 3570 and 3580 to read as follows:

Group 3500—Leasing of Solid Minerals Other than Coal and Oil Shale

Note.—The information collection requirements contained in Parts 3500, 3510, 3520, 3530, 3540, 3550, 3560, and 3570 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004–0030, 1004–0121 and 1004–0142. The information is being collected to permit the authorized officer to determine whether an applicant is qualified to hold a lease for exploration, development and utilization of leasable minerals other than coal and oil shale on the public lands. The information will be used to make this determination. A response is required to obtain a benefit.

PART 3500—LEASING OF SOLID MINERALS OTHER THAN COAL AND OIL SHALE

Subpart 3500—Leasing of Solid Minerals Other Than Coal and Oil Shale—General

Sec.
3500.0–3 Authority.
3500.0–5 Definitions.
3500.1 Nondiscrimination.
3500.2 False statements.
3500.3 Unlawful interests.
3500.4 Appeals.
3500.5 Filing of documents.
3500.6 Multiple development.
3500.7 Land use plans and environmental considerations.
3500.8 Lands not subject to leasing.
3500.9 Consent and consultation.
3500.9–1 Federal lands administered by agencies outside of the Department of the Interior.
3500.9–2 State's or charitable organization's ownership of surface overlying Federally-owned minerals.
3500.9–3 Management of Federal minerals from reserved mineral estates.

Subpart 3501—Descriptions and Acreage

3501.1 Land descriptions.
3501.1–1 Public domain.
3501.1–2 Acquired lands.
3501.1–3 Accreted lands.
3501.2 Computing acreage holdings.

Subpart 3502—Qualification Requirements

3502.1 Who may hold leases and permits.
3502.2 Qualifications and holdings statements.
3502.2–1 Filing of evidence.
3502.2–2 Individuals.
3502.2–3 Associations, including partnerships and trust.
3502.2–4 Corporations.
3502.2–5 Heirs and devisees.
3502.2–6 Attorneys in-fact.
3502.2 Other parties in interest.

Subpart 3503—Fees, Rentals and Royalties

3503.1 Payments.
3503.1–1 Form of remittance.
3503.1–2 Where remitted.
3503.2 Production royalties, minimum royalties and overriding royalties.
3503.2–1 Production royalty rates.
3503.2–2 Minimum production and minimum royalty.
3503.2–3 Overriding royalties.
3503.2–4 Waiver, suspension, or reduction of rental, minimum royalty or royalties.
3503.3 Suspensions.
3503.3–1 Suspension of operations and production.
3503.3–2 Suspension of operations.

Subpart 3504—Bonds

3504.1 Bonding requirements.
3504.1–1 When filed.
3504.1–2 Where filed.
3504.1–3 Surety bond and personal bonds.
3504.1–4 Individual permit and lease bonds.
3504.1–5 Statewide and nationwide bonds.
3504.1–6 Change in bond coverage.
3504.2 Default.
3504.3 Termination of period of liability.

Subpart 3506—Assignments and Subleases

3506.1 Permits and leases subject to assignment and sublease.
3506.2 Filing fees.
3506.3 Filing requirements.
3506.3–1 Record title assignments.
3506.3–2 Operating rights.
3506.3–3 Overriding royalty interests.
3506.4 Permit or lease account status.
3506.5 Bonds.
3506.5–1 Coverage.
3506.5–2 Continuing responsibility.
3506.6 Effective date.
3506.7 Extensions.

Subpart 3507—Fractional and Future Interest Permits and Leases

3507.1 Issuance of prospecting permits and leases.
3507.1–1 Prospecting permits.
3507.1–2 Leases
3507.2 Forms and applications.
3507.3 Terms and conditions.
3507.4 Consent of agency or bureau.
3507.5 Where filed and filing fee.
3507.6 Qualifications.
3507.7 Evidence of ownership.
3507.7–1 Present fractional interest.
3507.7–2 Future interest.
3507.8 Effective date of future interest leases.
3507.9 Rejection of application.

Subpart 3508—Mineral Lease Exchange

3508.0–1 Purpose.
3508.0–7 Scope.
3508.1 When exchange provisions apply.
3508.2 Exchange procedures.
3508.3 Issuance of lease.

Subpart 3509—Relinquishment, Termination, Expiration, and Cancellation

3509.1 Relinquishment.
3509.1–1 Prospecting permits.
3509.1–2 Leases.
3509.2 Termination of prospecting permits.
3509.3 Expiration.
3509.3–1 Prospecting permits.
3509.3–2 Leases.
3509.4 Cancellation.
3509.4–1 Prospecting permits.
3509.4–2 Leases.
3509.4–3 Bona fide purchasers.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); Reorganization Plan No. 3 of 1946 (5 U.S.C. Appendix); Section 3 of the Act of September 1, 1949 (30 U.S.C. 192c); the Act of June 30, 1950 (16 U.S.C. 508(b)); the Act of June 8, 1926 (30 U.S.C. 291–293); the Act of March 3, 1933, as amended (47 Stat. 1487); Section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 8, 1964 (16 U.S.C. 460n et seq.); the Act of November 8, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.); the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–2–460mm–4); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3500—Leasing of Solid Minerals Other Than Coal and Oil Shale—General

§ 3500.0–3 Authority.

The statutory authority for the regulations in this group is as follows:

(a) *Leasable minerals.*—(1) *Public domain.* The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181–287), including the Act of February 7, 1927 (30 U.S.C. 281–287), the Act of April 17, 1926 (30 U.S.C. 271–276), and the Act of June 28, 1944 (58 Stat. 483–485), and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.).

(2) *Acquired lands.* The Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359) and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.).

(b) *Hardrock minerals.* (1) Section 402, Reorganization Plan No. 3 of 1946 (5 U.S.C. Appendix) transferred the functions of the Secretary of Agriculture relative to the leasing or other disposal of minerals to the Secretary of the Interior for lands acquired under the following statutes: (i) the Act of March 4, 1917 (16 U.S.C. 520); (ii) Title II of the National Industrial Recovery Act of June 16, 1933 (40 U.S.C. 401, 403(a) and 408); (iii) the 1935 Emergency Relief Appropriation Act of April 8, 1935 (48 Stat. 115, 118); (iv) section 55 of Title I of the Act of August 24, 1935 (49 Stat. 750, 781); (v) the Act of July 22, 1937 (50 Stat. 522, 525, 530), as amended July 28, 1942 (7 U.S.C. 1011(c) and 1018); and (vi) section 3 of the Act of June 28, 1952 (66 Stat. 285).

(2) Section 3 of the Act of September 1, 1949 (30 U.S.C. 192c) authorized the issuance of mineral leases or permits for the exploration, development and utilization of minerals, other than those covered by the Mineral Leasing Act for Acquired Lands, in certain lands added to the Shasta National Forest by the Act of March 19, 1948 (62 Stat. 83).

(3) The Act of June 30, 1950 (16 U.S.C. 508(b)) authorizes leasing of the hardrock minerals on National Forest lands in Minnesota.

VOL 51 ISS 77 AP 22 1986 UMI

(c) *Special acts.* (1) Gold, silver or quicksilver in confirmed private land grants are covered by the Act of June 8, 1926 (30 U.S.C. 291–293).

(2) Reserved minerals in lands patented to the State of California for parks or other purposes are covered by the Act of March 3, 1933 (47 Stat. 1487), as amended by the Act of June 5, 1936 (49 Stat. 1482) and the Act of June 20, 1936 (49 Stat. 2028).

(3) *National Park Service Areas.* Congress authorized mineral leasing, including the leasing of nonleaseable minerals in the manner prescribed by section 10 of the Act of August 4, 1939 (43 U.S.C. 387), in the following national recreation areas: (i) Lake Mead National Recreation Area—The Act of October 8, 1964 (16 U.S.C. 460n–4 et seq.) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area—The Act of November 8, 1965 (16 U.S.C. 460q–et seq.); (iii) Ross Lake and Lake Chelan National Recreation Areas—The Act of October 2, 1968 (16 U.S.C. 90c–et seq.) Glen Canyon National Recreation Area—The Act of October 27, 1972 (16 U.S.C. 460dd et seq.).

(4) *Shasta-Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area.* Section 6 of the Act of November 8, 1965, (16 U.S.C. 460q–et seq.) authorizes mineral leasing, including the leasing of nonleasable minerals in the manner prescribed by section 3 of the Act of September 1, 1949, (30 U.S.C. 192c), on lands within the Shasta-Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area.

(5) *White Mountains National Recreation Area.* Sections 403, 404, and 1312 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–2 through 460mm–4) authorize the Secretary of the Interior to permit the removal of the nonleasable minerals from lands or interests in lands within the recreation area in the manner described by section 10 of the Act of August 4, 1939, as amended (43 U.S.C. 387), and the removal of leasable minerals from lands or interest in lands within the recreation area in accordance with the mineral leasing laws.

(6) The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) authorizes the management and use of the public lands.

(7) The Independent Offices Appropriation Act (31 U.S.C. 9701) authorizes agencies to charge fees to recover the costs of providing services or things of value.

§ 3600.0–5 Definitions.

As used in Group 3600, the term:

(a) "Secretary" means the Secretary of the Interior.

(b) "Director" means the Director, Bureau of Land Management.

(c) "State Director" means an employee of the Bureau of Land Management who has been designated as the chief administrative officer of one of the Bureau's 12 administrative areas designated as "States".

(d) "Authorized officer" means any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in group 3600 of this title.

(e) "Proper BLM office" means the Bureau of Land Management office having jurisdiction over the lands subject to the regulations in group 3600 of this title (see 43 CFR subpart 1821).

(f) "Public domain lands" means lands, including mineral estates, which never left the ownership of the United States, lands which were obtained by the United States in exchange for public domain lands, lands which have reverted to the ownership of the United States through the operation of the public land laws, and others specifically identified by Congress as part of the public domain.

(g) "Acquired lands" means lands, including mineral estates, which are not public domain lands and which the United States obtained through purchase, gift, or condemnation, and includes lands previously disposed of under the public land laws including the mining laws.

(h) "Leasable minerals" means the chlorides, sulphates, carbonates, borates, silicates or nitrates of potassium or sodium and related products; sulphur in the States of Louisiana and New Mexico and on all acquired lands; phosphate, including associated and related minerals; asphalt in certain lands in Oklahoma; and gilsonite (including all vein-type solid hydrocarbons).

(i) "Valuable deposit" means a mineral occurrence where minerals have been found and the evidence is of such a character that a person of ordinary prudence would be justified in the further expenditure of his/her labor and means, with a reasonable prospect of success, in developing a valuable mine.

(j) "Chiefly valuable" means a valuable deposit where there is no significant conflict between the extraction of sodium, sulphur or potassium and any non-mineral disposition of lands. Where such extraction conflicts with other disposition, the lands shall be deemed chiefly valuable for sodium, sulphur or potassium extraction if the economic value of the lands for extraction of such minerals exceeds its economic value for any non-mineral disposition.

(k) "Act" means the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.).

(l) "Service" means the Minerals Management Service.

(m) "Bureau" means the Bureau of Land Management.

(n) "Hardrock minerals" means those locatable minerals for which a mineral patent may be obtained under the Mining Law of 1872 and which are not leasable minerals as defined in paragraph (h) of this section and oil, gas, coal and oil shale or mineral materials disposable under Group 3600 of this title. Hardrock minerals include, but are not limited to, copper, lead, zinc, magnesium, nickel, tungsten, gold, silver, bentonite, uranium, barite, feldspar and fluorspar.

§ 3600.1 Nondiscrimination.

Any person acquiring a lease under Group 3500 shall comply fully with the equal opportunity provisions of Executive Order 11246 of September 24, 1965, as amended, and the regulations and relevant orders of the Secretary of Labor (41 CFR Chapter 60) and 43 CFR Part 17.

§ 3600.2 False statements.

Under the provisions of 18 U.S.C. 1001, it is a crime punishable by 5 years imprisonment or a fine of up to $10,000, or both, for anyone knowingly and willfully to submit or cause to be submitted to any agency of the United States any false or fraudulent statement(s) as to any matter within the agency's jurisdiction.

§ 3600.3 Unlawful interests.

No member of, or delegate to, Congress, or Resident Commissioner, and no employee of the Department of the Interior, except as provided in part 20 of this title, shall be entitled to acquire or hold any Federal lease, or interest therein. (Officer, agent or employee of the Department—See 43 CFR Part 20; Member of Congress—See R.S. 3741; 41 U.S.C. 22; 18 U.S.C. 431–433)

§ 3600.4 Appeals.

Any party adversely affected by a decision of the authorized officer made pursuant to the provisions of Group 3500 of this title shall have a right of appeal pursuant to part 4 of this title.

§ 3600.5 Filing of documents.

(a) All necessary documents shall be filed in the proper BLM office. A document shall be considered filed when it is received in the proper BLM office.

(b) All information which is submitted to the Bureau under the regulations in this group shall be available to the public unless exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552), or unless otherwise provided in this group.

§ 3600.6 Multiple development.

The granting of a permit or lease for the prospecting, development or production of deposits of any particular mineral shall not preclude the issuance of other permits or leases for the same lands for deposits of other minerals with suitable stipulations for simultaneous operation, or the allowance of applicable entries, locations or selections of leased lands with a reservation of the mineral deposits to the United States. Each permit or lease shall reserve the right to allow any other uses, or to allow disposal, of the leased lands that will not unreasonably interfere with the exploration and mining operations of the permittee or lessee and the permittee/lessee shall make all reasonable efforts to avoid interference with such authorized uses.

§ 3600.7 Land use plans and environmental considerations.

(a) Any lease or permit issued under Group 3500 of this title shall be issued in conformance with the decisions, terms and conditions of a comprehensive land use plan for the mineral deposit in question.

(b) Before a lease or permit is issued, the authorized officer or the appropriate surface management agency shall comply with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(c) Leases and permits shall be issued in a manner consistent with any unsuitability designation made under § 1610.7–1(b) of this title.

§ 3600.8 Lands not subject to leasing.

The following lands are not subject to leasing under the provisions of group 3500:

(a) Lands within the boundaries of any unit of the National Park System, except as authorized by law;

(b) Lands within Indian Reservations, except the Uintah and Ouray Indian Reservation, Hillcreek Extension, State of Utah;

(c) Lands within incorporated cities, towns and villages;

(d) Lands within the National Petroleum Reserve—Alaska and oil shale reserves and within the national petroleum reserves;

(e) Lands acquired by the United States for development of helium, fissionable material deposits or other minerals essential to the defense of the country, except leasable minerals;

(f) Lands acquired by foreclosure or otherwise for resale;

(g) Acquired lands reported as surplus under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.); and

(h) Any tidelands or submerged coastal lands within the continental shelf adjacent or littoral to any part of lands within the jurisdiction of the United States.

§ 3600.9 Consent and consultation.

§ 3600.9–1 Federal lands administered by agencies outside of the Department of the Interior.

(a) Unless consent is required by law, public domain lands, the surface of which is administered by an agency outside of the Department of the Interior, shall be permitted or leased only after Bureau of Land Management has consulted with the surface management agency.

(b) Acquired lands shall only be permitted or leased with the written consent of the head or other appropriate official of the surface management agency.

(c) An applicant may pursue the administrative remedies provided by a particular surface management agency where such agency has required special stipulations in the lease or permit, or has refused consent to issuance of the lease or permit. If the applicant notifies the authorized officer within 30 days of receipt of the Bureau's decision that he/she has requested the surface management agency to reconsider its decision, the time for filing an appeal under part 4 of this title is suspended until a decision is reached by such agency.

§ 3600.9–2 State's or charitable organization's ownership of surface overlying Federally-owned minerals.

Where the United States has conveyed title to, or otherwise transferred the control of the surface of lands to any State or political subdivision, agency or instrumentality thereof, or a college or any other educational corporation or association, or a charitable or religious corporation or association, such party shall be given written notification by certified mail of the application for permit or lease and shall be given a reasonable time, not to exceed 90 days, within which to suggest any lease stipulations deemed necessary for the protection of existing surface improvements or uses, to set forth the facts supporting the necessity of the stipulations or file any objections it may have to the issuance of the lease or permit. Where a party controlling the surface opposes the issuance of a lease or permit or wishes to place such restrictive stipulations, but the facts submitted in opposition to issuance or concerning the necessity for restrictive stipulations expressed by the party controlling the surface do not provide adequate basis for such action, the final decision as to whether to issue the lease or permit shall be based on a determination by the authorized officer as to whether or not the interests of the United States would best be served thereby.

§ 3600.9–3 Management of Federal minerals from reserved mineral estates.

Where nonmineral public land disposal statutes provide in conveyances of title that all or certain minerals shall be reserved to the United States together with the right to prospect for, mine and remove the minerals under applicable law and regulations as the Secretary may prescribe, the lease, sale or disposal and administration and management of the use of such minerals shall be accomplished under the regulations of subchapter C of this title. Such mineral estates include, but are not limited to, those that have been or will be reserved under the authorities of the Recreation and Public Purposes Act, as amended (43 U.S.C. 869 et seq.), the Small Tract Act of June 1, 1938, as amended (43 U.S.C. 682(b)) and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.).

Subpart 3601—Descriptions and Acreage

§ 3601.1 Land descriptions.

§ 3601.1–1 Public domain.

Each application shall contain a complete and accurate description of the lands for which the lease or permit is desired. The lands applied for shall be in reasonably compact form.

(a) If the lands have been surveyed under the public land rectangular system, each application shall describe the lands by legal subdivision, section, township and range. Generally, a quarter-quarter section or a lot is the smallest legal subdivision for which an application may be made.

(b) When protracted surveys have been approved and the effective date thereof published in the Federal Register, all applications for lands shown on such approved protracted surveys shall describe the lands in the same manner as provided in paragraph

VOL 51 ISS 77 AP 22 1986 UMI

(a) of this section for officially surveyed lands.

(c) If the lands have neither been surveyed on the ground nor shown on the records as protracted surveys, each application shall describe the lands by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, in cardinal directions except where the boundaries of the lands are in irregular form, and connected by courses and distances to an official corner of the public land surveys.

(d)(1) Prior to the issuance of a lease, all unsurveyed lands in the lease shall be surveyed.

(2) On a noncompetitive lease, the survey for unsurveyed lands shall be at the expense of the applicant.

(3) On a competitive lease, the survey of unsurveyed lands shall be at the expense of the United States.

§ 3501.1–2 Acquired lands.

(a)(1) If the lands have been surveyed under the rectangular system of public land surveys, the description shall conform to that system and the lands shall be described by legal subdivision, section, township, and range. Generally, a quarter-quarter section of a lot is the smallest legal subdivision for which an application may be made.

(2) Where the description cannot conform to the public land surveys, any boundaries which do not so conform shall be described by metes and bounds, giving courses and distances between the successive angle points with appropriate ties to the nearest existing official survey corner. If not surveyed but within the area of the public land surveys, the lands shall be described by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, and connected to a reasonably nearby official survey corner by courses and distances. Each application shall be accompanied by a map upon which the desired lands are clearly marked showing their location with respect to the administrative unit or project of which they are a part.

(b) If the lands have not been surveyed under the rectangular system of public land surveys, and the tract is not within the area of the public land surveys, it shall be described as in the deed or other document by which the United States acquired title to the lands or minerals. If the desired lands constitute less than the entire tract acquired by the United States, they shall be described by courses and distances between successive angle points on the boundary of the tract, tying by course and distance into the description in the deed or other document by which the United States acquired title to the lands. In addition, if the description in the deed or other document by which the United States acquired title to the lands does not include the courses and distances between the successive angle points on the boundary of the desired tract, the description in the application shall be expanded to include such courses and distances. Each application shall be accompanied by a map upon which the desired lands are clearly marked showing their location with respect to the administrative unit or project of which they are a part.

(c) If an acquisition tract number has been assigned by the acquiring agency to the identical tract desired, a description by such tract number shall be accepted in lieu of the description required in paragraphs (a)(2) and (b) of this section. However, such application shall be accompanied by the map required by paragraphs (a)(2) and (b) of this section.

§ 3501.1–3 Accreted lands.

Where an application includes any accreted lands that are not described in the deed to the United States, such accreted lands shall be described by metes and bounds, giving courses and distances between the successive angle points on the boundary of the tract, and connected by courses and distances to an angle point on the perimeter of the acquired tract to which the accretions belong.

§ 3501.2 Computing acreage holdings.

(a) In computing acreage holdings or control, the accountable acreage of a party owning any interest, either directly or indirectly, shall be such party's proportionate part of the total lease and permit acreage. Likewise, the accountable acreage of a party owning an interest in a corporation or association shall be such party's proportionate part of the corporation's or association's accountable acreage, except that no party shall be charged with its pro rata share of any acreage holdings of any association or corporation, unless it is the beneficial owner of more than 10 percent of the stock or other instruments of ownership or control of such association or corporation.

(b) The amount of acquired lands acreage for leasable minerals that may be held under lease or permit may not be in excess of the amount of public domain acreage for the same minerals permitted to be held under the Act. Public domain lease holdings shall not be charged against acquired lands lease holdings and vice versa; such respective holdings shall not be interchangeable.

(c) Where the United States owns only a fractional interest in the mineral resources of the lands involved, only that part of the total acreage involved in the lease which is proportionate to the ownership by the United States of the mineral resources therein shall be charged as acreage holdings. The acreage embraced in a future interest lease is not to be charged as acreage holdings until the lease for the future interest takes effect.

Subpart 3502—Qualification Requirements

§ 3502.1 Who may hold leases and permits.

(a) Leases and permits may be held only by citizens of the United States, associations (including partnerships and trusts) of such citizens, corporations organized under the laws of the United States or of any State or territory thereof. Citizens of a foreign country may only hold interest in leases or permits through stock ownership, stock holding or stock control.

(b) Citizens of a foreign country may only hold interests in leases and permits for leasable minerals if the laws, customs or regulations of their country do not deny similar or like privileges to citizens or corporations of the United States. A list of those countries denying similar or like privileges is available from any Bureau office.

(c) A mineral lease or permit shall not be issued to a minor. Leases or permits may be issued to a legal guardian or trustee of a minor.

§ 3502.2 Qualifications and holdings statements.

§ 3502.2–1 Filing of evidence.

Evidence of qualifications required by this section may be filed separately in the proper BLM Office. Thereafter, a reference by serial number to the record in which such evidence is filed, together with a statement as to any amendments, shall be acceptable in lieu of resubmitting the evidence with each application. It is the responsibility of applicants and lessees to assure that such evidence is current and accurate. An application referring to the serial number may be submitted only to the Bureau office where the evidence of qualifications is on file.

§ 3502.2–2 Individuals.

To qualify to hold a Federal prospecting permit, lease or license, an individual shall submit a signed statement showing:

(a) He/she is a U.S. citizen; and

(b) That his/her acreage holdings for the particular mineral concerned do not exceed the acreage holdings allowed for that mineral.

§ 3502.2–3 Associations, including partnerships and trusts.

(a) For an association, such as a partnership, to qualify to hold a prospecting permit, lease or exploration license, or any interest therein, a member or authorized attorney-in-fact shall submit the following:

(1) A signed statement setting forth: (i) The names, addresses, and citizenship of all members owning or controlling 10 percent or more of the association or partnership; (ii) the names of the members authorized to act on behalf of the association or partnership; (iii) that the association or partnership's acreage holdings for the particular mineral concerned do not exceed the acreage holdings for that mineral; and (iv) that the acreage holdings of any member owning more than 10 percent of the association or partnership do not exceed that allowed.

(2) A copy of the articles of the association or partnership.

(b) In order for a trust to hold prospecting permits or leases or any interest therein on behalf of a beneficiary, the guardian or trustee shall submit the following:

(1) A signed statement setting forth: (i) the citizenship of the beneficiary; (ii) the guardian or trustee's own citizenship; (iii) the grantor's citizenship, if the trust is revocable; and (iv) that the acreage holdings of the beneficiary, the guardian or trustee, or the grantor, if the trust is revocable, do not exceed that allowed.

(2) A copy of the court order or other document authorizing or creating the trust or guardianship.

§ 3502.2–4 Corporations.

For a corporation to qualify to hold a prospecting permit, lease, or exploration license, or any interest therein, an officer or authorized attorney-in-fact shall submit a signed statement setting forth:

(a) The State in which the corporation is incorporated;

(b) The names and citizenship of any stockholder owning or controlling more than 10 percent of the stock of the corporation;

(c) The names of the officers authorized to act on behalf of the corporation;

(d) That the corporation's acreage holdings, and those of any stockholder identified under paragraph (b) of this section, do not exceed that allowed; and

(e) The percentage of stock owned, held or controlled by citizens of a foreign country or persons with addresses outside the United States, if greater than 10 percent.

§ 3502.2–5 Heirs and devisees.

(a) If an applicant for a permit, an applicant for a preference right lease or a successful bidder to a competitive lease dies before the permit or lease is issued, the permit or lease shall be issued to the executor or administrator of the estate if probate of the estate has not been completed; if probate has been completed, or is not required, to the heirs or devisees; and if there are minor heirs or devisees, to their legal guardian or trustee in his/her name, provided there is filed in all cases the following information:

(1) Where probate of the estate has not been completed:

(i) Evidence that the person, who as executor or administrator submits forms of lease and bond, has authority to act in that capacity and to sign such forms;

(ii) Evidence that the heirs or devisees are the heirs or devisees of the deceased and are his/her only heirs or devisees; and

(iii) A statement over the signature of each heir or devisee concerning citizenship and holdings similar to that required by § 3502.2–2 of this title.

(2) Where the executor or administrator has been discharged or no probate proceedings are required:

(i) A certified copy of the will or decree of distribution, if any, and if not, a statement signed by the heirs that they are the only heirs and citing the provisions of the law of the deceased's last domicile showing that no probate is required; and

(ii) A statement over the signature of each of the heirs or devisees with reference to citizenship and holdings similar to that required by § 3502.2–2 of this title, except that if the heir or devisee is a minor, the statement shall be over the signature of the guardian or trustee.

(b) If a permittee or lessee dies, the executor or administrator of the estate shall be recognized as the record title holder of the permit or lease if probate has not been completed; and if probate has been completed, or is not required, the heirs or devisees shall be so recognized, provided that in all cases, the evidence required in paragraph (a) of this section has been filed.

§ 3502.2–6 Attorneys-in-fact.

An attorney-in-fact shall submit evidence of his/her authority to act on behalf of the applicant. The applicant shall submit a separate statement as to qualifications and acreage holdings unless the power of attorney specifically authorizes and empowers the attorney-in-fact to make or to execute such statements.

§ 3502.3 Other parties in interest.

If the applicant is not the sole party in interest to a permit or lease, he/she shall submit with his/her application the names of all other parties who hold or will hold any interest in the application or in the permit or lease, when issued. All interested parties shall furnish appropriate evidence of their qualifications to hold such permit or lease interest.

Subpart 3503—Fees, Rentals and Royalties

§ 3503.1 Payments.

§ 3503.1–1 Form of remittance.

All remittances shall be by U.S. currency, postal money order or negotiable instrument payable in U.S. currency and shall be made payable to the Department of the Interior—Bureau of Land Management or the Department of the Interior—Minerals Management Service, as appropriate. In the case of payments made to the Service, such payments may also be made by electronic funds transfer.

§ 3503.1–2 Where remitted.

(a)(1) All filing fees and all first-year rentals and all bonuses for leases issued under Group 3500 of this title shall be paid to the proper BLM office.

(2) All second-year and subsequent rentals and all other payments for leases shall be paid to the Service.

(b) All royalties on producing leases and all payments under leases in their minimum production period shall be paid to the Service.

(c) All payments paid to the Service shall be sent to: Minerals Management Service, Royalty Management Program/ BRASS, Box 5640, Denver, Colorado 80217.

§ 3503.2 Production royalties, minimum royalties and overriding royalties.

§ 3503.2–1 Production royalty rates.

Production royalty rates shall be set out in a separate schedule attached to and made a part of all leases and shall be determined on an individual case basis by the authorized officer prior to lease offering. For leases offered competitively, the rates shall be set out in the notice of lease sale. For leases issued noncompetitively, the schedule shall be sent to the prospective lessee for concurrence and signature prior to lease issuance.

VOL 51 ISS 77 AP 22 1986 UMI

§ 3503.2-2 Minimum production and minimum royalty.

(a) Each lease issued on or after the effective date of these regulations shall require a minimum annual production or the payment of minimum royalty in lieu of production for any particular lease year, beginning with the sixth lease year. Minimum royalty payments shall be credited to production royalties for that year only.

(b) Leases renewed or readjusted on or after the effective date of these regulations shall require a minimum annual production or the payment of minimum royalty in lieu of production for any particular lease year, beginning with the first full year of the readjusted or renewed lease. Minimum royalty payments shall be credited to production royalties for that year only.

(c) On or after the effective date of these regulations, the rate of the minimum royalty in lieu of production described in paragraphs (a) and (b) of this section shall be $3 per acre or fraction thereof per year, payable in advance.

(d) Hardrock mineral leases or development or operating agreements which are subject to escalating rentals are exempt from these minimum production and minimum royalty requirements.

§ 3503.2-3 Overriding royalties.

(a) Any overriding royalty interest created by assignment or otherwise shall be subject to the requirement, that if the total of the overriding royalty interest at any time exceeds 1 percent of the gross value of the output at the point at which royalty is assessed, it shall be subject to reduction or suspension by the authorized officer to a total of not less than 1 percent of such gross value, whenever, in the interest of conservation, it appears necessary to do so in order to: (1) prevent premature abandonment; or (2) make possible the economic mining of marginal or low grade deposits. Where there is more than 1 overriding royalty interest, any such suspension or reduction shall be applied to the respective interests in the manner agreed upon by the holders thereof or, in the absence of such agreement, in the inverse order of the dates of creation of such interests.

(b) No overriding royalties shall be paid at a rate in excess of the rate to which they have been so reduced until otherwise authorized by the authorized officer.

§ 3503.2-4 Waiver, suspension, or reduction of rental, minimum royalty or royalties.

(a) In order to encourage the greatest ultimate recovery of the leased minerals, and in the interest of conservation, whenever the authorized officer determines it is necessary to promote development or finds that leases cannot be successfully operated under the terms provided therein, the rental or minimum royalty payments may be waived, suspended or reduced, or the rate of royalty reduced.

(b) An application for any of the above benefits shall be filed in duplicate in the proper BLM office. The application shall contain the serial number of the lease, the name of the record title holder, the operator or sublessee and a description of the lands by legal subdivision in addition to the following information:

(1) Each application shall show the number and location of each mine, a map showing the extent of the mining operations, a tabulated statement of the minerals mined and subject to royalty for each month covering a period of not less than 12 months immediately preceding the date of filing of the application, and the average production per day mined for each month and complete information as to why the minimum production was not attained.

(2) Each application shall contain a detailed statement of expenses and costs of operating the entire lease, the income from the sale of any leased products and all facts showing whether the mines can be successfully operated under the royalty or rental fixed in the lease. Where the application is for a reduction in royalty, full information shall be furnished as to whether royalties or payments out of production are paid to anyone other than the United States, the amounts so paid and efforts made to reduce them.

(3) The applicant shall also file agreements of the holders of the lease and of the royalty holders to a permanent reduction of all other royalties from the leasehold to aggregate not in excess of one-half the royalties paid to the United States.

§ 3503.3 Suspensions.

§ 3503.3-1 Suspension of operations and production.

(a) The authorized officer may, in the interest of conservation, order or agree to a suspension of operations and production.

(b) Applications by lessees for suspensions of operations and production shall be filed in duplicate in the proper BLM office and shall set forth why it is in the interest of conservation to suspend operations and production.

(c) The term of any lease shall be extended by adding thereto any period of suspension of operations and production during such term.

(d) A suspension shall take effect as of the date specified by the authorized officer. Rental and minimum annual production shall be suspended during any period of suspension of operations and production beginning with the first day of the lease month on which the suspension of operations and production becomes effective, or, if the suspension of operations and production becomes effective on any date other than the first day of a lease month, beginning with the first day of the lease month following such effective date. The suspension of rental and minimum annual production shall end on the first day of the lease month in which operations or production is resumed, or upon expiration of the suspension, whichever occurs first. Where rentals are creditable against royalties and have been paid in advance, proper credit shall be allowed on the next rental or royalty due under the lease.

(e) The minimum annual production requirements of a lease shall be proportionately reduced for that portion of a lease year for which a suspension of operations and production is directed or granted by the authorized officer.

§ 3503.3-2 Suspension of operations.

(a) The authorized officer may, upon application of the lessee, suspend operations on a lease issued under the regulations in group 3500 of this title when marketing conditions are such that leases cannot be operated except at a loss.

(b) Application for suspension shall be submitted in duplicate to the proper BLM office and shall contain sufficient information to establish that the lease cannot be operated except at a loss.

(c) A suspension of operations does not affect the term of the lease or the annual rental payment.

(d) A suspension shall take effect as of the date specified by the authorized officer. Minimum annual production shall be suspended during any period of suspension of operations beginning with the first day of the lease month on which the suspension becomes effective, or, if the suspension becomes effective on any date other than the first day of a lease month, beginning with the first day of the lease month following such effective date. The suspension of minimum annual production shall end on the first day of the lease month in which operations are resumed, or upon expiration of the suspension, whichever occurs first.

(e) The minimum annual production requirements of a lease shall be proportionately reduced for that portion of a lease year for which a suspension of operations is granted by the authorized officer.

Subpart 3504—Bonds

§ 3504.1 Bonding requirements.

§ 3504.1-1 When filed.

Prior to the issuance of a permit or lease, the applicant shall be required to submit a surety or personal bond as described in this subpart.

§ 3504.1-2 Where filed.

All bonds shall be filed in the proper BLM office on an approved form. A single copy executed by the principal or, in the case of surety bonds, by both the principal and an acceptable surety is sufficient. Nationwide bonds may be filed in any Bureau State office.

§ 3504.1-3 Surety bonds and personal bonds.

(a) Only those surety bonds issued by qualified surety companies approved by the Department of the Treasury shall be accepted. (See Department of the Treasury Circular No. 570, any supplemental circulars or any replacements).

(b) Personal bonds shall be accompanied by: (1) cash; (2) cashier's check; (3) certified check; or (4) negotiable U.S. Treasury bonds of a value equal to the amount specified in the bond. Negotiable Treasury bonds shall be accompanied by a proper conveyance to the Secretary of full authority to sell such securities in case of default in the performance of the terms and conditions of the lease or permit.

§ 3504.1-4 Individual permit and lease bonds.

Individual permit and lease bond amounts shall be established on a case by case basis by the authorized officer. Minimum bonding requirements are set forth in the pertinent regulations for specific minerals.

§ 3504.1-5 Statewide and nationwide bonds.

(a) In lieu of separate bonds for each lease or permit, a lessee or permittee may furnish a bond in an amount of not less than $25,000, as determined by the authorized officer, to cover all leases and permits for a specific mineral in any 1 State.

(b) In lieu of separate bonds for each lease or permit, a lessee or permittee may furnish a bond in the amount of not less than $75,000, as determined by the authorized officer, to cover all leases and permits for a specific mineral nationwide.

§ 3504.1-6 Change in bond coverage.

The authorized officer may elect to increase or decrease the amount of any bond to be issued or any outstanding bond when a change in coverage is determined appropriate, except no bond may be reduced below the established minimum amount for that mineral.

§ 3504.2 Default.

(a) Where, upon a default, the surety makes a payment to the United States of an obligation incurred under a lease, the face amount of the surety bond or personal bond and the surety's liability thereunder shall be reduced by the amount of such payment.

(b) After default, upon penalty of cancellation of all of the leases or permits covered by such bond, the principal shall within 6 months after notice, or within such shorter period as may be fixed by the authorized officer, either post a new bond or increase the existing bond to the amount previously held. In lieu thereof, the principal may within that time file separate or substitute bonds for each lease or permit.

§ 3504.3 Termination of period of liability.

The authorized officer shall not give consent to termination of the period of liability of any bond unless an acceptable replacement bond has been filed or until all the terms and conditions of the lease or permit have been met.

Subpart 3506—Assignments and Subleases

§ 3506.1 Permits and leases subject to assignment or sublease.

Any prospecting permit or lease may be assigned or subleased in whole or in part to any person, association, or corporation qualified to hold such lease or permit.

§ 3506.2 Filing fees.

To be accepted for filing, each instrument of assignment of record title, operating rights and overriding royalty assignments shall be accompanied by a nonrefundable filing fee of $25. Any instrument not accompanied by the filing fee shall not be accepted.

§ 3506.3 Filing requirements.

§ 3506.3-1 Record title assignments.

(a) A separate instrument of assignment shall be filed in triplicate for each permit or lease. The instrument shall be filed within 90 days of final execution and shall contain:

(1) Name and current address of assignee;

(2) Interest held by assignor and interest to be assigned;

(3) The serial number of the affected permit or lease and a description of the lands to be assigned as described in the permit or lease;

(4) Percentage of overriding royalties retained; and

(5) Date and signature of assignor.

(b) The assignee shall provide a single copy of the request for approval of assignment which shall contain:

(1) Statement of qualifications and holdings as required by subpart 3502 of this title;

(2) Date and signature of assignee; and

(3) Filing fee as required by § 3506.2 of this title;

(c) The approval of an assignment of all interests in a specific portion of the lands in a lease shall create a separate lease which shall be given a current serial number.

§ 3506.3-2 Operating rights.

One copy of a sublease or an operating rights assignment shall be filed within 90 days from the date of final execution and shall contain the operating agreement between the lessee and operator. The operator shall file a request for approval as described in § 3506.3-1(b) of this title. The agreement shall be approved by formal decision.

§ 3506.3-3 Overriding royalty interests.

All overriding royalty interest assignments shall be filed for record purposes within 90 days from the date of execution, but no formal approval shall be given. Any such assignment shall be deemed to be valid provided it is accompanied by the assignee's statement of qualifications as provided for in subpart 3502 of this title, and filing fee as required by § 3506.2 of this title.

§ 3506.4 Permit or lease account status.

The authorized officer shall not approve an assignment of a permit or lease unless the account under the permit or lease is in good standing, or the assignee and his/her surety accepts, in writing, all outstanding liabilities of the assignor which have accrued, whether known or unknown, under the permit or lease.

§ 3506.5 Bonds.

§ 3506.5-1 Coverage.

If the permittee or lessee has been required to maintain a bond, then prior to approval of the assignment, the assignee shall be required to furnish a new bond in the same amount, or, in lieu

VOL 51 ISS 77 AP 22 1986

thereof, consent of the surety on the present bond to the substitution of the assignee as principal. (See Subpart 3504)

§ 3506.5-2 Continuing responsibility.

The assignor and his/her surety shall continue to be responsible for the performance of any obligation under the permit or lease until the effective date of the approval of the assignment. If the assignment is not approved, the assignor's obligation to the United States shall continue as though no such assignment had been filed for approval. After the effective date of approval the assignee and his/her surety shall be responsible for the performance of all permit or lease obligations notwithstanding any terms in the assignment to the contrary, or after the effective date of approval of the sublease, the sublessor and sublessee shall be jointly and severally liable for the performance of all permit or lease obligations, notwithstanding any terms in the sublease to the contrary.

§ 3506.6 Effective date.

An assignment or sublease shall take effect so far as the United States as lessor is concerned the first day of the month following its final approval by the Bureau, or if the assignee requests, the first day of the month of the approval.

§ 3506.7 Extensions.

The approval of an assignment or sublease shall not extend the life of the permit or the readjustment or renewal periods of the lease.

Subpart 3507—Fractional and Future Interest Permits and Leases

§ 3507.1 Issuance of prospecting permits and leases.

§ 3507.1-1 Prospecting permits.

A prospecting permit for a present fractional interest in mineral deposits acquired by the United States may be issued by the authorized officer.

§ 3507.1-2 Leases.

(a) Noncompetitive leases for future or fractional interests in lands believed, but not known, to contain mineral deposits, may be issued by the authorized officer whenever he/she finds it to be in the public interest.

(b) Noncompetitive leases for any future interest(s) in lands which are a part of an existing mining operation may be issued to the mine owner or operator by the authorized officer whenever he/she finds it to be in the public interest. Such leases shall be conditioned upon payment by the lessee of the fair market value of the mineral deposit at the time of vesting of title to the mineral in the United States.

§ 3507.2 Forms and applications.

No specific application form is required, but the application shall contain the same information required of an applicant for the specific mineral concerned.

§ 3507.3 Terms and conditions.

Permit and lease terms and conditions shall be those provided in this group for the particular mineral.

§ 3507.4 Consent of agency or bureau.

A prospecting permit for a present fractional interest in mineral deposits, or a lease for a fractional or future interest in mineral deposits acquired by the United States, may be issued by the authorized officer only with the consent of the surface management agency.

§ 3507.5 Where filed and filing fee.

The application shall be filed in triplicate in the proper BLM office and shall be accompanied by a nonrefundable filing fee of $25.

§ 3507.6 Qualifications.

Compliance with Subpart 3502 of this title is required.

§ 3507.7 Evidence of ownership.

§ 3507.7-1 Present fractional interest.

An applicant for a present fractional interest permit or lease shall have a present interest in the minerals. If the applicant does not own all of the mineral interests not owned by the United States or all of the operating rights therein, the application shall show the extent of the applicant's rights and the names of the other owners of such rights.

§ 3507.7-2 Future interest.

An application for a whole or fractional future interest prospecting permit or lease shall include evidence of title to the present interest in the mineral deposit, which may be in the form of a certified abstract of title or certificate of title. If the applicant is the owner of the operating rights to the non-federal minerals and acquired such rights under a lease or contract with the owner of such minerals, the application shall be accompanied by 3 copies of such lease or contract. A whole or fractional future interest lease shall be issued only to an applicant who owns all or substantially all of the present operating rights to the non-federal minerals as fee owner, lessee or operator holding such rights.

§ 3507.8 Effective date of future interest leases.

Future interest leases shall become effective on the date of vesting of title to the minerals in the United States as stated in the lease.

§ 3507.9 Rejection of application.

(a) An application for a future interest lease filed less than 1 year prior to the date of the vesting in the United States of the present interest in the minerals shall be rejected. Upon the vesting in the United States of the present possessory interest in the minerals, all applications for future interest leases outstanding at the time shall automatically lapse and thereafter only applications for a present interest lease shall be considered.

(b) Unless the authorized officer determines it to be in the public interest to do otherwise, a lease or prospecting permit shall not issue to one who, with the Federal interest applied for, would control less than 50 percent of the operating rights, and the application for such a lease or permit shall be rejected.

Subpart 3508—Mineral Lease Exchange

§ 3508.0-1 Purpose.

This subpart authorizes a mineral prospecting permittee, or mineral lessee, to relinquish the lease to be acquired under preference right, or an existing mineral lease, in exchange for a mineral lease of other lands of comparable value for any leasable or hardrock mineral when the Secretary concludes that operations on the preference right or outstanding lease would not be in the public interest, and that operations on the lands leased in exchange would be in the public interest.

§ 3508.0-7 Scope.

(a) The regulations in this subpart and Subpart 3435 of this title, which cover provisions related to exchanges involving the issuance of coal leases, coal lease bidding rights or coal lease modifications, may be used in exchanges of one mineral for another.

(b) In the case of a conflict between this subpart and the provisions of Subpart 3435 of this title, the provisions governing the lease or lease interest to be issued shall control.

§ 3508.1 When exchange provisions apply.

(a) The provisions of this subpart shall be invoked by the authorized officer notifying the preference right lease applicant or lessee that he/she is prepared to consider exchange of a mineral lease for relinquishment of

leasing rights on the lands described in the notice.

(b) The authorized officer may seek the exchange of any part or all of the lands under preference right lease application or lease. More than 1 preference right lease application or lease may be considered. The effect of a partial or multiple exchange shall be taken into account by the authorized officer in determining whether such an exchange is in the public interest.

(c) An exchange mineral lease shall not be issued unless the authorized officer finds, after completing the procedures in this subpart, that the exchange is in the public interest.

(d) For the purposes of this subpart, an exchange shall be considered in the public interest if the authorized officer finds that the benefits of production from the lease or preference right lease would not outweigh the adverse effects, or threat of damage or destruction to agricultural production potential, or scenic, biological, geologic, historic or other public interest values from lease operations, and if the authorized officer finds the lands proposed for exchange free from hazardous waste as defined under the authorities of the Clean Water Act, Resource Conservation and Recovery Act and the Comprehensive Environmental Response, Compensation and Liability Act. In exercising his/her discretion to exchange mineral leasing values in the public interest, the authorized officer shall consider, but is not limited to consideration of, these elements of the public interest; recreational use; archeological or historic values; threatened or endangered species; proximity of residential or urban areas; study for potential inclusion in the wilderness or wild and scenic rivers systems; and value for public uses, including public highways, airports and rights-of-way.

§ 3508.2 Exchange procedures.

(a) The authorized officer shall notify the preference right lease applicant or lessee when he/she is prepared to consider an exchange or other mineral leasing values for a tract under lease application or lease. The exchange notice shall:

(1) State why the authorized officer believes an exchange would be in the public interest;

(2) Provide that the lease applicant or lessee shall respond by indicating whether he/she is willing to negotiate for an exchange under this subpart; and

(3) Contain a description of the lands for which the authorized officer would offer exchange terms. The preference right lease applicant's or lessee's reply may describe the lands on which the lease applicant or lessee would accept an exchange lease.

(b) A preference right lease applicant shall show the timely submittal of a mineral preference right lease application.

(c) If the preference right lease applicant demonstrates to the Secretary that the applicant has a preference right to a lease, the authorized officer may, in lieu of issuing a lease on the preference right, negotiate for the selection of appropriate exchange lands and establish lease terms on the lands to be leased in exchange.

(d)(1) The lands leased in exchange shall, to the satisfaction of the preference right lease applicant or lessee and the authorized officer, be a lease tract containing a deposit of leasable or hardrock minerals of comparable value. A lease tract shall be determined "of comparable value" for exchange purposes when the authorized officer concludes that the value of the more valuable tract is less than 10 percent greater than the value of the less valuable tract.

(2) The lands covered by an exchange lease shall be subject to leasing under the authorities contained in § 3500.0-3 of this title.

(e) The exchange right shall be equal to the fair market value of the preference right or lease to be relinquished. A reply to the authorized officer's notice by the preference right lease applicant or lessee which indicates a willingness to consider an exchange also shall indicate a willingness to provide geologic and economic data to enable the authorized officer to determine the fair market value of the relinquished preference right or lease.

(f) After the prospective exchange lessee and the authorized officer agree on the lands to be leased in exchange, a notice of the proposed exchange shall be published in the **Federal Register** and in a newspaper(s) in the county(s) where both the preference right or lease lands and the proposed exchange lease lands are located. The notice shall include:

(1) The time and place of a public hearing(s);

(2) The authorized officer's preliminary findings that the exchange is in the public interest; and

(3) A request for public comments on the merits of the proposed exchange.

§ 3508.3 Issuance of lease.

(a) If, after public hearing, the authorized officer determines by written decision that issuance of the exchange lease is in the public interest, he/she shall establish stipulations for operations on the exchange lease.

(b) The exchange lease shall be subject to the relevant provisions of group 3500 and standard lease terms thereunder and shall contain:

(1) A statement that the lessee quitclaims and relinquishes any right or interest in the preference right lease application or lease exchanged; and

(2) A statement setting forth the authorized officer's finding that the lease issuance is in the public interest.

Subpart 3509—Relinquishment, Termination, Expiration, and Cancellation

§ 3509.1 Relinquishment.

§ 3509.1-1 Prospecting permits.

The permittee may relinquish the entire prospecting permit or any legal subdivision thereof. A partial relinquishment shall clearly describe the lands surrendered and give the exact acreage relinquished. A relinquishment shall be filed in the proper BLM office. Upon its acceptance by the authorized officer, the relinquishment shall be effective as of the date it is filed. Such lands, if otherwise available, shall be subject to the filing of new applications immediately upon notation of the relinquishment on the official status records.

§ 3509.1-2 Leases.

Upon a satisfactory showing that the public interest will not be impaired, the lessee may relinquish the entire lease or any legal subdivision thereof. A partial relinquishment shall clearly describe the lands surrendered and the exact area thereof. A relinquishment shall be filed in the proper BLM office. Upon its acceptance by the authorized officer, the relinquishment shall be effective as of the date it is filed, subject to the continued obligation of the lessee and his/her surety to make payment of all accrued rentals and royalties and to provide for the preservation of any mines or productive works or permanent improvements on the leased lands in accordance with the regulations and terms of the lease.

§ 3509.2 Termination of prospecting permits.

A prospecting permit shall automatically terminate for failure to pay rental on or before the anniversary date of the permit. The termination of the permit for failure to pay rental shall be noted on the official status records of the proper BLM office. Until such notation is made, the lands covered by the permit shall not be available for filing of any new permit applications.

UMI

VOL 51 ISS 77 AP 22 1986 UMI

Applications for such permits filed prior to such notation shall be rejected.

§ 3509.3 Expiration.

§ 3509.3–1 Prospecting permits.

The permit shall expire at the end of its initial or extended term, as applicable, without notice to the permittee. However, a permit may be extended if the permittee timely files an application for extension (See §§ 3512.9–2, 3532.9–2, 3552.9–2 and 3562.9–2). Upon expiration, the lands, if otherwise available and if no preference right lease application has been filed by the prior permit holder, shall be subject to filing of new applications for prospecting permits 60 days thereafter.

§ 3509.3–2 Leases.

(a) Hardrock, sodium, sulphur and asphalt leases shall expire either at the end of the lease term, if a timely application for lease renewal is not timely filed in accordance with applicable regulations, or at the time a timely application for renewal is rejected.

(b) Potassium, phosphate and gilsonite leases continue for so long as the lessee complies with the lease terms and conditions which are subject to periodic readjustment in accordance with applicable regulations.

§ 3509.4 Cancellation.

§ 3509.4–1 Prospecting permits.

(a) Except as provided for in § 3509.2 of this title, if a permittee fails to comply with the provisions of the law or the regulations issued thereunder, or defaults with respect to any of the terms or stipulations of the permit and such failure or default continues for 30 days after service of written notice thereof by the authorized officer, the permit may be cancelled. A waiver of any particular cause for cancellation shall not prevent the cancellation of the permit for any other cause, or for the same cause occurring at any other time.

(b) The cancellation of a permit for cause shall be noted on the official status records of the proper BLM office. Until such notation is made, the lands covered by the permit shall not be available for filing of like applications for a permit. Applications for such permits filed prior to such notation shall be rejected.

§ 3509.4–2 Leases.

(a) If the lessee fails to comply with the provisions of the Act, or of the general regulations promulgated and in force on the date of the lease, or at the effective date of any readjustment of the terms and conditions thereof, or defaults in the performance or observance of any of the terms, covenants, and stipulations of the lease and such failure or default continues for 30 days after service of written notice thereof by the lessor, then the lessor may institute appropriate proceedings in a court of competent jurisdiction for the forfeiture and cancellation of the lease as provided in section 31 of the Act. A waiver of any particular cause of forfeiture shall not prevent the cancellation and forfeiture of the lease for any other cause of forfeiture, or for the same cause occurring at any other time.

(b) If any interest in any lease is owned or controlled directly or indirectly in violation of any of the provisions of the Act, the authorized officer shall give the lessee 30 days to remedy the violation or to show cause why the Attorney General should not be requested to institute proceedings in a court of competent jurisdiction to:

(1) Cancel the lease;

(2) Forfeit the interest so owned; or

(3) Compel disposal of the interest so owned or controlled.

(c) If a lease is issued improperly, it shall be subject to administrative cancellation.

§ 3509.4–3 Bona fide purchasers.

(a) A lease or interest therein shall not be cancelled to the extent that such action adversely affects the title or interest of a bona fide purchaser even though such lease or interest, when held by a predecessor in title, may have been subject to cancellation. All purchasers shall be charged with constructive notice as to all pertinent regulations and all Bureau records pertaining to the lease and the lands covered by the lease.

(b) Prompt action shall be taken to dismiss, as a party to any proceedings with respect to a violation by a predecessor of any provisions of the Act, any person who shows the holding of an interest as a bona fide purchaser without having violated any provisions of the Act. No hearing shall be necessary upon such showing unless prima facie evidence is presented that the purchaser is not a bona fide purchaser. If, during any such proceeding, a party thereto files a waiver of his/her rights under the lease to drill or to assign his/her lease interests, or if such rights are suspended by order of the Secretary pending a decision, payments or rentals and the running of time against the term of the lease involved shall be suspended as of the first day of the month following the filing of the waiver or of the Secretary's suspension until the first day of the month following the final decision in the proceeding or the revocation of the waiver for suspension.

PART 3510—PHOSPHATE

Subpart 3510—Phosphate Leasing—General

Sec.
3510.0–3 Authority.
3510.1 Leasing procedures.
3510.2 Other applicable regulations.
3510.2–1 General leasing regulations.
3510.2–2 Special areas.
3510.3 Allowable acreage holdings.

Subpart 3511—Lease Terms and Conditions

3511.1 Applicability of lease terms and conditions.
3511.2 Rental and royalty.
3511.2–1 Rental.
3511.2–2 Production royalty.
3511.3 Duration of lease.
3511.4 Readjustment.
3511.5 Use of other minerals.
3511.6 Bonds.
3511.7 Special stipulations.
3511.8 Other applicable regulations.

Subpart 3512—Phosphate Prospecting Permits

3512.1 Areas subject to prospecting.
3512.2 Rights conferred by issuance of prospecting permits.
3512.3 Application for prospecting permit.
3512.3–1 Filing requirements.
3512.3–2 Contents of application.
3512.3–3 Exploration plans.
3512.3–4 Rejection of application.
3512.4 Determination of priorities.
3512.4–1 Regular filings.
3512.4–2 Simultaneous filings.
3512.5 Amendment to application.
3512.6 Withdrawal of application.
3512.7 Permit bonds.
3512.8 Terms and conditions of permit.
3512.8–1 Duration of permit.
3512.8–2 Dating of permits.
3512.8–3 Annual rental.
3512.8–4 Special stipulations.
3512.9 Prospecting permit extensions.
3512.9–1 Conditions for, and duration of, extensions.
3512.9–2 Application for extension.
3512.9–3 Effective date.

Subpart 3513—Preference Right Lease

3513.1 Application for preference right lease.
3513.1–1 Filing requirements.
3513.1–2 Contents of application.
3513.2 Review of application.
3513.2–1 Preference right determination.
3513.2–2 Surface management agency.
3513.3 Issuance of lease.
3513.4 Rejection of application.

Subpart 3514—Exploration License

3514.0–3 Authority.
3514.1 Exploration license.
3514.2 Regulations applicable.
3514.3 Exploration plan.
3514.4 Notice of exploration.
3514.4–1 Contents of notice.
3514.4–2 Publication and posting of notice.
3514.4–3 Notice of participation.
3514.4–4 Decision on plan and participation.
3514.5 Submission of data.
3514.6 Modification of exploration plan.

Subpart 3515—Competitive Leasing

3515.1 Lands subject only to competitive leasing.
3515.2 Surface management agency.
3515.3 Sale procedures.
3515.3–1 Publication and posting of notice.
3515.3–2 Contents of notice.
3515.3–3 Detailed statement.
3515.4 Bid opening.
3515.5 Award of lease.
3515.6 Rejection of bid.

Subpart 3516—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3516.1 Lands subject to lease.
3516.2 Special requirements.
3516.3 Filing requirements.
3516.4 Surface management agency.
3516.5 Payment of bonus.
3516.6 Terms and conditions of lease.

Subpart 3517—Use Permits

3517.1 Use permits.
3517.1–1 Applications.
3517.1–2 Rental.
3517.1–3 Additional requirements.
3517.2 Approval.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Mineral Leasing Act for Acquired Lands, as amended (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); the Act of March 3, 1933, as amended (47 Stat. 1487); Section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 8, 1964 (16 U.S.C. 460n et seq.); the Act of November 8, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.); the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–3–460mm–4); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3510—Phosphate Leasing—General

§ 3510.0–3 Authority.

Authority for leasing phosphate is shown under § 3500.0–3 (a) and (c) of this title.

§ 3510.1 Leasing procedures.

The regulations in this part provide the procedures for qualified applicants to obtain rights to develop deposits of phosphate, including associated and related minerals, found on lands available for leasing. The regulations provide for this in the following manner:

(a) "Prospecting permits" allow the permittee to explore for deposits of phosphate.

(b) "Preference right leases" are issued to holders of prospecting permits who demonstrate the discovery of a valuable deposit of phosphate under the permit.

(c) "Exploration licenses" allow the licensee to explore known deposits of phosphate to obtain data but do not grant the licensee any preference or other right to a lease.

(d) "Competitive leases" are issued for known deposits of phosphate and allow the lessee to mine the deposit.

(e) "Fringe acreage leases" are issued noncompetitively for known deposits of phosphate on Federal lands adjacent to existing mines on non-Federal lands which can only be mined as part of the existing mining operation.

(f) "Lease modifications" are used to add known deposits of phosphate to an adjacent Federal lease which contains an existing mine provided the deposits can only be mined as part of the existing mining operation.

§ 3510.2 Other applicable regulations.

§ 3510.2–1 General leasing regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The Part 3500 regulations include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation, and lands not available for leasing. Cross-reference to specific regulations in part 3500 is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 of this title only to the cross-referenced regulations.

§ 3510.2–2 Special areas.

Part 3580 of this title contains regulations specific to certain national recreation areas and to certain lands patented to the State of California, and as applicable, supplements this part. Except where specific regulations in Part 3580 of this title are applicable, the regulations in this part and Part 3500 of this title shall govern the leasing of phosphate in those national recreation areas and those patented lands.

§ 3510.3 Allowable acreage holdings.

No person, company, association or corporation may hold at any particular time, directly or indirectly, more than 20,480 acres under prospecting permit and lease in the United States.

Subpart 3511—Lease Terms and Conditions

§ 3511.1 Applicability of lease terms and conditions.

The lease terms and conditions set out under this section apply to all leases issued or readjusted under Part 3510 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize in accordance with its terms and conditions the mining of phosphate, phosphate rock and associated or related minerals.

§ 3511.2 Rental and royalty.

§ 3511.2–1 Rental.

(a) Each lease shall provide for the payment of rental annually on or before the anniversary date of the lease. The rental for each acre or fraction thereof shall be at the rate of not less than 25 cents for the first lease year, 50 cents for the second and third lease years, and $1 for each and every year thereafter. The annual rental payment shall not be less than $20. The rental paid for any year shall be credited against the first royalties as they accrue under the lease during the year for which rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease. (See § 3509.4–2)

(c) Remittances of rental shall be made in accordance with § 3503.1 of this title.

§ 3511.2–2 Production royalty.

All leases shall be conditioned upon the payment to the United States of such royalties as may be specified in the lease, which shall be fixed by the authorized officer in advance as provided under § 3503.2–1 of this title but not less than 5 per centum of the gross value of the output of phosphates or phosphate rock and associated or related minerals.

§ 3511.3 Duration of lease.

The lease shall be issued for an indeterminate period subject to the Secretary's right of reasonable readjustment of lease terms and conditions at the end of each 20-year period.

§ 3511.4 Readjustment.

(a) The terms and conditions of a lease are subject to reasonable readjustment at the end of each 20-year period following the effective date of the lease unless otherwise provided by law at the time of expiration of such period. Prior to the expiration of each 20-year period, the authorized officer shall transmit proposed readjusted terms and

VOL 51 ISS 77 AP 22 1986 UMI

conditions to the lessee. If the authorized officer fails to transmit the proposed readjusted terms and conditions prior to the expiration of the 20-year period, the right to readjust the lease shall have been waived until the expiration of the next 20-year term.

(b) The lessee is deemed to have agreed to the readjusted terms and conditions unless within 60 days after receiving them, the lessee files an objection to the readjusted terms and conditions or relinquishes the lease. The authorized officer shall issue a decision responding to the objections, and if the response is adverse to the lessee, the decision shall grant the right of appeal under part 4 of this title. The effective date of the readjustment shall not be affected by the filing of objections or the filing of a notice of appeal.

(c) Except as provided in this paragraph, the readjusted terms and conditions shall be effective pending a response to the objections or the outcome of the appeal provided for in paragraph (b) of this section unless the authorized officer provides otherwise. Upon the filing of an objection or appeal, the obligation to pay any increased readjusted royalties, minimum royalties and rentals shall be suspended pending the outcome of the objection or appeal. However, any such increased royalties, minimum royalties and rentals shall accrue during the pendency of the objection or appeal, commencing with the effective date of the readjustment. If the increased royalties, minimum royalties and rentals are sustained by the decision on the objection or on appeal, the accrued balance, plus interests at the rate specified for late payment by the Service shall be payable (See Part 3590). Pending the decision on the objection or the appeal, the royalties, minimum royalties and rentals shall be payable as specified by the lease terms and conditions in effect prior to the end of the 20-year period.

§ 3511.5 Use of other minerals.

Any phosphate lease issued pursuant to this subpart shall provide that the lessee may use deposits of silica, limestone or other rock on the leased lands in the processing or refining of the phosphates, phosphate rock and associated or related minerals mined from the leased lands upon payment of royalty as set forth in the royalty schedule attached to the lease.

§ 3511.6 Bonds.

Prior to issuance of a lease, the applicant shall furnish a bond in an amount to be determined by the authorized officer, but not less than $5,000. (See Subpart 3504)

§ 3511.7 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title. (See also Part 3580)

§ 3511.8 Other applicable regulations.

Leases issued under this part shall also be subject to the conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by § 3503.2–2 of this title.

(b) Suspension of operations and production and suspension of operations are covered by § 3503.3 of this title.

(c) Assignments and subleases are covered by subpart 3506 of this title.

(d) Cancellation and relinquishment are covered by subpart 3509 of this title.

(e) Exploration and mining are covered by Part 3590 of this title.

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3512—Phosphate Prospecting Permits

§ 3512.1 Areas subject to prospecting.

A prospecting permit may be issued for any unclaimed, undeveloped area of available public domain or acquired lands subject to leasing where prospecting or exploratory work is necessary to determine the existence or workability of deposits of phosphate. Discovery of a valuable deposit of phosphate within the term of the permit entitles the permittee to a preference right lease.

§ 3512.2 Rights conferred by issuance of prospecting permits.

A permit shall grant the permittee the exclusive right to prospect on and explore the lands to determine the existence of a valuable deposit of phosphate in accordance with the terms and conditions of the permit. The permittee may remove only such material as is necessary to demonstrate the existence of a valuable mineral deposit.

§ 3512.3 Application for prospecting permit.

§ 3512.3–1 Filing requirements.

(a) An application shall be filed on a form approved by the Director or an exact reproduction of such form.

(b) An application shall be filed in triplicate with the proper BLM office.

(c) The application shall be accompanied by a nonrefundable filing fee of $25, and rental for the first year at the rate of 50 cents per acre, or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall be for the total acreage if known, and if not known, for the total acreage computed on the basis of 40 acres for each smallest subdivision. The rental payment shall not be less than $20.

§ 3512.3–2 Contents of applications.

Each application shall be typewritten, or printed plainly in ink; manually signed in ink and dated by the applicant or applicant's duly authorized attorney-in-fact, and shall contain the following:

(a) The name and address of the applicant;

(b) A statement of the applicant's qualifications and holdings. (See Subpart 3502); and

(c) A complete and accurate land description in compliance with subpart 3501 of this title. The application shall not include more than 2,560 acres in a reasonably compact form.

§ 3512.3–3 Exploration plans.

After an initial review and clearance of the application indicates that the application is in compliance with the requirements of this subpart, the authorized officer shall require the applicant to file an exploration plan in triplicate, reasonably designed to determine the existence or workability of the deposit. The exploration plan shall, insofar as possible, including the following:

(a) The names, addresses and telephone numbers of persons responsible for operations under the plan and to whom notices and orders are to be delivered;

(b) A brief description, including maps, of geologic, water, vegetation and other physical factors, and the distribution, abundance and habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed operation within the area where exploration is to be conducted, and the present land use within and adjacent to the area;

(c) A narrative description showing:

(1) The method of exploration and types of equipment to be used;

(2) The measures to be taken to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat and other natural resources and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations;

(3) The method for plugging drill holes; and

(4) The measures to be taken for surface reclamation, which shall include as appropriate:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs or other vegetation to be planted; and

(v) The method of planting, including approximate quantity and spacing.

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features, and the proposed location of drill holes, trenches and roads; and

(f) Such other data as may be required by the authorized officer.

§ 3512.3–4 Rejection of application.

Any application for a prospecting permit which does not comply with the requirements of this subpart shall be rejected. If the applicant files a new application for the same lands within 30 days of receipt of the rejection, the nonrefundable filing fee and rental payment submitted with the original application shall be applied to the new application, provided the serial number of the original application is shown on the new application. If a new application is not filed within the 30-day period, the advance rental shall be refunded. Priority for the permit shall be established as of the date the corrected application is filed.

§ 3512.4 Determination of priorities.

§ 3512.4–1 Regular filings.

Priority of application shall be determined in accordance with the time of filing.

§ 3512.4–2 Simultaneous filings.

Where more than 1 application is filed at the same time for the same lands, priority shall be determined in accordance with Subpart 1821.2–3 of this title.

§ 3512.5 Amendment to application.

An amendment to an application for a prospecting permit to include additional lands shall receive priority for such additional lands from the date of the filing of the amended application. The amended application shall be accompanied by the required advance rental. No additional filing fees are required.

§ 3512.6 Withdrawal of application.

An application for permit may be withdrawn in whole or in part before the permit is signed on behalf of the United States. Upon acceptance of the withdrawal, the advance rental submitted with the application shall be refunded.

§ 3512.7 Permit bonds.

Prior to issuance of the permit, the applicant shall furnish a bond in an amount determined by the authorized officer, but not less than $1,000. (See Subpart 3504)

§ 3512.8 Terms and conditions of permit.

§ 3512.8–1 Duration of permit.

Prospecting permits are issued for an initial term of 2 years, and may be extended for an additional period not to exceed 4 years as provided in § 3512.9 of this title. No exploration activities other than those approved as part of an existing exploration plan shall be conducted following expiration of the initial term unless and until the permit has been extended by the authorized officer.

§ 3512.8–2 Dating of permits.

The permit shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved.

§ 3512.8–3 Annual rental.

Rental at the rate of 50 cents per acre or fraction thereof shall be paid annually on or before the anniversary date of the permit. The rental payment shall not be less than $20.

§ 3512.8–4 Special stipulations.

To insure adequate protection of the lands and their resources, permits shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title. (See Part 3580)

§ 3512.9 Prospecting permit extensions.

§ 3512.9–1 Conditions for, and duration of, extensions.

A permit may be extended for a maximum of 4 years at the discretion of the authorized officer provided that:

(a) The permittee has been unable, with reasonable diligence, to determine the existence or workability of valuable deposits covered by the permit and desires to continue the prospecting or exploration program. Reasonable diligence means that, in the opinion of the authorized officer, the permittee has drilled a sufficient number of core holes on the permit area or performed other comparable prospecting to explore the permit area within the time allowed; or

(b) The permittee's failure to perform diligent prospecting activities was due to conditions beyond his/her control.

§ 3512.9–2 Application for extension.

(a) Filing requirements.

(1) No specific application form is required.

(2) Application for extension shall be filed in the proper BLM office at least 90 days prior to expiration of the permit.

(3) Applications for extension shall be accompanied by a nonrefundable filing fee of $25, and advance rental of 50 cents per acre, or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(b) The application for extension shall:

(1) Demonstrate that the permittee has met the conditions for extension set out in § 3512.9–1 of this title;

(2) Demonstrate the permittee's diligent prospecting activities; and

(3) Show how much additional time is necessary to complete prospecting work.

§ 3512.9–3 Effective date.

The permit extension shall become effective as of the date of approval.

Subpart 3513—Preference Right Lease

§ 3513.1 Application for preference right lease.

§ 3513.1–1 Filing requirements.

(a) No specific application form is required.

(b) An application shall be filed in triplicate with the proper BLM office no later than 60 days after the prospecting permit expires.

(c) The application shall be accompanied by the first year's rental at the rate of 25 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20. (See subpart 3503)

§ 3513.1–2 Contents of application.

(a) The application shall contain a statement of qualification and holdings in compliance with Subpart 3502 of this title.

(b) The application shall contain a complete and accurate description of the lands in accordance with § 3501.1 of this

VOL 51 ISS 77 AP 22 1986 UMI

title. The lands shall have been included in the prospecting permit and shall not exceed 2,560 acres.

(c) The application shall be accompanied by a map(s) which shows utility systems, the location of any proposed development or mining operations and facilities incidental thereto, including the approximate locations and the extent of the areas to be used for pits, overburden and tailings, and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(d) The application shall include a narrative statement setting forth:

(1) The anticipated scope, method and schedule of development operations, including the types of equipment to be used;

(2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed; and

(3) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

§ 3513.2 Review of application.

§ 3513.2–1 Preference right determination.

The authorized officer shall determine whether the permittee has discovered a valuable deposit of phosphate. The determination shall be based on the data furnished to the authorized officer by the permittee as required by Part 3590 of this title during the life of the permit and supplemental data submitted at the request of the authorized officer to determine the extent and character of the deposit, the anticipated mining and processing methods, the anticipated location, kind and extent of necessary surface disturbance and measures to be taken to reclaim that disturbance.

§ 3513.2–2 Surface management agency.

The surface management agency, if other than the Bureau, shall review the application for preference right lease in accordance with § 3500.9 and Part 3580 of this title, as applicable. The appropriate surface management agency may request supplemental data regarding surface disturbance and reclamation if not otherwise submitted under § 3513.1–2 of this title.

§ 3513.3 Issuance of lease.

The authorized officer shall issue a lease to the holder of a prospecting permit who shows that, within the term of the permit, a valuable deposit of phosphate was discovered.

§ 3513.4 Rejection of application.

(a) The authorized officer shall reject an application for a preference right lease if the authorized officer determines:

(1) That the applicant did not discover a valuable deposit of phosphate;

(2) The applicant did not submit in a timely manner requested information; or

(3) The applicant did not otherwise comply with the requirements of this subpart.

(b) On alleging in an application facts sufficient to show entitlement to a lease, an applicant shall have a right to a hearing before an Administrative Law Judge in the Office of Hearings and Appeals.

(c) At the hearing, the lease applicant shall have both the burden of going forward and the burden of proof by a preponderance of the evidence that a valuable deposit of phosphate was discovered.

Subpart 3514—Exploration License

§ 3514.0–3 Authority.

Section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

§ 3514.1 Exploration license.

Private parties, jointly or severally, may apply for exploration licenses to explore known, unleased phosphate deposits to obtain geologic, environmental and other pertinent data concerning such deposits.

§ 3514.2 Regulations applicable.

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under Part 2920 of this title shall govern the issuance of exploration licenses.

§ 3514.3 Exploration plan.

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3512.3–3 of this title. The exploration plan, as approved, shall be attached to, and made a part of, the license.

§ 3514.4 Notice of exploration.

Applicants for exploration licenses shall be required to publish a Notice of Exploration inviting other parties to participate in exploration under the license on a pro rata cost sharing basis.

§ 3514.4–1 Contents of notice.

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

(a) The name and address of the applicant;

(b) A description of the lands;

(c) The address of the Bureau office where the exploration plan shall be available for inspection; and

(d) An invitation to the public to participate in the exploration under the license.

§ 3514.4–2 Publication and posting of notice.

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation in the area where the lands are located.

(b) The authorized officer shall post the notice in the proper BLM office for 30 days.

§ 3514.4–3 Notice of participation.

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting.

§ 3514.4–4 Decision on plan and participation.

The authorized officer may issue the license naming participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between proposed exploration plans.

§ 3514.5 Submission of data.

The licensee shall furnish the authorized officer copies of all data obtained during exploration. All data shall be considered confidential and not made public until the areas involved have been leased or until the authorized officer determines that the data are not exempt from disclosure under the Freedom of Information Act, whichever occurs first.

§ 3514.6 Modification of exploration plan.

Upon application therefor, a modification of the exploration plan may be approved by the authorized officer.

Subpart 3515—Competitive Leasing

§ 3515.1 Lands subject only to competitive leasing.

Lands available for leasing where prospecting or exploratory work is unnecessary to determine the existence or workability of a valuable phosphate deposit may be leased only through competitive sale to the qualified bidder who offers the highest acceptable bonus bid, except as provided in Subparts 3506 and 3516 of this title. A competitive lease sale may be initiated either through an expression of interest or on Bureau motion.

§ 3515.2 Surface management agency.

Prior to competitive lease offering, the surface management agency shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

3515.3 Sale procedures.

§ 3515.3–1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease sale shall be posted for 30 days in the public room of the proper BLM office.

§ 3515.3–2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the phosphate deposit being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

§ 3515.3–3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The proposed lease on a form approved by the Director with terms and conditions, including the rental, royalty rates, bond amount, and special stipulations for the particular tract;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's qualifications (See Part 3502) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay their proportionate share of the total cost of the publication of the sale notice;

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder if the successful bidder fails to obtain the lease for any reason; and,

(g) Any other information deemed appropriate.

§ 3515.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3515.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value, copies of the lease on the form attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3515.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3516—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3516.1 Lands subject to lease.

Lands available for leasing which are known to contain a phosphate deposit that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by a issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3516.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for the fringe acreage is not in excess of 2,560 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 2,560 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active phosphate mining units in the area;

(d) The lands applied for lack sufficient reserves of the mineral resource to warrant independent development; and

(e) Leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3516.3 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM office. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25, and an advance rental payment of 25 cents per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(c) The application shall:

(1) Make reference to the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Include a showing that a phosphate deposit extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3516.4 Surface management agency.

The surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

§ 3516.5 Payment of bonus.

Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event, shall such payment be less than $1 per acre or fraction thereof.

§ 3516.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under Subpart 3511 of this title. The terms and conditions of modified leases shall be the same as in the existing leases.

Subpart 3517—Use Permits

§ 3517.1 Use permits.

A lessee or permittee may be granted a right to use the surface of unappropriated and unentered public lands, not exceeding 80 acres, not

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

included within the boundaries of a national forest if necessary for the proper extraction, treatment or removal of the mineral deposits. This provision is not applicable to National Forest System lands.

§ 3517.1–1 Applications.

Applications for permits to use additional lands shall be filed in triplicate in the proper BLM office. Each application shall be accompanied by a nonrefundable $25 filing fee and the first year's rental. The rental payment shall not be less than $20.

§ 3517.1–2 Rental.

(a) The annual rental charge for use of such lands shall not be less than $1 an acre or fraction thereof. Payment of the rental shall be made on or before the anniversary date of the permit and also shall be required on all use permits issued prior to the effective date of this section.

(b) Any use permit shall terminate if the permittee or lessee fails to pay the rental within 30 days after service of written notice thereof by the authorized officer.

§ 3517.1–3 Additional requirements.

Applications shall set forth the specific reasons why the permittee or lessee needs any additional lands for the use named, describe the lands desired in accordance with Subpart 3501 of this title and also set forth the reasons why the lands are desirable and adapted to the use named, either in point of location, topography or otherwise, and shall assure that they are unoccupied and unappropriated. The application shall also contain an agreement to pay the annual charge prescribed in the permit.

§ 3517.2 Approval.

A use permit shall be issued on a form approved by the Director and dated as of the first day of the month after its issuance unless the applicant requests, in writing, that it be dated the first day of the month of issuance.

PART 3520—SODIUM

Subpart 3520—Sodium Leasing—General

Sec.
3520.0–3 Authority.
3520.1 Leasing procedures.
3520.2 Other applicable regulations.
3520.2–1 General leasing regulations.
3520.2–2 Special areas.
3520.3 Allowable acreage holdings.

Subpart 3521—Lease Terms and Conditions

3521.1 Applicability of lease terms and conditions.
3521.2 Rental and royalty.
3521.2–1 Rental.
3521.2–2 Production royalty.
3521.3 Duration of lease.
3521.4 Bonds.
3521.5 Special stipulations.
3521.6 Other applicable regulations.

Subpart 3522—Sodium Prospecting Permits

3522.1 Areas subject to prospecting.
3522.2 Rights conferred by issuance of a prospecting permit.
3522.3 Application for prospecting permit.
3522.3–1 Filing requirements.
3522.3–2 Contents of applications.
3522.3–3 Exploration plans.
3522.3–4 Rejection of application.
3522.4 Determination of priorities.
3522.4–1 Regular filings.
3522.4–2 Simultaneous filings.
3522.5 Amendment to application.
3522.6 Withdrawal of application.
3522.7 Permit bonds.
3522.8 Terms and conditions of permit.
3522.8–1 Duration of permit.
3522.8–2 Dating of permits.
3522.8–3 Annual rental.
3522.8–4 Special stipulations.

Subpart 3523—Preference Right Lease

3523.1 Application for preference right lease.
3523.1–1 Filing requirements.
3523.1–2 Contents of application.
3523.2 Review of application.
3523.2–1 Preference right determination.
3523.2–2 Surface management agency.
3523.3 Issuance of lease.
3523.4 Rejection of application.

Subpart 3524—Exploration License

3524.0–3 Authority.
3524.1 Exploration License.
3524.2 Regulations applicable.
3524.3 Exploration plan.
3524.4 Notice of Exploration.
3524.4–1 Contents of notice.
3524.4–2 Publication and posting of notice.
3524.4–3 Notice of participation.
3524.4–4 Decision on plan and participation.
3524.5 Submission of data.
3524.6 Modification of exploration plan.

Subpart 3525—Competitive Leasing

3525.1 Lands subject only to competitive leasing.
3525.2 Surface management agency.
3525.3 Sale procedures.
3525.3–1 Publication and posting of notice.
3525.3–2 Contents of notice.
3525.3–3 Detailed statement.
3525.4 Bid opening.
3525.5 Award of lease.
3525.6 Rejection of bid.

Subpart 3526—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3526.1 Lands subject to lease.
3526.2 Special requirements.
3526.3 Filing requirements.
3526.4 Surface management agency.
3526.5 Payment of bonus.
3526.6 Terms and conditions of lease.

Subpart 3527—Use Permits

3527.1 Use permits.
3527.1–1 Applications.
3527.1–2 Rental.
3527.1–3 Additional requirements.
3527.2 Approval.

Subpart 3528—Lease Renewals

3528.1 Applications.
3528.2 Bonds.
3528.3 Failure to apply for renewal.
3528.4 Lease terms and conditions.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Mineral Leasing Act of Acquired Lands of 1947 (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); the Act of March 3, 1933, as amended (47 Stat. 1467); Section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 8, 1964 (16 U.S.C. 460n et seq.); the Act of November 8, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.); the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–2–460mm–4); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3520—Sodium Leasing—General

§ 3520.0–3 Authority

Authority for leasing deposits of chlorides, sulphates, carbonates, borates, silicates or nitrates of sodium, hereinafter referred to as deposits of sodium or any sodium compound, is shown under § 3500.0–3 (a) and (c) of this title.

§ 3520.1 Leasing procedures.

The regulations in this part provide the procedures for qualified applicants to obtain rights to develop deposits of sodium or any sodium compound found on lands available for leasing. The regulations provide for this in the following manner:

(a) "Prospecting permits" allow the permittee to explore for deposits of sodium or any sodium compound.

(b) "Preference right leases" are issued to the holders of prospecting permits who demonstrate the discovery of a valuable deposit of sodium or any sodium compound under the permit and that the lands covered by the permit are chiefly valuable therefore.

(c) "Exploration licenses" allow the licensee to explore known deposits of sodium or any sodium compound to obtain data but do not grant the licensee any preference or other right to a lease.

(d) "Competitive leases" are issued for known deposits of sodium or any sodium compound and allow the lessee to mine the deposit.

(e) "Fringe acreage leases" are issued noncompetitively for known deposits of sodium or any sodium compound adjacent to existing mines on non-Federal lands which can only be mined as part of the existing mining operation.

(f) "Lease modifications" are used to add known deposits of sodium or any sodium compound to an adjacent Federal lease which contains an existing mine provided the deposits can only be mined as part of the existing mining operation.

§ 3520.2 Other applicable regulations.

§ 3520.2–1 General leasing regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The regulations in Part 3500 of this title include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation, and lands not available for leasing. Cross-reference to specific regulations in Part 3500 of this title is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 of this title only to the cross-referenced regulations.

§ 3520.2–2 Special areas.

Part 3580 of this title contains regulations specific to certain national recreation areas and to certain lands patented to the State of California, and as applicable, supplements this part. Except where specific regulations in Part 3580 of this title are applicable, the regulations in this part and Part 3500 of this title shall govern the leasing of deposits of sodium or any sodium compound in those national recreation areas and those patented lands.

§ 3520.3 Allowable acreage holdings.

No person, company, association or corporation may hold at any particular time, directly or indirectly, more than 5,120 acres under prospecting permit and lease in any 1 State, except that, where the Secretary determines pursuant to 30 U.S.C. 184(b)(2) that it is necessary to secure the economic mining of sodium compounds, holdings may equal 15,360 acres.

Subpart 3521—Lease Terms and Conditions

§ 3521.1 Applicability of lease terms and conditions.

The lease terms and conditions set out under this section apply to all leases issued or renewed under Part 3520 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize, in accordance with its terms and conditions, the mining of sodium, sodium compounds and other related products, including, but not limited to, potassium and potassium compounds.

§ 3521.2 Rental and royalty.

§ 3521.2–1 Rental.

(a) Each lease shall provide for the payment of rental annually and in advance for each acre or fraction thereof during the continuance of the lease at the rate of 25 cents for the first calendar year or fraction thereof, 50 cents for the second, third, fourth and fifth calendar years and $1 for each and every year thereafter. Rental is payable annually on or before January 1. The rental paid for any year shall be credited against the first royalties as they accrue under the lease during the year for which rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease. (See § 3509.4–2)

(c) Remittances of rental shall be made in accordance with § 3503.1 of this title.

§ 3521.2–2 Production royalty.

All leases shall be conditioned upon the payment to the United States of such royalties as may be specified in the lease, which shall be fixed by the authorized officer in advance as provided under § 3503.2–1 of this title, but at not less than 2 per centum of the quantity or gross value of the output of sodium compounds and related products at the point of shipment to market.

§ 3521.3 Duration of lease.

The lease shall be issued for an initial term of 20 years subject to a preferential right in the lessee to renew for a 10-year term at the end of the initial term and at the end of each 10-year period thereafter. (See Subpart 3528)

§ 3521.4 Bonds.

Prior to issuance of a lease under this part, the applicant shall furnish a bond in an amount to be determined by the authorized officer but not less than $5,000. (See Subpart 3504)

§ 3521.5 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title. (See also Part 3580)

§ 3521.6 Other applicable regulations.

Leases issued under this part shall also be subject to the conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by § 3503.2–2 of this title.

(b) Suspension of operations and production and suspension of operations are covered by § 3503.3 of this title.

(c) Assignments and subleases are covered by part 3506 of this title.

(d) Cancellation and relinquishment are covered by part 3509 of this title.

(e) Exploration and mining are covered by Part 3500 of this title.

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3522—Sodium Prospecting Permits

§ 3522.1 Areas subject to prospecting.

A prospecting permit may be issued for any area of available public domain or acquired lands subject to leasing where prospecting or exploratory work is necessary to determine the existence or workability of deposits of sodium or any sodium compound. If, within the term of the permit, the permittee makes a discovery of a valuable deposit of any of these sodium compounds, and the lands are determined to be chiefly valuable therefor, the permittee is entitled to a preference right lease.

§ 3522.2 Rights conferred by issuance of prospecting permits.

A permit shall grant the permittee the exclusive right to prospect on and explore the lands to determine the existence of a valuable deposit of sodium or any sodium compound in accordance with the terms and conditions of the permit. The permittee may remove only such material as is necessary to demonstrate the existence of a valuable mineral deposit.

§ 3522.3 Application for prospecting permit.

§ 3522.3–1 Filing requirements.

(a) An application shall be filed on a form approved by the Director or an exact reproduction of that form.

(b) An application shall be filed in triplicate with the proper BLM office.

(c) The application shall be accompanied by a nonrefundable filing fee of $25, and rental for the first year at the rate of 50 cents per acre, or fraction

VOL 51 ISS 77 AP 22 1986 UMI

thereof, made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall be for the total acreage if known, and if not known, for the total acreage computed on the basis of 40 acres for each smallest subdivision. The rental payment shall not be less than $20.

§ 3522.2–2 Contents of applications.

Each application shall be typewritten, or printed plainly in ink; manually signed in ink and dated by the applicant or applicant's duly authorized attorney-in-fact, and shall contain the following:

(a) The name and address of the applicant;

(b) A statement of the applicant's qualifications and holdings. (See Subpart 3502); and

(c) A complete and accurate land description in compliance with subpart 3501 of this title. The application shall not include more than 2,560 acres in a reasonably compact form.

§ 3522.2–3 Exploration plans.

After initial review and clearance of the application, but prior to issuance of the prospecting permit, the authorized officer shall require the applicant to file an exploration plan in triplicate, reasonably designed to determine the existence or workability of the deposit. The exploration plan shall, insofar as possible, include the following:

(a) The names, addresses and telephone numbers of persons responsible for operations under the plan and to whom notices and orders are to be delivered;

(b) A brief description, including maps, of geologic, water, vegetation, and other physical factors, and the distribution, abundance, and habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed operation within the area where exploration is to be conducted, and the present land use within and adjacent to the area;

(c) A narrative description showing:

(1) The method of exploration and types of equipment to be used;

(2) The measures to be taken to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat and other natural resources and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations;

(3) The method for plugging drill holes; and,

(4) The measures to be taken for surface reclamation, which shall include as appropriate:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs or other vegetation to be planted; and,

(v) The method of planting, including approximate quantity and spacing.

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features and the proposed location of drill holes, trenches and roads; and,

(f) Such other data as may be required by the authorized officer.

§ 3522.2–4 Rejection of application.

Any application for a prospecting permit which does not comply with the requirements of this subpart shall be rejected. If the applicant files a new application for the same lands within 30 days of receipt of the rejection, the nonrefundable filing fee and rental payment submitted with the original application shall be applied to the new application, provided the serial number of the original application is shown on the new application. If a new application is not filed within the 30-day period, the advance rental shall be refunded. Priority for the permit shall be established as of the date the corrected application is filed.

§ 3522.4 Determination of priorities.

§ 3522.4–1 Regular filings.

Priority of application shall be determined in accordance with the time of filing.

§ 3522.4–2 Simultaneous filings.

Where more than 1 application is filed at the same time for the same lands, priority shall be determined in accordance with Subpart 1821 of this title.

§ 3522.5 Amendment to application.

An amendment to an application for a prospecting permit to include additional lands shall receive priority for such additional lands from the date of the filing of the amended application. The amended application shall be accompanied by the required advance rental. No additional filing fees are required.

§ 3522.6 Withdrawal of application.

An application for permit may be withdrawn in whole or in part before the permit is signed on behalf of the United States. Upon acceptance of the withdrawal by the authorized officer, the advance rental submitted with the application shall be refunded.

§ 3522.7 Permit bonds.

Prior to issuance of the permit, the applicant shall furnish a bond in an amount determined by the authorized officer, but not less than $1,000. (See Subpart 3504)

§ 3522.8 Terms and conditions of permit.

§ 3522.8–1 Duration of permit.

Prospecting permits are issued for a term of 2 years, and may not be extended.

§ 3522.8–2 Dating of permits.

The permit shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved.

§ 3522.8–3 Annual rental.

Rental at the rate of 50 cents per acre or fraction thereof shall be paid annually on or before the anniversary date of the permit. The rental payment shall not be less than $20.

§ 3522.8–4 Special stipulations.

To insure adequate protection of the lands and their resources, permits shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title. (See also Part 3580)

Subpart 3523—Preference Right Lease

§ 3523.1 Application for preference right lease.

§ 3523.1–1 Filing requirements.

(a) No specific application form is required.

(b) An application shall be filed in triplicate with the proper BLM office no later than 60 days after the prospecting permit expires.

(c) The application shall be accompanied by the first year's rental at the rate of 25 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. (See Subpart 3503)

§ 3523.1–2 Contents of application.

(a) The application shall include a statement of qualifications and holdings in accordance with Subpart 3502 of this title;

(b) The application shall contain a complete and accurate description of the lands in accordance with § 3501.1 of this title. The lands shall have been included in the prospecting permit and shall not exceed 2,560 acres;

(c) The application shall be accompanied by a map(s) which shows utility systems; the location of any proposed development or mining operations and facilities incidental thereto, including the approximate locations and the extent of the areas to be used for pits, overburden and tailings; and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto; and

(d) The application shall include a narrative statement setting forth:

(1) The anticipated scope, method and schedule of development operations, including the types of equipment to be used;

(2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed; and

(3) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

§ 3523.2 Review of application.

§ 3523.2–1 Preference right determination.

The authorized officer shall determine whether the permittee has discovered a valuable deposit of sodium or any sodium compound and whether the lands are chiefly valuable therefor. The determination shall be based on data furnished to the authorized officer by the permittee as required by Part 3590 of this title during the life of the permit and supplemental data submitted at the request of the authorized officer to determine the extent and character of the deposit, the anticipated mining and processing methods, the anticipated location, kind and extent of necessary surface disturbance and measures to be taken to reclaim that disturbance.

§ 3523.2–2 Surface management agency.

The surface management agency, if other than the Bureau, shall review the application for preference right lease in accordance with § 3500.9 and Part 3580 of this title, as applicable. The appropriate surface management agency may request supplemental data regarding surface disturbance and reclamation if not otherwise submitted under § 3523.1–2 of this title.

§ 3523.3 Issuance of lease.

The authorized officer shall issue a lease to the holder of a prospecting permit who shows that, within the term of the permit, a valuable deposit of sodium or any sodium compound was discovered and that the lands are chiefly valuable therefor.

§ 3523.4 Rejection of application.

(a) The authorized officer shall reject the application for a preference right lease if the authorized officer determines:

(1) That the applicant did not discover a valuable deposit of sodium and/or the lands are not chiefly valuable therefor;

(2) The applicant did not submit requested information in a timely manner; or

(3) The applicant did not otherwise comply with the requirements of this subpart.

(b) On alleging in an application facts the applicant believes to be sufficient to show entitlement to lease, a permittee shall have the right to a hearing before an Administrative Law Judge in the Office of Hearings and Appeals.

(c) At the hearing, the permittee shall have both the burden of going forward and the burden of proof by a preponderance of the evidence that a valuable deposit of sodium or any sodium compound was discovered and that the lands are chiefly valuable therefor.

Subpart 3524—Exploration License

§ 3524.0–3 Authority.

Section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

§ 3524.1 Exploration license.

Private parties, jointly or severally, may apply for exploration licenses to explore known, unleased deposits of sodium or any sodium compound to obtain geologic, environmental and other pertinent data concerning such deposits.

§ 3524.2 Regulations applicable.

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under Part 2920 of this title shall govern the issuance of exploration licenses.

§ 3524.3 Exploration plan.

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3522.2–3 of this title. The exploration plan, as approved, shall be attached to, and made a part of, the license.

§ 3524.4 Notice of exploration.

Applicants for exploration licenses shall be required to publish a Notice of Exploration inviting other parties to participate in exploration under the license on a pro rata cost sharing basis.

§ 3524.4–1 Contents of notice.

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

(a) The name and address of the applicant;

(b) A description of the lands;

(c) The address of the Bureau office where the exploration plan shall be available for inspection; and

(d) An invitation to the public to participate in the exploration under the license.

§ 3524.4–2 Publication and posting of notice.

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation in the area where the lands are located.

(b) The authorized officer shall post the notice in the proper BLM office for 30 days.

§ 3524.4–3 Notice of participation.

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting.

§ 3524.4–4 Decision on plan and participation.

The authorized officer may issue the license naming participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between proposed exploration plans.

§ 3524.5 Submission of data.

The licensee shall furnish the authorized officer copies of all data obtained during exploration. All data shall be considered confidential and not made public until the areas involved have been leased or until the authorized officer determines that the data are not exempt from disclosure under the Freedom of Information Act, whichever occurs first.

§ 3524.6 Modification of exploration plan.

Upon application therefor, a modification of the exploration plan may be approved by the authorized officer.

VOL 51 ISS 77 APR 22 1986 UMI

Subpart 3525—Competitive Leasing

§ 3525.1 Lands subject only to competitive leasing.

Lands available for leasing where prospecting or exploratory work is unnecessary to determine the existence or workability of valuable deposits of sodium or any sodium compound may be leased only through competitive sale to the qualified bidder who offers the highest acceptable bonus bid, except as provided in Subparts 3506 and 3526 of this title. A competitive lease sale may be initiated either through an expression of interest or on Bureau motion.

§ 3525.2 Surface management agency.

Prior to competitive lease offering, the surface management agency shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

§ 3525.3 Sale procedures.

§ 3525.3-1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease sale also shall be posted for 30 days in the public room of the proper BLM office.

§ 3525.3-2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the sodium deposit or any sodium compound deposit being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

§ 3525.3-3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The proposed lease on a form approved by the Director with terms and conditions, including the rental, royalty rates, bond amount and special stipulations for the particular tract;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's qualifications (See Subpart 3502) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay their proportionate share of the total cost of the publication of the sale notice;

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder if the successful bidder fails to obtain the lease for any reason; and

(g) Any other information deemed appropriate.

§ 3525.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3525.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value, copies of the lease on the form attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3525.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3526—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3526.1 Lands subject to lease.

Lands available for leasing which are known to contain a deposit of sodium or any sodium compound that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3526.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for the fringe acreage is not in excess of 2,560 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 2,560 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(d) The lands applied for lack sufficient reserves of the mineral resource to warrant independent development; and

(e) That leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3526.3 Filing requirements.

(a) An application shall be filed in triplicate with proper BLM office. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25, and an advance rental payment of 25 cents per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management.

(c) The application shall:

(1) Make reference to the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Include a showing that a sodium deposit or any sodium compound deposit extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3526.4 Surface management agency.

The surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 and Part 3580 of this title.

§ 3526.5 Payment of bonus.

Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event shall such payment be less than $1 per acre or fraction thereof.

§ 3526.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under Subpart 3521 of this title. The terms and conditions of a modified lease shall be the same as in the existing lease.

Subpart 3527—Use Permits

§ 3527.1 Use permits.

A permittee or lessee may be granted a right to use, during the life of the permit or lease, the surface of unoccupied non-mineral public lands, not to exceed 40 acres, that are not included within the boundaries of a national forest, for camp sites, refining works and other purposes connected with, if necessary to, the proper development and use of the deposits covered by the permit or lease.

§ 3527.1-1 Applications.

Applications for permits to use additional lands shall be filed in triplicate in the proper BLM office. No specific form is required. Each application shall be accompanied by a nonrefundable $25 filing fee and the first year's rental. The rental payment shall not be less than $20.

§ 3527.1-2 Rental.

(a) The annual rental charge for use of such lands shall not be less than $1 an acre or fraction thereof. Payment of the rental shall be made on or before the anniversary date of the permit and also shall be required on all use permits issued prior to the effective date of this section.

(b) Any use permit shall terminate if the permittee or lessee fails to pay the required rental within 30 days after service of written notice thereof by the authorized officer.

§ 3527.1-3 Additional requirements.

Applications shall set forth the specific reasons why the permittee or lessee needs the additional lands for the use named, describe the lands desired in accordance with Subpart 3501 of this title and also set forth the reasons why the lands are desirable and adapted to the use named, either in point of location, topography or otherwise, and shall assure that they are unoccupied and unappropriated. The application shall also contain an agreement to pay the annual charge prescribed in the permit.

§ 3527.2 Approval.

A use permit shall be issued on a form approved by the Director and dated as of the first day of the month after its issuance unless the applicant requests in writing that it be dated the first day of the month of issuance.

Subpart 3528—Lease Renewals

§ 3528.1 Applications.

An application for lease renewal shall be filed at least 90 days prior to the expiration of the lease term. No specific form is required. All applications shall be filed in triplicate in the proper BLM office together with a nonrefundable $25 filing fee and an advance rental payment of $1 per acre or fraction thereof.

§ 3528.2 Bonds.

Prior to the issuance of a renewal lease, the lessee may be required to furnish a new bond as prescribed by Subpart 3504 of this title.

§ 3528.3 Failure to apply for renewal.

If the holder of a lease fails to apply for renewal as provided in § 3528.1 of this title, the lease shall expire on the last day of the current lease term.

§ 3528.4 Lease terms and conditions.

Each lease, if renewed, shall be issued on a form approved by the Director and shall be effective the first day of the month following its approval by the authorized officer or the first day of the month following the expiration of the current lease, whichever is later, and shall otherwise be subject to the terms and conditions set forth under Subpart 3521 of this title.

PART 3530—POTASSIUM

Subpart 3530—Potassium Leasing—General

Sec.
3530.0-3 Authority.
3530.1 Leasing procedures.
3530.2 Other applicable regulations.
3530.2-1 General leasing regulations.
3530.2-2 Special areas.
3530.3 Allowable acreage holdings.

Subpart 3531—Lease Terms and Conditions

3531.1 Applicability of lease terms and conditions.
3531.2 Rental and royalty.
3531.2-1 Rental.
3531.2-2 Production royalty.
3531.3 Duration of lease.
3531.4 Readjustment.
3531.5 Bonds.
3531.6 Special stipulations.
3531.7 Other applicable regulations.

Subpart 3532—Potassium Prospecting Permits

3532.1 Areas subject to prospecting.

Sec.
3532.2 Rights conferred by issuance of prospecting permits.
3532.3 Application for prospecting permit.
3532.3-1 Filing requirements.
3532.3-2 Contents of applications.
3532.3-3 Exploration plans.
3532.3-4 Rejection of application.
3532.4 Determination of priorities.
3532.4-1 Regular filings.
3532.4-2 Simultaneous filings.
3532.5 Amendment to application.
3532.6 Withdrawal of application.
3532.7 Permit bonds.
3532.8 Terms and conditions of permit.
3532.8-1 Duration of permit.
3532.8-2 Dating of permit.
3532.8-3 Annual rental.
3532.8-4 Special stipulations.
3532.9 Prospecting permit extensions.
3532.9-1 Conditions for, and duration of, extensions.
3532.9-2 Application for extension.
3532.9-3 Effective date.

Subpart 3533—Preference Right Lease

3533.1 Application for preference right lease.
3533.1-1 Filing requirements.
3533.1-2 Contents of application.
3533.2 Review of application.
3533.2-1 Preference right determination.
3533.2-2 Surface management agency.
3533.3 Issuance of lease.
3533.4 Rejection of application.

Subpart 3534—Exploration License

3534.0-3 Authority.
3534.1 Exploration license.
3534.2 Regulations applicable.
3534.3 Exploration plan.
3534.4 Notice of exploration.
3534.4-1 Contents of notice.
3534.4-2 Publication and posting of notice.
3534.4-3 Notice of participation.
3534.4-4 Decision on plan and participation.
3534.5 Submission of data.
3534.6 Modification of exploration plan.

Subpart 3535—Competitive Leasing

3535.1 Lands subject only to competitive leasing.
3535.2 Surface management agency.
3535.3 Sale procedures.
3535.3-1 Publication and posting of notice.
3535.3-2 Contents of notice.
3535.3-3 Detailed statement.
3535.4 Bid opening.
3535.5 Award of lease.
3535.6 Rejection of bid.

Subpart 3536—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3536.1 Lands subject to lease.
3536.2 Special requirements.
3536.3 Filing requirements.
3536.4 Surface management agency.
3536.5 Payment of bonus.
3536.6 Terms and conditions of lease.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C.1701 et seq.); the Act of March 3, 1933, as amended

VOL 51 ISS 77 AP 22 1986 UMI

(47 Stat. 1497); section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 6, 1964 (16 U.S.C. 460n et seq.); the Act of November 9, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.); the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–2–460mm–4); the Independent Offices Appropriations Act (31 U.S.C 9701).

Subpart 3530—Potassium Leasing—General

§ 3530.0–3 Authority.

Authority for leasing deposits of chlorides, sulphates, carbonates, borates, silicates or nitrates of potassium, hereinafter referred to as deposits of potassium or any potassium compound, is shown under § 3500.0–3 (a) and (c) of this title.

§ 3530.1 Leasing procedures.

The regulations in this part provide the procedures for qualified entities to obtain rights to develop deposits of potassium or any potassium compound found on lands available for leasing. The regulations provide for this in the following manner:

(a) "Prospecting permits" allow the permittee to explore for deposits of potassium or any potassium compound.

(b) "Preference right leases" are issued to the holders of prospecting permits who demonstrate the discovery of a valuable deposit of potassium or any potassium compound under the permit and the lands covered by the permit are chiefly valuable for potassium or any potassium compound.

(c) "Exploration licenses" allow the licensee to explore known deposits of potassium or any potassium compound to obtain data but do not grant the licensee any preference or other right to a lease.

(d) "Competitive leases" are issued for known deposits of potassium or any potassium compound and allow the lessee to mine the deposit.

(e) "Fringe acreage leases" are issued noncompetitively for known deposits of potassium or any potassium compound adjacent to existing mines on non-Federal lands which can only be mined as part of the existing mining operation.

(f) "Lease modifications" are used to add known deposits of potassium or any potassium compound to an adjacent Federal lease which contains an existing mine, provided the deposits can only be mined as part of the existing mining operation.

§ 3530.2 Other applicable regulations.

§ 3530.2–1 General leasing regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The Part 3500 regulations include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation, and lands not available for leasing. Cross-reference to specific regulations in Part 3500 is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 only to the cross-referenced regulations.

§ 3530.2–2 Special areas.

Part 3580 of this title contains regulations specific to certain national recreation areas and to certain lands patented to the State of California, and as applicable, supplements this part. Except where specific regulations in Part 3580 of this title are applicable, the regulations in this part and Part 3500 of this title shall govern the leasing of deposits of potassium or any potassium compound in those national recreation areas and those patented lands.

§ 3530.3 Allowable acreage holdings.

No person, association or corporation shall hold at any particular time, either directly or indirectly, more than 51,200 acres in permits and leases in any 1 State, except, the authorized officer may authorize additional acreage if he/she finds, upon a satisfactory showing by the applicant, that the additional acreage is needed for the economic and efficient extraction of potassium from concentrated brines in connection with the lessee's existing mining operations.

Subpart 3531—Lease Terms and Conditions

§ 3531.1 Applicability of lease terms and conditions.

The lease terms and conditions set out under this section apply to all leases issued or readjusted under Part 3530 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize, in accordance with its terms and conditions, the mining of potassium, potassium compounds and other related products, including, but not limited to, sodium and sodium compounds.

§ 3531.2 Rental and royalty.

§ 3531.2–1 Rental.

(a) Each lease shall provide for the payment of rental at the rate of 25 cents per acre or fraction thereof for the first calendar year or fraction thereof, 50 cents for the second, third, fourth and fifth years and $1 for the sixth and each succeeding year during the continuance of the lease. Rental is payable annually on or before January 1. The rental paid for any year shall be credited against the first royalties that accrue under the lease during the year for which the rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease. (See § 3509.4–2)

(c) Remittances of rental shall be made in accordance with § 3503.1 of this title.

§ 3531.2–2 Production royalty.

All leases shall be conditioned upon the payment of such royalties as may be specified in the lease as fixed by the authorized officer in advance as provided under § 3503.2–1 of this title, but shall not be less than 2 per centum of the quantity or gross value of the output of potassium compounds and other related products, except sodium, at the point of shipment to market.

§ 3531.3 Duration of lease.

The lease shall be issued for an indeterminate period subject to the Secretary's right of reasonable readjustment of lease terms and conditions at the end of each 20-year period.

§ 3531.4 Readjustment.

(a) The terms and conditions of a lease are subject to reasonable readjustment at the end of each 20-year period following the effective date of the lease unless otherwise provided by law at the time of expiration of such period. Prior to the expiration of each 20-year period, the authorized officer shall transmit proposed readjusted terms and conditions to the lessee. If the authorized officer fails to transmit the proposed readjusted terms and conditions prior to the expiration of the 20-year period, the right to readjust the lease shall have been waived until the expiration of the next 20-year term.

(b) The lessee is deemed to have agreed to the readjusted terms and conditions unless, within 60 days after receiving them, the lessee files an objection to the readjusted terms or relinquishes the lease. The authorized officer shall issue a decision responding to the objections, and if the response is adverse to the lessee, the decision shall grant the right of appeal under Part 4 of this title. The effective date of the readjustment shall not be affected by the filing of objections or by the filing of a notice of appeal.

(c) Except as provided in this paragraph, the readjusted lease terms and conditions shall be effective pending the outcome of the objections of the appeal provided for in paragraph (b) of this section unless the authorized officer provides otherwise. Upon the filing of an objection or appeal, the obligation to pay any increased readjusted royalties, minimum royalties and rentals shall be suspended pending the outcome of the objection or appeal. However, any such increased royalties, minimum royalties and rentals shall accrue during the pendency of the appeal, commencing with the effective date of the readjustment. If the increased royalties, minimum royalties and rentals are sustained by the decision on the objection or on appeal, the accrued balance, plus interest at the rate specified for late payment by the Service shall be payable (See Part 3590). Pending the decision on the objection or the appeal, the royalties, minimum royalties and rentals shall be payable as specified by the lease terms and conditions in effect prior to the end of the 20-year period

§ 3531.5 Bonds.

Prior to issuance of a lease under this part, the applicant shall furnish a bond in an amount to be determined by the authorized officer but not less than $5,000. (See Subpart 3504)

§ 3531.6 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction.

§ 3531.7 Other applicable regulations.

Leases issued under this part shall also be subject to the conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by § 3503.2–2 of this title.

(b) Suspension of operations and production and suspension of operations are covered by § 3503.3 of this title.

(c) Assignments and subleases are covered by Subpart 3506 of this title.

(d) Cancellation and relinquishment are covered by Subpart 3500 of this title.

(e) Exploration and mining are covered by Part 3600 of this title.

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3532—Potassium Prospecting Permits

§ 3532.1 Areas subject to prospecting.

A prospecting permit may be issued for any area of available public domain and acquired lands subject to leasing where prospecting or exploratory work is necessary to determine the existence or workability of deposits of potassium or any potassium compound, except prospecting permits may not be issued for lands in or adjacent to Searles Lake, California. If, within the term of the permit, the permittee makes a discovery of a valuable deposit of potassium or any potassium compound, and the lands are determined to be chiefly valuable therefor, the permittee is entitled to a preference right lease.

§ 3532.2 Rights conferred by issuance of prospecting permits.

A permit shall grant the permittee the exclusive right to prospect on and explore the lands to determine the existence of a valuable deposit of potassium or any potassium compound in accordance with the terms and conditions of the permit. The permittee may remove only such material as may be necessary to demonstrate the existence of a valuable mineral deposit.

§ 3532.3 Application for prospecting permit.

§ 3532.3–1 Filing requirements.

(a) An application shall be filed on a form approved by the Director or an exact reproduction of such form.

(b) An application shall be filed in triplicate with the proper BLM office.

(c) The application shall be accompanied by a nonrefundable filing fee of $25, and rental for the first year at the rate of 50 cents per acre, or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall be for the total acreage if known, and if not known, for the total acreage computed on the basis of 40 acres for each smallest subdivision, but shall not be less than $20.

§ 3532.3–2 Contents of applications.

Each application shall be typewritten, or printed plainly in ink; manually signed in ink and dated by the applicant or applicant's duly authorized attorney-in-fact, and shall contain the following:

(a) The name and address of the applicant;

(b) A statement of the applicant's qualifications and holdings. (See Subpart 3502); and

(c) A complete and accurate land description in compliance with Subpart 3501 of this title. The application shall not include more than 2,560 acres in a reasonably compact form.

§ 3532.3–3 Exploration plans.

After initial review and clearance of the application, but prior to issuance of the prospecting permit, the authorized officer shall require the applicant to file an exploration plan in triplicate, reasonably designed to determine the existence or workability of the deposit. The exploration plan shall, insofar as possible, include the following:

(a) The names, addresses and telephone numbers of persons responsible for operations under the plan and to whom notices and orders are to be delivered;

(b) A brief description, including maps, of geologic, water, vegetation, and other physical factors, and the distribution, abundance and habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed operation within the area where exploration is to be conducted, and the present land use within and adjacent to the area;

(c) A narrative description showing:

(1) The method of exploration and types of equipment to be used;

(2) The measures to be taken to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat and other natural resources, and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations;

(3) The method for plugging drill holes; and

(4) The measures to be taken for surface reclamation, which shall include as appropriate:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs or other vegetation to be planted; and

(v) The method of planting, including approximate quantity and spacing;

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features, and the proposed location of drill holes, trenches and roads; and

VOL 51 ISS 77 AP 22 1986 UMI

(f) Such other data as may be required by the authorized officer.

§ 3532.3-4 Rejection of application.

Any application for a prospecting permit that does not comply with the requirements of this subpart shall be rejected. If the applicant files a new application for the same lands within 30 days from receipt of the rejection, the nonrefundable filing fee and rental payment submitted with the original application shall be applied to the new application, provided the serial number of the original application is shown on the new application. If a new application is not filed within the 30-day period, the advance rental shall be refunded. Priority for the permit shall be established as of the date the corrected application is filed.

§ 3532.4 Determination of priorities.

§ 3532.4-1 Regular filings.

Priority of application shall be determined in accordance with the time of filing.

§ 3532.4-2 Simultaneous filings.

Where more than 1 application is filed at the same time for the same lands, priority shall be determined in accordance with Subpart 1821 of this title.

§ 3532.5 Amendment to application.

An amendment to an application for a prospecting permit to include additional lands shall receive priority for such additional lands from the date of the filing of the amended application. The amended application shall be accompanied by the required advance rental. No additional filing fees are required.

§ 3532.6 Withdrawal of application.

An application for permit may be withdrawn in whole or in part before the permit is signed on behalf of the United States. Upon acceptance of the withdrawal by the authorized officer, the advance rental submitted with the application shall be refunded.

§ 3532.7 Permit bonds.

Prior to issuance of the permit, the applicant shall furnish a bond in an amount determined by the authorized officer, but not less than $1,000. (See Subpart 3504)

§ 3532.8 Terms and conditions of permit.

§ 3532.8-1 Duration of permit.

Prospecting permits are issued for a term of 2 years, and may be extended for an additional 2 year period. No exploration activities other than those approved as part of an existing exploration plan shall be conducted following expiration of the initial term unless and until the permit has been extended by the authorized officer.

§ 3532.8-2 Dating of permits.

The permit shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved.

§ 3532.8-3 Annual rental.

Rental at the rate of 50 cents per acre or fraction thereof shall be paid annually on or before the anniversary date of the permit. The rental payment shall not be less than $20.

§ 3532.8-4 Special stipulations.

To insure adequate protection of the lands and their resources, permits shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in §3500.9 of this title. (See also Part 3580)

§ 3532.9 Prospecting permit extensions.

§ 3532.9-1 Conditions for, and duration of, extensions.

A permit may be extended for a maximum of 2 years by the authorized officer provided that:

(a) The permittee has been unable, with reasonable diligence, to determine the existence or workability of valuable deposits covered by the permit and desires to continue the prospecting or exploration program. Reasonable diligence means that, in the opinion of the authorized officer, the permittee has drilled a sufficient number of core holes on the permit area or performed other comparable prospecting to explore the permit area within the time allowed; or

(b) The permittee's failure to perform diligent prospecting activities was due to conditions beyond his/her control.

§ 3532.9-2 Application for extension.

(a) Filing requirements.

(1) No specific application form is required.

(2) Application for extension shall be filed in the proper BLM office at least 90 days prior to expiration of the permit.

(3) Applications for extension shall be accompanied by a nonrefundable filing fee of $25, and advance rental of 50 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(b) The application for extension shall, if applicable:

(1) Demonstrate that the permittee has met the conditions for extension set forth in § 3532.9-1 of this title;

(2) Demonstrate the permittee's diligent prospecting activities; and

(3) Show how much additional time is necessary to complete prospecting work.

§ 3532.9-3 Effective date.

The permit extension shall become effective as of the date of approval.

Subpart 3533—Preference Right Lease

§ 3533.1 Application for preference right lease.

§ 3533.1-1 Filing requirements.

(a) No specific application form is required.

(b) An application shall be filed in triplicate with the proper BLM office no later than 60 days after the prospecting permit expires.

(c) The application shall be accompanied by the first year's rental at the rate of 25 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. (See Subpart 3503)

§ 3533.1-2 Contents of application.

(a) The application shall include a statement of qualifications and holdings in accordance with Subpart 3502 of this title.

(b) The application shall contain a complete and accurate description of the lands in accordance with § 3501.1 of this title. The lands shall have been included in the prospecting permit and shall not exceed 2,560 acres.

(c) The application shall be accompanied by a map(s) which shows utility systems; the location of any proposed development or mining operations and facilities incidental thereto, including the approximate locations and the extent of the areas to be used for pits, overburden and tailings; and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(d) The application shall include a narrative statement setting forth:

(1) The anticipated scope, method and schedule of development operations, including the types of equipment to be used;

(2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed; and

(3) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

§ 3533.2 Review of application.

§ 3533.2-1 Preference right determination.

The authorized officer shall determine whether the permittee has discovered a valuable deposit of potassium or any potassium compound and whether the lands are chiefly valuable therefor. The determination shall be based on data furnished to the authorized officer by the permittee as required by Part 3590 of this title during the life of the permit and supplemental data submitted at the request of the authorized officer to determine the extent and character of the deposit, the anticipated mining and processing methods, the anticipated location, kind and extent of necessary surface disturbance and measures to be taken to reclaim that disturbance.

§ 3533.2-2 Surface management agency.

The surface management agency, if other than the Bureau, shall review the application for preference right lease in accordance with § 3500.9 and Part 3580 of this title, as applicable. The appropriate surface management agency may request supplemental data regarding surface disturbance and reclamation if not otherwise submitted under § 3533.1-2 of this title.

§ 3533.3 Issuance of lease.

The authorized officer shall issue a lease to the holder of a prospecting permit who shows that, within the term of the permit, a valuable deposit of potassium or any potassium compound was discovered and that the lands are chiefly valuable therefor.

§ 3533.4 Rejection of application.

(a) The authorized officer shall reject an application for a preference right lease if the authorized officer determines:

(1) That the applicant did not discover a valuable deposit of potassium and/or the lands are not chiefly valuable therefor;

(2) The applicant did not submit in a timely manner requested information; or

(3) The applicant did not otherwise comply with the requirements of this subpart.

(b) On alleging in an application facts the applicant believes to be sufficient to show entitlement to a lease, a permittee shall have the right to a hearing before an Administrative Law Judge in the Office of Hearings and Appeals.

(c) At the hearing, the permittee shall have both the burden of going forward and the burden of proof by a preponderance of the evidence that a valuable deposit of potassium or any potassium compound was discovered and that the lands are chiefly valuable therefor.

Subpart 3534—Exploration License

§ 3534.0-3 Authority.

Section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

§ 3534.1 Exploration license.

Private parties, jointly or severally, may apply for exploration licenses to explore known, unleased deposits of potassium or any potassium compound to obtain geologic, environmental and other pertinent data concerning such deposits.

§ 3534.2 Regulations applicable.

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under Part 2920 of this title shall govern the issuance of exploration licenses.

§ 3534.3 Exploration plan.

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3532.3-3 of this title. The exploration plan, as approved, shall be attached to, and made a part of, the license.

§ 3534.4 Notice of exploration.

Applicants for exploration licenses shall be required to publish a Notice of Exploration inviting other parties to participate in exploration under the license on a pro rata cost sharing basis.

§ 3534.4-1 Contents of notice.

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

(a) The name and address of the applicant;

(b) A description of the lands;

(c) The address of the Bureau office where the exploration plan shall be available for inspection; and

(d) An invitation to the public to participate in the exploration under the license.

§ 3534.4-2 Publication and posting of notice.

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation in the area where the lands are located.

(b) The authorized officer shall post the notice in the proper BLM office for 30 days.

§ 3534.4-3 Notice of participation.

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting of the Notice of Exploration.

§ 3534.4-4 Decision on plan and participation.

The authorized officer may issue the license naming participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between proposed exploration plans.

§ 3534.5 Submission of data.

The licensee shall furnish the authorized officer copies of all data obtained during exploration. All data shall be considered confidential and not made public until the areas involved have been leased or until the authorized officer determines that the data are not exempt from disclosure under the Freedom of Information Act, whichever occurs first.

§ 3534.6 Modification of exploration plan.

Upon application therefor, a modification of the exploration plan may be approved by the authorized officer.

Subpart 3535—Competitive Leasing

§ 3535.1 Lands subject only to competitive leasing.

(a) Lands available for leasing where prospecting or exploratory work is unnecessary to determine the existence or workability of a valuable deposit of potassium or any potassium compound may be leased only through competitive sale to the qualified bidder who offers the highest acceptable bonus bid, except as provided in Parts 3508 and 3536 of this title. A competitive lease sale may be initiated either through an expression of interest or on Bureau motion.

(b) Leases may be offered for lands in or adjacent to Searles Lake, California, without regard to the quantity or quality of the potassium deposit that may be present therein.

§ 3535.2 Surface management agency.

Prior to competitive lease offering, the surface management agency shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

§ 3535.3 Sale procedures.

§ 3535.3-1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease

VOL 51 ISS 77 AP 22 1986 UMI

sale also shall be posted for 30 days in the public room of the proper BLM office.

§ 3536.3-2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the deposit of potassium or any potassium compound being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

§ 3536.3-3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The lease form approved by the Director with terms and conditions, including the rental, royalty rates, bond amount and special stipulations;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's qualifications (See Subpart 3508) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay their proportionate share of the total cost of the publication of the sale notice;

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder if the successful bidder fails to obtain the lease for any reason; and

(g) Any other information deemed appropriate.

§ 3536.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3536.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value, copies of the lease on the form attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3536.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3536—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3536.1 Lands subject to lease.

Lands available for leasing which are known to contain a deposit of potassium or any potassium compound that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3536.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for the fringe acreage is not in excess of 2,560 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 2,560 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(d) The lands applied for lack sufficient reserves of the mineral resource to warrant independent development; and

(e) That leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3536.3 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM office. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25, and an advance rental payment of 25 cents per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management.

(c) The application shall:

(1) Make reference to the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Include a showing that a deposit of potassium or any potassium compound extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3536.4 Surface management agency.

The surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

§ 3536.5 Payment of bonus.

Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event shall such payment be less than $1 per acre or fraction thereof.

§ 3536.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under Subpart 3531 of this title. The terms and conditions of a modified lease shall be the same as in the existing lease.

PART 3540—SULPHUR

Subpart 3540—Sulphur Leasing—General

Sec.
3542.2 Rights conferred by issuance of prospecting permits.
3542.3 Application for prospecting permit.
3542.3-1 Filing requirements.
3542.3-2 Contents of applications.
3542.3-3 Exploration plans.
3542.3-4 Rejection of application.
3542.4 Determination of priorities.
3542.4-1 Regular filings.
3542.4-2 Simultaneous filings.
3542.5 Amendment to application.
3542.6 Withdrawal of application.
3542.7 Permit bonds.
3542.8 Terms and conditions of permit.
3542.8-1 Duration of permit.
3542.8-2 Dating of permits.
3542.8-3 Annual rental.
3542.8-4 Special stipulations.

Subpart 3543—Preference Right Lease

3543.1 Application for preference right lease.
3543.1-1 Filing requirements.
3543.1-2 Contents of application.
3543.2 Review of application.
3543.2-1 Preference right determination.
3543.2-2 Surface management agency.
3543.3 Issuance of lease.
3543.4 Rejection of application.

Subpart 3544—Exploration License

3544.0-3 Authority.
3544.1 Exploration license.
3544.2 Regulations applicable.
3544.3 Exploration plan.
3544.4 Notice of exploration.
3544.4-1 Contents of notice.
3544.4-2 Publication and posting of notice.
3544.4-3 Notice of participation.
3544.4-4 Decision on plan and participation.
3544.5 Submission of data.
3544.6 Modification of exploration plan.

Subpart 3545—Competitive Leasing

3545.1 Lands subject only to competitive leasing.
3545.2 Surface management agency.
3545.3 Sale procedures.
3545.3-1 Publication and posting of notice.
3545.3-2 Contents of notice.
3545.3-3 Detailed statement.
3545.4 Bid opening.
3545.5 Award of lease.
3545.6 Rejection of bid.

Subpart 3546—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3546.1 Lands subject to lease.
3546.2 Special requirements.
3546.3 Filing requirements.
3546.4 Surface management agency.
3546.5 Payment of bonus.
3546.6 Terms and conditions of lease.

Subpart 3547—Lease Renewals

3547.1 Applications.
3547.2 Bonds.
3547.3 Failure to apply for renewal.
3547.4 Lease terms and conditions.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); the Act of March 3, 1909, as amended (47 Stat. 1487); section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 6, 1964 (16 U.S.C. 460n et seq.); the Act of November 8, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.); the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C.C 460mm–2–460mm–4); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3540—Sulphur Leasing—General

§ 3540.0-3 Authority.

Authority for leasing deposits of sulphur is shown under § 3500.0–3 (a) and (c) of this title.

§ 3540.1 Leasing procedures.

The regulations in this part provide the procedures for qualified applicants to obtain rights to develop deposits of sulphur found on public domain lands in New Mexico and Louisiana and on all acquired lands which are available for leasing. The regulations provide for this in the following manner:

(a) "Prospecting permits" allow the permittee to explore for deposits of sulphur.

(b) "Preference right leases" are issued to holders of prospecting permits who demonstrate the discovery of a valuable deposit of sulphur under the permit and demonstrate that the lands covered by the permit are chiefly valuable for sulphur.

(c) "Exploration licenses" allow the licensee to explore known deposits of sulphur to obtain data but do not grant the licensee any preference or other right to a lease.

(d) "Competitive leases" are issued for known deposits of sulphur and allow the lessee to mine the deposit.

(e) "Fringe acreage leases" are issued noncompetitively for known deposits of sulphur adjacent to existing mines on non-Federal lands which can only be mined as part of the existing mining operation.

(f) "Lease modifications" are used to add known deposits of sulphur to an adjacent Federal lease which contains an existing mine provided the deposits can only be mined as part of the existing mining operation.

§ 3540.2 Other applicable regulations.

§ 3540.2-1 General leasing regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The regulations in Part 3500 of this title include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation, and lands not available for leasing. Cross-reference to specific regulations in Part 3500 of this title is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 of this title only to the cross-referenced regulations.

§ 3540.2-2 Special areas.

Part 3580 of this title contains regulations specific to certain national recreation areas and to certain lands patented to the State of California, and as applicable, supplements this part. Except where specific regulations in Part 3580 of this title are applicable, the regulations in this part and Part 3500 of this title shall govern the leasing of sulphur in those national recreation areas and those patented lands.

§ 3540.3 Allowable acreage holdings.

No person, company, association or corporation may hold at any particular time, more than 1,920 acres in the aggregate in 3 prospecting permits and leases in any 1 State.

Subpart 3541—Lease Terms and Conditions

§ 3541.1 Applicability of lease terms and conditions.

The lease terms and conditions set out under this section apply to all leases issued or renewed under Part 3540 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize, in accordance with its terms and conditions, the mining of sulphur.

§ 3541.2 Rental and royalty.

§ 3541.2-1 Rental.

(A) Each lease shall provide for the payment of rental annually and in advance during the continuance of the lease at the rate of 50 cents per acre or fraction thereof. The rental for any year shall be credited against the first royalties as they accrue under the lease during the year for which rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease. (See § 3509.4–2)

(c) Rental remittances shall be made in accordance with § 3503.1 of this title.

VOL 51 ISS 77 APR 22 1986 UMI

§ 3541.2-2 Production royalty.

All leases shall be conditioned upon the payment to the United States of a royalty of 5 percent of the quantity or gross value of the output of sulphur at the point of shipment to market.

§ 3541.3 Duration of lease.

The lease shall be issued for an initial term of 20 years subject to a preferential right in the lessee to renew for a 10-year term at the end of the initial term and at the end of each 10-year period thereafter. (See Subpart 3547)

§ 3541.4 Bonds.

Prior to issuance of a lease, the applicant shall be required to furnish a bond in an amount to be determined by the authorized officer but not less than $5,000. (See Subpart 3504)

§ 3541.5 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title. (See also Part 3580)

§ 3541.6 Other applicable regulations.

Leases issued under this part shall also be subject to the conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by § 3503.2-2 of this title.

(b) Suspension of operations and production and suspension of operations are covered by § 3503.3 of this title.

(c) Assignments and subleases are covered by Subpart 3506 of this title.

(d) Cancellation and relinquishment are covered by Subpart 3509 of this title.

(e) Exploration and mining are covered by Part 3580 of this title.

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3542—Sulphur Prospecting Permits

§ 3542.1 Areas subject to prospecting.

A prospecting permit may be issued for any area of available public domain lands in Louisiana and New Mexico and any acquired lands subject to leasing where prospecting or exploratory work is necessary to determine the existence or workability of sulphur deposits. If, within the term of the permit, the permittee makes a discovery of a valuable deposit of sulphur and the lands are determined to be chiefly valuable therefor, the permittee is entitled to a preference right lease.

§ 3542.2 Rights conferred by issuance of prospecting permits.

A permit shall grant the permittee the exclusive right to prospect on and explore the lands to determine the existence of a valuable deposit of sulphur in accordance with the terms and conditions of the permit. The permittee may remove only such material as is necessary to demonstrate the existence of a valuable mineral deposit.

§ 3542.3 Application for prospecting permit.

§ 3542.3-1 Filing requirements.

(a) An application shall be filed on a form approved by the Director or an exact reproduction of such form.

(b) An application shall be filed in triplicate with the proper BLM office.

(c) The application shall be accompanied by a nonrefundable filing fee of $25, and rental for the first year at the rate of 50 cents per acre, or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall be for the total acreage if known, and if not known, for the total acreage computed on the basis of 40 acres for each smallest subdivision. The rental payment shall not be less than $20.

§ 3542.3-2 Contents of applications.

Each application shall be typewritten, or printed plainly in ink; manually signed in ink and dated by the applicant or applicant's duly authorized attorney-in-fact, and shall contain the following:

(a) The name and address of the applicant;

(b) A statement of the applicant's qualifications and holdings. (See Subpart 3502); and

(c) A complete and accurate land description in compliance with subpart 3501 of this title. The application shall not include more than 640 acres in a reasonably compact form.

§ 3542.3-3 Exploration plans.

After initial review and clearance of the application, but prior to approval of the prospecting permit, the authorized officer shall require the applicant to file an exploration plan in triplicate, reasonably designed to determine the existence or workability of the deposit. The exploration plan shall, insofar as possible, include the following:

(a) The names, addresses and telephone numbers of persons responsible for operations under the plan and to whom notices and orders are to be delivered;

(b) A brief description, including maps, of geologic, water, vegetation, and other physical factors, and the distribution, abundance and habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed operation within the area where exploration is to be conducted, and the present land use within and adjacent to the area;

(c) A narrative description showing:

(1) The method of exploration and types of equipment to be used;

(2) The measures to be taken to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat and other natural resources, and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations;

(3) The method for plugging drill holes; and,

(4) The measures to be taken for surface reclamation, which shall include as appropriate:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs or other vegetation to be planted; and

(v) The method of planting, including approximate quantity and spacing;

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features, and the proposed location of drill holes, trenches and roads; and

(f) Such other data as may be required by the authorized officer.

§ 3542.3-4 Rejection of application.

Any application for a prospecting permit that does not comply with the requirements of this subpart shall be rejected. If the applicant files a new application for the same lands within 30 days of receipt of the rejection, the nonrefundable filing fee and rental payment submitted with the original application shall be applied to the new application, provided the serial number of the original application is shown on the new application. If a new application is not filed within the 30-day period, the advance rental shall be refunded. Priority for the permit shall be established as of the date the corrected application is filed.

§ 3542.4 Determination of priorities.

§ 3542.4-1 Regular filings.

Priority of application shall be determined in accordance with the time of filing.

§ 3542.4-2 Simultaneous filings.

Where more than 1 application is filed at the same time for the same lands priority shall be determined in accordance with Subpart 1821 of this title.

§ 3542.5 Amendment to application.

An amendment to an application for a prospecting permit to include additional lands, not to exceed 640 acres in total, will receive priority for such additional lands from the date of the filing of the amended application. The amended application shall be accompanied by the required advance rental. No additional filing fees are required.

§ 3542.6 Withdrawal of application.

An application for permit may be withdrawn in whole or in part before the permit is signed on behalf of the United States. Upon acceptance of the withdrawal, the advance rental submitted with the application shall be refunded.

§ 3542.7 Permit bonds.

Prior to issuance of the permit, the applicant shall furnish a bond in an amount determined by the authorized officer, but not less than $1,000. (See Subpart 3504)

§ 3542.8 Terms and conditions of permit.

§ 3542.8-1 Duration of permit.

Prospecting permits are issued for a term of 2 years, and may not be extended.

§ 3542.8-2 Dating of permits.

The permit shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved.

§ 3542.8-3 Annual rental.

Rental at the rate of 50 cents per acre or fraction thereof shall be paid annually on or before the anniversary date of the permit. The rental payment shall not be less than $20.

§ 3542.8-4 Special stipulations.

To insure adequate protection of the lands and their resources, permits shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title. (See Part 3580)

Subpart 3543—Preference Right Lease

§ 3543.1 Application for preference right lease.

§ 3543.1-1 Filing requirements.

(a) No specific application form is required.

(b) An application shall be filed in triplicate with the proper BLM office no later than 60 days after the prospecting permit expires.

(c) The application shall be accompanied by the first years' rental at the rate of 50 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. (See Subpart 3503)

§ 3543.1-2 Contents of application.

(a) The application shall include a statement of qualifications and holdings in accordance with Subpart 3502 of this title.

(b) The application shall contain a complete and accurate description of the lands in accordance with § 3501.1 of this title. The lands shall have been included in the prospecting permit and shall not exceed 640 acres.

(c) The application shall be accompanied by a map(s) which shows utility systems; the location of any proposed development or mining operations and facilities incidental thereto, including the approximate locations and the extent of the areas to be used for pits, overburden and tailings; and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(d) The application shall include a narrative statement setting forth:

(1) The anticipated scope, method and schedule of development operations, including the types of equipment to be used;

(2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed; and

(3) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

§ 3543.2 Review of application.

§ 3543.2-1 Preference right determination.

The authorized officer shall determine whether the permittee has discovered a valuable deposit of sulphur and whether the lands are chiefly valuable therefor. The determination shall be based on data furnished to the authorized officer by the permittee as required by Part 3590 of this title during the life of the permit and supplemental data submitted at the request of the authorized officer to determine the extent and character of the deposit, the anticipated mining and processing methods, the anticipated location, kind and extent of necessary surface disturbance and measures to be taken to reclaim that disturbance.

§ 3543.2-2 Surface management agency.

The surface management agency, if other than the Bureau, shall review the application for preference right lease in accordance with § 3500.9 and Part 3560 of this title, as applicable. The appropriate surface management agency may request supplemental data regarding surface disturbance and reclamation if not otherwise submitted under § 3543.1-2 of this title.

§ 3543.3 Issuance of lease.

The authorized officer shall issue a lease to the holder of a prospecting permit who shows that, within the term of the permit, a valuable deposit of sulphur was discovered and that the lands are chiefly valuable therefor.

§ 3543.4 Rejection of application.

(a) The authorized officer shall reject an application for a preference right lease if the authorized officer determines:

(1) That the applicant did not discover a valuable deposit of sulphur and/or the lands are not chiefly valuable therefor;

(2) The applicant did not submit in a timely manner requested information; or

(3) The applicant did not otherwise comply with the requirements of this subpart.

(b) On alleging in an application facts the applicant believes to be sufficient to show entitlement to a lease, a permittee shall have the right to a hearing before an Administrative Law Judge in the Office of Hearings and Appeals.

(c) At the hearing, the permittee shall have both the burden of going forward and the burden of proof by a preponderance of the evidence that a valuable deposit of sulphur was discovered and that the lands are chiefly valuable therefor.

Subpart 3544—Exploration License

§ 3544.0-3 Authority.

Section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

§ 3544.1 Exploration license.

Private parties, jointly and severally, may apply for exploration licenses to

VOL 51 ISS 77 APR 22 1986 UMI

explore known, unleased sulphur deposits to obtain geologic, environmental, and other pertinent data concerning such deposits.

§ 3544.2 Regulations applicable.

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under Part 2920 of this title shall govern the issuance of exploration licenses.

§ 3544.3 Exploration plan.

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3542.3–3 of this title. The exploration plan, as approved, shall be attached to, and made a part of, the license.

§ 3544.4 Notice of exploration.

Applicants for exploration licenses shall be required to publish a Notice of Exploration inviting other parties to participate in exploration under the license on a pro rata cost sharing basis.

§ 3544.4–1 Contents of notice.

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

(a) The name and address of the applicant;

(b) A description of the lands;

(c) The address of the Bureau office where the exploration plan shall be available for inspection; and

(d) An invitation to the public to participate in the exploration under the license.

§ 3544.4–2 Publication and posting of notice.

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation in the area where the lands are located.

(b) The authorized officer shall post the notice in the proper BLM office for 30 days.

§ 3544.4–3 Notice of participation.

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting.

§ 3544.4–4 Decision on plan and participation.

The authorized officer may issue the license naming the participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between exploration plans.

§ 3544.5 Submission of data.

The licensee shall furnish the authorized officer copies of all data obtained during exploration. All data shall be considered confidential and not made public until the areas involved have been leased or until the authorized officer determines that the data are not exempt from disclosure under the Freedom of Information Act, whichever occurs first.

§ 3544.6 Modification of exploration plan.

Upon application therefor, a modification of the exploration plan may be approved by the authorized officer.

Subpart 3545—Competitive Leasing

§ 3545.1 Lands subject only to competitive leasing.

Lands available for leasing where prospecting or exploratory work is unnecessary to determine the existence or workability of a valuable sulphur deposit may be leased only through competitive sale to the qualified bidder who offers the highest acceptable bonus bid, except as provided in Subparts 3508 and 3546 of this title. A competitive lease sale may be initiated either through an expression of interest or on Bureau motion.

§ 3545.2 Surface management agency.

Prior to competitive lease offering, the surface management agency shall be consulted in accordance with § 3500.9 and Part 3560 of this title, as applicable.

§ 3545.3 Sale procedures.

§ 3545.3–1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease sale shall be posted for 30 days in the public room of the proper BLM office.

§ 3545.3–2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the sulphur deposit being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

§ 3545.3–3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The lease form approved by the Director with terms and conditions, including the rental, royalty rates, bond amount and special stipulations;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's qualifications (See Subpart 3502) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay their proportionate share of the total cost of the publication of the sale notice.

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder if the successful bidder fails to obtain the lease for any reason; and

(g) Any other information deemed appropriate.

§ 3545.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3545.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value, copies of the lease on the form attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3545.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3546—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3546.1 Lands subject to lease.

Lands available for leasing which are known to contain a sulphur deposit that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3546.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for the fringe acreage is not in excess of 640 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 640 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(d) The lands applied for lack sufficient reserves of the mineral resources to warrant independent development; and

(e) That leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3546.3 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM office. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25, and an advance rental payment of 50 cents per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management.

(c) The application shall:

(1) Make reference to the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Include a showing that a sulphur deposit extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3546.4 Surface management agency.

The surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 and Part 3560 of this title, as applicable.

§ 3546.5 Payment of bonus.

(a) Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event shall such payment be less than $1 per acre or fraction thereof.

§ 3546.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under Subpart 3541 of this title. The terms and conditions of a modified lease shall be the same as in the existing lease.

Subpart 3547—Lease Renewals

§ 3547.1 Applications.

An application for lease renewal shall be filed at least 90 days prior to the expiration of the lease term. No specific form is required. All applications shall be filed in triplicate in the proper BLM office together with a nonrefundable $25 filing fee and an advance rental payment of 50 cents per acre or fraction thereof.

§ 3547.2 Bonds.

Prior to the issuance of a renewal lease, the lessee may be required to furnish a new bond as prescribed by Subpart 3504 of this title.

§ 3547.3 Failure to apply for renewal.

If the holder of a lease fails to apply for renewal as provided in § 3547.1 of this title, the lease shall expire on the last day of the current lease term.

§ 3547.4 Lease terms and conditions.

Each renewal lease shall be issued on a form approved by the Director and shall be dated effective the first day of the month following its approval by the authorized officer or the first day of the month following the expiration of the current lease, whichever is later, and shall otherwise be subject to the terms and conditions set forth under Subpart 3541 of this title.

PART 3550—"GILSONITE" (INCLUDING ALL VEIN-TYPE SOLID HYDROCARBONS)

Subpart 3550—"Gilsonite" Leasing—General

Sec.

3550.0–3 Authority.
3550.1 Leasing procedures.
3550.2 Other applicable regulations.
3550.2–1 General leasing regulations.
3550.2–2 Special areas.
3550.3 Allowable acreage holdings.

Subpart 3551—Lease Terms and Conditions

3551.1 Applicability of lease terms and conditions.
3551.2 Rental and royalty.
3551.2–1 Rental.
3551.2–2 Production royalty.
3551.3 Duration of lease.
3551.4 Readjustment.
3551.5 Bonds.
3551.6 Special stipulations.
3551.7 Other applicable regulations.

Subpart 3552—"Gilsonite" Prospecting Permits

3552.1 Areas subject to prospecting.
3552.2 Rights conferred by issuance of prospecting permits.
3552.3 Application for prospecting permit.
3552.3–1 Filing requirements.
3552.3–2 Contents of application.
3552.3–3 Exploration plans.
3552.3–4 Rejection of application.
3552.4 Determination of priorities.
3552.4–1 Regular filings.
3552.4–2 Simultaneous filings.
3552.5 Amendment to application.
3552.6 Withdrawal of application.
3552.7 Permit bonds.
3552.8 Terms and conditions of permit.
3552.8–1 Duration of permit.
3552.8–2 Dating of permits.
3552.8–3 Annual rental.
3552.8–4 Special stipulations.
3552.9 Prospecting permit extensions.
3552.9–1 Conditions for, and duration of, extensions.
3552.9–2 Application for extension.
3552.9–3 Effective date.

Subpart 3553—Preference Right Lease

3553.1 Application for preference right lease.
3553.1–1 Filing requirements.
3553.1–2 Contents of application.
3553.2 Review of application.
3553.2–1 Preference right determination.
3553.2–2 Surface management agency.
3553.3 Issuance of lease.
3553.4 Rejection of application.

Subpart 3554—Exploration License

3554.0–3 Authority.
3554.1 Exploration license.
3554.2 Regulations applicable.
3554.3 Exploration plan.
3554.4 Notice of exploration.
3554.4–1 Contents of notice.
3554.4–2 Publication and posting of notice.
3554.4–3 Notice of participation.
3554.4–4 Decision on plan and participation.
3554.5 Submission of data.
3554.6 Modification of exploration plan.

Subpart 3555—Competitive Leasing

3555.1 Lands subject only to competitive leasing.
3555.2 Surface management agency.
3555.3 Sale procedures.
3555.3–1 Publication and posting of notice.
3555.3–2 Contents of notice.
3555.3–3 Detailed statement.

VOL 51 ISS 77 AP 22 1986 UMI

Sec.
3555.4 Bid opening.
3555.5 Award of lease.
3555.6 Rejection of bid.

Subpart 3556—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3556.1 Lands subject to lease.
3556.2 Special requirements.
3556.3 Filing requirements.
3556.4 Surface management agency.
3556.5 Payment of bonus.
3556.6 Terms and conditions of lease.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3550—"Gilsonite" Leasing—General

§ 3550.0–3 Authority.

(a) Authority for leasing "Gilsonite" (including all vein-type solid hydrocarbons) is shown under § 3500.0–3(a) of this title.

(b) In 1981, Congress amended the Act by including tar sand within the meaning of oil and retaining separate leasing authority for vein-type solid hydrocarbons such as "Gilsonite". Fluid and gaseous hydrocarbons are leased as oil and gas, while bedded deposits are leased either as coal, oil shale or as oil (tar sand). The leasing authority for vein-type solid hydrocarbons, hereinafter referred to as "Gilsonite", is implemented by the regulations in this part.

§ 3550.1 Leasing procedures.

The regulations in this part provide the procedures for qualified applicants to obtain rights to develop deposits of "Gilsonite", found on lands available for leasing. The regulations provide for this in the following manner:

(a) "Prospecting permits" allow the permittee to explore for deposits of "Gilsonite".

(b) "Preference right leases" are issued to holders of prospecting permits who demonstrate the discovery of a valuable deposit of "Gilsonite" under the permit.

(c) "Exploration licenses" allow the licensee to explore known deposits of "Gilsonite" to obtain data but do not grant the licensee any preference or other right to a lease.

(d) "Competitive leases" are issued for known deposits of "Gilsonite" and allow the lessee to mine the deposit.

(e) "Fringe acreage leases" are issued noncompetitively for known deposits of "Gilsonite" adjacent to existing mines on non-Federal lands which can only be mined as part of the existing mining operation.

(f) "Lease modifications" are used to add known deposits of "Gilsonite" to an adjacent Federal lease which contains an existing mine provided the deposits can only be mined as part of the existing mining operation.

§ 3550.2 Other applicable regulations.

§ 3550.2–1 General leasing regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The regulations in Part 3500 of this title include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation, and lands not available for leasing. Cross-reference to specific regulations in Part 3500 of this title is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 of this title only to the cross-referenced regulations.

§ 3550.2–2 Special areas.

Part 3580 of this title contains regulations specific to certain national recreation areas and to certain lands patented to the State of California, and, as applicable, supplements this part. Except where specific regulations in Part 3580 of this title are applicable, the regulations in this part and Part 3500 of this title shall govern the leasing of "Gilsonite" in those national recreation areas and those patented lands.

§ 3550.3 Allowable acreage holdings.

No person, company, association or corporation may hold at any particular time, directly or indirectly, more than 7,680 acres under prospecting permit and lease in any one state.

Subpart 3551—Lease Terms and Conditions

§ 3551.1 Applicability of lease terms and conditions.

The lease terms and conditions set out under this section apply to all leases issued or readjusted under Part 3550 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize in accordance with its terms and conditions the mining of "Gilsonite".

§ 3551.2 Rental and royalty.

§ 3551.2–1 Rental.

(a) Each lease shall provide for the payment of rental annually and in advance at the rate of 50 cents per acre or fraction thereof. The annual rental payment shall not be less than $20. The rental paid for any year shall be credited against the first royalties as they accrue under the lease during the year for which rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease (See § 3509.4–2).

(c) Remittances of rental shall be made in accordance with § 3503.1 of this title.

§ 3551.2–2 Production royalty.

All leases shall be conditioned upon the payment to the United States of such royalties as may be specified in the lease, which shall be fixed by the authorized officer in advance as provided under § 3503.2–1 of this title.

§ 3551.3 Duration of lease.

The lease shall be issued for 20 years and for so long thereafter as "Gilsonite" is produced in paying quantities subject to the Secretary's right of reasonable readjustment of lease terms and conditions at the end of each 20-year period.

§ 3551.4 Readjustment.

(a) The terms and conditions of a lease are subject to reasonable readjustment at the end of each 20-year period following the effective date of the lease unless otherwise provided by law at the time of expiration of such period. Prior to the expiration of each 20-year period, the authorized officer shall transmit proposed readjusted terms and conditions to the lessee. If the authorized officer fails to transmit the proposed readjusted terms and conditions prior to the expiration of the 20-year period, the right to readjust the lease shall have been waived until the expiration of the next 20-year term.

(b) The lessee is deemed to have agreed to the readjusted terms and conditions unless, within 60 days after receiving them, the lessee files an objection to the readjusted terms or relinquishes the lease. The authorized officer shall issue a decision responding to the objections, and if the response is adverse to the lessee, the decision shall grant the right of appeal under Part 4 of this title. The effective date of the readjustment shall not be affected by the filing of objections or by the filing of a notice of appeal.

(c) Except as provided in this paragraph, the readjusted lease terms and conditions shall be effective pending a response to the objections or the outcome of the appeal provided for in paragraph (b) of this section unless the authorized officer provides otherwise. Upon the filing of an objection or appeal, the obligation to pay any increased readjusted royalties, minimum royalties and rentals shall be suspended pending the outcome of the objection or appeal. However, any such increased royalties, minimum royalties and rentals shall accrue during the pendency of the objection or appeal, commencing with the effective date of the readjustment. If the increased royalties, minimum royalties and rentals are sustained by the decision on the objection or on appeal, the accrued balance, plus interest at the rate specified for late payment by the Service shall be payable (See Part 3590). Pending the decision on the objection or the appeal, the royalties, minimum royalties and rentals shall be payable as specified by the lease terms and conditions in effect prior to the end of the 20-year period.

§ 3551.5 Bonds.

Prior to issuance of a lease, the applicant shall furnish a bond in an amount to be determined by the authorized officer, but not less than $5,000 (See Subpart 3504).

§ 3551.6 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title (See also Part 3580).

§ 3551.7 Other applicable regulations.

Leases issued under this part shall also be subject to conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by § 3503.2–2 of this title;

(b) Suspension of operations and production and suspension of operations are covered by § 3503.3 of this title;

(c) Assignments and subleases are covered by Subpart 3506 of this title;

(d) Cancellation and relinquishment are covered by Subpart 3509 of this title;

(e) Exploration and mining are covered by Part 3590 of this title; and

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3552—"Gilsonite" Prospecting Permits

§ 3552.1 Areas subject to prospecting.

A prospecting permit may be issued for any area of available public domain or acquired lands subject to leasing where prospecting or exploratory work is necessary to determine the existence or workability of "Gilsonite". Discovery of a valuable deposit of "Gilsonite" within the terms of the permit entitles the permittee to a preference right lease.

§ 3552.2 Rights conferred by issuance of prospecting permits.

A permit shall grant the permittee the exclusive right to prospect on and explore the lands to determine the existence of a valuable deposit of "Gilsonite" in accordance with the terms and conditions of the permit. The permittee may remove only such material as is necessary to demonstrate the existence of a valuable mineral deposit.

§ 3552.3 Application for prospecting permit.

§ 3552.3–1 Filing requirements.

(a) An application shall be filed on a form approved by the Director or an exact reproduction of such form.

(b) An application shall be filed in triplicate with the proper BLM office.

(c) The application shall be accompanied by a nonrefundable filing fee of $25, and rental for the first year at the rate of 50 cents per acre, or fraction thereof made payable to the Department of the Interior-Bureau of Land Management. The rental payment shall be for the total acreage if known, and if not known, for the total acreage computed on the basis of 40 acres for each smallest subdivision. The rental payment shall not be less than $20.

§ 3552.3–2 Contents of applications.

Each application shall be type-written, or printed plainly in ink; manually signed in ink and dated by the applicant or applicant's duly authorized attorney-in-fact, and shall contain the following:

(a) The name and address of the applicant;

(b) A statement of the applicant's qualifications and holdings (See subpart 3502); and

(c) A complete and accurate land description in compliance with subpart 3501 of this title. The application shall not include more than 5120 acres in a reasonably compact form.

§ 3552.3–3 Exploration plans.

After initial review and clearance of the application, but prior to issuance of the prospecting permit, the authorized officer shall require the applicant to file in triplicate, an exploration plan reasonably designed to determine the existence or workability of the deposit. The exploration plan shall, insofar as possible, include the following:

(a) The names, addresses and telephone numbers of persons responsible for operations under the plan and to whom notices and orders are to be delivered:

(b) A brief description, including maps, of geologic, water, vegetation and other physical factors, and the distribution, abundance and habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed operation within the area where exploration is to be conducted, and the present land use within and adjacent to the area:

(c) A narrative description showing:

(1) The method of exploration and types of equipment to be used:

(2) The measures to be taken to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat and other natural resources and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations:

(3) The method for plugging drill holes; and

(4) The measures to be taken for surface reclamation, which shall include as appropriate:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs or other vegetation to be planted; and

(v) The method of planting, including approximate quantity and spacing.

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features, and the proposed location of drill holes, trenches and roads; and

(f) Such other data as may be required by the authorized officer.

§ 3552.3–4 Rejection of application.

Any application for a prospecting permit which does not comply with the

VOL 51 ISS 77 AP 22 1986 UMI

requirements of this subpart shall be rejected. If the applicant files a new application for the same lands within 30 days of receipt of the rejection, the nonrefundable filing fee and rental payment submitted with the original application shall be applied to the new application, provided the serial number of the original application is shown on the new application. If a new application is not filed within the 30-day period, the advance rental shall be refunded. Priority for the permit shall be established as of the date the corrected application is filed.

§ 3552.4 Determination of priorities.

§ 3552.4–1 Regular filings.

Priority of application shall be determined in accordance with the time of filing.

§ 3552.4–2 Simultaneous filings.

Where more than 1 application is filed at the same time for the same lands, priority shall be determined in accordance with Subpart 1821 of this title.

§ 3552.5 Amendment to application.

An amendment to an application for a prospecting permit to include additional lands shall receive priority for such additional lands from the date of the filing of the amended application. The amended application shall be accompanied by the required advance rental. No additional filing fees are required.

§ 3552.6 Withdrawal of application.

An application for permit may be withdrawn in whole or in part before the permit is signed on behalf of the United States. Upon acceptance of the withdrawal, the advance rental submitted with the application shall be refunded.

§ 3552.7 Permit bonds.

Prior to issuance of the permit, the applicant shall furnish a bond in an amount determined by the authorized officer, but not less than $1,000 (See Subpart 3504).

§ 3552.8 Terms and conditions of permit.

§ 3552.8–1 Duration of permit.

Prospecting permits are issued for an initial terms of 2 years, and may be extended for a period not to exceed 2 years as provided in § 3552.9 of this title. No exploration activities other than those approved as part of an existing exploration plan shall be conducted following expiration of the initial term unless and until the permit has been extended by the authorized officer.

§ 3552.8–2 Dating of permits.

The permit shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved.

§ 3552.8–3 Annual rental.

Rental at the rate of 50 cents per acre or fraction thereof shall be paid annually on or before the anniversary date of the permit. The rental payment shall not be less than $20.

§ 3552.8–4 Special stipulations.

To insure adequate protection of the lands and their resources, permits shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3509.9 of this title (See also Part 3580).

§ 3552.9 Prospecting permit extensions.

§ 3552.9–1 Conditions for, and duration of, extensions.

A permit may be extended for a maximum of 2 years at the discretion of the authorized officer provided that:

(a) The permittee has been unable, with reasonable diligence, to determine the existence or workability of valuable deposits covered by the permit and desires to continue the prospecting or exploration program. Reasonable diligence means that, in the opinion of the authorized officer, the permittee has drilled a sufficient number of core holes on the permit area or performed other comparable prospecting to explore the permit area within the time allowed; or

(b) The permittee's failure to perform diligent prospecting activities was due to conditions beyond his/her control.

§ 3552.9–2 Application for extension.

(a) Filing requirements.

(1) No specific application form is required.

(2) Application for extension shall be filed in the proper BLM office at least 90 days prior to expiration of the permit.

(3) Application for extension shall be accompanied by a nonrefundable filing fee of $25, and advance rental of 50 cents per acre, or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(b) The application for extension shall:

(1) Demonstrate that the permittee has met the conditions for extension set out in § 3552.9–1 of this title;

(2) Demonstrate the permittee's diligent prospecting activities; and

(3) Show how much additional time is necessary to complete prospecting work.

§ 3552.9–3 Effective date.

The permit extension shall become effective as of the date of approval.

Subpart 3553—Preference Right Lease

§ 3553.1 Application for preference right lease.

§ 3553.1–1 Filing requirements.

(a) No specific application form is required.

(b) An application shall be filed in triplicate with the proper BLM office no later than 60 days after the prospecting permit expires.

(c) The application shall be accompanied by the first year's rental at the rate of 50 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20 (see Subpart 3503).

§ 3553.1–2 Contents of application.

(a) The application shall contain a statement of qualifications and holdings in compliance with Subpart 3502 of this title.

(b) The application shall contain a complete and accurate description of the lands in accordance with § 3501.1 of this title. The lands shall have been included in the prospecting permit and shall not exceed 5,120 acres.

(c) The application shall be accompanied by a map(s) which shows utility systems, the location of any proposed development or mining operations and facilities incidental thereto, including the approximate locations and the extent of the areas to be used for pits, overburden and tailings, and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(d) The application shall include a narrative statement setting forth:

(1) The anticipated scope, method and schedule of development operations, including the types of equipment to be used;

(2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed; and

(3) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

§ 3553.2 Review of application.

§ 3553.2–1 Preference right determination.

The authorized officer shall determine whether the permittee has discovered a valuable deposit of "Gilsonite". The determination shall be based on the data furnished to the authorized officer by the permittee as required by Part 3590 of this title during the life of the permit and supplemental data submitted at the request of the authorized officer to determine the extent and character of the deposit, the anticipated mining and processing methods, the anticipated location, kind and extent of necessary surface disturbance and measures to be taken to reclaim that disturbance.

§ 3553.2–2 Surface management agency.

The surface management agency, if other than the Bureau, shall review the application for preference right lease in accordance with § 3509.9 and Part 3580 of this title, as applicable. The appropriate surface management agency may request supplemental data regarding surface disturbance and reclamation if not otherwise submitted under § 3553.1–2 of this title.

§ 3553.3 Issuance of lease.

The authorized officer shall issue a lease to the holder of a prospecting permit who shows that, within the term of the permit, a valuable deposit of "Gilsonite" was discovered.

§ 3553.4 Rejection of application.

(a) The authorized officer shall reject an application for a preference right lease if the authorized officer determines:

(1) That the applicant did not discover a valuable deposit of "Gilsonite";

(2) The applicant did not submit in a timely manner requested information; or

(3) The applicant did not otherwise comply with the requirements of this subpart.

(b) On alleging in an application facts sufficient to show entitlement to a lease, a permittee shall have a right to a hearing before an Administrative Law Judge in the Office of Hearings and Appeals.

(c) At the hearing, the permittee shall have both the burden of going forward and the burden of proof by a preponderance of the evidence that a valuable deposit of "Gilsonite" was discovered.

Subpart 3554—Exploration License

§ 3554.0–3 Authority.

Section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

§ 3554.1 Exploration License.

Private parties, jointly or severally, may apply for exploration licenses to explore known, unleased "Gilsonite" deposits to obtain geologic, environmental and other pertinent data concerning such deposits.

§ 3554.2 Regulations applicable.

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under Part 2920 of this title shall govern the issuance of exploration licenses.

§ 3554.3 Exploration plan.

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3552.8–3 of this title. The exploration plan, as approved, shall be attached to, and made a part of, the license.

§ 3554.4 Notice of exploration.

Applicants for exploration licenses shall be required to publish a Notice of Exploration inviting other parties to participate in exploration under the license on a pro rata cost sharing basis.

§ 3554.4–1 Contents of Notice.

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

(a) The name and address of the applicant;

(b) A description of the lands;

(c) The address of the Bureau office where the exploration plan shall be available for inspection; and

(d) An invitation to the public to participate in the exploration under the license.

§ 3554.4–2 Publication and posting of notice.

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation in the area where the lands are located.

(b) The authorized officer shall post the notice in the proper BLM office for 30 days.

§ 3554.4–3 Notice of participation.

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting.

§ 3554.4–4 Decision on plan and participation.

The authorized officer may issue the license naming participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between proposed exploration plans.

§ 3554.5 Submission of data.

The licensee shall furnish the authorized officer copies of all data obtained during exploration. All data shall be considered confidential and not made public until the areas involved have been leased or until the authorized officer determines that the data are not exempt from disclosure under the Freedom of Information Act, whichever occurs first.

§ 3554.6 Modification of Exploration Plan.

Upon application by the participants, a modification of the exploration plan may be approved by the authorized officer.

Subpart 3555—Competitive Leasing

§ 3555.1 Lands subject only to competitive leasing.

Lands available for leasing that have surface and/or subsurface evidence to reasonably assure the existence of a valuable deposit of "Gilsonite" may be leased only through competitive sale to the qualified bidder who offers the highest acceptable bonus bid, except as provided in Subparts 3506 and 3590 of this title. A competitive lease sale may be initiated either through an expression of interest or on Bureau motion.

§ 3555.2 Surface management agency.

Prior to competitive lease offering, the surface management agency shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

§ 3555.3 Sale procedures.

§ 3555.3–1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease sale shall be posted for 30 days in the public room of the proper BLM office.

§ 3555.3–2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the "Gilsonite" deposit being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

§ 3555.3-3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The proposed lease on a form approved by the Director with terms and conditions including the rental, royalty rates, bond amount, and special stipulations;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's qualifications (See Part 3502) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay its proportionate share of the total cost of the publication of the sale notice;

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder if the sucessful bidder fails to obtain the lease for any reason; and,

(g) Any other information deemed appropriate.

§ 3555.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3555.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value, copies of the proposed lease attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3555.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3556—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3556.1 Lands subject to lease.

Lands available for leasing which are known to contain a "Gilsonite" deposit that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by an issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3556.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for the fringe acreage is not in excess of 5120 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 5120 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(d) The lands applied for lack sufficient reserves of the mineral resource to warrant independent development; and

(e) Leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3556.3 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM offfice. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25, and an advance rental payment of 25 cents per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(c) The application shall:

(1) Make reference to the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Include a showing that a "Gilsonite" deposit extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3556.4 Surface management agency.

The surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable.

§ 3556.5 Payment of bonus.

Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event, shall such payment be less than $1 per acre or fraction thereof.

§ 3556.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under Subpart 3551 of this title. The terms and conditions of modified leases shall be the same as the existing leases.

PART 3560—HARDROCK MINERALS

Subpart 3560—Hardrock Minerals Leasing—General

Sec.

3560.0-3 Authority.
3560.1 Leasing procedures.
3560.2 Other applicable regulations.
3560.2-1 General leasing regulations.
3560.2-2 Special areas.
3560.3 Lands subject to lease.
3560.3-1 Department of Agriculture lands.
3560.3-2 National Park Service recreation areas.
3560.3-3 White Mountains National Recreation Area—Alaska.
3560.3-4 Lands patented to the State of California for park purposes.
3560.4 Allowable acreage holdings.
3560.5 Identify of mineral or minerals required.
3560.5 Multiple development.
3560.7 Hardrock mineral specimen collection.

Subpart 3561—Lease Terms and Conditions

3561.1 Applicability of lease terms and conditions.
3561.2 Rental and royalty.
3561.2-1 Rental.
3561.2-2 Production royalty.
3561.3 Duration of lease.
3561.4 Bonds.
3561.5 Special stipulations.
3561.6 Other applicable regulations.

Subpart 3562—Hardrock Minerals Prospecting Permits

3562.1 Areas subject to prospecting.
3562.2 Rights conferred by issuance of prospecting permits.
3562.3 Application for prospecting permit.
3562.3-1 Filing requirements.
3562.3-2 Contents of applications.
3562.3-3 Exploration plans.
3562.3-4 Rejection of application.
3562.4 Determination of priorities.
3562.4-1 Regular filings.
3562.4-2 Simultaneous filings.
3562.5 Amendment to application.
3562.6 Withdrawal of application.
3562.7 Permit bonds.
3562.8 Terms and conditions of permit.
3562.8-1 Duration of permit.
3562.8-2 Rating of permits.
3562.8-3 Annual rental.
3562.8-4 Special stipulations.
3562.9 Prospecting permit extensions.
3562.9-1 Conditions for, and duration of, extensions.
3562.9-2 Application for extension.
3562.9-3 Effective date.

Subpart 3563—Preference Right Lease

3563.1 Application for preference right lease.
3563.1-1 Filing requirements.
3563.1-2 Contents of application.
3563.2 Review of application.
3563.2-1 Preference right determination.
3563.2-2 Surface management agency.
3563.3 Issuance of lease.
3563.4 Rejection of application.

Subpart 3564—Competitive Leasing

3564.1 Lands subject only to competitive leasing.
3564.2 Surface management agency.
3564.3 Sale procedures.
3564.3-1 Publication and posting of notice.
3564.3-2 Contents of notice.
3564.3-3 Detailed statement.
3564.4 Bid opening.
3564.5 Award of lease.
3564.6 Rejection of bid.

Subpart 3565—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3565.1 Lands subject to lease.
3565.2 Special requirements.
3565.3 Filing requirements.
3565.4 Surface management agency.
3565.5 Payment of bonus.
3565.6 Terms and conditions of lease.

Subpart 3566—Lease Renewals

3566.1 Applications.
3566.2 Bonds.
3566.3 Failure to apply for renewal.
3566.4 Lease terms and conditions.

Subpart 3567—Development Contracts

3567.1 Development contracts and processing and milling arrangements.
3567.2 Acreage chargeability.
3567.3 Applications.
3567.4 Approval.

Authority: The Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); Reorganization Plan No. 3 of 1946 (5 U.S.C. Appendix); Section 3 of the Act of September 1, 1949 (30 U.S.C. 192c); the Act of June 30, 1960 (16 U.S.C. 508(b)); the Act of March 3, 1909, as amended (47 Stat. 1487); Section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 8, 1964 (16 U.S.C. 460n et seq.); the Act of November 2, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.); the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm-2—460mm-4); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3560—Hardrock Minerals Leasing—General

§ 3560.0-3 Authority.

Authority for leasing hardrock minerals are shown under § 3560.0-3 (b) and (c) of this title.

§ 3560.1 Leasing procedures.

The regulations in this part provide the procedures for qualified applicants to obtain rights to develop deposits of hardrock minerals found on certain lands available for leasing. The regulations provide for this in the following manner:

(a) "Prospecting permits" allow the permittee to explore for deposits of hardrock minerals.

(b) "Preference right leases" are issued to holders of prospecting permits who demonstrate the discovery of a valuable deposit of a hardrock mineral(s) under the permit.

(c) "Competitive leases" are issued for known deposits of hardrock minerals and allow the lessee to mine the deposit.

(d) "Fringe acreage leases" are issued noncompetitively for known deposits of hardrock minerals adjacent to existing mines on non-Federal lands which can only be mined as part of the existing mining operation.

(e) "Lease modifications" are used to add known deposits of hardrock minerals to an adjacent Federal lease which contains an existing mine provided the deposits can only be mined as part of the existing mining operation.

§ 3560.2 Other applicable regulations.

§ 3560.2-1 General leasing regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The Part 3500 regulations include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation and lands not available for leasing. Cross-reference to specific regulations in Part 3500 is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 only to the cross-referenced regulations.

§ 3560.2-2 Special areas.

Part 3580 of this title contains regulations specific to certain national recreation areas and to certain lands patented to the State of California, and as applicable, supplements this part. Except where specific regulations in Part 3580 of this title are applicable, the regulations in this part and Part 3580 shall govern the leasing of hardrock minerals in those national recreation areas and those patented lands.

§ 3560.3 Lands subject to lease.

§ 3560.3-1 Department of Agriculture lands.

With the consent of the Secretary of Agriculture and subject to such conditions as he/she may prescribe, the hardrock minerals in the following lands administered by the Secretary of Agriculture are subject to lease:

(a) Lands acquired pursuant to the laws set out in Reorganization Plan No. 3 of 1946: (1) "The Act of March 4, 1917 (39 Stat. 1134; 16 U.S.C. 520); (2) Title II of the National Industrial Recovery Act of June 16, 1933 (48 Stat. 195, 200, 202, 205; 40 U.S.C. 401, 403a and 406); (3) The 1935 Emergency Relief Appropriations Act of April 8, 1935 (48 Stat. 115, 118); (4) Section 55 of Title I of the Act of August 24, 1935 (49 Stat. 750, 781); and, (5) The Act of July 22, 1937 (50 Stat. 522, 525, 530), as amended by the Act of July 28, 1942 (56 Stat. 725; 7 U.S.C. 1011(c) and 1018)."

(b) Lands added to the Shasta National Forest by the Act of March 19, 1948 (62 Stat. 83).

(c) Portions of Juan Jose Lobato Grant (North Lobato) and of the Anton Chica Grant (El Pueblo) in New Mexico (66 Stat. 285) described in section 1 of the Act of June 28, 1952.

(d) Public domain lands within National Forest lands in Minnesota.

(e) Lands in Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area, subject to the regulations in Subpart 3583 of this title.

§ 3560.3-2 National Park Service Recreation areas.

With the consent of the Regional Director, National Park Service, and subject to such conditions as may be prescribed by the Regional Director, the following national recreation areas administered by the National Park Service are available for leasing subject to the regulations in Subpart 3582 of this title:

(a) Lake Mead National Recreation Area;

(b) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area;

(c) Ross Lake and Lake Chelan National Recreation Areas; and

(d) Glen Canyon National Recreation Area.

VOL 51 ISS 77 AP 22 1986 UMI

§ 3560.3-9 White Mountains National Recreation Area—Alaska.

The lands within White Mountains National Recreation Area are available for lease subject to the regulations in Subpart 3585 of this title.

§ 3560.3-4 Lands patented to the State of California for park purposes.

The reserved hardrock minerals in certain lands patented to the State of California are available for lease subject to the regulations in Subpart 3574 of this title.

§ 3560.4 Allowable acreage holdings.

No person, company, association or corporation may hold at any particular time, directly or indirectly, more than 20,480 acres in any 1 state under prospecting permit and lease for a particular hardrock mineral or an associated group of hardrock minerals, of which not more than 10,240 acres may be held under lease. However, the authorized officer may authorize a lessee to hold an additional 10,240 acres under lease if he/she finds, upon a satisfactory showing submitted by the lessee, that such additional acreage is necessary to promote the orderly development of the mineral resource, and does not result in undue control of the mineral to be mined, removed and marketed. In any case, the aggregate chargeable acreage held under permit and lease shall not exceed 20,480 acres in any 1 state.

§ 3560.5 Identity of mineral or minerals required.

All applications under this section shall specify the mineral or minerals for which the lease or permit is sought. A permit, if granted, shall be for the mineral or minerals requested and any associated minerals. A preference right lease shall be issued for the mineral(s) specified in the permit for which a valuable deposit has been discovered and for any associated minerals. (See also Subpart 3563 and 3565)

§ 3560.6 Multiple development.

The granting of a hardrock permit or lease for the prospecting, development, or production of deposits for a specific mineral shall not preclude the issuance of other permits or leases for the same lands for deposits of other minerals with suitable stipulations for simultaneous operation. It is recognized, however, that multiple permits or leases for solid hardrock minerals on the same lands would not be compatible in most cases. For this reason, multiple permits or leases for such minerals generally shall not be issued for the same lands.

§ 3560.7 Hardrock mineral specimen collection.

The surface management agency having jurisdiction over the lands shall determine which areas and under what conditions mineral specimens may be collected for non-commercial purposes (e.g., recreation, hobby collecting, scientific or research specimens, etc), and whether an approved permit shall be required prior to entry on the lands by the collector. If such a permit is necessary, it shall be obtained from the responsible official of the surface management agency who shall have the discretionary authority to issue the permit, determine the permit fee, if any, and specify the terms and conditions of the permit.

Subpart 3561—Lease Terms and Conditions

§ 3561.1 Applicability of lease terms and conditions.

The lease terms and conditions set out under this section apply to all leases issued or renewed under Part 3560 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize in accordance with its terms and conditions the mining of the hardrock mineral(s) for which the lease issued, including any associated minerals.

§ 3561.2 Rental and royalty.

§ 3561.2-1 Rental.

(a) Each lease shall provide for the payment of rental at the rate of $1 per acre or fraction thereof each year on or before the anniversary date of the lease. The rental payment shall not be less than $20. The rental paid for any year shall be credited against any royalties which may accrue under the lease during the year for which the rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease. (See § 3509.4-2)

(c) Remittances of rental shall be made in accordance with § 3503.1 of this title.

§ 3561.2-2 Production royalty.

The production royalty shall be determined by the authorized officer on a case-by-case basis as provided in § 3503.2-1 of this title. If hardrock minerals other than those specified in the issued lease should be discovered and mined by the lessee, an applicable royalty rate shall be established by the authorized officer for such mineral(s).

§ 3561.3 Duration of lease.

The lease shall be issued for a period not exceeding 20 years as determined by the authorized officer with a preference right in the lessee to renew for a term not to exceed 10 years at the end of the initial term and at the end of each 10-year period thereafter.

§ 3561.4 Bonds.

Prior to issuance of a lease under this part, the applicant shall furnish a bond in an amount to be determined by the authorized officer but not less than $5,000. (See Subpart 3504)

§ 3561.5 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in §3500.9 of this title. (See also Part 3580).

§ 3561.6 Other applicable regulations.

Leases issued under this part shall also be subject to the conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by §3503.2-2 of this title.

(b) Suspension of operations and production and suspension of operations are covered by § 3503.3 of this title.

(c) Assignments and subleases are covered by Subpart 3506 of this title.

(d) Cancellation and relinquishment are covered by Subpart 3509 of this title.

(e) Exploration and mining are covered by Part 3500 of this title.

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3562—Hardrock Minerals Prospecting Permits

§ 3562.1 Areas subject to prospecting.

(A) prospecting permit may be issued for any area of available public domain and acquired lands subject to hardrock mineral leasing where prospecting or exploratory work is necessary to determine the existence or workability of a particular hardrock mineral(s). Discovery of a valuable deposit of any such mineral(s) within the term of the permit entitles the permittee to a preference right lease.

§ 3562.2 Rights conferred by issuance of prospecting permits.

A permit shall grant the permittee the exclusive right to prospect on and explore the lands to determine the existence of a valuable deposit of the mineral(s) for which the permit was issued, such right to be in accordance with the terms and conditions of the permit. The permittee may remove only such material as is necessary to demonstrate the existence of a valuable mineral deposit.

§ 3562.3 Application for prospecting permit.

§ 3562.3-1 Filing requirements.

(a) An application shall be filed on a form approved by the Director or an exact reproduction of that form.

(b) An application shall be filed in triplicate with the proper BLM office.

(c) The application shall be accompanied by a nonrefundable filing fee of $25, and rental for the first year at the rate of 50 cents per acre or fraction thereof made payable to the Department of the Interior-Bureau of Land Management. The rental payment shall be for the total acreage if known, and if not known, for the total acreage computed on the basis of 40 acres for each smallest subdivision. The rental payment shall not be less than $20.

§ 3562.3-2 Contents of applications.

Each application shall be typewritten, or printed plainly in ink; manually signed in ink and dated by the applicant or applicant's duly authorized attorney-in-fact, and shall contain the following:

(a) The name and address of the applicant;

(b) A statement of the applicant's holdings in accordance with Subpart 3502 of this title;

(c) A complete and accurate land description in compliance with subpart 3501 of this title. The application shall not include more than 2,560 acres in a reasonably compact form; and

(d) The name of mineral(s) for which the permit is sought. (See § 3560.5)

§ 3562.3-3 Exploration plans.

After initial review and clearance of the application, but prior to issuance of the prospecting permit, the authorized officer shall require the applicant to file an exploration plan in triplicate, reasonably designed to determine the existence or workability of the deposit. The exploration plan shall, insofar as possible, include the following:

(a) The names, addresses and telephone numbers of persons responsible for operations under the plan and to whom notices and orders are to be delivered;

(b) A brief description, including maps, of geologic, water, vegetation, and other physical factors, and the distribution, abundance and habitat of fish and wildlife, particularly threatened and endangered species, that may be affected by the proposed operation within the area where exploration is to be conducted, and the present land use within and adjacent to the area;

(c) A narrative description showing:

(1) The method of exploration and types of equipment to be used;

(2) The measures to be taken to prevent or control fire, soil erosion, pollution of surface and ground water, pollution of air, damage to fish and wildlife or their habitat and other natural resources, and hazards to public health and safety, including specific actions necessary to meet all applicable laws and regulations;

(3) The method for plugging drill holes; and

(4) The measures to be taken for surface reclamation, which shall include as appropriate:

(i) A reclamation schedule;

(ii) The method of grading, backfilling, soil stabilization, compacting and contouring;

(iii) The method of soil preparation and fertilizer application;

(iv) The type and mixture of shrubs, trees, grasses, forbs and other vegetation to be planted; and

(v) The method of planting, including approximate quantity and spacing;

(d) The estimated timetable for each phase of the work and for final completion of the program;

(e) Suitable topographic maps or aerial photographs showing existing bodies of surface water, topographic, cultural and drainage features, and the proposed locations of drill holes, trenches and roads; and

(f) Such other data as may be reasonably required by the authorized officer.

§ 3562.3-4 Rejection of application.

Any application for a prospecting permit that does not comply with the requirements of this subpart shall be rejected. If the applicant files a new application for the same lands within 30 days of receipt of the rejection, the nonrefundable filing fee and rental payment submitted with the original application shall be applied to the new application, provided the serial number of the original application is shown on the new application. If a new application is not filed within the 30-day period, the advance rental shall be refunded. Priority for the permit shall be established as of the date the corrected application is filed.

§ 3562.4 Determination of priorities.

§ 3562.4-1 Regular filings.

Priority of application shall be determined in accordance with the time of filing.

§ 3562.4-2 Simultaneous filings.

Where more than 1 application is filed at the same time for the same lands and for the same mineral, priority shall be determined in accordance with Subpart 1821 of this title.

§ 3562.5 Amendment to application.

An amendment to an application for a prospecting permit to include additional lands shall receive priority for such additional lands from the date of the filing of the amended application. The amended application shall be accompanied by the required advance rental. No additional filing fees are required.

§ 3562.6 Withdrawal of application.

An application for permit may be withdrawn in whole or in part before the permit is signed on behalf of the United States. Upon acceptance of the withdrawal by the authorized officer, the advance rental submitted with the application shall be refunded.

§ 3562.7 Permit bonds.

Prior to issuance of the permit, the applicant shall furnish a bond in an amount determined by the authorized officer, but not less than $1,000. (See Subpart 3504)

§ 3562.8 Terms and conditions of permit.

§ 3562.8-1 Duration of permit.

Prospecting permits are issued for an initial term of 2 years, and may be extended for a period not to exceed 4 years as provided in § 3562.9 of this title. No exploration activities other than those approved as part of an existing exploration plan shall be conducted following expiration of the initial term unless and until the permit has been extended by the authorized officer.

§ 3562.8-2 Dating of permits.

The permit shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved.

§ 3562.8-3 Annual rental.

Rental at the rate of 50 cents per acre or fraction thereof shall be paid annually on or before the anniversary date of the permit. The rental payment shall not be less than $20.

VOL 51 ISS 77 AP 22 1986 UMI

§ 3562.9–4 Special stipulations.

To insure adequate protection of the lands and their resources, permits shall contain such stipulations as may be prescribed by the authorized officer or the surface management agency if the surface is not under Bureau jurisdiction as described in § 3568.0. (See also Part 3580)

§ 3562.9 Prospecting permit extensions.

§ 3562.9–1 Conditions for, and duration of, extensions.

A permit may be extended for a maximum of 4 years by the authorized officer provided that:

(a) The permittee has been unable with reasonable diligence to determine the existence or workability of valuable deposits of any mineral(s) covered by the permit and desires to continue the prospecting or exploration program. Reasonable diligence means that in the opinion of the authorized officer the permittee has drilled a sufficient number of core holes on the permit area or performed other comparable prospecting to explore the permit area within the time allowed; or

(b) The permittee's failure to perform diligent prospecting activities was due to conditions beyond his/her control.

§ 3562.9–2 Application for extension.

(a)(1) An application for extension shall be filed in the proper BLM office at least 90 days prior to expiration of the permit. No specific application form is required.

(2) Applications for extension shall be accompanied by a nonrefundable filing fee of $25 and the advance rental of 50 cents per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(b) The application for extension shall:

(1) Demonstrate that the permittee has met the conditions for extension set forth in § 3562.9–1 of this title;

(2) Demonstrate the permittee's diligent prospecting activities; and

(3) Show how much additional time is necessary to complete prospecting work.

§ 3562.9–3 Effective date.

The permit extension shall become effective as of the date of approval.

Subpart 3563—Preference Right Lease

§ 3563.1 Application for preference right lease.

§ 3563.1–1 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM office no later than 60 days after the prospecting permit expires. No specific form is required.

(b) The application shall be accompanied by the first year's rental at the rate of $1 per acre or fraction thereof made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20. (See Subpart 3503)

§ 3563.1–2 Contents of application.

(a) The application shall include a statement of the applicant's holdings in accordance with Subpart 3502 of this title.

(b) The application shall contain a complete and accurate description of the lands in accordance with § 3501.1 of this title. The lands shall have been included in the prospecting permit and shall not exceed 2,560 acres.

(c) The application shall identify the mineral(s) of which a valuable deposit(s) was discovered.

(d) The application shall be accompanied by a map(s) which shows utility systems; the location of any proposed development or mining operations and facilities incidental thereto, including the approximate locations and extent of the areas to be used for pits, overburden and tailings; and the location of water sources or other resources which may be used in the proposed operations or facilities incidental thereto.

(e) The application shall include a narrative statement setting forth:

(1) The anticipated scope, method and schedule of development operations, including the types of equipment to be used;

(2) The method of mining anticipated, including the best available estimate of the mining sequence and production rate to be followed; and

(3) The relationship, if any, between the mining operations anticipated on the lands applied for and existing or planned mining operations, or facilities incidental thereto, on adjacent Federal or non-Federal lands.

§ 3563.2 Review of application.

§ 3563.2–1 Preference right determination.

The authorized officer shall determine whether the permittee has discovered a valuable deposit of any mineral covered by the prospecting permit. The determination shall be based on data furnished the authorized officer by the permittee as required by Part 3590 of this title during the life of the permit and supplemental data submitted at the request of the authorized officer to determine the extent and character of the deposit, the anticipated mining and processing methods, the anticipated location, kind and extent of necessary surface disturbance and measures to be taken to reclaim that disturbance.

§ 3563.2–2 Surface management agency.

The surface management agency, if other than the Bureau, shall review the application for preference right lease in accordance with § 3500.9 and Part 3580 of this title, as applicable. The appropriate surface management agency may request supplemental data regarding surface disturbance and reclamation if not otherwise submitted under § 3563.1–2 of this title. On acquired lands administered by the Secretary of Agriculture, supplemental data in addition to that submitted under § 3563.1–2 of this title may be required. Such data will be used in the development of environmental analyses and special stipulations.

§ 3563.3 Issuance of lease.

The authorized officer shall issue a lease to the holder of a prospecting permit who shows that, within the terms of the permit, a valuable deposit of any mineral(s) covered by the prospecting permit was discovered.

§ 3563.4 Rejection of application.

(a) The authorized officer shall reject an application for a preference right lease if the authorized officer determines:

(1) That the applicant did not discover a valuable deposit of any mineral covered by the prospecting permit;

(2) The applicant did not submit in a timely manner requested information; or

(3) The applicant did not otherwise comply with the requirements of this subpart.

(b) On alleging in an application facts the applicant believes to be sufficient to show entitlement to a lease, a permittee shall have a right to a hearing before an Administrative Law Judge in the Office of Hearings and Appeals.

(c) At the hearing, the permittee shall have both the burden of going forward and the burden of proof by a preponderance of the evidence that a valuable deposit of the mineral(s) was discovered.

Subpart 3564—Competitive Leasing

§ 3564.1 Lands subject only to competitive leasing.

Lands where prospecting or exploratory work is unnecessary to determine the existence or workability of a valuable deposit of a particular hardrock mineral may be leased only through competitive sale to the qualified bidder who offers the highest acceptable bonus bid. A competitive lease sale may

be initiated either through an expression of interest or on Bureau motion.

§ 3564.2 Surface management agency.

Prior to competitive lease offering, the surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable. (See also § 3560.3)

§ 3564.3 Sale procedures.

§ 3564.3–1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease sale shall be posted for 30 days in the public room of the proper BLM office.

§ 3564.3–2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the mineral deposit being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

§ 3564.3–3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The proposed lease on a form approved by the Director with terms and conditions, including the rental, royalty rates, bond amount and special stipulations;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's statement of holdings (See Subpart 3502) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay his/her proportionate share of the total cost of the publication of the sale notice;

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder if the successful bidder fails to obtain the lease for any reason; and

(g) Any other information deemed appropriate.

§ 3564.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3564.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value, copies of the lease on the form attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3564.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3565—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3565.1 Lands subject to lease.

Lands available for leasing which are known to contain a hardrock mineral deposit that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3565.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for fringe acreage is not in excess of 2,560 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 2,560 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(d) The lands applied for lack of sufficient reserves of the mineral resource to warrant independent development; and

(e) That leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3565.3 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM office. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25 and an advance rental payment of $1 per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management. The rental payment shall not be less than $20.

(c) The application shall:

(1) Make reference to the serial number of the lease if the land adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the land desired;

(3) Include a showing that a hardrock mineral deposit extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3565.4 Surface management agency.

The surface management agency shall be consulted in accordance with § 3500.9 and Part 3580 of this title, as applicable. (See also § 3560.3)

§ 3565.5 Payment of bonus.

Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event shall such payment be less than $1 per acre or fraction thereof.

§ 3565.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under Subpart 3561 of this title. The terms and conditions of a modified lease shall be the same as in the existing lease.

VOL 51 ISS 77 AP 22 1986 UMI

Subpart 3566—Lease Renewals

§ 3566.1 Applications.

An application for lease renewal shall be filed at least 90 days prior to the expiration of the lease term. No specific form is required. All applications shall be filed in triplicate in the proper BLM office together with a nonrefundable $25 filing fee and an advance rental payment of $1 per acre or fraction thereof. The rental payment shall not be less than $20.

§ 3566.2 Bonds.

Prior to the issuance of a renewal lease, the lessee may be required to furnish a new bond as prescribed by Subpart 3504 of this title.

§ 3566.3 Failure to apply for renewal.

If the holder of a lease fails to apply for renewal as provided in § 3566.1 of this title, the lease shall expire on the last day of the lease term.

§ 3566.4 Lease terms and conditions.

Each lease, if renewed, shall be issued on a form approved by the Director and shall be dated effective the first day of the month following its approval by the authorized officer or the first day of the month following the expiration of the current lease, whichever is later, and shall otherwise be subject to the terms and conditions set forth under Subpart 3561 of this title.

Subpart 3567—Development Contracts

§ 3567.1 Development contracts and processing and milling arrangements.

Development contracts and processing and milling arrangements by 1 or more lessees with 1 or more persons, associations or corporations to justify operations on a large scale for the discovery, development, production or transportation of ores may be approved by the authorized officer without regard to the acreage limitation set forth in § 3560.4 of this title.

§ 3567.2 Acreage chargeability.

Leases and permits committed to an approved development contract or to a processing or milling arrangment shall not be included in computing accountable acreage.

§ 3567.3 Applications.

All applications shall be filed in triplicate in the proper BLM office. No specific form is required. An application shall include the following:

(a) Copies of the contract affecting the Federal leases and/or permits;

(b) A statement showing the nature and reasons for the requested contract;

(c) A statement showing all of the interests held in the contract area by the designated contractor; and

(d) The proposed or agreed upon plan of operation or development of the leased lands.

§ 3567.4 Approval.

Development contracts may be approved by the authorized officer when, in his/her judgment, conservation of natural resources or the public interest shall be best served thereby. The contract shall be signed and agreed upon by the parties prior to final approval by the Bureau.

PART 3570—ASPHALT IN OKLAHOMA

Subpart 3570—Asphalt in Oklahoma—General

Sec.

3570.0-3 Authority.
3570.1 Leasing procedures.
3570.2 Minerals and lands subject to leasing.
3570.3 Other applicable regulations.
3570.4 Allowable acreage holdings.

Subpart 3571—Lease Terms and Conditions

3571.1 Applicability of lease terms and conditions.
3571.2 Rental and royalty.
3572.2-1 Rental.
3571.2-2 Production royalty.
3571.3 Duration of lease.
3571.4 Bonds.
3571.5 Special stipulations.
3571.6 Other applicable regulations.

Subpart 3574—Competitive Leasing

3574.1 Lease by competitive bidding.
3574.2 Surface management agency.
3574.3 Sale procedures.
3574.3-1 Publication and posting of notice.
3574.3-2 Contents of notice.
3574.3-3 Detailed statement.
3574.4 Bid opening.
3574.5 Award of lease.
3574.6 Rejection of bid.

Subpart 3575—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

3575.1 Lands subject to lease.
3575.2 Special requirements.
3575.3 Filing requirements.
3575.4 Surface management agency.
3575.5 Payment of bonus.
3575.6 Terms and conditions of lease.

Subpart 3576—Lease Renewals

3576.1 Applications.
3576.2 Bonds.
3576.3 Failure to apply for renewal.
3576.4 Lease terms and conditions.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3570—Asphalt in Oklahoma—General

§ 3570.0-3 Authority.

Authorities for leasing asphalt in Oklahoma are cited under § 3500.0-3(a) of this title.

§ 3570.1 Leasing procedures.

The regulations in this part provide the procedures for qualified applicants to obtain rights to develop deposits of asphalt on certain lands in Oklahoma. The regulations provide for this in the following manner:

(a) "Competitive leases" are issued for deposits of asphalt in Oklahoma without regard to the quantity or quality of the mineral deposit and allow the lessee to mine the deposit.

(b) "Fringe acreage leases" are issued noncompetitively for known deposits of asphalt in Oklahoma adjacent to existing mines on non-Federal lands which can be mined only as part of the existing mining operation.

(c) "Lease modifications" are used to add known deposits of asphalt in Oklahoma to an adjacent Federal lease which contains an existing mine, provided the deposits can only be mined as part of the existing mining operation.

§ 3570.2 Minerals and lands subject to leasing.

By the Act of June 28, 1944 (58 Stat. 463, 483–485), Congress authorized the Secretary to acquire certain lands and mineral deposits in Oklahoma and amended the Act to authorize leasing of the asphalt on those lands. The lands and mineral deposits covered by the 1944 law are those reserved from allotment in accordance with the provisions of section 58 of the Supplemental Agreement of 1902 (32 Stat. 654) with the Choctaw-Chickasaw Nation of Indians. Congress ratified the purchase contract in the Act of June 24, 1948 (62 Stat. 598), and appropriated funds for the purchase in the Act of May 24, 1949 (63 Stat. 76).

§ 3570.3 Other applicable regulations.

Part 3500 of this title contains the general regulations governing the leasing of solid minerals other than coal and oil shale and supplements, as applicable, the regulations in this part. The regulations in Part 3500 of this title include, but are not limited to, such matters as multiple mineral development, environmental review, other agency consent and consultation, and lands not available for leasing. Cross-reference to specific regulations in Part 3500 of this title is provided in this part as an aid to the reader and is not intended to limit the applicability of Part 3500 of this title only to the cross-referenced regulations.

§ 3570.4 Allowable acreage holdings.

No person, company, association or corporation may hold, at any one time, either directly or indirectly, leases exceeding in the aggregate 2,560 acres.

Subpart 3571—Lease Terms and Conditions

§ 3571.1 Applicability of lease terms and conditions.

Except as otherwise specifically stated, all lease terms and conditions set out under this section apply to all leases issued under Part 3570 of this title. Each lease shall be issued on a form approved by the Director and shall be dated as of the first day of the month after its approval by the authorized officer unless the applicant requests in writing that it be dated the first day of the month in which it is approved. Each lease shall authorize in accordance with its terms and conditions the mining of asphalt.

§ 3571.2 Rental and royalty.

3571.2-1 § Rental.

(a) Each lease shall provide for the payment of rental annually and in advance for each acre or fraction thereof during the continuance of the lease at the rate of 25 cents per acre or fraction thereof for the first calendar year, 50 cents for the second, third, fourth and fifth calendar years, and $1 for each calendar year thereafter. Rental is payable annually on or before January 1. The rental paid for any year shall be credited against the first royalties as they accrue under the lease during the year for which rental was paid.

(b) If the annual rental is not timely remitted, the lessee shall be notified by the authorized officer that, unless payment is made within 30 days from receipt of such notification, action shall be taken to cancel the lease. (See § 3509.4–2).

(c) Remittances of rental shall be made in accordance with § 3503.1 of this title.

§ 3571.2–2 Production royalty.

All leases shall be conditioned upon the payment to the United States of such royalties as may be specified in the lease, which shall be fixed by the authorized officer in advance as provided under § 3503.2–1 of this title, but shall not be less than 25 cents per ton of 2,000 pounds of marketable production.

§ 3571.3 Duration of lease.

The lease shall be issued for an initial term of 20 years subject to a preferential right in the lessee to renew for a 10-year term at the end of the initial term and at the end of each 10-year period thereafter.

§ 3571.4 Bonds.

Prior to issuance of a lease, the applicant shall furnish a bond in an amount to be determined by the authorized officer, but not less than $5,000 (See Subpart 3504).

§ 3571.5 Special stipulations.

To insure adequate utilization and protection of the lands and their resources, leases shall contain such stipulations as may be prescribed by the authorized officer or the responsible official of the surface management agency if the surface is not under Bureau jurisdiction as described in § 3500.9 of this title (See also Part 3580).

§ 3571.6 Other applicable regulations.

Leases issued under this part shall also be subject to the conditions set forth in other regulations, including, but not limited to, the following:

(a) Minimum annual production and minimum royalty are covered by § 3503.2–2 of this title;

(b) Suspension of operations and production and suspension of operations are covered by § 3508.3 of this title;

(c) Assignments and subleases are covered by Subpart 3506 of this title;

(d) Cancellation and relinquishment are covered by Subpart 3509 of this title;

(e) Exploration and mining are covered by Part 3590 of this title; and

(f) Royalty management is covered by 30 CFR Chapter II, Subchapter A.

Subpart 3574—Competitive Leasing

§ 3574.1 Lease by competitive bidding.

Leases may be offered competitively under this part without regard to the quantity or quality of the mineral deposit in the lands subject to the lease. A competitive lease sale may be initiated either through an expression of interest or on Bureau motion.

§ 3574.2 Surface management agency.

Prior to competitive lease offering, the surface management agency shall be consulted in accordance with § 3500.9 of this title, as applicable.

§ 3574.3 Sale procedures.

§ 3574.3–1 Publication and posting of notice.

Prior to a lease offering, the authorized officer shall publish a notice of lease sale for at least 3 consecutive weeks in a newspaper of general circulation in the area in which the lands are situated. The notice of lease sale shall be posted for 30 days in the public room of the proper BLM office.

§ 3574.3–2 Contents of notice.

The lease sale notice shall include:

(a) The time and place of sale;

(b) The bidding method;

(c) A description of the tract being offered;

(d) A description of the deposit being offered;

(e) The minimum bid to be considered; and

(f) Information on where a detailed statement of the terms and conditions of the lease sale and of the proposed lease may be obtained.

§ 3574.3–3 Detailed statement.

The authorized officer shall also prepare and make available a detailed statement of sale containing:

(a) The proposed lease on a form approved by the Director with terms and conditions, including the rental, royalty rates, bond amount, and special stipulations;

(b) An explanation of the manner in which bids may be submitted;

(c) A notice that each bid shall be accompanied by the bidder's qualifications (See Part 3502) and one-fifth of the amount bid;

(d) A notice that the successful bidder(s) shall be required, prior to lease issuance, to pay its proportionate share of the total cost of the publication of the sale notice;

(e) A warning to all bidders concerning 18 U.S.C. 1860 which prohibits unlawful combination or intimidation of bidders;

(f) A statement that the Secretary reserves the right to reject any and all bids, and the right to offer the lease to the next qualified bidder in the successful bidder fails to obtain the lease for any reason; and,

(g) Any other information deemed appropriate.

§ 3574.4 Bid opening.

All bids shall be opened and announced at the time and date specified in the notice of lease sale, but no bids shall be accepted or rejected at that time. Bids received after the time specified in the notice of sale shall not be considered. A bid may be withdrawn or modified prior to the time specified in the notice of sale.

§ 3574.5 Award of lease.

After the authorized officer has determined that the highest qualified bid meets or exceeds fair market value,

VOL 51 ISS 77 AP 22 1986 UMI

copies of the proposed lease attached to the detailed statement shall be sent to the successful bidder who shall, within a specified time, sign and return the lease form, pay the balance of the bonus bid, pay the first year's rental, pay the publication costs and furnish the required lease bond.

§ 3574.6 Rejection of bid.

(a) If the high bid is rejected for failure of the successful bidder to sign the lease form and pay the balance of the bonus bid, or otherwise comply with the regulations of this subpart, the one-fifth bonus accompanying the bid shall be forfeited to the United States.

(b) If the lease cannot be awarded for reasons determined by the authorized officer to be beyond the control of the successful bidder, the authorized officer shall reject the bid and the deposit submitted with the bid shall be returned.

Subpart 3575—Noncompetitive Leasing—Fringe Acreage Leases and Lease Modifications

§ 3575.1 Lands subject to lease.

Lands available for leasing which are known to contain a deposit of asphalt that extends from an adjoining Federal lease or from privately held lands may be leased noncompetitively either by issuance of a new lease for these lands or by adding such lands to an existing Federal lease.

§ 3575.2 Special requirements.

Before a fringe acreage lease may be issued or a lease modified under this subpart, the authorized officer shall determine the following:

(a) The lands are contiguous to an existing Federal lease or to non-Federal lands owned or controlled by the applicant;

(b)(1) The new lease for the fringe acreage is not in excess of 640 acres; or

(2) The acreage of the modified lease, including additional lands, is not in excess of 640 acres;

(c) The mineral deposit is not in an area of competitive interest to holders of other active mining units in the area;

(d) The lands applied for lack sufficient reserves of the mineral resource to warrant independent development; and

(e) Leasing the lands will result in conservation of natural resources and will provide for economical and efficient recovery as part of a mining unit.

§ 3575.3 Filing requirements.

(a) An application shall be filed in triplicate with the proper BLM office. No specific application form is required.

(b) The application shall be accompanied by a nonrefundable filing fee of $25, and an advance rental payment of 25 cents per acre or fraction thereof for a new lease or at the rental rate set forth in the base lease for a modification made payable to the Department of the Interior—Bureau of Land Management.

(c) The application shall:

(1) Make reference to the serial number of the lease if the lands adjoin an existing Federal lease;

(2) Contain a complete and accurate description of the lands desired;

(3) Include a showing that an asphalt deposit extends from the applicant's adjoining lease or from private lands owned or controlled by the applicant; and

(4) Include proof of ownership or control of the mineral deposit in the adjoining lands if not under a Federal lease.

§ 3575.4 Surface management agency.

The surface management agency, if other than the Bureau, shall be consulted in accordance with § 3500.9 of this title, as applicable.

§ 3575.5 Payment of bonus.

Prior to the issuance of a new lease or a modification of an existing lease, the applicant shall be required to pay a bonus in an amount determined by the authorized officer based on an appraisal. In no event, shall such payment be less than $1 per acre or fraction thereof.

§ 3575.6 Terms and conditions of lease.

New leases shall be issued subject to the terms and conditions set out under subpart 3571 of this title. The terms and conditions of modified leases shall be the same as in the existing leases.

Subpart 3576—Lease Renewals

§ 3576.1 Applications.

An application for lease renewal shall be filed at least 90 days prior to the expiration of the lease term. There is no specific form required. All applications shall be filed in triplicate in the proper BLM office together with a nonrefundable filing fee of $25 and an advance rental payment of $1 per acre or fraction thereof.

§ 3576.2 Bonds.

Prior to the issuance of a renewal lease, the lessee may be required to furnish a new bond as prescribed by Subpart 3504 of this title.

§ 3576.3 Failure to apply for renewal.

If the holder of a lease fails to apply for renewal timely, the lease shall expire on the last day of the lease term.

§ 3576.4 Lease terms and conditions.

Each renewal lease shall be issued on a form approved by the Director and shall be effective the first day of the month following its approval by the authorized officer or the first day of the month following the expiration of the current lease, whichever is later, and shall otherwise be subject to the terms and conditions set forth under Subpart 3571 of this title.

PART 3580—SPECIAL LEASING AREAS

Subpart 3581—Gold, Silver or Quicksilver in Confirmed Private Land Grants

Sec.
3581.0–3 Authority.
3581.1 Lands to which applicable.
3581.2 Who may obtain a lease.
3581.3 Application for lease.
3581.4 Leases.
3581.4–1 Lease terms.
3581.4–2 Rate of royalty; investment determined.
3581.4–3 Lease form and execution.
3581.5 Bond.

Subpart 3582—National Park Service Areas

3582.0–3 Authority.
3582.1 Other applicable regulations.
3582.1–1 Leasable minerals.
3582.1–2 Hardrock minerals.
3582.2 Lands to which applicable.
3582.2–1 Boundary maps.
3582.2–2 Excepted areas.
3582.3 Consent and consultation.

Subpart 3583—Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area

3583.0–3 Authority.
3583.1 Other applicable regulations.
3583.1–1 Leasable minerals.
3583.1–2 Hardrock minerals.
3583.2 Consent of Secretary of Agriculture.
3583.3 Application for hardrock mineral leases.
3583.4 Hardrock mineral leases.
3583.4–1 Leasing units.
3583.4–2 Royalties, rentals and minimum royalties.
3583.4–3 Special terms and conditions.
3583.4–4 Duration of lease.
3583.4–5 Lease by competitive bidding.
3583.5 Disposal of materials.

Subpart 3584—Reserved Minerals in Lands Patented to the State of California for Park and Other Public Purposes

3584.0–3 Authority.
3584.1 Lands to which applicable.
3584.2 Minerals to be leased.
3584.3 Other applicable regulations.
3584.4 Notice of application.
3584.5 Protection of surface.
3584.6 Terms of lease.

Subpart 3585—White Mountains National Recreation Area—Alaska

3585.0–3 Authority.
3585.1 Lands to which applicable.
3585.2 Other applicable regulations.

Sec.
3585.2–1 Leasable minerals.
3585.2–2 Hardrock minerals.
3585.3 Mining claimant preference right leases.
3585.3–1 Who may obtain a mining claimant preference right lease.
3585.3–2 Application.
3585.4 Leases.
3585.4–1 Survey for leasing.
3585.4–2 Terms and conditions.
3585.4–3 Relinquishment of claims.
3585.5 Exploration license.
3585.5–1 Exploration license.
3585.5–2 Other applicable regulations.
3585.5–3 Exploration plan.
3585.5–4 Notice of exploration.
3585.5–5 Contests of notice.
3585.5–6 Publication and posting of notice.
3585.5–7 Notice of participation.
3585.5–8 Decision on plan and participation.
3585.5–9 Submission of data.

Subpart 3586—Sand and Gravel in Nevada

3586.1 Sand and gravel.
3586.1–1 Applicable law and regulations.
3586.1–2 Existing leases.
3586.1–3 Transfers of lease.

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.); the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359); the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); the Act of June 8, 1926 (30 U.S.C. 291–293); the Act of March 3, 1909, as amended (47 Stat. 1487); Section 10 of the Act of August 4, 1939 (43 U.S.C. 387); the Act of October 8, 1964 (16 U.S.C. 460n et seq.); the Act of November 8, 1965 (16 U.S.C. 460q et seq.); the Act of October 2, 1968 (16 U.S.C. 90c et seq.), the Act of October 27, 1972 (16 U.S.C. 460dd et seq.); the Alaska National Interest Lands Conservation Act (16 U.S.C. 460mm–3—460mm–4); the Independent Offices Appropriations Act (31 U.S.C. 9701).

Subpart 3581—Gold, Silver, or Quicksilver in Confirmed Private Land Grants

§ 3581.0–3 Authority.

Authority for leasing gold, silver, or quicksilver in confirmed private land grants is shown in § 3580.0–3(c)(1) of this title.

§ 3581.1 Lands to which applicable.

The regulations in this subpart apply to lands in private land claims patented pursuant to decrees of the Court of Private Land Claims where the grant did not convey the rights to deposits of gold, silver and quicksilver and where the grantee has not otherwise become entitled in law or in equity to the deposits.

§ 3581.2 Who may obtain a lease.

Applications shall only be filed by, and leases issued to, the owner of the lands under the confirmed land grant; that is, the original grantee or his/her record transferee or successor in title.

§ 3581.3 Application for lease.

(a) Applications for leases shall be filed in triplicate in the proper BLM office and may include all or any part of the grant for which the applicant holds title on the date of the application. No specific form is required.

(b) Applications shall set forth the name and address of the applicant, describe the lands in which the deposits occur by legal subdivision of the public surveys, if so surveyed, otherwise by metes and bounds; or if for the entire area in the grant, the name of the grant, area and date of patent shall suffice. The mineral deposits also shall be fully described, giving character, mode of occurrence, nature of the formation, kind and character of associated minerals, if any, proposed mining methods, estimate of amount of investment necessary for successful operation of the mine(s) contemplated, estimated amount of production of gold, silver and quicksilver, or any of them, and such other pertinent information as the applicant may desire to set forth, including what he/she considers a reasonable royalty rate under the lease.

(c) The applicant also shall file with his/her application a duly authenticated abstract of title showing present ownership of the lands or a certificate of the county recorder of deeds that the record title stands in the applicant's name.

§ 3581.4 Leases.

§ 3581.4–1 Lease terms.

The lease shall be issued for a period of 20 years with a preference right in the lease to renew for a 10-year term at the end of the initial term and at the end of each 10-year period thereafter.

§ 3581.4–2 Rate of royalty; investment determined.

If the authorized officer finds the application sufficient to authorize the issuance of a lease, he/she shall establish a rate of royalty of not less than 5 percent or more than 12½ percent of the value of the output of gold, silver or quicksilver at the mine and also shall establish the amount of investment required under the lease.

§ 3581.4–3 Lease form and execution.

A lease on a form approved by the Director shall be furnished to the applicant, who shall be allowed 30 days from notice within which to execute and return the lease to the proper BLM office and to furnish the required bond.

§ 3581.5 Bond.

Prior to lease issuance, the lessee shall furnish a bond of not less than $2,000 conditioned upon compliance with all terms and conditions of the lease, including the prescribed investment requirement. The authorized officer reserves the right to increase the bond amount.

Subpart 3582—National Park Service Areas

§ 3582.0–3 Authority.

Authority for leasing mineral deposits within certain national recreation areas administered by the National Park Service is found in § 3500.0–3(c)(3) of this title.

§ 3582.1 Other applicable regulations.

§ 3582.1–1 Leasable minerals.

Except as otherwise specifically provided in this subpart, leasing of deposits of leasable minerals shall be governed by regulations in Parts 3500, 3510, 3520, 3530, 3540 and 3550 of this title.

§ 3582.1–2 Hardrock minerals.

Except as otherwise specifically provided in this subpart, leasing of deposits of hardrock minerals shall be governed by regulations in Parts 3500 and 3560 of this title.

§ 3582.2 Lands to which applicable.

§ 3582.2–1 Boundary maps.

The areas subject to the regulations in this subpart are those areas of lands and water which are shown on the following maps on file and available for public inspection in the Office of the Director of the National Park Service and in the Superintendent's office of each area. The boundaries of these areas may be revised by the Secretary as authorized in the Acts cited under § 3500.0–3(c)(3) of this title.

(a) Lake Mead National Recreation Area—the map identified as "boundary map 8360—80023.A, revised December 1979."

(b) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area—the map identified as "Proposed Whiskeytown-Shasta-Trinity National Recreation Area," numbered BOR–WEST 100%, dated July 1963.

(c) Ross Lake and Lake Chelan National Recreation Areas—the map identified as "Proposed Management Units, North Cascades, Washington," numbered MP–CAS—7002, dated October 1967.

(d) Glen Canyon National Recreation Area—the map identified as "Boundary Map Glen Canyon National Recreation Area," numbered GLC—91,008, dated August 1972.

VOL 51 ISS 77 AP 22 1986 UMI

§ 3582.2–2 Excepted areas.

The following areas shall not be opened to mineral leasing:

(a) Lake Mead National Recreation Area.

(1) All waters of Lakes Mead and Mohave and all lands within 300 feet of those lakes measured horizontally from the shoreline at maximum water surface elevations.

(2) All lands within the area of supervision of the Bureau of Reclamation around Hoover and Davis Dams and all lands within any developed and/or concentrated public use area or other area of outstanding recreational significance as designated by the Superintendent on the map (NRA–L.M. 2291A, dated July 1986) of Lake Mead National Recreation Area which is available for inspection in the Office of the Superintendent.

(b) Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area.

(1) All waters of Whiskeytown Lake an all lands within 1 mile of that lake measured from the shoreline at maximum surface elevation.

(2) All lands classified as high density recreation, general outdoor recreation, outstanding natural and historic, as shown on the map numbered 611–20, 004B, dated April 1976 entitled "Land Classification, Whiskeytown Unit, Whiskeytown-Shasta-Trinity National Recreation Area." This map is available for public inspection in the Office of the Superintendent.

(3) All lands within section 34 of Township 33 north, Range 7 west, Mt. Diablo Meridian.

(c) Ross Lake and Lake Chelan National Recreation Areas.

(1) All of Lake Chelan National Recreation Area.

(2) All lands within one-half mile of Gorge, Diablo and Ross Lakes measured from the shoreline at maximum surface elevation.

(3) All lands proposed for or designated as wilderness.

(4) All lands within one-half mile of State Highway 20.

(5) Pyramid Lake Research Natural Area and all lands within one-half mile of its boundaries.

(d) Glen Canyon National Recreation Area.

Those areas closed to mineral disposition within the natural zone, development zone, cultural zone and portions of the recreation and resource utilization zone as shown on the map numbered 80,002A, dated March 1980, entitled "Mineral Management Plan—Glen Canyon National Recreation Area." This map is available for public inspection in the Office of the Superintendent and the Office of the State Directors, Bureau of Land Management, Arizona and Utah.

§ 3582.3 Consent and consultation.

Any mineral lease or permit shall be issued or renewed only with the consent of the Regional Director, National Park Service. Such consent shall be granted only upon a determination by the Regional Director that the activity permitted under the lease or permit shall not have significant adverse effect upon the resources or administration of the area pursuant to the authorizing legislation for the area. Any lease or permit issued shall be subject to such conditions as may be prescribed by the Regional Director to protect the surface and significant resources of the area, to preserve their use for public recreation and subject to the condition that site specific approval of any activity on the leasse or permit shall be given only upon a concurrence by the Regional Director. All lease applications for reclamation withdrawn lands also shall be submitted to the Bureau of Reclamation for review.

Subpart 3583—Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area

§ 3583.0–3 Authority.

Authority for leasing mineral deposits within the Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area administered by the Forest Service is cited in § 3500.0–3(c)(4) of this title.

§ 3583.1 Other applicable regulations.

§ 3583.1–1 Leasable minerals.

Except as otherwise specifically provided in this subpart, leasing of deposits of leasable minerals shall be governed by regulations in Parts 3500, 3510, 3520, 3530, 3540 and 3550 of this title.

§ 3583.1–2 Hardrock minerals.

This subpart governs the leasing of hardrock minerals in the Shasta and Trinity Units of the Whiskeytown-Shasta-Trinity National Recreation Area. The terms and conditions of hardrock leases issued under this subpart shall be the same as those set out for hardrock leases in subpart 3561 of this title, except as specifically modified in this subpart.

§ 3583.2 Consent of Secretary of Agriculture.

Any mineral lease for lands subject to this subpart shall be issued only with the consent of the Secretary of Agriculture and subject to such conditions as he/she may prescribe after he/she finds that such disposition would not have significant adverse effects on the purpose of the Central Valley Project or the administration of the recreation area.

§ 3583.3 Applications for hardrock mineral leases.

No specific form is required. An application shall include the applicant's name and address, a statement of holdings in accordance with Subpart 3502 of this title, a description of the lands in accordance with Subpart 3501 of this title, and the name of the mineral for which the lease is desired. The applicant shall state whether the mineral applied for can be developed in paying quantities, stating the reasons therefor, and shall furnish such facts as are available to him/her respecting the known occurrence of the mineral, the character of such occurrence and its probable value as evidencing the existence of a workable deposit of such mineral. Each application shall be filed in triplicate in the proper BLM office and shall be accompanied by a nonrefundable filing fee of $25.

§ 3583.4 Hardrock mineral leases.

§ 3583.4–1 Leasing units.

Leasing units may not exceed 640 acres consisting, if the lands are surveyed, of legal subdivisions in reasonably compact form or, if the lands are not surveyed, of a square or rectangular area with north and south and east and west boundaries so as to approximate legal subdivisions, described by metes and bounds and connected to a corner of the public survey by courses and distances. The authorized officer may prescribe a lesser area for any mineral deposit if such lesser area is adequate for an economic mining operation.

§ 3583.4–2 Royalties, rentals and minimum royalties.

Rentals and royalties shall be determined by the authorized officer on the basis of the fair market value, but in no event shall be less than:

(a) A rental of 50 cents per acre or fraction thereof payable in advance until production is obtained.

(b) A minimum royalty of $1 per acre or fraction thereof payable in advance after production is obtained.

(c) A production royalty of 2 percent of the amount or value of the minerals mined, the exact amount of royalty to be fixed prior to the issuance of the lease.

§ 3583.4–3 Special terms and conditions.

Each lease shall contain provisions for the following:

(a) Diligent development of the leased property, except when operations are interrupted by strikes, the elements or casualties not attributable to the lessee, unless operations are suspended upon a showing that the lease cannot be operated except at loss because of unfavorable market conditions;

(b) Occupation and use of the surface shall be restricted to that which is reasonably necessary for the exploration, development and extraction of the leased minerals, subject to any special rules to protect the values of the recreation area;

(c) No vegetation shall be destroyed or disturbed except where necessary to mine and remove the minerals;

(d) Operations shall not be conducted in such a manner as to adversely affect the purpose of the Central Valley Project through dumping, drainage or otherwise;

(e) Structures shall not be erected or roads or vehicle trails opened or constructed without first obtaining written permission from an authorized officer or employee of the Forest Service. The permit for a road or trail may be conditioned upon the permittee's maintaining the road or trail in passable condition satisfactory to the officer in charge of the area so long as it is used by the permittee or his/her successor;

(f) Reservation of the right to add additional terms to the lease when deemed necessary by the authorized officer or employee of the Forest Service for the protection of the surface, its resources and use for recreation.

§ 3583.4–4 Duration of lease.

Leases shall be issued for period of 5 years. Any lease in good standing, upon which production in paying quantities has been obtained, shall be subject to renewal for successive 5 year terms on such reasonable terms as may be prescribed by the Secretary. An application for renewal shall be filed in triplicate in the proper BLM office at least 90 days prior to the expiration of the current lease term unless the lands included in the lease have been withdrawn at the expiration of such term.

§ 3583.4–5 Lease by competitive bidding.

Leases may be offered competitively for any lands applied for under this subpart without regard to the quantity or quality of the mineral deposit that may be present therein.

§ 3583.5 Disposal of materials.

Materials within the public lands covered by regulations in this subpart which are not subject to the provisions of §§ 3583.1–1 and 3583.1–2 of this title shall be subject to disposal under the Material Act of 1947, as amended (30 U.S.C. 601 et seq.), subject to the conditions and limitations on occupancy and operations prescribed for leases in this subpart.

Subpart 3584—Reserved Minerals in Lands Patented to the State of California for Park or Other Public Purposes

§ 3584.0–3 Authority.

Authority for leasing reserved minerals in certain lands patented to the State of California for park or other purposes is cited under § 3500.0–3(c)(2) of this title.

§ 3584.1 Lands to which applicable.

The regulations in this subpart apply to certain lands patented to the State of California for park and other public purposes.

§ 3584.2 Minerals to be leased.

Leasable and hardrock minerals are subject to lease under this subpart.

3584.3 Other applicable regulations.

Subject to regulations in this subpart, the regulations in Parts 3500, 3510, 3520, 3530, 3540, 3550 and 3560 of this title shall govern the leasing of all leasable and hardrock minerals within this area.

§ 3584.4 Notice of application.

The authorized officer shall notify the surface owner of each application received. Notice of any proposed competitive lease sale shall be given to the surface owner prior to publication of notice of sale. Should the surface owner object to leasing of any tract for reasons determined by the authorized officer to be satisfactory, the application shall be rejected and the lands shall not be offered for lease sale.

§ 3584.5 Protection of surface.

All leases issued pursuant to this subpart shall be conditioned upon compliance by the lessee with all the laws, rules and regulations of the State of California for the safeguarding and protection of plant life, scenic features and park or recreational improvements on the lands, where not inconsistent with the terms of the lease or this section. The lease also shall provide that any mining work performed upon the lease shall be located in accordance with any requirements of the State necessary for the protection of the surface rights and uses and so conducted as to result in the least possible injury to plant life, scenic features and improvements and that, upon completion of the mining operation, all excavations, including wells, shall be closed and the property shall be conditioned for abandonment to the satisfaction of the surface owner. The lease shall further provide that any use of the lands for ingress to and egress from the mine shall be on a route approved in writing by the State's authorized representative.

§ 3584.6 Terms of lease.

Leases for hardrock minerals shall issue for a period of 5 years with a preference in the lessee for renewal for a term of 5 years at the end of the initial term and at the end of each 5 year period thereafter (See Subpart 3566).

Subpart 3585—White Mountains National Recreation Area—Alaska

§ 3585.0–3 Authority.

(a) Authority for leasing minerals in the White Mountains National Recreation Area—Alaska is found in § 3500.0–3(c)(5) of this title.

(b) Authority for approving exploration licenses is section 302(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732(b)).

§ 3585.1 Lands to which applicable.

The lands subject to the regulations in this subpart are within the White Mountains National Recreation Area—Alaska which have been opened to mineral leasing and development pursuant to the findings in the land use plan for the area that such use and development would be compatible with, or would not significantly impair, public recreation and conservation of the scenic, scientific, historic, fish and wildlife or other values contributing to public enjoyment. The land use plan is on file and available for public inspection in the Bureau's Fairbanks District Office.

§ 3585.2 Other applicable regulations.

§ 3585.2–1 Leasable minerals.

Leasing of deposits of leasable minerals shall be governed by the applicable regulations in Parts 3500, 3510, 3520, 3530, 3540 and 3550 of this title.

§ 3585.2–2 Hardrock minerals.

Expect as otherwise specifically provided in §§ 3585.3 and 3585.4 of this

VOL 51 ISS 77 AP 22 1986 UMI

title for mining claimant preference right leases, the regulations in Parts 3500 and 3560 of this title shall govern the leasing of hardrock minerals.

§ 3585.3 Mining claimant preference right leases.

§ 3585.3-1 Who may obtain a mining claimant preference right lease.

Where, consistent with the land use plan, the Secretary has opened the area to mineral leasing and development, the holder of an unperfected mining claim within the White Mountains National Recreation Area—Alaska which was, prior to November 16, 1978, located, recorded and maintained in accordance with applicable Federal and State laws on lands located within the recreation area is entitled to a lease for the removal of the hardrock minerals from the mining claim(s), provided such mining claimant submits a timely application.

§ 3585.3-2 Application.

(a) An application for a mining claimant preference right lease shall be filed in triplicate in the Fairbanks District Office, Bureau of Land Management, P.O. Box 1150, Fairbanks, Alaska 99707, by the holder of an unperfected mining claim(s), within 2 years from the date the lands are opened to mineral leasing and development.

(b) No specific form is required.

(c) Each application shall be signed in ink by the applicant and shall include the following:

(1) The applicant's name and address;

(2) The serial number for each claim for which the application is made;

(3) The name of the mineral(s) for which the lease is sought; and

(4) A separate map on which the claim(s) is clearly marked.

(d) A single application may embrace any number of unperfected mining claims provided that, in the aggregate, the claims do not exceed 640 acres. The claims shall be contiguous and shall be located entirely within an area 6 miles square. Multiple applications may be submitted.

§ 3585.4 Leases.

§ 3585.4-1 Survey for leasing.

Prior to the issuance of a lease under their subpart, the applicant, at his/her own expense, shall be required to have a correct survey made under authority of a cadastral engineer, such survey to show the exterior surface boundaries of the entire lease tract, not each individual mining claim where more than one claim is involved, which boundaries are to be distinctly marked by monuments on the ground. Application for authorization of survey shall be made in accordance with Subpart 1821 of this title.

§ 3585.4-2 Terms and conditions.

Leases shall be issued on a form approved by the Director and under such terms and conditions as prescribed in the lease form and Subpart 3561 of this title. Where deemed necessary by the authorized officer, special lease stipulations also shall be included for the protection of the surface, its resources and use for recreation.

§ 3585.4-3 Relinquishment of claims.

Prior to the issuance of a lease, the applicant shall relinquish in writing any right or interest in his/her mining claim(s) as of the date the lease covering such claim(s) becomes effective.

§ 3585.5 Exploration license.

§ 3585.5-1 Exploration license.

Private parties, jointly or severally, may apply for exploration licenses to explore known hardrock mineral deposits which are not under lease or within an area subject to application and lease under § 3585.3 of this title to obtain geologic, environmental and other pertinent data concerning such deposits. Exploration licenses do not grant the licensee any preference right to a lease.

§ 3585.5-2 Other applicable regulations.

Except as otherwise specifically provided in this subpart, the regulations pertaining to land use authorizations under Part 2920 of this title shall govern the issuance of exploration licenses.

§ 3585.5-3 Exploration plan.

All applications for exploration licenses shall include an exploration plan which is in full compliance with § 3562.3-3 of this title. The approved exploration plan shall be attached to, and made a part of, the license.

§ 3585.5-4 Notice of exploration.

Applicants for exploration licenses shall publish a Notice of Exploration inviting other parties to participate in exploration under license on a pro rata cost sharing basis.

§ 3585.5-5 Contents of notice.

The Notice of Exploration prepared by the authorized officer and furnished to the applicant shall contain:

(a) The name and address of the applicant;

(b) A description of the lands;

(c) The address of the Bureau office where the exploration plan will be available for inspection; and

(d) An invitation to the public to participate in the exploration under the license.

§ 3585.5-6 Publication and posting of notice.

(a) The applicant shall publish the Notice of Exploration once a week for 3 consecutive weeks in at least 1 newspaper of general circulation nearest the area where the lands are located.

(b) The authorized officer shall post the notice in the Bureau's Alaska State Office and in the Fairbanks District Office for 30 days.

§ 3585.5-7 Notice of participation.

Any person who seeks to participate in the exploration program shall notify the authorized officer and the applicant in writing within 30 days after posting of the Notice of Exploration.

§ 3585.5-8 Decision on plan and participation.

(a) The authorized officer may issue the exploration license naming participants and acreage covered, establishing core hole spacing and resolving any other issue necessary to minimize surface disturbance and inconsistencies between the exploration plan.

(b) Upon application by the participants, a modification of the exploration plan may be approved by the authorized officer.

§ 3585.5-9 Submission of data.

The licensee shall furnish the authorized officer with copies of all data obtained during exploration. All data shall be considered confidential and not made public until the areas have been leased or until the authorized officer determines that public access to the data is not exempt from disclosure under the Freedom of Information Act, whichever occurs first.

Subpart 3586—Sand and Gravel in Nevada

§ 3586.1 Applicable laws and regulations.

The Act of June 8, 1926 (44 Stat. 708), authorizes the Secretary to dispose of the reserved minerals in certain lands patented to the State of Nevada under such conditions and under such rules and regulations as he/she may prescribe. Mineral materials, including deposits of sand and gravel, in such lands shall, except for leases granted and renewed under this subpart, be subject to disposal only under the regulations in group 3600 of this title which implement the Materials Act of 1947, as amended (30 U.S.C. 601 et seq.).

§ 3586.2 Existing leases.

Existing sand and gravel leases may be renewed at the expiration of their initial term, and at the end of each successive 5-year period thereafter, for an additional term of 5 years, under such terms and conditions as the authorized officer determines to be reasonable. An application for renewal shall be filed in triplicate in the proper BLM office within 90 days prior to the expiration of the lease term and be accompanied by a nonrefundable filing fee of $25. Prior to renewal of a lease, the lessee shall be required to file a new bond and remit advance rental for the first year of the renewal lease at the rate prescribed by the authorized officer. The rental payment shall not be less than $20. The lease shall be renewed only upon application of the lessee of record. The authorized officer shall not renew any lease that is not producing sand and gravel or is not part of an existing sand and gravel mining operation.

§ 3586.3 Transfers of lease.

Leases may be transferred in whole or in part. The regulations in Subpart 3506 of this title shall govern all such transfers.

Federal Acquisition Regulation (FAR); Price Negotiation Memorandum and Construction and Architect-Engineer Contracts; Proposed Rules

VOL 51 ISS 77 AP 22 1986 UMI

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 15

Federal Acquisition Regulation (FAR); Price Negotiation Memorandum

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering a change to Federal Acquisition Regulation (FAR) 15.808, Price negotiation memorandum.

COMMENTS: Comments should be submitted to the FAR Secretariat at the address shown below on or before May 22, 1986, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 86–19 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background

The recommended revision to FAR 15.808(a)(8) expands the existing requirements to summarize proposed recommended and negotiated amounts by specifically requiring that the summary be in terms of major cost elements. Also specifically required is the summary of the Government's negotiation objective and the "considered negotiated" amounts. This additional set of requirements applies only where cost analysis is used to determine price reasonableness. The recommended coverage does not define or list "major cost element" because of the many varied titles and descriptions of cost elements used by the thousands of contractors who are required to submit cost data to the Government in support of contract prices.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (Pub. L. 96–354) does not apply because the proposed revision is not a "significant revision" as defined in FAR 1.501–1; i.e., it does not alter the substantive meaning of any coverage in the FAR having a significant cost or administrative impact on contractors or offerors, or a significant effect beyond the internal operating procedures of the issuing agencies. Accordingly, and consistent with section 1212 of Pub. L. 98–525 and section 302 of Pub. L. 98–577 pertaining to publication of proposed regulations (as implemented in FAR Subpart 1.5, Agency and Public Participation), solicitation of agency and public views on the proposed revision is not required. Since such solicitation is not required, the Regulatory Flexibility Act does not apply. Althoug such solicitation is not required, comments are invited.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed change to FAR 15.808(a)(8) does not impose any additional reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Part 15

Government procurement.

Dated: April 16, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 15 be amended as follows:

PART 15—CONTRACTING BY NEGOTIATION

1. The authority citation for Part 15 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

2. Section 15.808 is amended by revising paragraphs (a)(8) and (a)(9) to read as follows:

15.808 Price negotiation memorandum.

* * * * *

(a) * * *

(8) A summary of the contractor's proposal, the field pricing report recommendations, and the reasons for any pertinent variances from the field pricing report recommendation. Where the determination of price reasonableness is based on cost analysis, the summary shall address each major cost element (i) proposed by the contractor, (ii) recommended by the field pricing assistance report (if any), (iii) contained in the Government's negotiation objective, and (iv) considered negotiated as a part of the price.

(9) The most significant facts or considerations controlling the establishment of the prenegotiation price objective and the negotiated price including an explanation of any significant differences between the two positions. To the extent such direction is received, the PNM shall discuss and quantify the impact of direction given by Congress, other agencies, and higher level officials (i.e., officials who would not normally exercise authority during the award and review process for the instant contract action) if the direction has had a significant effect on the action.

* * * * *

[FR Doc. 86–8889 Filed 4–21–86; 8:45 am]

BILLING CODE 6820–61–M

48 CFR Part 31

Federal Acquisition Regulation (FAR); Construction and Architect-Engineer Contracts

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulatory Council are considering a change to Federal Acquisition Regulation (FAR) 31.105, Construction and architect-engineer contracts, concerning the exclusion of unallowable costs from cost submissions that are based on the use of construction equipment cost schedules.

Comments: Comments should be submitted to the FAR Secretariat at the address shown below on or before May 22, 1986, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., Room 4041, Washington, DC 20405.

Please cite FAR Case 86–21 in all correspondence related to this issue.

FOR FURTHER INFORMATION CONTACT: Ms. Margaret A. Willis, FAR Secretariat, Telephone (202) 523–4755.

SUPPLEMENTARY INFORMATION:

A. Background

At the present time, contractors are permitted to use construction equipment ownership and operating cost schedules to determine equipment costs when actual costs cannot be determined from their accounting records. A change is being proposed which specifically precludes the acceptance of unallowable costs as the result of using such a schedule. The proposal is being made because one of the more prominent industry supported schedules was found to include some unallowable cost factors.

B. Regulatory Flexibility Act

The proposed revision of FAR 31.105 is not expected to have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.) because it represents no change in existing policy. FAR 31.109(c) already prohibits contracting officers from agreeing to a treatment of costs inconsistent with FAR Part 31. The revised wording of FAR 31.105 merely clarifies a policy which might be overlooked when predetermined equipment rate schedules are authorized for determining construction equipment ownership and operating costs.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed revision to FAR 31.105 does not impose any additional reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Part 31

Government procurement.

Dated: April 16, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Therefore, it is proposed that 48 CFR Part 31 be amended as set forth below:

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

1. The authority citation for Part 31 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

2. Section 31.105 is amended by revising paragraph (d)(2)(i)(A) to read as follows:

31.105 Construction and architect-engineer contracts.

* * * * *

(d) * * *

(2) * * *

(i) * * *

(A) Actual cost data shall be used when such data can be determined for both ownership and operating costs for each piece of equipment, or groups of similar serial or series equipment, from the contractor's accounting records. When such costs cannot be so determined, the contracting agency may specify the use of a particular schedule of predetermined rates or any part thereof to determine ownership and operating costs of contruction equipment (see subdivisons (B) and (C) below). However, costs otherwise unallowable under this Part shall not become allowable through the use of any schedule (see 31.109(c)). For example, schedules need to be adjusted for Government contract costing purposes if they are based on replacement cost, include unallowable interest costs, or use improper cost of money rates or computations. Contracting officers should review the computations and factors included within the specified schedule and ensure that unallowable or unacceptably computed factors are not allowed in cost submissions.

Acquisition Regulation Concerning Direct AID Contracts With U.S. Citizens or U.S. Resident Aliens for Personal Services Abroad; Final Rule

BEST COPY AVAILABLE

VOL 51 ISS 77 AP 22 1986 UMI

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

48 CFR Ch. 7, Appendix D

[AIDAR Notice 86-2]

Acquisition Regulation Concerning Direct AID Contracts With U.S. Citizens or U.S. Resident Aliens for Personal Services Abroad

AGENCY: Agency for International Development (AID).

ACTION: Final rule.

SUMMARY: The AID Acquisition Regulation (AIDAR) is being amended by revising and updating in its entirety, Appendix D, Direct AID Contracts With U.S. Citizens or U.S. Resident Aliens for Personal Services Abroad.

EFFECTIVE DATE: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: M/SER/PPE, Mrs. Patricia L. Bullock, telephone (703) 235-1822.

SUPPLEMENTARY INFORMATION: The AIDAR Appendix D is being amended specifically to include: (1) The addition of a pay comparability adjustment for Personal Services Contractors (PSCs) not to exceed that amount set out in each Executive Order which authorizes pay comparability adjustments to direct hire employees, (2) new health and life insurance coverage, (3) additional annual leave coverage for PSC's, (4) new salary setting procedures, (5) the requirement to use the Standard Form 171, "Personal Qualifications Statement" instead of AID Form 1420-17, "Contractor Employee Biographical Data Sheet" for each PSC, and (6) to add appropriate AIDAR clauses as well as FAR clauses.

This AIDAR Notice is not a major rule and is exempt from the requirements of Executive Order 12291 by OMB Bulletin 85-7. Therefore, the change is not considered "significant" under FAR 1.301 or FAR 1.501, and public comments have not been solicited. This Notice will not have an impact on a substantial number of small entities or require any information collection, as contemplated by the Regulatory Flexibility Act or the Paperwork Reduction Act respectively.

List of Subjects in 48 CFR Ch. 7, Appendix D,

Government procurement.

1. The Authority citation in Chapter 7, Appendix D is unchanged and continues to read as follows:

Authority: Sec. 621, 75 Stat. 445 (22 U.S.C. 2381) as amended: E.O. 12163, Sept. 29, 1979, 44 FR 56673; 3 CFR 1979 Comp., p. 435.

2. Appendix D is revised to read as follows:

Appendix D—Direct AID Contracts With U.S. Citizens or U.S. Resident Aliens for Personal Services Abroad

1. General

(a) *Purpose.* This appendix sets forth the authority, policy, and procedures under which AID contracts with U.S. citizens or U.S. resident aliens for personal services abroad.

(b) *Definitions.* For the purpose of this appendix:

(1) "Personal services" means an employer-employee relationship (see FAR 37.104).

(2) "Nonpersonal services" means an independent contractor relationship (see FAR 37.101).

(3) "U.S resident alien" means a non-U.S. citizen lawfully admitted for permanent residence in the United States.

(4) "Abroad" means outside the United States and its possessions (see FAR Subpart 2.1).

(5) "AID direct-hire employees" means civilian employees appointed under AID Handbook 25 procedures.

2. Legal Basis

(a) Section 635(b) of the Foreign Assistance Act of 1961, as amended (hereinafter referred to as the "FAA"), provides the Agency's basic contracting authority for nonpersonal services.

(b) Section 636(a)(3) of the FAA (22 U.S.C. 2396(a)(3)) authorizes the Agency to enter into personal services contracts with individuals for personal services abroad and provides further that such individuals" . . . shall not be regarded as employees of the U.S. Government for the purpose of any law administered by the Civil Service Commission."[1]

3. Applicability

(a) This appendix applies to all personal services contracts with U.S. citizens or U.S. resident aliens to provide assistance abroad under Section 636(a)(3) of the FAA. (The various sections of this appendix define the employer-employee relationship.)

(b) This appendix does not apply to:

(1) Nonpersonal services contracts with U.S. citizens or U.S. resident aliens; such contracts are covered by the basic text of the FAR and the AIDAR.

(2) Personal services contracts with individual cooperating country nationals (CCNs) or third-country nationals (TCNs); such contracts are covered by Appendix J of this chapter.

(3) Other personal services arrangements covered by *AID Handbook 25—Employment and Promotion.*

(4) Interagency agreements (e.g., PASAs and RSSAs) covered by *AID Handbook 12—Use of Federal Agencies.*

4. Policy

(a) *General.* AID may finance, with either program or operating expense (OE) funds, the cost of personal services as part of the Agency's program of foreign assistance by entering into a direct contract with an individual U.S. citizen or U.S. resident alien for personal services abroad.

(b) *Limitations on personal services contracts.*

(1) Personal services contracts may only be used when adequate supervision is available.

(2) Personal services contracts may be used for commercial activities. Commercial activities provide a product or service which could be obtained from a commercial source. See Attachment A of OMB Circular A-76 for a representative list of such activities.

(3) Personal services contracts may be used for Governmental functions (defined by OMB Circular A-76 as functions so intimately related to the public interest as to mandate performance by Government employees) *except:*

(i) Negotiating on behalf of the United States with foreign governments and public international organizations. Note: Negotiating on behalf of the United States with private individuals and entities is permitted.

(ii) Entering into any agreement (e.g., loan, grant, contract) on behalf of the United States.

(iii) Making decisions involving governmental functions such as planning, budget, programming and personnel selection. Services will be limited to making recommendations with final decision-making authority reserved for authorized AID direct-hire employees.

(iv) Supervision of AID direct-hire U.S. citizen employees.

(c) *Withholdings and Fringe Benefits.*

(1) Personal services contractors (PSCs) are Government employees and are therefore subject to social security (FICA) and Federal income tax (FIT) withholdings. As employees, they are ineligible for the "foreign earned income" exclusion under the IRS regulations (see 26 CFR 1.911-3(c)(3)).

(2) Personal Services Contractors are treated on par with other Government employees, *except* for programs based on any law administered by the Federal Office of Personnel Management (e.g., incentive awards, life insurance, health insurance, and retirement programs covered by 5 CFR Parts 530, 531, 831, 870, 871, and 880). While PSCs are ineligible to participate in any of these programs, the following fringe benefits are provided as a matter of policy:

(i) The employer's FICA contribution for retirement purposes;

(ii) A contribution against the actual costs of the PSC's annual health insurance costs. Such contribution: (1) Shall not exceed 50% of the actual costs of the PSC's annual health insurance and (2) shall not exceed the maximum U.S. Government contribution for direct-hire personnel as announced annually by the Office of Personnel Management.

(iii) A maximum contribution of up to 50% against the actual costs of the PSC's annual life insurance costs, not to exceed $500.00 per year.

(iv) PSCs shall receive the same percentage pay comparability adjustment as U.S. Government employees;

(v) PSCs shall receive the following allowances and differentials provided in the State Department's Standardized Regulations (Government Civilians Foreign Areas) on the same basis as U.S. Government employees:

(A) temporary lodging allowance (Section 120),[2]

(B) living quarters allowance (Section 130),[2]

(C) post allowance (Section 220),[2]

(D) supplemental post allowance (Section 230),[2]

(E) separate maintenance allowance (Section 260),[2]

(F) education allowance (Section 270),[2]

(G) educational travel (Section 280),[2]

(H) post differential (Chapter 500),

(I) payments during evacuation/authorized departure (Section 600), and

(J) danger pay (Section 650).

Any allowance or differential that is not *expressly stated* in this paragraph is not authorized for any PSC;

(vi) PSCs and their authorized dependents shall be entitled to health room services of the same type that are normally provided to AID direct-hire U.S. citizen employees. See General Provision entitled "Post of Assignment Privileges."

(vii) PSCs are eligible to receive benefits for injury, disability, or death under the Federal Employees' Compensation Act since the law is administered by the Department of Labor, not the Office of Personnel Management.

(viii) PSCs are eligible to earn four hours of annual leave and four hours of sick leave for each two week period. However, PSCs with previous PSC service (not previous U.S. Government civilian or military service) earn *either* six hours of annual leave for each two week period if their previous PSC service exceeds 3 years, *or* eight hours of annual leave for each two week period if their previous PSC service exceeds 15 years.

(d) A PSC who is a spouse of current or retired Civil Service, Foreign Service, or Military Service member and who is covered by their spouse's Government health or life insurance policy is ineligible for the contribution under paragraph 4(c)(2)(ii) or (2) (iii) of this appendix.

(e) Retired U.S. Government employees may be awarded personal services contracts without any reduction in or offset against their Government annuity.

(f) *Salary Setting.*

(1) Salaries for personal services contractors shall be based on the salary established for the position being recruited for or the PSC's current earnings (as adjusted under (f)(2) and (f)(3) below), except as provided in paragraphs (f)(4) through (f)(7) below. Current earnings must be certified by the contractor on the SF 171, "Personal Qualifications Statement" (see paragraph 6(b)(3) of this appendix); the form must be retained in the permanent contract file.

(2) As a rule, up to a 3 percent increase above current earnings may be given. However, a 3 percent increase is awarded only to a PSC whose earnings are based on a period of twelve months or more; 2 percent for established earnings of less than twelve months but not less than four months; or 1 percent for established earnings during the past four months.

(3) Additional percentages may be given for the following factors. If a PSC has worked in a developing country for more than two years, an additional 1 percent is awarded. Education related to the area of specialization and above the minimum qualification required warrants an additional 1 percent, and those specialties for which there is keen competition in the employment market or a serious shortage category nationwide are awarded an additional 2 percent. In addition, related technical experience over 5 years increases the percentage by 1 and over ten years by 3.

(4) When an applicant has no current earnings history (e.g., a person returning to the workforce after an absence of a number of years) or when an applicant's current earnings history doesn't accurately reflect the applicant's job market worth (e.g., a Peace Corps volunteer), the salary set for the position should be used, notwithstanding the lack of a current earnings history, provided that the applicant has the full qualifications for the job and could command a similar salary in the open job market.

(5) All requests for an initial rate of pay above 10 percent over current earnings must be approved in writing by the appropriate Regional Assistant Administrator or Mission Director. Current earnings are actual earnings for work reasonably related to the position for which the applicant is being considered.

(6) Salaries in excess of the FS-1 level must also be approved by the appropriate Regional Assistant Administrator or Mission Director, as provided for in Appendix G of this chapter.

5. Soliciting for Personal Services Contracts [Reserved]

6. Negotiating a Personal Services Contract [Reserved]

7. Executing a Personal Services Contract

Contracting activities, whether AID/W or Mission, may execute personal services contracts, provided that the amount of the contract does not exceed the contracting authority that has been redelegated to them under Delegation of Authority No. 148, "To the Assistant to the Administrator for Management, Concerning Acquisition Functions" (50 FR 23642), as amended.

In executing a contract, the Contracting Officer shall ensure that:

(a) The following clearances, approvals and forms have been obtained and placed in the contract file before the contract is signed by both parties:

(1) Security clearance, including the completed SF 86, to the extent required by AID Handbook 6, *Security;*

(2) Mission and host country clearance, as appropriate;

(3) Medical clearance(s) based on a full medical examination(s) and certification of same by a licensed physician (medical clearance requirements apply to the contractor and to each dependent who is authorized to travel to the overseas post);

(4) An executed IRS Form W-4 (2 copies) (one copy of the executed W-4 shall be sent to the Controller of the Paying Office);

---

[1] The Civil Service Commission is now the Federal Office of Personnel Management.

[2] Mission Directors may authorize per diem in lieu of these allowances.

[3] These allowances are not authorized for short tours (i.e., less than a year).

VOL 51 ISS 77 AP 22 1986

(5) The approval for any salary in excess of PS-1, in accordance with appendix G of this chapter;

(6) Appropriate explanation and support required by AIDAR 706.302-70, if applicable;

(7) Any deviation to the policy or procedures of this appendix, processed and approved under AIDAR 701.470;

(8) A fully executed SF 171;

(9) The memorandum of negotiation;

(10) The Contract Negotiator's Checklist;

(b) Funds for the contract are properly obligated to preclude violation of the Anti-Deficiency Act, 31 U.S.C. 665 (the contracting officer ensures that the contract has been properly recorded by the appropriate accounting office prior to its release for the signature of the selected contractor);

(c) The Contractor receives and understands Attachment 2C of Chapter 2, AID Handbook 24, *General Personnel Policy*, entitled "Employee Responsibilities and Conduct," and a copy is attached to each Contract, as provided for in paragraph 2(c) of the General Provision (Section 11);

(d) Agency conflict of interest requirements, as set out in Chapter 2D and 2F of AID Handbook 24, are met by the contractor prior to his/her reporting for duty;

(e) The contract is modified by deleting from the general provisions (Sections 11, and 12 of this appendix) the inapplicable portion(s) of the provisions entitled "Allowances", "Travel and Transportation Expenses" and the medical clearance of dependents residing with the contractor at post if the contractor is a resident of the cooperating country (resident hire employee) when the contract is awarded; specifically, resident hire employees are not eligible for:

(1) The accrual and granting of home leave and home leave travel;

(2) Rest and Recuperation (R&R) travel, except as a dependent of a U.S. Government employee, or an AID participating agency employee who is eligible for travel (see HB 22, Attachment 1);

(3) Separation travel and transportation of efforts; and

(4) Storage of household and personal effects; and

(f) The block entitled, "Project No." on the cover page of the Contract format is completed by inserting the four-segment project number as prescribed in AID Handbook 18, *Information Services*.

8. Post Audit

The Inspector General, or his/her designee, audits the personal services contracts of all contracting activities for the purpose of ensuring conformance to applicable policy and regulations.

9. Contracting Format

The prescribed Contract Cover Page, Contract Schedule, General Provisions, and Additional General Provisions for personal services contracts covered by this appendix are included as follows:

10. Form AID 1420-36, "Cover Page" and "Schedule"

11. "General Provisions"

12. "Additional Provisions"

13. FAR Clauses to be incorporated by reference in personal services contracts.

The United States of America, hereinafter called the Government, represented by the Contracting Officer executing this contract, and the Contractor agree that the Contractor shall perform all the services set forth in the attached Schedule, for the consideration stated therein. The rights and obligations of the parties to this contract shall be subject to and governed by the Schedule and the General Provisions. To the extent of any inconsistency between the Schedule or the General Provisions and any specifications or other provisions which are made a part of this contract, by reference or otherwise, the Schedule and the General Provisions shall control. To the extent of any inconsistency between the Schedule and the General Provisions, the Schedule shall control.

SPECIAL NOTE: As an employee under 22 U.S.C. 2396(a)(3), the Contractor is subject to both FICA and Federal Income Tax withholding.

Privacy Act Statement

This information is provided pursuant to Public Law 93–579 (Privacy Act of 1974), December 31, 1974, for individuals who complete this form.

The Executive Office of the President, Office of Management and Budget has required that all departments and agencies comply with the reporting requirements of Section 6041 of the Internal Revenue Code. Section 6041 states that all departments and agencies making payments totalling $600.00 or more in one year to a recipient for services provided must be reported to the Internal Revenue Service (IRS). The SSN and all financial numbers will be disclosed to Agency for International Development (AID) payroll office personnel and personnel in the Department of the Treasury, Division of Disbursements. AID will use this SSN to complete Form W–2 of the Code on employee compensation. Disclosure by the personal services contractor of the SSN is necessary to obtain the services, benefits or processes provided by this contract. Disclosure of the SSN may be made outside AID (a) pursuant to any applicable routine use listed in AID's Notice for implementing the Privacy Act as published in the Federal Register, or (b) when disclosure by virture of a contract being a public document after signatures is authorized under the Freedom of Information Act.

TABLE OF CONTENTS

Schedule

The Schedule on pages 2 through 5 consists of this Table of Contents and the following Articles:

Articles:
Article I—Statement of Duties
Article II—Period of Service Overseas
Article III—Contractor's Compensation and Reimbursement in U.S. Dollars
Article IV—Costs Reimbursable and Logistic Support
Article V—Precontract Expenses
Article VI—Additional Clauses

General Provisions

The following provisions numbered as shown below omitting number(s) ———, are the General Provisions (GPs) of this Contract:

1. Definitions
2. Laws and Regulations Applicable Abroad
3. Physical Fitness
4. Workweek and Compensation (Pay Comparability Adjustments)
5. Leave and Holidays
6. Differential and Allowances
7. Social Security and Federal Income Tax
8. Advance of Dollar Funds
9. Insurance
10. Travel and Transportation Expenses
11. Preference for U.S.-Flag Air Carriers (FAR 52.247–63)
12. Payment
13. Conversion of U.S. Dollars To Local Currency
14. Post of Assignment Privileges
15. Security Requirements
16. Contractor-Mission Relationships
17. Termination (FAR 52.249–2)
18. Disputes (FAR 52.233–1 Alternate I)
19. Release of Information
20. Officials Not to Benefit
21. Convenant Against Contingent Fees
22. Notices
23. Reports
24. Use of Pouch Facilities

For a tour of duty of 1 year or more, "Additional General Provisions (AGP)" will be attached and be applicable to this contract. References to individual clauses should specify for example, "GP 9" (insurance), or "AGP 34" (termination).

Schedule

Note.—Use of the following Schedule articles are not mandatory. They are intended to serve as guidelines for contracting offices in drafting contract schedules. Article language may be changed to suit the needs of the particular contract.

Article I—Statement of Duties

(The statement of duties shall include:

A. General statement of the purpose of the contract.

B. Statement of duties to be performed.

C. Any AID Consultation or orientation.)

Article II—Period of Service Overseas

Within ——— days after written notice from the Contracting Officer that all clearances, including the doctor's certificate required under General Provisions Clause 3, have been received or unless another date is specified by the Contracting Officer in writing, the contractor shall proceed to ——— where he/she shall promptly commence performance of the duties specified above. The contractor's period of service overseas shall be approximately ——— in ———. (Specify time of duties in each location as well as authorized stopovers with purpose of each.)

Article III—Contractor's Compensation and Reimbursement in U.S. Dollars

A. Except to the extent reimbursement therefor is payable in the currency of the Cooperating Country pursuant to Article IV, AID shall pay the contractor compensation after it has accrued and reimburse him/her in U.S. dollars for necessary and reasonable costs actually incurred by him/her in the performance of this contract within the categories listed in paragraph C, below, and subject to the conditions and limitations applicable thereto as set out herein and in the attached General Provisions (GP).

B. The amount budgeted and available as personal compensation to the contractor is calculated to cover a calendar period of approximately ——— (days) (weeks) (months) (years) (which is to include (1) vacation, sick, and home leave which may be earned during the contractor's tour of duty (GP Clause No. 5, AGP Clause No. 29), (2) ——— days for authorized travel (GP Clause 10(b)), and (3) ——— days for orientation and consultation in the United States.

C. Allowable Costs:

1. Compensation at the rate of $——— per (year) (month) (week) (day). Adjustments in compensation (pay) for periods when the contractor is not in compensable pay status shall be calculated as follows: Rate of $——— per (day) (hour).

Contingency for Compensation (Pay Comparability) Adjustments. $———.

2. Overtime (Unless specifically authorized in the Schedule of this contract, no overtime hours shall be allowed hereunder.) $———

*3. Overseas Differential (Ref. GP Clause No. 6.) Rate ——— and Contingency $——— $———

**4. Allowances in Cooperating Country (Ref. GP Clause 6 and AGP Clause 30.) $———

**5. Travel and Transportation (Ref. GP Clause 10 and AGP Clause 31.) (Includes the value of GTRs furnished by the Government, not payable to Contractor). $———

a. United States $———
b. International $———
c. Cooperating and Third Country $———

Subtotal Item 5 $———

**6. Subsistence or Per Diem (Ref. GP Clause 10 and AGP Clause 31.)

a. United States $———
b. International $———
c. Cooperating and Third Country $———

Subtotal Item 6 $———

7. Other Direct Costs.

a. Health and Life Insurance Ref. GP (Clause 9–b.) $———
b. Precontract Costs, passport, visa, inoculations, etc. (Ref. GP Clause 8.) $———
c. Physical Examination (Ref. GP Clause 3 and AGP Clause 23.) $———
d. Communications, Miscellaneous. $———

Subtotal Item 7 $———

8. F.I.C.A.—U.S.C. contribution (not payable to contractor). $———

*If post differential is applicable to the assigned post, a contingency for the adjusted amount of differential resulting from compensation (pay comparability) adjustment should be included.

**Do not include the value of any costs to be paid or reimbursed in local currency.

Total estimated costs (lines 1 thru 8). $———

D. Maximum U.S.-Dollar Obligation:

In no event shall the maximum U.S.-dollar obligation under this contract exceed $———. Contractor shall keep a close account of all obligations he/she incurs and accrues hereunder and promptly notify the Contracting Officer whenever in his/her opinion the said maximum is not sufficient to cover all compensation and costs reimbursable in U.S. dollars which he/she anticipates under the contract.

Article IV—Costs Reimbursable and Logistic Support

A. General:

The contractor shall be provided with or reimbursed in local currency ( ) for the following:

[Complete]

B. Method of Payment of Local Currency Costs:

Those contract costs which are specified as local currency costs in paragraph A above, if not furnished in kind by the cooperating government or the Mission, shall be paid to the contractor in a manner adapted to the local situation, based on vouchers submitted in accordance with General Provision Clause 12. The documentation for such costs shall be on such forms and in such manner as the Mission Director shall prescribe.

Article V—Precontract Expenses

No expense incurred before execution of this contract will be reimbursed unless such expense was incurred after receipt and acceptance of a precontract expense letter issued to the contractor by the Contracting Officer, and then only in accordance with the provisions and limitations contained in such letter. The rights and obligations created by such letter shall be considered as merged into this contract.

Article VI—Additional Clauses

(Additional Schedule clauses may be added such as the implementation of General Provisions or Additional General Provisions clauses.)

Section 11. General Provisions

Contract With a U.S. Citizen or a U.S. Resident Alien for Personal Services Abroad

The following clauses are to be used for tours of duty of less than 1 year. For tours of duty of 1 year or more these "General Provisions" will be supplemented by the "Additional General Provisions", Section 12.

Index of Clauses

1. Definitions (DEC 1985)
2. Laws and Regulations Applicable Abroad (DEC 1985)
3. Physical Fitness (DEC 1985)
4. Workweek and Compensation (Pay Comparability Adjustments) (DEC 1985)
5. Leave and Holidays (DEC 1985)
6. Differential and Allowances (DEC 1985)
7. Social Security and Federal Income Tax (DEC 1985)
8. Advance of Dollar Funds (DEC 1985)
9. Insurance (DEC 1985)
10 Travel and Transportation Expenses (DEC 1985)
11. Preference for U.S.-Flag Air Carriers (APR 1984) (FAR 52.247–63)
12. Payment (DEC 1985)
13. Conversion of U.S. Dollars to Local Currency (DEC 1985)
14. Post of Assignment Privileges (DEC 1985)
15. Security Requirements (DEC 1985)
16. Contractor-Mission Relationships (DEC 1985)
17. Termination (APR 1984) (FAR 52.249–12)
18. Disputes (APR 1984) [(FAR 52.233–1) (Alternate I)]
19. Release of Information (DEC 1985)
20. Officials Not to Benefit [(APR 1984) (FAR 52.203–5)]
21. Covenant Against Contingent Fees [(DEC 1985) (FAR 52.203–5)]
22. Notices (DEC 1985)
23. Reports (DEC 1985)
24. Use of Pouch Facilities (DEC 1985)

1. Definitions (Dec. 1985)

(a) "Administrator" shall mean the Administrator or the Deputy Administrator of AID.

(b) "AID" shall mean the Agency for International Development.

(c) "Contracting Officer" shall mean a person with the authority to enter into, administer, and/or terminate contracts and make related determinations and findings. The term includes certain authorized representatives of the Contracting Officer acting within the limits of their authority as delegated by the Contracting Officer.

(d) "Contractor" shall mean the individual engaged to serve in the Cooperating Country under this Contract.

(e) "Cooperating Country" shall mean the foreign country in or for which services are to be rendered hereunder.

(f) "Cooperating Government" shall mean the government of the Cooperating Country.

(g) "Economy class" air travel (also known as jet-economy, air coach, tourist-class, etc.) shall mean a class of travel which is less than first class.

(h) "Government" shall mean the United States Government.

(i) "Local currency" shall mean the currency of the Cooperating Country.

(j) "Mission" shall mean the United States AID Mission to, or principal AID office in, the Cooperating Country.

(k) "Mission Director" shall mean the principal officer in the Mission in the Cooperating Country, or his/her designated representative.

(l) "Tour of duty" shall mean the Contractor's period of service under this Contract and shall include orientation in the United States (less language training), authorized leave, and international travel.

(m) "Traveler" shall mean the Contractor in authorized travel status.

(n) "Project Officer" shall mean the AID official to whom the Contractor reports, and who is responsible for monitoring the Contractor's performance.

(o) "U.S. Resident alien" as used in this contract shall mean an alien immigrant, legally resident in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States, and having a valid "Alien Registration and Receipt Card" (Immigration and Naturalization Service forms I–151 or I–551).

2. Laws and Regulations Applicable Abroad (Dec. 1985)

(a) Conformity to Laws and Regulations of the Cooperating Country.

Contractor agrees that, while in the cooperating country, he/she shall abide by all applicable laws and regulations of the cooperating country and political subdivision thereof.

(b) Purchase or Sale of Personal Property or Automobiles.

To the extent permitted by the cooperating country, the purchase, sale, import, or export of personal property or automobiles in the cooperating country by the Contractor shall be subject to the same limitations and prohibitions which apply to Mission U.S.-citizen direct-hire employees.

(c) Code of Conduct.

The Contractor shall, during his/her tour of duty under this Contract, be

VOL 51 ISS 77 AP 22 1986 UMI

considered an "employee" (or if his/her tour of duty is for less than 130 days, a "special Government employee") for the purposes of, and shall be subject to, the provisions of 22 CFR 10, "Employee Responsibilities and Conduct" (Attachment 2C to Chapter 2 of AID Handbook 24). The Contractor acknowledges receipt of a copy of said provisions by his/her acceptance of this Contract.

3. Physical Fitness (Dec. 1985)

The Contractor shall be required to be examined by a licensed doctor of medicine, and the Contractor shall obtain from the doctor a certificate that, in the doctor's opinion, the Contractor is physically qualified to engage in the type of activity for which he/she is to be employed under the Contract and is physically qualified to reside in the cooperating in the cooperating country. A copy of the certificate shall be provided to the Contracting Officer prior to the Contractor's departure for the cooperating country, or if this Contract is entered into in the cooperating country, the Contractor shall provide the certificate before he/she starts work under the Contract. The Contractor shall be reimbursed not to exceed $100 for the cost of the physical examination, plus reimbursement of charges for immunizations if such costs are not covered by the Contractor's health insurance policy.

4. Workweek and Compensation (Pay Comparability Adjustments) (Dec. 1985)

(a) Workweek.

The Contractor's workweek shall not be less than 40 hours, unless otherwise provided in the Contract Schedule, and shall coincide with the workweek for those employees of the Mission or the cooperating country agency most closely associated with the work of this Contract. If the Contract is for less than full time (40 hours weekly), the annual and sick leave earned shall be prorated (see the General Provision of this Contract entitled Leave and Holidays).

(b) Compensation (Pay Comparability) Adjustments.

The Contractor's compensation shall be adjusted to reflect the pay comparability adjustments which are granted from time to time to U.S. direct-hire employees by Executive Order for the statutory pay systems. Any adjustments authorized shall not exceed that percentage stated in the Executive Order granting the adjustment. Further, the adjusted compensation may not exceed the maximum FS–1 annual compensation (or the equivalent daily rate).

5. Leave and Holidays (Dec. 1985)

(a) Vacation Leave.

(1) The Contractor shall earn vacation leave at the rate of 13 workdays per annum or 4 hours every 2 weeks. However, no vacation shall be earned if the tour of duty is less than 90 days.

(2) Notwithstanding paragraph (a)(1) of this provision, if the Contractor has had previous PSC service (i.e., has served under other personal services contracts (PSCs) covered by Sec. 636(a)(3) of the FAA), the Contractor shall earn vacation leave at the rate of either 6 hours every two weeks for cumulative PSC service exceeding 3 years or 8 hours every two weeks for cumulative PSC service exceeding 15 years. Former Civil Service, Foreign Service, or a Military Service experience is not creditable towards PSC service for annual leave purposes.

(3) It is understood that vacation leave is provided under this Contract primarily for the purposes of affording necessary rest and recreation during the tour of duty in the cooperating country. The Contractor in consultation with the AID Mission shall develop a vacation leave schedule early in his/her tour of duty taking into consideration project requirements, employee preference and other factors. All vacation leave earned by the Contractor must be used during the his/her tour of duty. All vacation leave earned by the Contractor but not taken by the end of the his/her tour of duty will be forfeited unless otherwise approved in writing by the Contracting Officer or Mission Director.

(b) Sick Leave.

Sick leave is earned at a rate not to exceed 13 work-days per annum or 4 hours every 2 weeks. Unused sick leave may be carried over under an extension of this Contract but the Contractor will not be compensated for unused sick leave at the completion of this Contract.

(c) Leave Without Pay.

Leave without pay may be granted only with the written approval of the Contracting Officer or Mission Director.

(d) Holidays.

The Contractor, while serving abroad, shall be entitled to all holidays granted by the Mission to U.S.-citizen direct-hire employees.

(e) Leave Records.

The Contractor shall maintain current leave records for himself/herself and make them available, as requested by the Mission Director or the Contracting Officer.

6. Differential and Allowances (Dec. 1985)

(a) The following differential and allowances will be granted to the Contractor to the same extent and on the same basis as they are granted to U.S.-citizen direct-hire employees at the Mission by the Standardized Regulations (Government Civilians, Foreign Areas), as from time to time amended, except as noted to the contrary below:

Applicable Reference to Standardized Regulations

(1) Post Differential—Chapter 500 and Tables in Chapter 900
(2) Living Quarters Allowance—Section 130
(3) Temporary Lodging Allowance—Section 120
(4) Post Allowance—Section 220
(5) Supplemental Post Allowance—Section 230
(6) Payments During Evacuation—Section 600

(i) Post differential.

Post differential is an additional compensation for service at places in foreign areas where conditions of environment differ substantially from conditions of environment in the continental United States and warrant additional compensation as a recruitment and retention incentive. In areas where post differential is paid to AID direct-hire employees, post differential not to exceed the percentage of salary as is provided such AID employees in accordance with the Standardized Regulations (Government Civilians, Foreign Areas) Chapter 500 (except the limitation contained in Section 552, "Ceiling on Payment") Tables-Chapter 900, as from time to time amended, will be reimbursable hereunder for employees in respect to amounts earned during the time such employees actually spend overseas on work under this contract. When such post differential is provided to the Contractor, it shall be payable beginning on the date of arrival at the post of assignment and continue, including periods away from post on official business, until the close of business on the day of departure from post of assignment en route to the United States. Sick or vacation leave taken at or away from the post of assignment will not interrupt the continuity of the assignment or require a discontinuance of such post differential payments, provided such leave is not taken within the United States or the territories of the United States. Post differential will not be payable while the employee is away from his/her post of assignment for purposes of home leave. Short-term employees shall be entitled to post differential beginning with the forty-third (43rd) day at post.

(ii) Living quarters allowance.

Living quarters allowance is an allowance granted to reimburse an employee for substantially all of his/her cost for either temporary or residence quarters whenever Government-owned or Government-rented quarters are not provided to him/her at his/her post without charge. Such costs are those incurred for temporary lodging (temporary lodging allowance) or one unit of residence quarters (living quarters allowance) and include rent, plus any cost not included therein for heat, light, fuel, gas, electricity and water. The temporary lodging allowance and the living quarters allowance are never both payable to an employee for the same period of time. The Contractor will receive living quarters allowance for payment of rent and utilities if such facilities are not supplied. Such allowance shall not exceed the amount paid AID employees of equivalent rank in the Cooperating Country, in accordance with either the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 130, as from time to time amended, or other rates approved by the Mission Director. Subject to the written approval of the Mission Director, short-term employees may be paid per diem (in lieu of living quarters allowance) at rates prescribed by the Federal Travel Regulations, as from time to time amended, during the time such short-term employees spend at posts of duty in the Cooperating Country under this contract. In authorizing such per diem rates, the Mission Director shall consider the particular circumstances involved with respect to each such short-term employee including the extent to which meals and/or lodging may be made available without charge or at nominal cost by an agency of the United States Government or of the Cooperating Government, and similar factors.

(iii) Temporary lodging allowance.

Temporary lodging allowance is a quarters allowance granted to an employee for the reasonable cost of temporary quarters incurred by the employee and his/her family for a period not in excess of: (i) Three months after first arrival at a new post in a foreign area or a period ending with the occupation of residence (permanent) quarters, if earlier, and (ii) one (1) month immediately preceding final departure from the post subsequent to the necessary vacating of residence quarters. The Contractor will receive temporary lodging allowance for himself/herself and authorized dependents, in lieu of living quarters allowance, not to exceed the amount set forth in the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 120, as from time to time amended.

(iv) Post allowance.

Post allowance is a cost-of-living allowance granted to an employee officially stationed at a post where the cost of living, exclusive of quarters cost, is substantially higher than in Washington, D.C. The Contractor will receive post allowance payments not to exceed those paid AID employees in the Cooperating Country, in accordance with the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 220, as from time to time amended.

(v) Supplemental post allowance.

Supplemental post allowance is a form of post allowance granted to an employee at his/her post when it is determined that assistance is necessary to defray extraordinary subsistence costs. The Contractor will receive supplemental post allowance payments not to exceed the amount set forth in the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 230, as from time to time amended.

(vi) Payments during evacuation.

The Standardized Regulations (Government Civilians, Foreign Areas) provide the authority for efficient, orderly, and equitable procedure for the payment of compensation, post differential and allowances in the event of an emergency evacuation of employees or their dependents, or both, from duty stations for military or other reasons or because of imminent danger to their lives. If evacuation has been authorized by the Mission Director, the Contractor will receive payments during evacuation for himself/herself and authorized dependents evacuated from their post of assignment in accordance with the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 600, and the Federal Travel Regulations, as from time to time amended.

The allowances provided in paragraphs (a)(1) through (a)(6) of this provision shall be paid to the Contractor in dollars or in the currency of the cooperating country in accordance with the practice prevailing at the Mission, or the Mission Director may direct that the Contractor be paid a per diem in lieu thereof as prescribed by the Standardized Regulations (Government Civilians, Foreign Areas), as from time to time amended.

(b) The Contractor shall not be eligible for any allowance, differential, or other employment benefit that is not expressly authorized by AIDAR Appendix D.

7. Social Security and Federal Income Tax (Dec. 1985)

(a) Since the Contractor is an employee, F.I.C.A. contributions and U.S. Federal Income Tax withholding shall be deducted in accordance with regulations and rulings of the Social Security Administration and the U.S. Internal Revenue Service, respectively.

(b) As an employee, the Contractor is not eligible for the "foreign earned income" exclusion under the IRS regulations (see 26 CFR 1.911–3(c)(3)).

8. Advance of Dollar Funds (Dec. 1985)

If requested by the Contractor and authorized in writing by the Contracting Officer, AID will arrange for an advance of funds to defray the initial cost of travel, travel allowances, authorized precontract expenses, and shipment of personal property. The advance shall be granted on the same basis as to an AID U.S.-citizen direct-hire employee in accordance with AID Handbook 22, Chapter 4.

9. Insurance (Dec. 1985)

(a) Worker's Compensation Benefits.

The Contractor shall be provided worker's compensation benefits in accordance with the Federal Employees Compensation Act.

(b) Health and Life Insurance.

(1) The Contractor shall be provided a maximum contribution of up to 50% against the actual costs of the Contractor's annual health insurance costs, provided that such costs may not exceed the maximum U.S. Government contribution for direct-hire personnel as announced annually by the Office of Personnel Management.

(2) The Contractor shall be provided a contribution of up to 50% against the actual costs of annual life insurance not to exceed $500.00 per year.

(3) A Contractor who is a spouse of a current or retired Civil Service, Foreign Service, or Military Service member and who is covered by their spouse's Government health or life insurance policy is ineligible for the contribution under paragraphs (a)(1) or (a)(2) of this provision. Proof of insurance coverage shall be submitted to the Contracting Officer before any contribution is paid.

(c) Insurance on Private Automobiles.

If the Contractor or his/her dependents transport, or cause to be transported, privately owned automobile(s) to the cooperating country, or any of them purchase an automobile within the cooperating country, the Contractor agrees to ensure

VOL 51 ISS 77 AP 22 1986 UMI

that all such automobile(s) during such ownership within the cooperating country will be covered by a paid-up insurance policy issued by a reliable company providing the following minimum coverages, or such other minimum coverages as may be set by the Mission Director, payable in U.S. dollars or its equivalent in the currency of the cooperating country: injury to persons, $10,000/$20,000; property damage, $5,000. The Contractor further agrees to deliver, or cause to be delivered to the Mission Director, the insurance policies required by this clause or satisfactory proof of the existence thereof, before such automobile(s) is operated within the cooperating country. The premium costs for such insurance shall not be a reimbursable cost under this Contract.

(d) Claims for Private Personal Property Losses.

The Contractor shall be reimbursed for private personal property losses in accordance with AID Handbook 23, Chapter 10.

10. Travel and Transportation Expenses (Dec. 1985)

(a) General.

AID/Washington Office of Management Operations, or such other office as may be designated by that office, may furnish Transportation Requests (TR's) to the Contractor for transportation originating in the United States authorized by this Contract, and the executive or administrative officer at the Mission may furnish TR's for such authorized transportation which is payable in local currency or is to originate overseas. When transportation is not provided by the Government-issued TR, the Contractor shall procure his/her own transportation, the costs of which will be reimbursed in accordance with the following.

(b) Travel and Transportation.

(1) U.S. Travel and Transportation.

The Contractor shall be reimbursed for actual transportation costs and travel allowances in the United States as authorized in the Contract Schedule or approved in advance by the Contracting Officer or the Mission Director. Transportation costs and travel allowances shall not be reimbursed in any amount greater than the cost of, and time required for, economy-class commercially scheduled air travel by the most expeditious route except as otherwise provided in paragraph (b)(2)(vi) of this provision unless economy air travel is not available and the Contractor certifies to this in his/her voucher or other documents submitted for reimbursement.

(2) International Travel.

(i) The Contractor shall be reimbursed for actual transportation costs and travel allowances from place of residence in the United States (or other location, provided that the cost of such travel does not exceed the cost of travel from the place of residence) to post of duty in the cooperating country and return to place of residence in the United States (or other location, provided that the cost of such travel does not exceed the cost of travel from the post of duty to the place of residence) upon completion of his/her duties. Such transportation costs shall not be reimbursed in an amount greater than economy-class commercially scheduled air travel by the most expeditious route, except as otherwise provided in paragraph (b)(2)(vi) of this provision, unless economy air travel or economy air space are not available and the Contractor certifies to the facts in the voucher or other document he/she submits for reimbursement. When travel to or from the cooperating country is by economy-class accommodations, the Contractor will be reimbursed for the cost of transporting up to 44 pounds gross weight of accompanied personal baggage in addition to that regularly allowed with the economy ticket, provided that the total number of pounds of baggage does not exceed that regularly allowed for first-class travelers. Travel allowances shall be at the rate of $6 per day for not more than the travel time required by scheduled economy-class commercial air carrier using the most expeditious route and computed in accordance with the Federal Travel Regulations, as from time to time amended. One stopover en route for a period not to exceed 24 hours is allowable when the Contractor uses economy-class accommodations for a trip of 14 hours or more of scheduled duration. Such stopover shall not be authorized when travel is by indirect route for the convenience of the Contractor. Per diem during authorized stopover shall be paid in accordance with the Federal Travel Regulations, as from time to time amended.

(ii) Unaccompanied Baggage.

Except as provided in the Contract Schedule or approved by the Contracting Officer, the Contractor who is on a tour of duty of 90 days or more under this Contract shall be reimbursed for the cost of unaccompanied personal effects not to exceed 250 pounds gross weight via airfreight from place of residence in the United States (or other location, provided that the cost of such shipment does not exceed the cost of shipment from the place of residence) to post of duty in the cooperating country and return to place of residence in the United States (or other location, provided that the cost of such shipment does not exceed the cost of shipment from the post of duty to the place of residence) upon completion of duties.

(iii) Local Travel.

The Contractor shall be reimbursed at the rates established by the Mission Director for authorized travel in the cooperating country in connection with duties directly referable to work under this Contract. In the absence of such established rates, the Contractor shall be reimbursed for actual costs of authorized travel in the cooperating country if not provided by the cooperating government or the Mission in connection with duties directly referable to work hereunder, including travel allowances at rates precribed by the Standardized Regulations (Government Civilians, Foreign Areas), as from time to time amended.

(iv) Special International Travel and Third-Country Travel.

For special travel which (A) advances the purpose of the Contract, (B) is not otherwise provided by the cooperating government; and (C) has the prior written approval of the Contracting Officer or the Mission Director, the Contractor shall be reimbursed for (*1*) the cost of international transportation other than between the United States and the cooperating country and for local transportation within other countries, and (*2*) travel allowances while in official travel status and while performing services under the Contract in such other countries at rates prescribed by the Standardized Regulations (Government Civilians, Foreign Areas), as from time to time amended.

(v) Indirect Travel for Personal Convenience.

(A) When travel is performed by an indirect route for the personal convenience of the traveler, the allowable costs of such travel will be computed on the basis of the cost of economy class air fare via the direct usually traveled route between the authorized points of departure and destination.

(B) If such costs include fares for air or ocean transportation by foreign-flag carriers, approval for indirect travel by such foreign-flag carrier must be obtained from the Contracting Officer or Mission Director, *before* such travel is undertaken, otherwise only that portion of travel accomplished by U.S.-flag carriers will be reimbursable under this contract.

(vi) Delays En Route.

The Contractor may be granted reasonable delays en route, provided that such delays are caused by events beyond the control of the Contractor and are not due to circuitous routing. It is understood that if the delay is caused by physical incapacitation, the Contractor shall be eligible for such sick leave as is provided under paragraph (b) of the General Provision of this Contract entitled Leave and Holidays.

(vii) Privately Owned Automobiles (POV).

(A) If travel by POV is authorized in the Contract Schedule or approved by the Contracting Officer, the Contractor shall be reinbursed for the cost of travel in his/her privately owned automobile at the rate per mile equal to the rate authorized a U.S. Government employee in equivalent circumstances, plus authorized per diem, if the automobile is being driven in connection with: (1) Authorized orientation, (2) authorized duties under this Contract, or (3) en route to or from the cooperating country provided that the total cost of the mileage and the per diem to the Contractor shall not exceed the total constructive cost of fare and normal per diem by (i) surface common carrier or (ii) economy class air, whichever is the lesser.

(B) Cost of the shipment of automobiles for Contract tours of duty of less than 1 year is not reimbursable under this Contract.

(viii) Emergency and Irregular Travel and Transportation.

Actual transportation costs and travel allowances while en route, as provided in this section, shall be reimbursed under the following conditions:

(A) Subject to the prior written approval of the Mission Director, the costs of going from post of duty in the cooperating country to the United States or other approved location for the Contractor when, because of reasons or conditions beyond his/her control, the Contractor has not completed his/her required service in the cooperating country. The Mission Director may also authorize the return to the cooperating country of such Contractor.

(B) It is agreed that paragraph (b)(2)(viii)(A) of this provision includes, but is not necessarily limited to, the following:

(*1*) Need for medical care beyond that available within the areas to which the Contractor is assigned, or serious effect on physical or metal health if residence is continued at assigned post of duty, subject in either case, to the limitations stated in the provision of this contract entitled "Physical Fitness." The Mission Director may authorize a medical attendant to accompany the employee at contract expense if, based on medical opinion, such an attendant is necessary.

(*2*) Serious illness, injury, or death of a member of the Contractor's immediate family. Travel shall be authorized in accordance with emergency visitation travel granted to U.S.-citizen direct-hire employees.

(*3*) Emergency evacuation when ordered by the principal U.S. Diplomatic Officer in the cooperating country. Allowances at safe haven when authorized by the Mission Director, shall be payable in accordance with established Government Regulations.

(*4*) Preparation and return of the remains of a deceased Contractor.

11. Preference for U.S.-Flag Air Carriers (Apr. 1984) (FAR 52.247-63)

(a) "International air transportation," as used in this clause, means transportation by air between a place in the United States and a place outside the United States or between two places both of which are outside the United States.

"United States," as used in this clause, means the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, and possessions of the United States.

"U.S.-flag air carrier," as used in this clause, means an air carrier holding a certificate under Section 401 of the Federal Aviation Act of 1958 (49 U.S.C. 1371).

(b) Section 5 of the International Air Transportation Fair Competitive Practices Act of 1974 (49 U.S.C. 1517) (Fly America Act) requires that all Federal agencies and Government contractors and subcontractors use U.S.-flag carriers for U.S. Government-financed international air transportation of personnel (and their personal effects) or property, to the extent that service by those carriers is available. It requires the Comptroller General of the United States, in the absence of satisfactory proof of the necessity for foreign-flag air transportation, to disallow expenditures from funds, appropriated or otherwise established for the account of the United States, for international air transportation secured aboard a foreign-flag air carrier if a U.S.-flag air carrier is available to provide such services.

(c) The Contractor agrees, in performing work under this contract, to use U.S.-flag air carriers for international air transportation of personnel (and their personal effects) or property to the extent that service by those carriers is available.

(d) In the event that the Contractor selects a carrier other than a U.S.-flag air carrier for international air transportation, the Contractor shall include a certification on vouchers involving such transportation essentially as follows:

Certification of Unavailability of U.S.-Flag Air Carriers

I hereby certify that international air transportation of persons (and their personal effects) or property by U.S.-flag air carrier was not available or it was necessary to use foreign-flag air carrier service for the following reasons (see section 47.403 of the Federal Acquisition Regulation) (State reasons—see Note):

(End of certification)

(e) The Contractor shall include the substance of this clause, including this paragraph (e), in each subcontract or purchase under this contract that may involve international air transportation.

Note.—Availability and unavailability of U.S.-flag air carrier service. (FAR 47.403-1)

(a) If a U.S.-flag air carrier cannot provide the international air transportation needed or if the use of U.S.-flag air carrier service would not accomplish an agency's mission, foreign-flag air carrier service may be deemed necessary.

(b) U.S.-flag air carrier service is considered available even though:

(1) Comparable or a different kind of service can be provided at less cost by a foreign-flag air carrier;

(2) Foreign-flag air carrier service is preferred by, or is more convenient for, the agency or traveler; or

(3) Service by a foreign-flag air carrier can be paid for in excess foreign currency (unless U.S.-flag air carriers decline to accept excess or near excess foreign currencies for transportation payable only out of such monies).

(c) Except as provided in paragraph 47.403-1(a), U.S.-flag air carrier service shall be used for U.S. Government-financed commercial foreign air travel if service provided by U.S.-flag air carriers is available. In determining availability of a U.S.-flag air carrier, the following scheduling principles shall be followed unless their application would result in the last or first leg of travel to or from the United States being performed by a foreign-flag air carrier:

(1) U.S.-flag air carrier service available at point of origin shall be used to destination or, in the absence of direct or through service, to the farthest interchange point on a usually traveled route.

(2) When an origin or interchange point is not served by a U.S.-flag air carrier, foreign-flag air carrier service shall be used only to the nearest interchange point on a usually traveled

VOL 51 ISS 77 APR 22 1986 UMI

route to connect with U.S.-flag air carrier service.

(3) When a U.S.-flag air carrier involuntarily reroutes the traveler via a foreign-flag air carrier, the foreign-flag air carrier may be used notwithstanding the availability of alternative U.S.-flag air carrier service.

(d) For travel between a gateway airport in the United States and a gateway airport abroad, passenger service by U.S.-flag air carrier shall not be considered available if:

(1) The gateway airport abroad is the traveler's origin or destination airport and the use of U.S.-flag air carrier service would extend the time in a travel status, including delay at origin and accelerated arrival at destination, by at least 24 hours more than travel by a foreign-flag air carrier; or

(2) The gateway airport abroad is an interchange point and the use of U.S.-flag air carrier service would require the traveler to wait 6 hours or more to make connections at that point, or if delayed departure from, or accelerated arrival at, the gateway airport in the United States would extend time in a travel status by at least 6 hours more than travel by a foreign-flag air carrier.

(e) For travel between two points outside the United States, the rules in paragraphs 47.403–1(a), (b), and (c) shall be applicable, but passenger service by a U.S.-flag air carrier shall not be considered to be reasonably available if:

(1) Travel by a foreign-flag air carrier would eliminate two or more aircraft changes en route;

(2) One of the two points abroad is the gateway airport en route to or from the United States and the use of a U.S.-flag air carrier would extend the time in a travel status by at least 6 hours more than travel by a foreign-flag air carrier, including accelerated arrival at the overseas destination or delayed departure from the overseas origin, as well as delay at the gateway airport or other interchange point abroad; or

(3) The travel is not part of the trip to or from the United States and use of a U.S.-flag air carrier would extend the time in a travel status by a least 6 hours more than travel by a foreign-flag air carrier including the delay at origin, delay en route, and accelerated arrival at destination.

(f) For all short-distance travel under either paragraph (d) or paragraph (e) of 47.403–1 U.S. air carrier service shall not be considered available when the elapsed traveltime on a scheduled flight from origin to destination airport by foreign-flag air carrier is 3 hours or less and service by a U.S.-flag air carrier would involve twice such traveltime.

12. Payment (Dec. 1985)

(a) Once each month (or at more frequent intervals, if approved by the paying office indicated on the Cover Page), the Contractor may submit to such office form SF 1034 Public Voucher for Purchases and Services Other Than Personal (original) and SF 1034–A (three copies), each voucher identified by the AID contract number properly executed in the amount of dollars claimed during the period covered. The voucher forms shall be supported by:

(1) The Contractor's detailed invoice, in original and two copies, indicating for each amount claimed the paragraph of the Contract under which payment is to be made, supported when applicable as follows:

(i) For compensation—a statement showing period covered, days worked, and days when Contractor was in authorized travel, leave, or stopover status for which compensation is claimed. All claims for compensation will be accompanied by, or will incorporate, a certification signed by the Project Officer covering days or hours worked, or authorized travel or leave time for which compensation is claimed.

(ii) For travel and transportation—a statement of itinerary with attached carrier's receipt and/or passenger's coupons, as appropriate.

(iii) For reimbursable expenses—an itemized statement supported by original receipts.

(2) The first voucher submitted shall include a fully executed Form W–4, Employees Withholding Exemption Certificate, to permit required withholding by AID, such as Federal Income Tax, F.I.C.A. deductions, and when applicable, state income tax. The first voucher shall also account for, and liquidate the unexpended balance of, any funds advanced to the Contractor.

(b) A final voucher shall be submitted by the Contractor promptly following completion of the duties under this Contract but in no event later than 120 days (or such longer period as the Contracting Officer may in his/her discretion approve in writing) from the date of such completion. The Contractor's claim, which includes his/her final settlement of compensation, shall not be paid until after the performance of the duties required under the terms of this Contract has been approved by AID. On receipt and approval of the voucher designated by the Contractor as the "final voucher" submitted on form SF 1034 (original) and SF 1034–A (three copies), together with a refund check for the balance remaining on hand of any funds which may have been advanced to the Contractor, the Government shall pay any amounts due and owing the Contractor.

Interest on Overdue Payments

(a) The Prompt Payment Act, Public Law 97–177 (96 Stat. 85.31; U.S.C. 1801) is applicable to payments under this contract and requires the payment to the contractor of interest on overdue payments and improperly taken discounts.

(b) Determinations of interest due will be made in accordance with the provisions of the Prompt Payment Act and Office of Management and Budget Circular A–125.

Payment Due Dates

(a) Unless otherwise specifically provided in this contract, payments under this contract will be due as follows:

(1) When the designated paying office identified in the contract or purchase order is located in the U.S.: 30 calendar days after the date of actual receipt of a proper invoice in the designated paying office or 30 days after a designated AID official or authorized representative accepts the property or services, whichever is later.

(2) When the designated paying office identified in the contract or purchase order is at a foreign location: 45 calendar days after the date of actual receipt of a proper invoice in the designated paying office or 45 days after a designated AID official or authorized representative accepted the property or services, whichever is later.

13. Conversion of U.S. Dollars to Local Currency (Dec. 1985)

Upon arrival in the Cooperating Country, and form time to time as appropriate, the Contractor shall consult with the Mission Director or his/her authorized representative who shall provide, in writing, the policy the Contractor shall follow in the conversion of U.S. dollars to local currency.

This may include, but not be limited to the conversion of said currency through the cognizant U.S. Disbursing Officer, or Mission Controller, as appropriate.

14. Post of Assignment Privileges (Dec. 1985)

(a) Health room services of the same type that are normally provided to AID direct-hire U.S. citizen employees shall be available for U.S. citizen contractors and their authorized dependents (regardless of citizenship) at the post of duty. These services do not include hospitalization, or predeparture or end of tour medical examinations. The services do not include such medications as may be available, immunizations and preventive health measures, diagnostic examinations and advice, emergency treatment, and home visits as medically indicated.

(b) Privileges such as the use of APO, PX's, commissaries and officer's clubs are established at posts abroad under agreements between the U.S. and host governments. These facilities are intended for and usually limited to members of the official U.S. establishment including the Embassy, AID Mission, U.S. Information Service and the Military. Normally, the agreements do not permit these facilities to be made available to non-official Americans.

15. Security Requirements (Dec. 1985)

(a) This entire provision shall apply to the extent that this Contract involves access to classified information ("Confidential", "Secret", or "Top Secret") or access to administratively controlled information ("Limited Official Use"). Contractors that are not U.S. citizens shall not have access to classified or administratively controlled information.

(b) The Contractor: (1) Shall be responsible for safeguarding all classified or administratively controlled information in accordance with appropriate instructions furnished by AID Office of Security (IG/SEC), as referenced in paragraph (d) of this provision and shall not supply, disclose, or otherwise permit access to classified information or administratively controlled information to any unauthorized person; (2) shall not make or permit to be made any reproductions of classified information or administratively controlled information except with the prior written authorization of the Contracting Officer or Mission Director; (3) shall submit to the Contracting Officer, at such times as the Contracting Officer may direct, an accounting of all reproductions of classified or administratively controlled information; and (4) shall not incorporate in any other project any matter which will disclose classified and/or administratively controlled information except with the prior written authorization of the Contracting Officer.

(c) The Contractor shall not permit any alien access to classified or administratively controlled information. The Contractor shall not permit any individual to have access to classified information or administratively controlled information without the prior written authorization of the Contracting Officer or Mission Director.

(d) The Contractor shall follow the procedures for classifying, marking, handling, transmitting, disseminating, storing, and destroying official material in accordance with the regulations in the Foreign Affairs Manual, Chapter 5 (5 FAM 900), a copy of which will be furnished by the Contracting Officer or Mission Director.

(e) The Contractor agrees to submit immediately to the Mission Director or Contracting Officer a complete detailed report, appropriately classified, of any information which the Contractor may have concerning existing or threatened espionage, sabotage, or subversive activity.

(f) The Government agrees that, when necessary, it shall indicate by security classification or administratively controlled designation, the degree of importance to the national defense of information to be furnished by the Contractor to the Government or by the Government to the Contractor, and the Government shall give written notice of such security classification or administratively controlled designation to the Contractor and of any subsequent changes thereof. The Contractor is authorized to rely on any letter or other written instrument signed by the Contracting Officer changing a security classification or administratively controlled designation of information.

(g) The Contractor agrees to certify after completion of his/her assignment under this Contract that he/she has surrendered or disposed of all classified and/or administratively controlled information in his/her custody in accordance with applicable security instructions.

16. Contractor-Mission Relationships (Dec. 1985)

(a) The Contractor acknowledges that this Contract is an important part of the U.S. Foreign Assistance Program and agrees that his/her duties will be carried out in such a manner as to be fully commensurate with the responsibilities which this entails.

(b) While in the cooperating country, the Contractor is expected to show respect for the conventions, customs, and institutions of the cooperating country and not interfere in its political affairs.

(c) If the Contractor's conduct is not in accordance with paragraph (b) of this provision, the Contract may be terminated under General Provision 17 of this contract. The Contractor recognizes the right of the U.S. Ambassador to direct his/her immediate removal from any country when, in the discretion of the Ambassador, the interests of the United States so require.

(d) The Mission Director is the chief representative of AID in the cooperating country. In this capacity, he/she is responsible for the total AID Program in the cooperating country including certain administrative responsibilities set forth in this Contract and for advising AID regarding the performance of the work under the Contract and its effect on the U.S. Foreign Assistance Program. The Contractor will be responsible for performing his/her duties in accordance with the statement of duties called for by the Contract. However, he/she shall be under the general policy guidance of the Mission Director, and shall keep the Mission Director or his/her designated representative currently informed of the progress of the work under this Contract.

17. Termination (Apr. 1985) (FAR 52.249–12)

The Government may terminate this contract at any time upon at least 15 days' written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days' written notice to the Contracting Officer.

18. Disputes (Apr. 1984) (FAR 52.233–1 [Alternate I]

(a) This contract is subject to the Contract Disputes Act of 1978 (41 U.S.C. 601–613) (the Act).

(b) Except as provided in the Act, all disputes arising under or relating to this contract shall be resolved under this clause.

(c) "Claim," as used in this clause, means a written demand or written assertion by one of contracting parties seeking, as a matter of right, the payment of money in a sum certain, the adjustment or interpretation of contract terms, or other relief arising under or relating to his/her contract. A claim arising under a contract, unlike a claim relating to that contract, is a claim that can be resolved under a contract clause that provides for the relief sought by the claimant. However, a written demand or written assertion by the Contractor seeking the payment of money exceeding $50,000 is not a claim under the Act until certified as required by subparagraph (d)(2) below. A voucher, invoice, or other routine request for payment that is not in dispute when submitted is not a claim under the Act. The submission may be converted to a claim under the Act, by complying with the submission and certification requirements of this clause, if it is disputed either as to liability or amount

VOL 51 ISS 77 AP 22 1986 UMI

or is not acted upon in a reasonable time.

(d)(1) A claim by the Contractor shall be made in writing and submitted to the Contracting Officer for a written decision. A claim by the Government against the Contractor shall be subject to a written decision by the Contracting Officer.

(2) For Contractor claims exceeding $50,000, the Contractor shall submit with the claim a certification that:

(i) The claim is made in good faith;

(ii) Supporting data are accurate and complete to the best of the Contractor's knowledge and belief; and

(iii) The amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable.

(3)(i) If the Contractor is an individual, the certification shall be executed by that individual.

(ii) If the Contractor is not an individual, the certification shall be executed by:

(A) A senior company official in charge at the Contractor's plant or location involved; or

(B) An officer or general partner of the Contractor having overall responsibility for the conduct of the Contractor's affairs.

(e) For Contractor claims of $50,000 or less, the Contracting Officer must, if requested in writing by the Contractor, render a decision within 60 days of the request. For Contractor-certified claims over $50,000, the Contracting Officer must, within 60 days, decide the claim or notify the Contractor of the date by which the decision will be made.

(f) The Contracting Officer's decision shall be final unless the Contractor appeals or files a suit as provided in the Act.

(g) the Government shall pay interest on the amount found due and unpaid from: (1) The date the Contracting Officer receives the claim (properly certified if required), or (2) the date payment otherwise would be due, if that date is later, until the date of payment. Simple interest on claims shall be paid at the rate, fixed by the Secretary of the Treasury as provided in the Act, which is applicable to the period during which the Contracting Officer receives the claim and then at the rate applicable for each 6-month period as fixed by the Treasury Secretary during the pendency of the claim.

(h) The Contractor shall proceed diligently with performance of this contract, pending final resolution of any request for relief, claim, appeal, or action arising under or relating to the Contract, and comply with any decision of the Contracting Officer.

19. Release of Information (Dec. 1985)

All rights in data and reports shall become the property of the U.S. Government. All information gathered under this Contract by the Contractor and all reports and recommendations hereunder shall be treated as confidential by the Contractor and shall not, without prior written approval of the Contracting Officer, be made available to any person, party, or government, other than AID, except as otherwise expressly provided in this Contract.

20. Officials Not To Benefit (Apr. 1984)

No member of or delegate to the Congress or resident commissioner shall be admitted to any share or part of this Contract or to any benefit that may arise therefrom.

21. Covenant Against Contingent Fees (Apr. 1984) (FAR 52.203-5)

(a) The Contractor warrants that no person or agency has been employed or retained to solicit or obtain this contract upon an agreement or understanding for a contingent fee, except a bona fide employee or agency. For breach or violation of this warranty, the Government shall have the right to annul this contract without liability or, in its discretion, to deduct from the contract price or consideration, or otherwise recover, the full amount of the contingent fee.

(b) "Bona fide agency," as used in this clause, means an established commercial or selling agency, maintained by a contractor for the purpose of securing business, that neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds itself out as being able to obtain any Government contract or contracts through improper influence.

"Bona fide employee," as used in this clause, means a person, employed by a contractor and subject to the contractor's supervision and control as to time, place, and manner of performance, who neither exerts nor proposes to exert improper influence to solicit or obtain Government contracts nor holds out as being able to obtain any Government contract or contracts through improper influence.

"Contingent fee," as used in this clause, means any commission, percentage, brokerage, or other fee that is contingent upon the success that a person or concern has in securing a Government contract.

"Improper influence," as used in this clause, means any influence that induces or tends to induce a Government employee or officer to give consideration or to act regarding a Government contract on any basis other than the merits of the matter.

22. Notices (Dec. 1985)

Any notice, given by any of the parties hereunder, shall be sufficient only if in writing and delivered in person or sent by telegraph, telegram, registered, or regular mail as follows:

To AID: Administrator, Agency for International Development, Washington, D.C. 20523.

Attention: Contracting Officer (name of the cognizant Contracting Officer with a copy to the appropriate Mission Director).

To Contractor:

At his/her post of duty while in the cooperating country and at the Contractor's address shown on the Cover Page of this Contract or to such other address as either of such parties shall designate by notice given as herein required. Notices hereunder shall be effective in accordance with this clause or on the effective date of the notice, whichever is later.

23. Reports (Dec. 1985)

(a) The Contractor shall prepare and submit three copies of each technical report required by the schedule (e.g., progress reports, final report, etc.) to the Development Information Utilization Service, Bureau for Program and Policy Coordination (PPC/DIU), Agency for International Development, Washington, D.C. 20523. The title page of all reports forwarded shall include the contract number, the project number and the project title which are set forth on the Cover Page of this Contract.

(b) When preparing reports, the Contractor shall refrain from using elaborate art work, multicolor printing and expensive paper/binding, unless it is specifically authorized in the Contract Schedule. Wherever possible, pages should be printed on both sides using single spaced type.

24. Use of Pouch Facilities (Dec. 1985)

(a) Use of diplomatic pouch is controlled by the Department of State. The Department of State has authorized the use of pouch facilities for AID Contractors as a general policy, as detailed in paragraph (a)(1) through (a)(6) of this provision. However, the final decision regrading use of pouch facilities rests with the Embassy or AID Mission. In consideration of the use of pouch facilities as hereinafter stated, the Contractor agrees to indemnify and hold

harmless the Department of State and AID for loss or damage occurring in pouch transmission.

(1) Contractors are authorized use of the pouch for transmission and receipt of up to a maximum of 2 pounds per shipment of correspondence and documents needed in the administration of foreign assistance programs.

(2) U.S. citizen or U.S. resident alien Contractors are authorized use of the pouch for personal mail up to a maximum of one pound per shipment (but see (a)(3) below). Non-U.S. citizen Contractors are not permitted use of the pouch for personal mail except to the extent that such use may be authorized by the Chief of Mission.

(3) Merchandise, parcels, magazines, or newspapers are not considered to be personal mail for purposes of this clause, and are not authorized to be sent or received by pouch.

(4) Official and personal mail under paragraphs (a)(1) and (2) of this provision, sent by pouch, should be addressed as follows:

Name of individual (followed by letter symbol "C")
Name of post (USAID/), Agency for International Development, Washington, D.C. 20523.

(5) Mail sent via the diplomatic pouch may not be in violation of U.S. Postal laws and may not contain material ineligible for pouch transmission.

(6) AID Contractors are not authorized use of military postal facilities (APO/FPO). This is an Adjutant General's decision based on existing laws and regulations governing military postal facilities and is being enforced worldwide. Posts having access to APO/FPO facilities and using such for diplomatic pouch dispatch may, however, accept official and personal mail for the pouch provided, of course, adequate postage is affixed when onward transmission (mail to other than AID/W) through U.S. postal channels is required.

(b) The Contractor shall be responsible for compliance with these guidelines and limitations on use of pouch facilities.

(c) Specific additional guidance on use of pouch facilities in accordance with this clause is available from the Post Communication Center at the Embassy or AID Mission.

Section 12. Additional General Provisions

Contract With a U.S. Citizen or a U.S. Alien Resident for Personal Services Abroad

The following clauses are to be used along with the General Provisions (Section 11) for a tour of duty of 1 year or more.

Table of Contents

26. Definitions (Long Tour) (Dec. 1985)
27. Laws and Regulations Applicable Abroad (Dependents) (Dec. 1985)
28. Physical Fitness (Long Tour) (Dec. 1985)
29. Leave and Holidays (Long Tour) (Dec. 1985)
30. Allowances (Long Tour) (Dec. 1985)
31. Travel and Transportation Expenses (Long Tour) (Dec. 1985)
32. Orientation and Language Training (Long Tour) (Dec. 1985)
33. Post of Assignment Privileges (Dependents) (Dec. 1985)
34. Termination (Long Tour) (Apr. 1985) (FAR 52.249-12)

26. Definitions (Long Tour) (Dec. 1985)

(a) "Dependents" means:

(1) Spouse.

(2) Children (including step and adopted children) who are unmarried and under 21 years of age, or regardless of age, are incapable of self-support.

(3) Parents (including step and legally adoptive parents) of the employee or of the spouse, when such parents are least 51 percent dependent on the Contractor for support.

(4) Sisters and brothers (including step or adoptive sisters or brothers) of the Contractor, or of the spouse, when such sisters and brothers are at least 51 percent dependent on the Contractor for support, unmarried and under 21 years of age, or regardless of age, are incapable of self-support.

(b) "Traveler" also means dependents of the Contractor who are in authorized travel status.

27. Laws and Regulations Applicable Abroad (Dependents) (Dec. 1985)

(a) Conformity to Laws and Regulations of the Cooperating Country.

While in the cooperating country, the Contractor agrees he/she will make every effort to assure that his/her authorized dependents shall abide by all applicable laws and regulations of the cooperating country and political subdivisions thereof.

(b) Purchase, Sale, Import, or Export of Personal Property or Automobiles.

To the extent permitted by the cooperating country, the purchase, sale, import, or export of personal property or automobiles by the Contractor's authorized dependents in the cooperating country shall also be subject to the same limitations and prohibitions which apply to U.S.-citizen direct-hire employee dependents.

28. Physical Fitness (Long Tour) (Dec. 1985)

(a) Predeparture.

The Contractor's authorized dependents shall also be required to be examined by a licensed doctor of medicine. The Contractor shall require the doctor to certify that, in the doctor's opinion, the Contractor's authorized dependents are physically qualified to reside in the cooperating country. A copy of the certificate shall be provided to the Contracting Officer prior to the dependent's departure for the cooperating country.

(b) End of Tour.

The Contractor and his/her authorized dependents are authorized physical examinations within 60 days after completion of the Contractor's tour of duty.

(c) Reimbursement.

The Contractor shall be reimbursed for the physical examinations mentioned in paragraphs (a) and (b) above as follows: (1) Not to exceed $100 per examination for the Contractor's dependents of 12 years of age and over and (2) $40 per examination for Contractor's dependents under 12 years of age. The Contractor shall also be reimbursed for the cost of immunizations.

29. Leave and Holidays (Long Tour) Dec. 1985)

(a) Vacation Leave.

(1) With the approval of the Mission Director, and if the circumstances warrant, a Contractor may be granted advance vacation leave in excess of that earned, but in no case shall a Contractor be granted advance vacation leave in excess of that which he/she will earn over the life of the Contract. The Contractor agrees to reimburse AID for leave used in excess of the amount earned during the Contractor's assignment under the Contract.

(2) Leave taken during the concluding weeks of an employee's tour shall be included in the established leave schedule and be limited to that amount of leave which can be earned during a twelve month period unless approved in accordance with paragraph (a)(3) of this clause.

(3) Vacation leave earned but not taken by the end of the employee's tour pursuant to paragraphs (a)(1) and (2) of this clause will be forfeited, unless the requirements of the project precluded the employee from taking such leave

VOL 51 ISS 77 APR 22 1986 UMI

and the Contracting Officer, with the endorsement of the Mission, approves one of the following as a alternative:

(i) Taking, during the concluding weeks of the employee's tour, leave not permitted under (a)(2) of this clause, or

(ii) Lump-sum payment for leave not taken provided such leave does not exceed the number of days which can be earned by the employee during a twelve month period.

(b) Military Leave.

Military leave of not more than 15 calendar days in any calendar year may be granted to a Contractor who is a reservist of the Armed Forces, provided that such military leave has been approved in advance by the Contracting Officer or the Mission Director. A copy of any such approval shall be provided to the Contracting Officer.

(c) Home Leave.

(1) Home leave is leave earned for service abroad for use only in the United States, in the Commonwealth of Puerto Rico, or in the possessions of the United States.

(2) A Contractor who is a U.S. citizen or U.S. resident alien and has served at least 2 years overseas, as defined in paragraph (c)(4) below, under this Contract, and has not taken more than 30 workdays leave (vacation, sick, or leave without pay) in the United States, may be granted home leave of not more than 15 calendar days for each such year of service overseas; provided, that the Contractor agrees to return overseas upon completion of home leave under an additional 2 year appointment, or for such shorter period of not less than 1 year of overseas service under the Contract as the Mission Director may approve in advance. Home leave must be taken in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States, and any days spent elsewhere will be charged to vacation leave or leave without pay.

(3) Notwithstanding the requirement in paragraph (c)(2) above, that the Contractor must have served 2 years overseas under this Contract to be eligible for home leave, the Contractor may be granted advance home leave subject to all of the following conditions:

(i) Granting of advance home leave would in each case serve to advance the attainment of the objectives of this Contract;

(ii) The Contractor shall have served a minimum of 18 months in the cooperating country on his/her current tour of duty under this Contract; and

(iii) The Contractor shall have agreed to return to the cooperating country to serve out the remainder of his/her current tour of duty and an additional 2 year appointment under this Contract, or such other additional appointment of not less than 1 year of overseas service as the Mission Director may approve.

(4) The period of service overseas required under paragraph (c)(2), or paragraph (c)(3) above, shall include the actual days in orientation in the United States (less language training) and the actual days overseas beginning on the date of departure from the U.S. port of embarkation on international travel and continuing, inclusive of authorized delays en route, to the date of arrival at the U.S. port of debarkation from international travel. Allowable vacation and sick leave taken while overseas, but not leave without pay, shall be included in the required period of service overseas. An amount equal to the number of days of vacation and sick leave taken in the United States, the Commonwealth of Puerto Rico, or the possessions of the United States will be added to the required period of service overseas.

(5) Salary during travel to and from the United States for home leave will be limited to the time required for travel by the most expeditious air route. The Contractor will be responsible for reimbursing AID for payments made during home leave if, in spite of the undertaking of the new appointment, the Contractor, except for reasons beyond his/her control as determined by the Contracting Officer, does not return overseas and complete the additional required service. Unused home leave is not reimbursable under this Contract.

(6) To the extent deemed necessary by the Contracting Officer, a Contractor in the United States on home leave may be authorized to spend not more than 5 days in work status for consultation at AID/Washington before returning to post of duty. Consultation at locations other than AID/Washington as well as any time in excess of 5 days spent for consultation, must be approved by the Mission Director or the Contracting Officer.

30. Differential and Allowances (Long Tour) (Dec. 1985)

The following allowances shall also be granted to the Contractor and his/her authorized dependents to the same extent, and on the same basis as, they are granted to AID employees and their dependents by the Standardized Regulations (Government Civilians, Foreign Areas) as from time to time amended:

	Applicable reference to standardized regulations (Chapter)
Educational Allowance	270
Educational Travel	280
Separate Maintenance Allowances	280
Danger Pay Allowance	650

(a) Educational Allowance.

Educational allowance is an allowance to assist the Contractor in meeting the extraordinary and necessary expenses, not otherwise compensated for, incurred by reason of his/her service in a foreign area in providing adequate elementary and secondary education for his/her children. The Contractor will receive educational allowances payments for his/her dependent children in amounts not to exceed those set forth in (Standardized Regulations Government Civilians, Foreign Areas), Chapter 270, as from time to time amended.

(b) Educational travel. Educational travel is travel to and from a school in the United States for secondary education (in lieu of an educational allowance) and for college education. The Contractor will receive educational travel payments for his/her dependent children provided such payment does not exceed that which would be payable in accordance with the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 280, as from time to time amended. Educational travel shall not be authorized for Contractors whose assignment is less than two years.

(c) Separate maintenance allowance. Separate maintenance allowance is an allowance to assist an employee who is compelled by reason of dangerous, notably unhealthful, or excessively adverse living conditions at his/her post of assignment in a foreign area, or for the convenience of the Government, to meet the additional expense of maintaining his/her dependents elsewhere than at such post. The Contractor will receive separate maintenance allowance payments not to exceed that made to AID employees in accordance with the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 280, as from time to time amended.

(d) Danger pay allowance. Danger pay allowance is an allowance to provide additional compensation above basic compensation to employees in foreign areas where there exist conditions of civil insurrection, civil war, terrorism or wartime conditions which threaten physical harm or imminent danger to the health or well-being of an employee. The danger pay allowance is in lieu of that part of the hardship post differential rate at a post which is attributable to political violence. Consequently, the rate of post differential may be reduced while danger pay is in effect to avoid dual crediting for political violence. The contractor shall be allowed danger pay allowance not to exceed that paid AID employees in the cooperating country, in accordance with the Standardized Regulations (Government Civilians, Foreign Areas), Chapter 650, as from time to time amended.

The allowances provided in paragraph (a) through (d) above shall be paid to the Contractor in dollars or in the currency of the cooperating country in accordance with the practice prevailing at the Mission.

31. Travel and Transportation Expenses (Long Tour) (Dec. 1985)

(a) General.

Pursuant to paragraph (a) of Clause 10 of the General Provisions, when transportation is not provided by Government-issued TR for the items listed below, the Contractor shall procure his/her own transportation, the costs of which will be reimbursed in accordance with the following:

(1) International Travel.

(i) International travel costs and allowances and stopovers for authorized dependents shall be reimbursed on the same basis as for the Contractor under General Provision Clause No. 10(b)(2)(i) of this Contract except that travel allowances for such dependents shall be at the rate of $6 per day for persons 11 years of age or over and $3 per day for persons under 11 years of age payable for not more than the travel time required by scheduled economy class commercial air carrier using the most expeditious route and computed in accordance with the Federal Travel Regulations, as from time to time amended.

(ii) 1. All international ocean transportation of things which is to be reimbursed in U.S. dollars as authorized under this Contract shall be by U.S.-flag vessels to the extent they are available. When U.S.-flag vessels are not available, or their use would result in a significant delay, the Contractor may request a release from this requirement from M/SER/AAM, Transportation Division, Agency for International Development, Washington, DC 20523, giving the basis for the request.

2. All international air transportation of dependents shall be in accordance with General Provision 11, entitled "Preference for U.S. Flag Air Carriers.".

(b) Limitation on Travel Dependents.

Travel costs and allowances will be allowed for authorized dependents of the Contractor and such costs shall be reimbursed for travel from place of abode in the United States to assigned station in the cooperating country and return, only if the dependent remains in the cooperating country for at least 9 months or one-half of the required tour of duty of the Contractor, whichever is greater, except as otherwise authorized hereunder for education, medical, or emergency visitation travel.

(c) Delays En Route.

Dependents may be granted reasonable delays en route, not circuitous in nature, while in travel status, caused by events beyond the control of such dependents.

(d) Travel by Privately Owned Automobile (POV).

Notwithstanding paragraph (b)(2)(vii) of Clause 10 of the General Provisions, if travel by POV is authorized in the Schedule or approved by the Contracting Officer, the Contractor shall be reimbursed for the cost of travel in his/her privately owned automobile at the rate per mile equal to the rate authorized a U.S. Government employee in equivalent circumstances, plus authorized per diem for the Contractor and for each of the authorized dependents traveling in the automobile if the automobile is being driven in connection with (1) authorized orientation, (2) authorized duties under this Contract, or (3) en route to or from the cooperating country as authorized in the Schedule; provided that the total cost of the mileage and the per diem paid to all authorized travelers shall not exceed the total constructive cost of fare and normal per diem for all authorized travelers by (i) surface common carrier or (ii) less-than-first-class air, whichever is less.

(e) Emergency and Irregular Travel and Transportation.

Notwithstanding the provisions of paragraph (b)(2)(viii) of Clause 10 of the General Provisions, actual transportation costs and travel allowances while en route, as provided in this section, will also be reimbursed under the following conditions:

(1) Subject to the prior written approval of the Mission Director, the costs of going from post of duty in the cooperating country to the United States or other approved location for the Contractor and authorized dependents when, because of reasons or conditions beyond his/her control, the Contractor has not completed his/her required service in the cooperating country or the dependent must leave the cooperating country. The Mission Director may also authorize the return to the cooperating country of such Contractor and/or his/her authorized dependents.

(2) It is agreed that paragraph (e)(1) above, includes but is not necessarily limited to the following:

(i) Need for medical care beyond that available within the area to which Contractor is assigned.

(ii) Serious effect on physical or mental health if residence is continued at assigned post of duty.

(iii) Serious illness, injury, or death of a member of a Contractor's immediate family or a dependent. Travel may be authorized in accordance with emergency visitation travel granted to U.S.-citizen direct-hire employees and their dependents under Chapter 600 of the Standardized Regulations (Government Civilians, Foreign Areas).

(iv) Emergency evacuation when ordered by the principal U.S. Diplomatic Officer in the cooperating country. Transportation and travel allowances at safe haven and the transportation of household effects and automobile or storage thereof when authorized by the Mission Director, shall be payable in accordance with established Government regulations.

(v) Preparation and return of the remains of a deceased Contractor or his/her dependents.

(f) Transportation of Motor Vehicles, Personal Effects, and Household Goods.

(1) General.

Transportation, including packing and crating costs, will be paid for shipment from Contractor's residence in the United States or other location (provided that the cost of transportation does not exceed the cost from the Contractor's residence) to post of duty in the cooperating country and return to the Contractor's residence in the United States or other location (provided that the cost of transportation does not exceed the cost to the Contractor's residence), (i) of one privately owned motor vehicle for the Contractor subject to the restrictions contained in paragraph (h) below, (ii) of personal effects of the Contractor, and (iii) of household goods of Contractor not to exceed the following limitations:

	Basic household furniture not supplied (pounds net weight)	Basic household furniture supplied (pounds net weight)
Contractor with dependents in cooperating country	18,000	7,200
Contractor without dependents in cooperating country	18,000	7,200

Note.—For the purpose of this Clause, "net weight" and "gross weight" are defined and determined in accordance with the provisions of Section 102.1 of the Uniform Foreign

VOL 51 ISS 77 APR 22 1986 UMI

Affairs Regulations, (for State/AID/USIA Commerce, and Agriculture).

The cost of transporting motor vehicles and household goods shall not exceed the cost of packing, crating, and transportation by surface common carrier. In the event that the carrier does not require boxing or crating of motor vehicles for shipment to the cooperating country, the cost of boxing or crating is not reimbursable. The transportation of a privately owned motor vehicle for a Contractor may be authorized as a replacement of the last such motor vehicle shipped under this Contract for such Contractor when the Mission Director determines, in advance, and so notifies the Contractor in writing, that the replacement is necessary for reasons not due to the negligence or malfeasance of the Contractor. The determination shall be made under the same rules and regulations that apply to authorized Mission U.S.-citizen direct-hire employees.

(2) Unaccompanied Baggage.

The Contractor will be reimbursed for costs of shipment of unaccompanied baggage (in addition to the weight allowance above for household effects) not to exceed the following:

	Gross weight (pounds)
Employee	250
First dependent traveling	200
Second dependent traveling	150
Each additional dependent traveling	100

This unaccompanied baggage may be shipped as air freight by the most direct route between authorized points of origin and destination regardless of the modes of travel used.

Unaccompanied baggage is considered to be those personal belongings needed by the traveler immediately upon arrival at destination.

(3) Reduced Rates on U.S.-Flag Carriers.

Reduced rates on U.S.-flag carriers are in effect for shipments of household goods and personal effects of AID Contractors between certain locations. These reduced rates are available provided the shipper furnishes to the carrier at the time of the issuance of the Bill of Lading documentary evidence that the shipment is for the account of AID. The Contracting Officer will, on request, furnish to the Contractor current information concerning the availability of a reduced rate with respect to any proposed shipment. The Contractor will not be reimbursed for shipments of household goods or personal effects in amounts in excess of the reduced rates which are available in accordance with the foregoing.

(g) Storage of Household Effects.

(1) The cost of storage charges (including packing, crating, and drayage costs) in the United States of household goods of the Contractor will be reimbursed, in lieu of transportation of all or any part of such goods to the cooperating country under paragraph (f) above, provided that (1) the total amount of household goods shipped to the cooperating country and stored in the United States shall not exceed 18,000 pounds net for each Contractor employee regardless of family status, and (2) at least 200 pounds net of household effects will be stored; quantities of less than 200 pounds net stored will not be reimbursed.

(2) Storage of items of high value (items that exceed $1,000 in value, that are irreplaceable or one of a kind, and that have a definite monetary or insurable value), such as clothing, rugs, tapestries, paintings, other works of art and that have special storage requirements, is also reimbursable. If requested by the Contractor and approved by the Contracting Officer, after receipt (from the Contractor), of an itemized inventory of the items to be stored, the request for reimbursement shall be processed on the same basis as for AID U.S. citizen direct-hire employees in accordance with Handbook 22, Appendix 9A.

(h) Transportation of Foreign-Made Motor Vehicles.

Reimbursement of the costs of transporting a foreign (non-U.S.) made motor vehicle will be made in accordance with the provisions of the Uniform State/AID/USIA Foreign Service Travel Regulations, as from time to time amended, on the same basis as a U.S. Government employee.

(i) Home Leave Travel.

The Contractor shall be reimbursed for the cost of travel performed by Contractor and dependents for purposes of home leave, provided that such reimbursement does not exceed that authorized by the Uniform State/AID/USIA Foreign Service Travel Regulations.

(j) Rest and Recuperation Travel.

If approved in writing by the Mission Director, the Contractor and his/her dependents shall be allowed rest and recuperation travel on the same basis as authorized U.S.-citizen direct-hire Mission employees and their dependents.

32. Orientation and Language Training (Long Tour) (Dec. 1985)

(a) Except as set forth in paragraph (b) (4) below, the Contractor shall receive a maximum of 2 weeks AID orientation before travel overseas. The dates of orientation shall be selected by the Contractor and approved by the Contracting Officer from the orientation schedule provided by AID.

(b) As either set forth in the Contract Schedule, or provided in writing by the Contracting Officer, the following may be authorized taking into consideration specific job requirements, Contractor's prior overseas experience, or unusual circumstances, in connection with orientation of individual Contractors:

(1) Modification orientation,

(2) Language training,

(3) Orientation for Contractor's dependents at Contract expense,

(4) Waiver of orientation for individual Contractor.

(c) Transportation costs and travel allowances not to exceed one round trip from the Contractor's residence to place of orientation and return will be reimbursed, pursuant to Clause 10 of the General Provisions, entitled "Travel and Transportation Expenses," if the orientation is more than 50 miles from the Contractor's residence. Allowable salary costs during the period of orientation are also reimbursable.

33. Post of Assignment Privileges (Dependents) (Dec. 1985)

(a) Health room services of the same type that are normally provided to AID direct-hire U.S. citizen employees shall be available for U.S. citizen contractor employees and their authorized dependents (regardless of citizenship) at the post of duty. These services do not include hospitalization, or predeparture or end of tour medical examinations. The services do include such medications as may be available, immunizations and preventive health measures, diagnostic examinations and advice, emergency treatment, and home visits as medically indicated.

(b) Privileges such as the use of APO, PX's, commissaries and officers' clubs are established at posts abroad pursuant to agreements between the U.S. and host governments. These facilities are intended for and usually are limited to members of the official U.S. establishment including the Embassy, AID Mission, USIA, and the Military. Normally, the agreements do not permit these facilities to be made available to non-official Americans.

34. Termination (Long Tour) (Apr. 1985) (FAR 52.249-12)

The Government may terminate this contract at any time upon at least 15 days' written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days' written notice to the Contracting Officer.

35. Section 13. FAR Clauses

The following FAR clauses are to be used along with the General Provisions, (Section 11), and when appropriate, the Additional General Provisions (Section 12), and shall be incorporated in each personal service contract by reference.

1. Inspection 52.246-5.
2. Examination of Records by Comptroller General 52.215-1.
3. Audit—Negotiation 52.215-2.
4. Privacy Act Notification 52.224-1.
5. Privacy Act 52.224-2.
6. Taxes—Foreign Cost Reimbursement Contracts 52.229-8.
7. Interest 52.232-17.
8. Assignment of Claims 52.232-23.
9. Protection of Government Buildings, Equipment, and Vegetation 52.237-2.
10. Notice of Intent to Disallow Costs 52.242-1.
11. Limitation of Cost 52.232-20.
12. Limitation of Funds 52.232-22.
13. Limitation of Liability—Services 52.246-25.

Dated: April 10, 1986.

John F. Owens,

Procurement Executive.

VOL 51 ISS 77 AP 22 1986 UMI

DEPARTMENT OF AGRICULTURE

Office of Grants and Program Systems

7 CFR Part 3201

Competitive Research Grants Program for Forest and Rangeland Renewable Resources; Administrative Provisions

AGENCY: Office of Grants and Program Systems, USDA.

ACTION: Final rule.

SUMMARY: This document establishes Part 3201 of Title 7, Subtitle B, Chapter XXXII of the Code of Federal Regulations, for the purpose of administering the Competitive Research Grants Program for Forest and Rangeland Renewable Resources conducted under authority of section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended (16 U.S.C. 1644). The issuance of this rule establishes the procedures to be followed annually in the solicitation of research grant proposals, the evaluation of such proposals, and the award of competitive research grants under this program.

EFFECTIVE DATE: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Terry J. Pacovsky, Chief, Grants Administrative Management, Office of Grants and Program Systems, U.S. Department of Agriculture, Room 112, Justin Smith Morrill Building, 15th and Independence Avenue, SW., Washington, DC 20251. (Telephone: (202) 475–5024.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction

Under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), the collection of information requirements contained in this rule has been approved under OMB Document No. 0525–0001.

Classification

This rule has been reviewed under Executive Order 12291, and it has been determined that it is not a major rule because it does not involve a substantial or major impact on the Nation's economy or on large numbers of individuals or businesses. There will be no major increase in cost or prices for consumers, individual industries, Federal, State, or local governmental agencies, or geographic regions. It will not have a significant economic impact on competitive employment, investment, productivity, innovation, or on the ability of U.S. enterprises to compete with foreign-based enterprises in domestic or export markets. In addition, it will not have a significant impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96–534 (5 U.S.C. 601).

Regulatory Analysis

Not required for this rulemaking.

Environmental Impact Statement

This regulation does not significantly affect the environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969.

Catalog of Federal Domestic Assistance

This program/activity is scheduled to appear in the 1986 edition of the Catalog of Federal Domestic Assistance as 10.213, Competitive Research Grants Program for Forest and Rangeland Renewable Resources. For the reasons set forth in the Final rule related Notice to 7 CFR Part 3015, Subpart V, 48 CFR 29115, June 24, 1983, when the authority to administer this program resided in the Forest Service, this program/activity is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Background and Purpose

Under the authority of section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended, the Secretary of Agriculture is authorized to make competitive research grants to further research activities related to the protection, management and utilization of forest and rangeland renewable resources to Federal, State, and other governmental agencies, public or private agencies, institutions, universities, and organizations, and businesses and individuals in the United States.

This rule establishes Part 3201 of Title 7, Subtitle B, Chapter XXXII of the Code of Federal Regulations, for the purpose of administering the Competitive Research Grants Program for Forest and Rangeland Renewable Resources.

On February 25, 1986, the Department published a Notice in the **Federal Register** (51 FR 6696) proposing the establishment of this regulation and inviting comments from interested individuals and organizations. Comments were requested by March 27, 1986. No comments were received.

List of Subjects in 7 CFR Part 3201

Grant programs—agriculture, Grant administration.

The Department therefore amends Title 7, Subtitle B, Chapter XXXII of the Code of Federal Regulations by adding Part 3201 to read as follows:

CHAPTER XXXII—OFFICE OF GRANTS AND PROGRAM SYSTEMS, DEPARTMENT OF AGRICULTURE

PART 3201—COMPETITIVE RESEARCH GRANTS PROGRAM FOR FOREST AND RANGELAND RENEWABLE RESOURCES

Sec.
3201.1 Applicability of regulations.
3201.2 General regulations.
3201.3 Eligibility requirements.
3201.4 Signatures required on grant application.

Authority: Sec. 5 of the Forest and Rangeland Renewable Resources Act of 1978, as amended (16 U.S.C. 1644).

§ 3201.1 Applicability of regulations.

(a) The regulations of this part apply to competitive research grants awarded under the provisions of section 5 of the Forest and Rangeland Renewable Resources Research Act of 1978, as amended (16 U.S.C. 1644), to Federal, State, or other governmental agencies, public or private agencies, institutions, universities, and organizations, and businesses and individuals in the United States. The Secretary, or his or her designee, shall determine and announce, through publication of a Notice in the **Federal Register** each year, research program areas for which proposals will be solicited to the extent that funds are available. Research under this program will be in those areas having a significant impact on the protection, management and utilization of forest and rangeland renewable resources.

(b) The regulations of this part do not apply to research grants awarded under any other authorization.

§ 3201.2 General regulations.

For purposes of this part, the provisions found at Part 3200 of this chapter, excluding the provisions listed in paragraphs (a) through (e) of this section, are applicable to the administration of this research program.

(a) Section 3200.1.
(b) Section 3200.3(a).
(c) Section 3200.4(c).
(d) The material found in the second sentence of § 3200.6(c)(3) beginning with "the results of which" and ending with "food and agricultural sciences."
(e) The parenthetical phrase in the last sentence of § 3200.7(c).

§ 3201.3 Eligibility requirements.

Except where otherwise prohibited by law, any Federal, State or other governmental agency, public or private agency, institution, university, or

organization, and business or individual in the United States shall be eligible to apply for and receive a project grant under this part, provided that the applicant qualifies as a responsible grantee under the criteria set forth in § 3200.3(b).

§ 3201.4 Signatures required on grant application.

(a) Any research proposal submitted by an agency, institution, university, organization, or business must be signed by the principal investigator(s) and endorsed by the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources.

(b) Any research proposal submitted by an individual who lacks organizational affiliation need only be signed by the principal investigator.

Done at Washington, DC, this 15th day of April 1986.

John Patrick Jordan,
Acting Administrator, Office of Grants and Program Systems.

Part IX

Department of Education

34 CFR Parts 617 and 619

Postsecondary Education; Graduate Academic Facilities Program; Proposed Rule

VOL 51 ISS 77 AP 22 1986 UMI

DEPARTMENT OF EDUCATION

34 CFR Parts 617 and 619

Graduate Academic Facilities Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes new regulations to govern the Graduate Academic Facilities Program. The regulations are needed to reflect statutory changes made in the program and to implement the program as authorized under Title VII–B of the Higher Education Act. The proposed regulations would establish eligibility conditions, selection criteria, and other terms and conditions for applicants or recipients of grants under this program.

DATE: Comments must be received on or before May 22, 1986.

ADDRESS: All comments concerning these proposed regulations should be addressed to Charles I. Griffith, Director, Division of Higher Education Incentive Programs, Office of Higher Education Programs, Office of Postsecondary Education, U.S. Department of Education, (Room 3022, ROB–3), 400 Maryland Avenue SW., Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Charles I. Griffith. Telephone (202) 245–3253.

SUPPLEMENTARY INFORMATION: This program was originally authorized by the Congress under Title II of the Higher Education Facilities Act of 1963. It has been reauthorized and re-established in Title VII–B of the Higher Education Act by the Education Amendments of 1972, 1976, and 1980. The Congress has not generally appropriated funds for this program since 1979. Essentially, Title VII–B of the Higher Education Act (20 U.S.C. 1132c) authorizes a program of construction assistance grants to graduate institutions of higher education. Recipients under this program use their grants for certain construction improvements of graduate academic facilities or for the acquisition of special research equipment at such facilities.

Current regulations for this program were promulgated in April 1980 (45 FR 28666–83) and are codified at 34 CFR Part 617, Subpart C. These regulations, however, were promulgated before the Congress made sweeping statutory changes in program operations when it enacted the Education Amendemnts of 1980 in October 1980. The Secretary proposed regulations for this program and its three other related construction assistance programs in December 1980, (45 FR 86341–59), when funds for these programs were appropriated by the Congress. These proposed regulations would have incorporated the statutory changes in the program made by the Education Amendments of 1980, but because the Congress later rescinded its appropriation, the Secretary decided not to issue final regulations.

In fiscal years 1985 and 1986, the Congress appropriated funds for this program, and in light of those appropriations, the Secretary has decided to propose new regulations for this program. Applicable legislation directs that construction assistance grants under this program chiefly enable eligible recipients to make construction improvements for new or existing facilities so that these facilities would—

- Economize on the use of energy resources;
- Comply with the Architectural Barriers Act of 1968, section 504 of the Rehabilitation Act of 1973, or other environmental protection or health and safety laws, if such requirements were not in effect at the time such facilities were constructed;
- Improve research facilities, including libraries, and acquire Special research equipment;
- Accommodate unusual increases in enrollment; or
- Detect, remove, or contain asbestos hazards.

As directed by applicable legislation, the Secretary has obtained the advice and recommendations of a panel of specialists from the higher education community. This panel issued a number of informal recommendations to the Secretary, respecting selection criteria and other matters, most of which have been incorporated in these proposed regulations.

Under the terms of the Department's Appropriation Acts for 1985 and 1986, the Congress directed the Secretary to make the appropriated funds available to both undergraduate and graduate institutions of higher education, not just graduate institutions. Although the proposed regulations are drafted on the basis of the "permanent" legislation which authorizes eligibility for graduate institutions only, the Secretary's competiton for fiscal year 1985 and 1986 grant funds will be open to all institutions of higher education. However, the Administration has requested that the funds for fiscal year 1986 be rescinded. Information about the grant competition for this program will be published in an application notice after the proposed regulations are promulgated in final form.

The Education Amendments of 1980 continue to authorize grants for the construction, reconstruction, and renovation of graduate academic facilities. However, as a result of changes in the statutory changes enacted by the Congress in October 1980 (20 U.S.C. 1132a and 1132c). The propose regulations, 34 CFR Part 619 replace Subpart C, 34 CFR Part 617 of the program's existing regulations published on April 29, 1980. Major changes in the proposed regulations include: the primary purposes for which grant funds may be used; the inclusion of a limitation of 12.5 per centum that can be made to institutions of higher education in a State, in any single fiscal year; the inclusion of a limitation on the amount of a grant which may not exceed 50 per centum of the project's development cost; the elimination of cooperative graduate center boards from program eligibility; the elimination of awards for model intercultural programs designed to integrate the educational requirements of substantive knowledge and language proficiency; changes in definitions of program terms; and, selection criteria for funding program applications. The proposed regulations also permit the Secretary to establish annual priorities for the program.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for a major regulations established in the Order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. The small entities affected by these regulations are small institutions of postsecondary education. These regulations describe the program and establish minimal application requirements. They will not have a significant economic impact on the institutions affected.

Paperwork Reduction Act of 1980

These proposed regulations do not contain any information collection requirements and are, therefore, not subject to the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) which govern such requirements.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. The Secretary particularly invites comments on the definitions of terms (Subpart A, § 619.4) and on the selection criteria and related weighting factors (Subpart D, §§ 619.30 through 619.36). All comments submitted in response to these proposed regulations will be available for inspection, during and after the comment period, in Room 3022, Regional Office Building #3, 7th and D Streets SW., Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 619

Academic facilities, Colleges and universities, Construction, reconstruction, and renovation, Equipment, Research.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance Number 84.172—Construction, Reconstruction, and Renovation of Academic Facilities)

Dated: April 18, 1986.

William J. Bennett,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by removing Subpart C of Part 617, and adding a new Part 619 as follows:

PART 617—FINANCIAL ASSISTANCE FOR CONSTRUCTION, RECONSTRUCTION, OR RENOVATION OF HIGHER EDUCATION FACILITIES

1. The authority citation for Part 617 is revised to read as follows:

Authority: 20 U.S.C. 1132a–1132a–1, unless otherwise noted.

2. Part 617 is amended by removing Subpart C, and the table of contents of Part 617 is amended accordingly.

3. A new Part 619 is added to read as follows:

PART 619—GRANTS FOR CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF GRADUATE ACADEMIC FACILITIES.

Subpart A—General

Sec.

619.1 What is the Graduate Academic Facilities Program?
619.2 Who is eligible to apply for a grant under the Graduate Academic Facilities Program?
619.3 What regulations apply to the Graduate Academic Facilities Program?
619.4 What definitions apply to the Graduate Academic Facilities Program?

Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

619.10 What kinds of projects are funded by the Program?
619.11 What are the funding priorities?

Subpart C—How Does One Apply for a Grant?

619.20 What limitations apply to the number of applications that may be submitted?

Subpart D—How Does the Secretary Make a Grant?

619.30 How are applications evaluated?
619.31 What selection criteria are used to evaluate existing academic facilities and financial need?
619.32 What selection criteria are used to evaluate energy conservation projects?
619.33 What selection criteria are used to evaluate the removal of architectural barriers, and environmental protection or health and safety programs mandated by law?
619.34 What selection criteria are used to evaluate the detection, removal, or containment of asbestos hazards?
619.35 What selection criteria are used to evaluate unusual increases in enrollment?
619.36 What selection criteria are used to evaluate research facilities, including libraries, and the acquisition of special research equipment?

Subpart E—How Does the Secretary Determine the Amount of the Grant Award?

619.40 What are the general rules for determining eligible development costs?
619.41 What are the specific rules for determining eligible development costs?

Subpart F—What Conditions Apply to Awards Under the Program?

619.50 What are the funding levels?
619.51 What are the financial considerations for approval or selection?
619.52 Must the grant award instrument be recorded?
619.53 What are the conditions for the recovery of payments?

Authority: 20 U.S.C. 1132a–1132a–1, unless otherwise noted.

Subpart A—General

§ 619.1 What is the Graduate Academic Facilities Program?

The Graduate Academic Facilities Program provides grants to graduate institutions of higher education for the construction, reconstruction, and renovation of graduate academic facilities or, in some cases for the acquisition of special research equipment. The grants may be used for new or existing academic facilities if the primary purpose of the project is to carry out one or more of the kinds of projects described in § 619.10.

(Authority: 20 U.S.C. 1132c)

§ 619.2 Who is eligible to apply for a grant under the Graduate Academic Facilities Program?

Graduate institutions of higher education are eligible to apply for grants under this program.

(Authority: 20 U.S.C. 1132c)

§ 619.3 What regulations apply to the Graduate Academic Facilities Program?

The following regulations apply to this program:

(a) The Education Department General Administrative Regulations (EDGAR), 34 CFR Parts 74, 75, (with the exception of § 75.217 and §§ 75.219 through 75.222), 77, and 78.

(b) The regulations in this Part 619.

(Authority: 20 U.S.C. 1132)

§ 619.4 What definitions apply to the Graduate Academic Facilities Program?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in EDGAR, 34 CFR Part 77.1:

Applicant
Application
Award
Budget
Department
EDGAR
Facilities
Fiscal year
Grant
Grantee
Nonprofit
Private
Public
Recipient
Supplies
Secretary
Work of art.

(b) *Revised EDGAR definitions.* The following terms defined in EDGAR, 34 CFR Part 77.1, are redefined for this part as follows:

VOL 51 ISS 77 AP 22 1986 UMI

"Acquisition" means taking ownership of property through purchase at fair market value.

"Equipment" means machinery, fixtures, and other items necessary for maintenance and operation of a facility, except books, computer software, instructional materials, and items involving current and operating expenses such as fuel, supplies, and serviceable parts. Equipment may consist of—

(1) "Built-in equipment", which includes permanent nonmovable fixtures to a facility;

(2) "Initial equipment", which includes items necessary for installation in connection with construction of a facility;

(3) "Movable equipment", which includes movable fixtures and furniture necessary and appropriate for the functioning of an academic facility taking into account the specific purposes of the facility; and

(4) "Special research equipment", which includes equipment used in connection with a research program at graduate institutions of higher education.

"Project" means the construction activity or the acquisition of special research equipment that is proposed for funding by an applicant for assistance under this program.

(c) *Other definitions that apply to this part.* The following definitions also apply to this part:

"Academic facilities" means buildings or structures necessary and appropriate for instruction of students, for research, or for administration of educational programs and student and faculty services at an institution of higher education. Academic facilities include instructional and library facilities, instruction-related facilities, and related supporting facilities, but do not include facilities, such as—

(1) Dormitories, residence halls, or similar facilities designed for residence or habitation;

(2) Infirmaries or similar facilities designed for outpatient care;

(3) Facilities intended for events for which admission is to be charged the general public;

(4) Gymnasiums, stadiums, swimming pools, student centers, or other similar facilities designed for athletic or recreational activities;

(5) Facilities used for religious worship or sectarian activities, or used in connection with a program conducted by a school or department of divinity; or

(6) Facilities used by a school of medicine, school of dentistry, school of osteopathy, school of pharmacy, school of optometry, school of podiatry, school of nursing, or school of public health, unless the facilities—

(i) Are owned, operated, and maintained by a parent or affiliated institution of higher education which exercises corporate control over the particular school;

(ii) Require conversion or modernization of energy utilization techniques to economize on the use of energy resources; and

(iii) Support activities, services, or structures maintained by a parent or an affiliated institution of higher education.

"Act" means the Higher Education Act of 1965, as amended. Unless otherwise indicated, references to titles in the regulations in this part are to titles of the Act.

"Assignable area" means the square footage of floor space in facilities which is designed and available for assignment to specific functional purposes, such as instruction, research, and administration, but does not include—

(1) Areas used for general circulation within a building;

(2) Areas for public washrooms;

(3) Areas for building maintenance or custodial services; or

(4) Areas in central maintenance and utility facilities that exist only to support the operation and use of other structures on the campus and that are not available for assignment to specific functional purposes.

"Branch campus" means, within an institution of higher education, a unit that—

(1) Is separately organized;

(2) Is located apart from the parent institution;

(3) Meets the definition of an institution of higher education under the Act as an independent unit; and

(4) Has its own Federal Interagency Committee on Education (FICE) identification number.

"Capacity/enrollment ratio" means—

(1) The ratio of the assignable area of instructional and library facilities to the total student clock-hour enrollment at the campus of an institution, and

(2) For purposes of this definition, "student clock-hour enrollment" means the aggregate clock hours (sometimes called contact hours) per week in classes or supervised laboratory or shop work of those students enrolled in credit courses—i.e., attending credit courses at the institution's campus. A campus having formally established independent study programs may include systematically determined equivalents of credit hours but only include those hours when the relevant facility is being used by those students.

"Construction" means the erection of new structures, the rehabilitation, conversion, or improvement of existing structures, or the acquisition of existing structures and land thereunder.

"Eligible development costs" means the amount of necessary and reasonable expenses that would be incurred by construction of a project and that would be subject to reimbursement under this program, excluding any expenses reimbursed under any other Federal construction grant and any non-Federal funds required to be expended as a condition for the grant.

"FTE student" means full-time-equivalent student, as that term is defined for the Higher Education General Information Survey (HEGIS).

"Graduate institution" means an institution of higher education within the meaning of section 1201(a) of the Act that provides at least one post-baccalaureate program of study leading to an advanced degree.

"Other facilities used by students" means, in connection with projects relating to asbestos hazards, any campus facilities used by students, even if those facilities are ineligible for Federal assistance under this program.

"Research facilities, including libraries" means academic facilities used in connection with research programs at graduate institutions of higher education.

"Research program" means an organized activity which has as its primary objective the creation, organization, and dissemination of new knowledge or technology. It embraces only those activities designed to produce research outcomes commissioned by an agency either external to the institution or authorized by an organizational unit within the institution. It does not include research funded from the instructional budget of the institution.

"Unusual increases in enrollment" means an increase in full-time-equivalent enrollment of at least 100 full-time-equivalent students and an increase of more than 10 percent of FTE enrollment over a period of three years going back to the fall term beginning three years prior to the filing date for applications.

(Authority: 20 U.S.C. 1132a, 1132d-1, 1132e, 1132e-1)

Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

§ 619.10 What kinds of projects are funded under the program?

(a) Funds are awarded for projects which enable graduate institutions of higher education to—

(1) Economize on the use of energy resources;

(2) Comply with the requirements of—

(i) The Architectural Barriers Act of 1968;

(ii) Section 504 of the Rehabilitation Act of 1973; or

(iii) Other Federal, State or local laws dealing with environmental protection or health and safety, if the laws impact on facilities after they were constructed;

(3) Detect, remove, or contain asbestos hazards;

(4) Accommodate unusual increases in enrollment; or

(5) Improve research facilities, including library facilities, and acquire special research equipment.

(b) In order for facilities to be eligible for assistance under paragraph (a)(2)(iii) and (a)(3) of this section, the applicant must submit with its application satisfactory evidence to demonstrate that the degree of non-compliance with legal requirements, and the degree of threat from, and exposure to, asbestos hazards, pose a significant threat to the health and safety of the students.

(Authority: 20 U.S.C. 1132c)

§ 619.11 What are the funding priorities?

The Secretary may announce from among those categories listed in 34 CFR § 619.10 funding priorities under this program in any given fiscal year through a notice published in the Federal Register.

(Authority: 20 U.S.C. 1132a-1132-1)

Subpart C—How Does One Apply for a Grant?

§ 619.20 What limitations apply to the number of applications that may be submitted?

An applicant may submit only one application for assistance under this program in any given fiscal year. The Secretary considers as a separate applicant a branch campus of a multi-campus institution. If a project is funded by this program, the Secretary will not accept any future applications for funding for the same project.

(Authority: 20 U.S.C. 1132c)

Subpart D—How Does the Secretary Make a Grant?

§ 619.30 How are applications evaluated?

(a) The Secretary evaluates an application for a grant on the basis of—

(1) The general criteria in § 619.31 for all applicants; and

(2) The specific criteria in §§ 619.32 through 619.36 for applicants of particular categories of projects.

(b)(1) The Secretary awards up to a total of 100 points based on a maximum possible score of—

(i) 40 points for the general criteria in § 619.31; and

(ii) 60 points for the specific criteria in §§ 619.32 through 619.36, as applicable.

(2) The maximum possible score for each criterion is indicated in parentheses following the heading of that criterion.

(c) If a project includes two or more of the categories in § 619.10, the Secretary applies—

(1) The general criteria in § 619.31 (up to 40 points); and

(2) Each applicable set of specific criteria in §§ 619.32 through 619.36. The Secretary awards the average score (up to 60 points) received by the project under those sets of specific criteria.

The Secretary may award up to 25 additional points to each application that meets one or more priority categories established under §619.11. Subject to the 25-point limit, the Secretary may award a higher number of points to an application that addresses more than one priority category, and may award a lower number of points to an application that addresses both a priority and a nonpriority category. The Secretary announces the number of additional points for each priority category and type of application in a notice published in the Federal Register.

(e) The Secretary ranks all eligible applications in accordance with the total number of points each application receives in accordance with this section. Before making grants, the Secretary obtains the advice and recommendations of a panel of specialists who are competent in evaluating program applications. The Secretary may, based on the advice and recommendations of the panel, deviate from the initial rank order. Regular, full-time employees of the Federal Government may not be appointed as panel members.

(Authority: 20 U.S.C. 1132c)

§ 619.31 What selection criteria are used to evaluate existing academic facilities and financial need?

The Secretary evaluates each application for a grant under this program on the basis of the following criteria:

(a) *Use of existing academic facilities.* (Total: 10 points)

(1) The Secretary assesses the extent to which the applicant makes use of its existing academic facilities by considering the amount of assignable square feet in such facilities per FTE student.

(2) The Secretary assigns the highest scores to applicants with the smallest amount of square feet per FTE student.

(b) *Capacity/enrollment ratio.* (Total: 10 points)

(1) The Secretary further assesses the applicant's use of its existing academic facilities as reflected by the institution's capacity/enrollment ratio.

(2) The Secretary assigns the highest scores to applicants with the lowest capacity/enrollment ratio.

(c) *Financial Need.* (Total: 20 points)

(1) The Secretary considers the basic education and general annual expenditures per FTE student, based on data reported in the annual National Center for Education Statistics Survey, "Financial Statistics of Institutions of Higher Education," for the most recent year for which data are available.

(2) The Secretary assigns the highest scores to applicants with the lowest expenditure per FTE student.

(Authority: 20 U.S.C. 1132c)

§ 619.32 What selection criteria are used to evaluate conservation projects?

For projects based on energy conservation, the Secretary applies the following criteria:

(a) *Life cycle energy analysis.* (Total: 6 points)

(1) The Secretary considers whether the proposed project is based on a least-cost life cycle energy analysis that reflects the life cycle cost of the project over a twenty-year period.

(2) The Secretary awards six points for this criterion.

(b) *Integrated system design.* (Total: 6 points)

(1) The Secretary considers whether the proposed project exhibits an integrated system design, including a mix of energy sources and/or cogeneration systems, and/or other integrated system designs.

(2) The Secretary awards six points for this criterion.

(c) *Use of coal, solar energy, and renewable resources.* (Total: 8 points)

(1) The Secretary considers whether the proposed project promotes the use of coal, solar energy, or renewable resources.

(2) The Secretary awards eight points for this criterion.

(d) *Energy savings internal rate of return to the project.* (Total: 20 points)

(1) The Secretary considers the extent to which the proposed project is likely to provide a significant return in energy cost savings on the investment represented by the cost of the project.

(2) The internal rate of return is calculated on the basis of projected energy cost savings and the total cost of

VOL 51 ISS 77 AP 22 1986 UMI

the project, except for interior finishing and furnishing expenses (i.e. seating, blackboards, laboratory fixtures, etc.).

(3) Projected energy cost savings for renovation projects of existing buildings are the difference between—

(i) The average routine energy costs over the last three years, adjusted to current prices; and

(ii) Projected annual energy cost resulting from completion of the project.

(4) Projected energy cost savings for new construction are the difference between—

(i) The projected annual energy costs of a conventionally-designed building of the same kind as the one proposed (as calculated by an architectural engineering firm or consulting services firm); and

(ii) Projected annual energy costs resulting from the completion of a least-cost energy design project.

(5) The Secretary assigns the highest scores to applicants demonstrating the highest projected internal rates of return in energy cost savings.

(e) *Energy savings internal rate of return to the Federal investment share.* (Total: 20 points)

(1) The Secretary considers the extent to which the Federal investment in the proposed project is likely to provide a significant return in energy savings.

(2) The internal rate of return is calculated on the basis of the projected energy cost savings as determined under paragraph (d) of this section and the total Federal investment in the project.

(3) The Secretary assigns the highest scores to projects demonstrating the highest energy cost saving internal rates of return on the Federal investment.

(Authority: 20 U.S.C. 1132c)

§ 619.33 What selection criteria are used to evaluate the removal of architectural barriers, and environmental protection or health and safety programs mandated by law?

(a) For projects to remove architectural barriers to meet accessibility requirements which were not in effect at the time the facilities were constructed, the Secretary applies the following criteria:

(1) *Amount of assignable square feet of academic facilities to be made accessible by the project.* (Total: 30 points)

(i) The Secretary considers the amount of assignable square feet of academic facilities per FTE student to be made accessible to the handicapped by the project.

(ii) The Secretary assigns the highest scores to applicants with the largest amount of square feet to be made accessible per FTE student.

(2) *Percentage of assignable square feet of academic facilities to be made accessible by the project.* (Total: 30 points)

(i) The Secretary considers the percentage of assignable square feet of academic facilities to be made accessible to the handicapped by the project.

(ii) The Secretary assigns the highest scores to applicants with the largest percentage of square feet to be made accessible by the project.

(b) For reconstruction or renovation projects mandated by Federal, State, or local law, if those rquirements were not in effect at the time the facilities were constructed, the Secretary applies the following criteria:

(1) *Cost per FTE student.* (Total: 30 points)

(i) The Secretary considers the cost per FTE student of the applicant's compliance with the law.

(ii) The Secretary assigns the highest scores to applicants with the highest cost per FTE student.

(2) *Impact of the project.* (Total: 20 points)

(i) The Secretary considers the number of FTE students affected by the project.

(ii) The Secretary assigns the highest scores to applicants with the largest number of FTE students affected by the project.

(3) *Relative impact of the project.* (Total: 10 points)

(i) The Secretary considers both the number of FTE students affected by the project and the FTE enrollment of the institution.

(ii) The Secretary measures the relative impact of the project by dividing the number of FTE students affected by the project by the total number of FTE students enrolled, and assigns the highest scores to applicants with the highest relative impact.

(Authority: 20 U.S.C. 1132c(b); 1132a(2)(A) and (B))

§ 619.34 What selection criteria are used to evaluate the detection, removal, or containment of asbestos hazards?

For projects to detect, remove, or contain asbestos hazards, the Secretary applies the following criteria:

(a) *Amount of gross square feet of academic or other facilities with known or suspected asbestos hazards used by students.* (Total: 30 points)

(1) The Secretary considers the amount of gross square feet of academic or other facilities with known or suspected asbestos hazards per FTE student.

(2) The Secretary assigns the highest scores to applicants with the largest amount of square feet with known or suspected asbestos hazards per FTE student.

(b) *Estimated cost of detecting, removing, or containing asbestos hazards.* (Total: 30 points)

(1) The Secretary considers the estimated cost per FTE student of one or more of the following: detecting, removing, or containing asbestos hazards.

(2) The Secretary assigns the highest scores to applicants with the highest cost per FTE student.

(Authority: 20 U.S.C. 1132c(b); 1132(a)(5))

§ 619.35 What selection criteria are used to evaluate unusual increases in enrollment?

For projects based on unusual increases in enrollment, the Secretary applies the following criteria:

(a) *Increase in enrollment.* (Total: 30 points)

(1) The Secretary considers the extent of the actual numerical and percentage increases in FTE student enrollment at the institution or branch campus where construction would occur.

(2) The Secretary considers the increases over a three-year period starting with the fall semester that began three years preceding the most recent fall semester.

(3) The Secretary awards up to 15 points for the actual numerical increase and up to 15 points for the percentage increase, and assigns the highest scores to applicants with the largest increases in FTE student enrollment.

(b) *Increase in capacity.* (Total: 30 points)

(1) The Secretary considers the amount and percentage by which the project increases the assignable square feet of academic facilities at an institution.

(2) The Secretary awards up to 15 points for the actual numerical increase and up to 15 points for the percentage increase, and assigns the highest scores to applicants with the largest increases of assignable square feet of academic facilities per FTE student.

(Authority: 20 U.S.C. 1132c)

§ 619.36 What selection criteria are used to evaluate research facilities, including libraries, and the acquisition of special research equipment?

For projects based on research facilities, including libraries, and the acquisition of special research equipment, the Secretary applies the following criteria:

(a) *Institutional commitment to research programs.* (Total: 10 points)

(1) The Secretary considers the applicant's expenditures for research programs as a percentage of the applicant's average annual educational and general expenditures for graduate programs, as reported in the annual National Center for Education Statistics Survey, "Financial Statistics of Institutions of Higher Education," for the three most recent years for which data are available.

(2) The Secretary assigns the highest scores to applicants with the largest percentage of expenditures for research programs.

(b) *Age of special research equipment.* (Total: 10 points)

(1) The Secretary considers the percentage of the applicant's special research equipment which is more than five years old as of the opening of the fall semester preceding the application closing date.

(2) The Secretary assigns the highest scores to applicants with the largest percentage of special research equipment which is more than five years old.

(c) *Quality of existing research programs.* (Total: 10 points)

(1) The Secretary considers the quality of the applicant's existing research programs, in particular the adequacy of the existing research facilities and special research equipment, and the relevance of the proposed project to current research programs.

(2) A panel of specialists evaluates the quality of existing programs.

(d) *Increase in research capacity.* (Total: 10 points)

(1) The Secretary considers the extent to which the proposed project will increase the applicant's capacity for research or improve its existing research capacity.

(2) A panel of specialists evaluates the increase in research capacity.

(e) *Funding priorities.* (Total: 10 points)

(1) The Secretary considers the extent to which the proposed project improves the applicant's capacity for research in those academic disciplines, such as physical sciences and mathematics, engineering and environmental sciences, biological sciences, social sciences and education, and arts and humanities, which the Secretary, through a notice published in the **Federal Register**, establishes as priorities for the program in any given fiscal year.

(2) A panel of specialists evaluates the extent to which the project meets the Secretary's funding priorities.

(f) *Impact of project.* (Total: 5 points)

(1) The Secretary considers the extent to which the proposed project is likely to increase the capacity of the applicant to supply highly qualified personnel critically needed by the community, industry, and government for research and teaching.

(2) A panel of specialists evaluates the potential impact of the project.

(g) *Scope of project.* (Total: 5 points)

(1) The Secretary considers the extent to which the proposed project is likely to contribute significantly to the distribution of research programs of high quality throughout the United States.

(2) A panel of specialists evaluates the scope of the project.

(Authority: 20 U.S.C. 1132(b), 1132c, 1132a(3))

Subpart E—How Does the Secretary Determine the Amount of the Grant Award?

§ 619.40 What are the general rules for determining eligible development costs?

The Secretary determines eligible development costs by assessing the reasonableness and appropriateness of expenses that would be incurred by the project taking into account—

(a) The timing of when certain expenses would be incurred by the applicant; and

(b) The applicant's compliance with the regulations in this part.

(Authority: 20 U.S.C. 1132a, 1132c, 1132e–1)

§ 619.41 What are the specific rules for determining eligible development costs?

(a) An applicant selected to receive a grant under this program shall obtain from the Secretary a determination of eligible development costs before it may award any contract for construction or purchase any equipment that may later be financed with assistance under this program.

(b) The Secretary approves costs only after the Secretary or the appropriate official of another Federal agency has approved Federal assistance for the construction.

(c) The Secretary excludes the following from eligible development costs:

(1) Any costs for land incurred before the applicant files the application.

(2) Any cost for the acquisition of a structure incurred before the applicant files the application.

(3) Any costs for equipment, including special research equipment, incurred before the date the applicant files the application.

(4) Any cost for construction or built-in equipment if the contract was entered into before the date the applicant files the application.

(5) Any cost for ineligible facilities included in the total development costs.

(Authority: 20 U.S.C. 1132–1(3))

Subpart F—What Conditions Apply to Awards under this Program?

§ 619.50 What are the funding levels?

(a) An award of a construction grant under this program may not exceed 50 percent of the total eligible development costs.

(b) The Secretary does not award a construction grant for less than $25,000.

(c) The Secretary awards to institutions of higher education in any one State not more than 12.5 percent of the total funds available for grants under this program in any fiscal year.

(Authority: 20 U.S.C. 1132c)

§ 619.51 What are the financial considerations for approval or selection?

(a) The Secretary does not approve or select applications from institutions that are in default on a construction loan previously made under Part C of Title VII of the Act or Title IV of the Housing Act of 1950, whether or not the Secretary has agreed to any deferment, or in default of any other obligation made under any other Federal program.

(b) The Secretary does not approve or select applications from institutions that are financially insolvent.

(Authority: 20 U.S.C. 1132c)

§ 619.52 Must the grant award instrument be recorded?

A grantee under this program shall record its grant award instrument in the appropriate land registry records.

(Authority: 20 U.S.C. 1132c)

§ 619.53 What are the conditions for the recovery of payments?

The recipient or its successor shall pay to the Secretary an amount which bears to the value of the facility at that time the same ratio as the amount of the grant bore to the original cost of the facility, if, within twenty years after completion of construction of an academic facility under this program, a grant recipient or its successor in title or possession ceases to be a public or nonprofit institution, or the facility ceases to be used as an eligible academic facility, unless the Secretary determines that there is good cause for releasing the recipient or its successor from its obligation.

Selected Subjects

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 78
Wednesday, April 23, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 985

Spearmint Oil Produced In the Far West; Establishment of Salable Quantities and Allotment Percentages for the 1986–87 Marketing Year

AGENCY: Agricultrual Maketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule establishes the quantity of spearmint oil produced in the Far West, by class, that may be purchased from, or handled for, producers by handlers during the 1986–87 marketing year which begins June 1, 1986. This action is designed to promote orderly marketing condjtons for spearmint oil produced in the Far West. The rule was recommended by the Spearmint Oil Administrative Committee established under this marketing order.

EFFECTIVE DATE: April 23, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, DC 20250. Telephone (202) 447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been determined to be a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through the group actions of essentially small entities acting on their own behalf. Thus, both statues heve small entity orientation and compatibility.

It is estimated that approximately nine handlers of spearmint oil will be subject to regulation under the Marketing Order for Spearmint Oil Produced in the Far West during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the course of the season impose some costs on affected handlers, the added burden imposed on small entities by this regulation, if present at all, is not significant.

The salable quantity and allotment percentage for each class of spearmint oil is established in accordance with the provisions of Marketing Order No. 985, regulating the handling of spearmint oil produced in the Far West. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The rule was recommended by the Spearmint Oil Administrative Committee established under this marketing order.

The salable quantity and allotment percentage for each class of spearmint oil for the 1986–87 marketing year beginning June 1, 1986, is based upon recommendations of the committee and the following data and estimates:

(1) "Class 1" Oil (Scotch Spearmint)

(A) Estimated carrying on June 1, 1986—209,964 pounds.

(B) Estimated trade demand (domestic and export) for the 1986–87 marketing year, based on an average of producer sales for the five-year period beginning with the 1980–81 marketing year thorough the 1984–85 marketing year—737,049 pounds.

(C) Recommended desirable carryout on May 31, 1987—75,000 pounds.

(D) Salable quantity required from 1986 production—602,085 pounds.

(E) Total allotment bases for "Class 1" Oil—1,639,140 pounds.

(F) Computed allotment percentage—37.73 percent.

(G) The committee's recommended salable quantity—688,439 pounds.

(H) Recommended allotment percentage—42 percent.

(2) "Class 3" Oil (Native Spearmint)

(A) Estimated carryin on June 1, 1986—60,529 pounds.

(B) Estimated trade demand (domestic and export) for the 1986–87 marketing year, based on an average of sales for the past five marketing years beginning with the 1980–81 marketing year through the 1984–85 marketing year—870,516 pounds.

(C) Recommended desirable carryout on May 31, 1987—75,000 pounds.

(D) Salable quantity required from 1986 production—854,987 pounds.

(E) Total allotment bases for "Class 3" Oil—1,808,587 pounds.

(F) Computed allotment percentage—47.27 percent.

(G) The committee's recommended salable quantity—866,208 pounds.

(H) Recommended allotment percentage—49 percent.

The salable quantity is the total quantity of each class of oil which handlers may purchase from or handle on behalf of producers during a marketing year. Each producer is allotted a share of the salable quantity by applying the allotment percentage to the producer's allotment base for the applicable class.

Volume controls in effect under the order have aided in maintaining a stable market for each class of oil. The committee's objective for the 1986–87 marketing season is to promote orderly marketing and to continue to balance supply and demand in order to maintain stable market conditions and prices for each class of 1986–87 crop oil. The committee's recommendations are based on expectations of normal sales of spearmint oil during the 1986–87 marketing year.

Pursuant to the order, the committee issued additional allotment bases to both new and existing producers for the 1986–87 marketing year. New producers were issued allotment bases in units of 2,049 pounds for "Class 1" Oil and 2,261 pounds for "Class 3" Oil. Additional allotment bases for existing producers were divided equally, by class of oil, among all producers who reqested such additional base and demonstrated the ability to produce the additional spearmint oil referable to such base. The issuance of the additional allotment bases increased the total of "Class 1"

VOL 51 ISS 78 AP 23 1986 UMI

Oil allotment bases by 16,336 pounds and "class 3" Oil by 18,054 pounds.

A proposed rule published in the February 4, 1986, issue of the Federal Register (51 FR 4373) provided a 15-day comment period which ended February 19. Five comments were received. Essentially, commenters suggested that the marketing order ensures that: (1) Small producers are being put out of business and that either the marketing order should be terminated, or the proposed salable quantities and allotment percentages should be increased for the 1986–87 marketing season; (2) that barriers to entry should be reduced as is required by the Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders (guidelines); and (3) that marketing order regulations limit the quantity of spearmint oil that domestic producers can export and increase the amount of imports that enter into the U.S., thus reducing the ability of domestic producers to compete in world markets.

Small producers are given the same opportunity as all producers under the marketing order, and the regulations are established for the benefit of all producers and consumers. Allotment regulations apply equally to producers of all levels of production. If the commenters' requests to increase the proposed salable quantities and allotment percentages for the 1986–87 season were adopted, producers would likely overplant which could result in increased stocks and depressed prices as occurred prior to issuance of this order.

Section 985.50 of the order requires that the committee consider at least the following items when establishing regulation: (1) The estimated quantity of salable oil of each class held by producers and handlers; (2) the estimated demand for each class of oil; (3) the prospective production of each class of oil for the current marketing year; (4) the estimated total of allotment bases of each class of oil for the ensuing marketing year; (5) the quantity of reserve oil, by class, in storage; (6) producer prices of oil including prices for each class of oil; and (7) the general marketing conditions for each class of oil, including whether the estimated season average price to producers is likely to exceed parity. As outlined in this document, the supply and demand factors bearing on the need for regulation have been carefully examined, and the necessary requirements for regulation as specified in § 985.50 have been met. Therefore, it is determined that regulation of spearmint oil for the 1986–87 season in the manner specified is necessary to effectuate the declared purposes of the act.

Consistent with the Department's guidelines,which require that allocation and reserve pool programs make available to the primary market at least 110 percent of prior years' sales, the committee has recommended the salable quantities for the 1986–87 season at 127 and 111 percent of average sales for Scotch and native spearmint oil, respectively, for the three year period beginning with the 1982–83 marketing year though the 1984–85 marketing year. The committee has also made additional base available to new and existing producers in order to facilitate entry into the industry and update producer bases as required by the guidelines.

Contrary to the comments, marketing order regulations have not substantially limited the quantity of spearmint oil that can be exported, or increased the amount of imports into the U.S. According to data from USDA's Foreign Agricultural Service, in 1984 and 1985 exports of spearmint oil from the U.S. were significantly greater than the amount of imported spearmint oil from other countries into the U.S. Such imports are insignificant when compared to U.S. production. USDA's Crop Reporting Board indicates that U.S. production for 1984 was 2,019,000 pounds, (1,536,000 pounds of which was produced in the regulated area) while total imports were only 75,340 pounds. In 1985, U.S. production was 2,317,000 pounds (1,946,000 of which was produced in the regulated area) and imports decreased from the previous year to a total of 12,167 pounds. In addition, exports of spearmint oil from the U.S. to foreign markets in 1984 and 1985 were 398,504 and 372,012 pounds, respectively. The remainder of the U.S. production was utilized in domestic markets or put into storage.

Based on the foregoing facts and information, it appears that marketing order regulations are not significantly reducing the U.S. producers' competitiveness in U.S. or world markets. Also, the 1986–87 recommended salable quantities and allotment percentages for spearmint oil produced in the Far West have increased salable quantities of spearmint oil from that offered in previous years and will provide ample quantities to meet current and prospective supply and demand conditions. Consequently, the comments in opposition to the proposed regulation are not adopted.

In order to ensure orderly marketing of spearmint oil during the 1986–87 marketing season, and to give growers adequate notice so they may develop or make any adjustments in their planting decisions (planting usually begins in March) for the ensuing marketing season, this rule is to become effective upon publication.

List of Subjects in 7 CFR Part 985

Marketing agreements and orders, Spearmint Oil, and Far West.

PART 985—[AMENDED]

1. The authority citation for 7 CFR Part 985 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 985.206 is added under Subpart—Salable Quantities and Allotment Percentages, to read as follows: (The following provisions will not be published in the Code of Federal Regulations).

§ 985.206 Salable quantities and allotment percentages—1986–87 marketing year.

The salable quantity and allotment percentage for each class of spearmint oil during the marketing year which begins June 1, 1986, shall be as follows:

(a) "Class 1" Oil—a salable quantity of 686,439 pounds and an allotment percentage of 42 percent.

(b) "Class 3" Oil—a salable quantity of 866,206 pounds and an allotment percentage of 49 percent.

Dated: April 16, 1986.

Joseph A. Gribbin,

Director, Fruit and Vegetable Division.

7 CFR Part 989

Raisins Produced From Grapes Grown in California; Changes to Procedural and Operational Details of the Raisin Diversion Program

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule changes procedural and operational details of the Raisin Diversion Program (RDP). The changes will: (1) Broaden the category of producer applicants receiving priority for program participation; (2) add authority for subjecting those approved applicants who fail to follow through with their intention to remove vines to legal and administrative sanctions; (3) clarify that order requirements are applicable to raisin handlers when redeeming diversion certificates just as

though the raisins were acquired as new crop raisins; and (4) allow the Raisin Administrative Committee (Committee) to release to handlers the entire tonnage represented by diversion certificates. These changes were recommended by the Committee, which works with the U.S. Department of Agriculture (USDA) in administering the marketing order for California raisins.

EFFECTIVE DATE: April 18, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Agricultural Marketing Service, USDA, Washington, DC 20250, Telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum No. 1512–1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through the group action of essentially small entities for their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 23 handlers of raisins will be subject to regulation under the Marketing Order for Raisins Produced from Grapes Grown in California during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued under this order impose some costs on affected handlers and the number of such firms may be substantial, the added burden imposed on small entities, if present at all, is not significant.

The changes to the RDP are established in accordance with the provisions of Marketing Order No. 989, regulating the handling of raisins produced from grapes grown in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

It is found that good cause exists for not postponing the effective date of this rule until 30 days after publication in the Federal Register (5 U.S.C. 553). The final rule needs to be effective by April 18, 1986, in order to provide producers with adequate notice of the changes to the RDP and so that they may be given the opportunity to withdraw prior to June 1, 1986. Under § 989.156(r) of the RDP rules and regulations, successful applicants have 10 days to withdraw from the program if they disagree with any program changes. June 1 is the date specified in § 989.156(h) of the RDP rules and regulations by which successful applicants must have removed their grapes or vines under the RDP.

Notice of this action was published in the Federal Register on March 24, 1986 (51 FR 9968). Interested persons were invited to submit written comments by April 3, 1986. One comment was received from the Committee.

The RDP, which was implemented for the first time in 1985, gives producers the means of voluntarily reducing the quantity of grapes grown for drying into raisins. Participating producers would be required to preclude grapes from being produced and harvested on the production unit involved in the program. In return, producers would receive a diversion certificate representing the quantity of raisins diverted from the involved production unit. Producers could then sell the diversion certificate to handlers as though the raisins were produced in the current crop year. Since the establishment of the RDP, the raisin industry has been working to bring raisin supplies more in line with demand. In 1985, 60,000 tons of raisins were diverted from production. The Committee has designated over 100,000 tons of Natural Seedless raisins for the 1986 diversion program because raisin supplies are expected to exceed market demand and normal carryover needs by that amount.

The first change in § 989.156(d) as proposed would have allowed producers, who agree to remove vines from a partial production unit, to receive the same priority as those who remove vines from an entire production unit. The Committee's comment suggested that the proposed rule should be revised to allow producers who remove vines from a partial production unit to receive second priority for program participation instead of the same priority as those producers who remove vines from a full production unit. Producers who remove a full production unit would no longer have the ability to produce raisins on that area, and would most likely convert the unit to other uses. Thus, this would permanently reduce the production of grapes to be dried into raisins. However, those producers who agree to remove the vines on a portion of their production unit would still be capable of producing grapes for raisins on the remainder of that production unit, and could continue to produce grapes on that area in the future. While removing vines from a partial production unit would also reduce grape production for raisins, such producers would be most likely to remove only low yielding portions of their production. Since it is the Committee's intention to encourage producers to remove vines under the RDP, which is the most effective method currently known for accomplishing program goals, the Committee's comment to give second priority to those producers who remove vines from a portion of a production unit is adopted into this final rule.

The second change will add legal and administrative remedies to § 989.156(h) for those approved applicants who fail to follow through with their intention to remove vines as specifically stated on their applications. Such producers shall not be issued a diversion certificate, may be subject to liquidated damages and interest charges as provided in paragraph (q) of § 989.150, and may be denied the opportunity to participate in future programs. This will discourage approved applicants from changing from vine removal to diversion by another method. In an oversubscription situation, when the production volume in such applications exceeds the amount of diversion tonnage available under the program, a lottery system would be required to allocate such diversion tonnage among the applicants. Producers who indicate vine removal on their diversion applications but later decide to divert by another means would avoid the lottery system and deny other producers the opportunity to participate in the program. Thus, these measures are necessary to foster compliance and more effectively enforce the provisions of the diversion program.

The third change is in § 989.156(p) and will clarify that order requirements are applicable to handlers when diversion certificates are redeemed. It is the Committee's intention to clarify that the raisin tonnage represented on diversion certificates be treated in the same manner as new crop raisins, and to protect the intereats of reserve pool equity holders. This includes any reserve pool obligations, payment of assessments, storing of reserve tonnage, and remedies in the event of handlers' failure to deliver reserve tonnage raisins. These requirements are applicable to reserve raisins released to handlers under the diversion program.

The last change is in § 989.156(k). It will allow the Committee to release to

VOL 51 ISS 78 APR 23 1986 UMI

handlers the entire amount on the diversion certificate when certificates are redeemed. The current provisions only allow the Committee to release the free tonnage portion on the certificates to handlers. One year's program experience has shown that diversion certificates may be redeemed before free and reserve percentages have been computed and announced. Free and reserve percentages are recommended to the Secretary prior to February 15, of the crop year. The free percentage prescribes the portion of the crop that can be shipped immediately to any market. The reserve percentage prescribes the portion that must be held for delayed shipment. Releasing the entire amount of diversion tonnage, regardless of whether free and reserve percentages are established, will allow handlers to treat the reserve raisins represented by diversion certificates the same as if a crop was produced and delivered to the handler.

After consideration of all relevant matters presented, the information and recommendations submitted by the Committee, and other available information, it is further found that the changes to the procedural and operational details of the raisin diversion program will tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Part 989

Marketing agreements and Orders, Grapes, Raisins, California

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR Part 989 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Paragraphs (d), (h), (k), and (p) of § 989.156 are revised, and the heading of paragraph (g) is revised to read as follows:

Subpart—Administrative Rules and Regulations

§ 989.156 Raisin diversion program.

* * * * *

(d) *Priority of applications and allocation of tonnage.* Those producer applicants indicating that the vines of the producing units or portions thereof will be removed, shall receive first and second priority, respectively, over other applicants when reserve tonnage under the program is to be allocated. Grafting vines of one varietal type to another varietal type does not constitute removal under the program. If the production volume in such applications exceeds the amount of diversion tonnage available under the program, a lottery will be held to allocate such diversion tonnage among the applicants. In conducting any lottery under this section, the Committee may group producer applications on a handler-by-handler basis, and separate lotteries will be held for each such group. The diversion tonnage of raisins available for each such group in each lottery may not exceed the percentage of total handler acquisitions acquired by the group's handler during the previous crop year. To the extent diversion tonnage exists after such group lotteries, such remaining diversion tonnage may be allocated by one lottery of all remaining producer applications. If reserve tonnage exists under the program after the allocation of diversion tonnage has been made to all eligible producer applicants who remove vines, all other applications shall be considered. If the production volume in such applications exceeds the amount of reserve raisin tonnage remaining under the program, a lottery will be held to allocate the remaining diversion tonnage in the manner described above.

* * * * *

(g) *Verification.*

* * * * *

(h) *Compliance.*—(1) *Methods of diversion.* An approved applicant shall be required to take the necessary measures to preclude grapes from being produced and harvested on the production unit involved in the program. These measures may include spur pruning the vines, chemically removing the crop before maturity, hand removing and destroying the bunches of grapes before maturity, removing the vines, or any other method which prevents the grapes from maturing and being harvested. Grafting vines of one varietal type to another varietal type does not constitute removal of the vines under the program.

(2) *Period of diversion.* An approved applicant must remove the grapes, or vines, indicated on the application within the production unit or portion thereof designated in the application not later than June 1 of the crop year when a raisin diversion program is implemented.

(3) *Failure to divert.* Any raisin producer who does not take the necessary measures to remove the grapes on an approved production unit by June 1, or any raisin producer who has indicated the removal of vines or the intent to remove the vines and who does not remove such vines on an approved production unit or portion thereof by June 1, shall not be issued a diversion certificate, may be subject to liquidated damages and interest charges as provided in paragraph (q) of this section, may be subject to an injunctive action under the act, and may be denied the opportunity to participate in future diversion programs.

* * * * *

(k) *Redemption of certificates.* Any handler holding diversion certificates may redeem such certificates for reserve pool raisins from the Committee. To redeem a certificate, a handler must present the diversion certificate to the Committee and pay the Committee an amount equal to the established harvest costs plus an amount equal to the payment for receiving, storing, fumigating, handling, and inspecting raisins as specified in § 989.401 for the entire tonnage shown on the certificate. Handlers who acquire diversion certificates from producers shall report acquisitions of such certificates and submit them for redemption in a manner and for the reporting periods provided in § 989.173(b) for the acquisition of raisins acquired from producers. The Committee shall issue a reserve release entitling the handler to an amount of reserve pool raisins equal to the entire tonnage shown on the certificate. Upon receipt of the diversion certificate, the Committee shall note on the certificate that it is cancelled. Diversion certificates will only be valid and honored by the Committee if presented to it for redemption on or before February 15 of the crop year for which they were issued.

* * * * *

(p) *Handling of reserve pool tonnage released when diversion certificates are redeemed.* Handlers shall comply with the applicable provisions of the order and administrative rules and regulations for the reserve pool tonnage released under the raisin diversion program in the same manner as raisins acquired from producers. Such provisions shall include, but not be limited to, reporting, satisfying reserve pool obligations, payment of assessments, storing reserve tonnage, and the remedies in the event of failure to deliver reserve tonnage raisins.

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 32

[Docket No. 86–9]

National Banks' Lending Limits; Request for Comment

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Temporary rule; request for comment.

SUMMARY: The Office of the Comptroller of the Currency ("Office") has adopted an amendment to 12 CFR Part 32 creating a substitute lending limit for national banks with charged-off agricultural and oil and gas loans. This revision is intended to provide temporary relief from lending restrictions to national banks which have suffered reductions in capital as a result of problems in the agricultural and oil and gas sectors of the economy. Although the temporary rule is effective immediately, the Office is requesting comments from the public prior to adopting a final rule.

DATES: The temporary rule is effective on March 28, 1986. Comments must be received on or before May 23, 1986.

ADDRESS: Comments should be sent to Docket No. 86–9, Communications Division, 5th Floor, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, SW., Washington, D.C. 20219. Attention: Lynnette Carter. Telephone: (202) 447–1800. Comments will be available for inspection and photocopying at the same location.

FOR FURTHER INFORMATION CONTACT: Rosemarie Oda, Senior Attorney, Legal Advisory Services Division, (202) 447–1880; Linda Gottfried, Attorney, Legal Advisory Services Division, (202) 447–1880; Alan Herlands, Special Assistant to the Chief National Bank Examiner, (202) 447–1646.

SUPPLEMENTARY INFORMATION:

Introduction

Section 401(a) of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. No. 97–320 (1982), amended R.S. § 5200, 12 U.S.C. 84, to raise the general limit on a national bank's lending to a single borrower from 10 to 15 percent of unimpaired capital and unimpaired surplus. It also provided express authority for the Office to issue regulations implementing the statute, including rules "to establish limits or requirements other than those specified." 12 U.S.C. 84(d)(1).

When Congress amended section 84, it expressed an intention to "substantially amend the arbitrary and inflexible laws affecting national bank lending." S. Rep. No. 97–536, 97th Cong., 2d Sess. 25 (1982). In granting the Office the authority to promulgate regulations to carry out the purposes of the section, Congress stated that the reason for permitting the Office to establish separate limitations was to enable it to respond to changes in "economic conditions and financial practices." S. Rep. at 60. Among the reasons Congress cited for the comprehensive changes to the existing lending limits statute was the following:

> Added flexibility is needed by smaller institutions, particularly in rural and agricultural communities, where too often small banks now have to turn away local borrowers. In fact, a recent ABA nationwide survey found that 6 percent of 2,400 rural bank respondents had loan applications from acceptable farm customers exceeding their lending limits. (S. Rep. at 25.)

Clearly, Congress was concerned about the availability of credit in farm communities when it relaxed lending limitations. The agricultural economy has vastly deteriorated in the four years since the statutory amendment, creating severe financial pressures on agricultural borrowers and their banks. Additionally, the oil and gas sector of the economy has been adversely affected by the worldwide plummet in the price of oil. The credit needs of these sectors cannot or will not be met because of the reduction in unimpaired capital and unimpaired surplus of national banks serving those communities resulting from losses due to economic problems beyond their control. The federal bank regulatory agencies recently testified before Congress and issued a joint statement that supervisory policies were necessary to assist basically sound, well-managed banks to weather the temporary strains in these troubled economic sectors.

On March 28, 1986, the Office announced a new enforcement policy, subsequently published as "Capital Forbearance Policies", elsewhere in this issue of the **Federal Register**. The enforcement policy is designed to benefit banks that have sufficient capital to absorb loan losses and have reasonable prospects to replenish capital. It will encourage banks to recognize losses in their agricultural and oil and gas loan portfolios without sacrificing the integrity of their financial statements. This new capital forbearance policy establishes a window period, from March 28, 1986, until December 31, 1987, for eligible banks to request that the Office forbear from imposing its usual capital standards and an expiration date of January 1, 1993, for the forbearance policy.

One of the stated purposes of the capital forbearance policy is to encourage work-out strategies between national banks and agricultural and oil and gas borrowers. This has been accomplished by providing an incentive to banks in these sectors of the economy to take losses without fear of enforcement action against them on charges that capital has not been maintained at adequate levels. It will also be accomplished by eliminating the fear of incurring personal liability on the part of the bank's directors for exceeding national bank lending limits in making new loans or meeting prior commitments to lend.

An essential component of the capital forbearance policy is the amendment of the call report for national banks to create a new memorandum item for charge-offs of special category, "agricultural" and "oil and gas," loans. This memorandum item has been designed for national banks with special category loan charge-offs whose capital has declined as a result of losses incurred on these loans; it will be used in part to provide the Office with information to evaluate whether to grant capital forbearance.

The capital forbearance policy statement also announced that the Office would amend the regulation implementing section 84, which is found at 12 CFR Part 32, 48 FR 15844 (April 12, 1983), to comport with the aims of the forbearance policy. In order to allow national banks which have suffered reductions in their capital as a result of problems in the agricultural and oil and gas sectors to substitute an increased lending limit to offset the decline in their unimpaired capital and unimpaired surplus, or total capital, the Office has created a temporary regulation at 12 CFR 32.6, "Substitute lending limit for banks with agricultural and oil and gas loans." The new provision will allow these banks with agricultural and oil and gas loans to continue lending to their creditworthy customers by using the special category loan charge-offs described above to calculate lending limits up to a maximum level of 20 percent of unimpaired capital and unimpaired surplus.

It must be emphasized that the substitute lending limit is not designed to increase a bank's lending capacity above that which existed prior to January 1, 1986. It also does not establish a flat new limit for all banks which have agricultural or oil and gas loans in their portfolios. Within the maximum level of 20 percent, the substitute lending limit may vary with each bank, because it will factor into the

VOL 51 ISS 78 APR 23 1986 UMI

lending limit calculation the degree to which the bank has been affected by charge-offs of agricultural and oil and gas loans. The substitute lending limit does not affect the applicability or availability of any other statutory limitation or exception, such as the additional 10 percent limit for loans secured by readily marketable collateral at 12 U.S.C. 84(a)(2), 12 CFR 32.4.

Definitions

The definitional section of the new provision is intended to carry over the terminology used in the capital forbearance policy statement and for call report purposes and thereby ensure that the new limit is available only to banks which have loaned in the agricultural and oil and gas sectors. Accordingly, "agricultural loans" and "oil and gas" loans are defined in general terms in the regulation and are further described in the call report instructions and in the "Capital Forbearance Policies". The federal bank regulatory agencies have generally agreed upon these definitions, which are based on historical usages of these terms. It is anticipated that any subsequent interpretations of the definitions of "agricultural loans" or "oil and gas loans" will be issued in the form of banking circulars, call report instructions, other related issuances, and letter rulings. To minimize the necessity for further interpretation, however, the Office specifically invites comment on these definitions.

The term "special category loan charge-offs" is defined to incorporate the memorandum item for agricultural and oil and gas loan charge-offs referred to in the capital forbearance policy statement. The definition includes a reference to the window period for entries in this account, January 1, 1986 through December 31, 1987, established in the capital forbearance policy statement, thereby harmonizing the extent of relaxation in lending limitations with the extent of forbearance from administrative action.

The Temporary Substitute Lending Limit

The substitute lending limit will be available only to a national bank with the aforementioned special category loan charge-offs if its capital has declined and only for a limited period of time. Section (b) provides the maximum substitute lending limit of 20 percent of unimpaired capital and unimpaired surplus for banks whose capital has declined as a result of the aforementioned special category loan charge-offs and provides an expiration date for the regulation of January 1, 1993, which coincides with the date of termination of the capital forbearance policy. It also provides that even though a bank with reduced capital has agricultural or oil and gas loans covered by the capital forbearance policy, its substitute lending limit cannot exceed 15 percent of its unimpaired capital and unimpaired surplus as of December 31, 1985.

Below the maximum limit, the lending limit for each bank can be expected to differ, depending on the effect of including the factor for special category loan charge-offs in section (c). The Office has not made the maximum limit available in all instances because the substitute limit is not intended to grant affected national banks a higher limit than would have been afforded to them under the general statutory limit prior to January 1, 1986. A worksheet is provided at the end of this preamble as Exhibit A which will assist banks in computing their substitute limit.

Reasons for Adoption Without Prior Notice and Comment

Immediate adoption of this rule is required to accomplish the purposes of the capital forebearance policy. On March 26, 1986, the United States Senate Committee on Banking, Housing, and Urban Affairs endorsed the objectives of the joint statement and urged the federal bank regulatory agencies to move as rapidly as possible to provide assistance to banks now making lending decisions for the 1986 growing season. For these reasons, the Office finds that application of the notice and public participation provisions of 5 U.S.C. 553 to this action would be contrary to the public interest and that good cause exists for making this action effective immediately. Nevertheless, the Office believes that comment on alternate proposals may be beneficial and could result in a better final rule. Therefore, the Office has also requested post-promulgation comment on preferable alternatives for providing relief from national bank lending limits.

Regulatory Flexibility Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–602), it is certified that this regulation will not have a significant economic impact on a substantial number of small entities. The effect of the regulation is beneficial rather than adverse, and small entities are generally expected to benefit more than larger institutions.

Executive Order 12291

The Office has determined that this regulation does not constitute a "major rule" and, therefore, does not require a regulatory impact analysis. This regulation would ease burdens imposed by regulations and would have no adverse effect on the operations of national banks.

Exhibit A—General Lending Limitation Calculations

(For use until January 1, 1993)

Calculation date _____

1. Total capital on December 31, 1985	$_____
2. 15% of the amount on Line 1	$_____
3. Total capital on calculation date	$_____
4. 15% of the amount on Line 3	$_____

IF THE AMOUNT ON LINE 4 EQUALS OR EXCEEDS THE AMOUNT ON LINE 2, STOP HERE. THE BANK'S CURRENT GENERAL LENDING LIMITATION IS THE AMOUNT ON LINE 4.

5. Sum of Special Category Loan Charge-offs since December 31, 1985 (but only through December 31, 1987)	$_____
6. Sum of all recoveries since December 31, 1985 on all loans included in Line 5	$_____
7. Amount on Line 5 minus amount on Line 6	$_____
8. Amount on Line 3 plus amount on Line 7	$_____
9. 15% of the amount on Line 8	$_____
10. 20% of the amount on Line 3	$_____
11. Lesser of the amounts on Line 9 and Line 10	$_____
12. Lesser of the amounts on Line 2 and Line 11	$_____

THE BANK'S CURRENT GENERAL LENDING LIMITATION IS THE AMOUNT ON LINE 12.

List of Subjects in 12 CFR Part 32

National banks, Lending limits.

PART 32—LENDING LIMITS

For the reasons set forth in the preamble, the Comptroller of the Currency hereby amends 12 CFR Part 32 as follows:

1. The authority citation for Part 32 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.*, 12 U.S.C. 84 and 12 U.S.C. 93a.

2. Section 32.6 is added to read as follows:

§ 32.6 Substitute lending limit for banks with agricultural or oil and gas loans.

(a) *Definitions.* For purposes of this section:

(1) "Agricultural loans" include loans or extensions of credit secured by farmland, loans to finance agricultural production and other loans to farmers reported in the bank's call report of condition. The following are examples of such types of loans: For growing and storing of crops, breeding and marketing of livestock, financing fisheries, purchases of farm machinery and equipment, maintenance and operations of the farm, and discounted notes of farmers.

(2) "Oil and gas loans" include loans or extensions of credit to oil companies, petroleum refiners, and companies primarily engaged in the oil- and gas-related business, for example: Operating oil and gas field properties, contract drilling, performing exploration services on a contract basis, performing oil and gas field services, manufacturing or leasing of oil field machinery and equipment, pipeline transportation of petroleum, natural gas transmission or distribution, and investing in oil and gas royalties or leases.

(3) "Special category loan charge-offs" mean agricultural or oil and gas loans charged-off during the period from January 1, 1986 through December 31, 1987, which have been or will be reported in a special memorandum item in the bank's call report of condition in accordance with the Comptroller's capital forbearance policy.

(b) A national bank which has special category loan charge-offs resulting in a reduction in its unimpaired capital and unimpaired surplus since December 31, 1985, may substitute a lending limit calculated under this section for the general limitation provided at 12 U.S.C. 84(a)(1), up to a maximum amount of 20 percent of unimpaired capital and unimpaired surplus, until January 1, 1993.

(c) The substitute lending limit in section (b) is the lesser of the following amounts:

(1) 15 percent of unimpaired capital and unimpaired surplus on December 31, 1985; or

(2) 15 percent of the total of:

(i) The difference between the sum of special category loan charge-offs and the sum of recoveries on those charge-offs; plus

(ii) Unimpaired capital and unimpaired surplus; or

(3) 20 percent of unimpaired capital and unimpaired surplus.

Dated: April 4, 1986.

Robert L. Clarke,

Comptroller of the Currency.

BILLING CODE 4810-33-M

12 CFR Part 32

[Docket No. 86-10]

National Banks; Capital Forbearance Policies

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Policy Statement on Capital Forbearance.

SUMMARY: Conditions in the farm and oil and gas sectors of the economy have created increasingly severe financial pressures on farm banks and their farmer borrowers and on oil and gas banks and their oil and gas borrowers. Many farmers are facing foreclosure, and others have developed serious problems. Likewise, the volatility of energy prices has created difficulties for oil and gas borrowers.

Recognizing these problems, the Office of the Comptroller of the Currency ("OCC") is publishing this policy statement which explains its intentions with regard to supervisory policies affecting national banks adversely affected by economic conditions in the agricultural and oil and gas sectors of the economy. This statement was issued in Banking Circular No. 212, dated March 28, 1986. The statement outlines a short term capital forbearance policy designed generally to benefit agricultural and oil and gas banks having sufficient capital to absorb loan losses and reasonable prospects to replenish capital; it reiterates previous OCC statements regarding loan restructuring and accounting therefore; it describes proposed call report changes expected to be effective with the call report for the quarter ending June 30, 1986; and it announces OCC's intention to amend 12 CFR Part 32 relating to lending limits to substitute a new lending limit to offset the impact lower capital ratios would otherwise have on lending limit computations at national banks making agricultural and oil and gas loans.

EFFECTIVE DATE: March 28, 1986.

FOR FURTHER INFORMATION CONTACT: Alan Herlands, Special Assistant to the Chief National Bank Examiner, (202) 447–1646, or Zane Blackburn, Director, Bank Accounting, (202) 447–0471, 490 L'Enfant Plaza East, SW., Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION:

I. Introduction

The last few years have proved to be a particularly difficult period for farm and oil and gas banks and their borrowers. Many farmers and others dependent on the agricultural economy have experienced, and continue to experience, financial difficulties. During this period, an historically large number of farm banks have failed and an even larger number have developed serious problems. Similarly, volatile energy prices have adversely impacted oil and gas borrowers and the banks that lend heavily to them.

In light of these problems, the Comptroller of the Currency, the Federal Reserve Board, and the Federal Deposit Insurance Corporation believe it appropriate to employ supervisory policies that will support basically sound, well-managed banks in weathering what is expected to be a difficult but transitional period. In connection with their recent testimony before Congress, the agencies released a Joint Policy Statement on March 11, 1986, outlining these policies. Although the statement refers only to agricultural banks, it has been extended to oil and gas banks by subsequent agreement among the agencies. A copy of the Joint Policy Statement is attached.

This Circular explains how the Office of the Comptroller of the Currency will implement the Joint Policy Statement. Implementation will be accomplished by encouraging banks to work with their troubled agricultural and oil and gas borrowers; by establishing a capital forbearance policy; by encouraging the use of generally accepted accounting principles which may permit loan restructurings without loss recognition; by changes to Call Reports; and by relaxing lending limits.

The Congress is considering legislation covering capital forbearance, Call Reports, and lending limits, among other matters. Modification of this Circular may be required if legislation is enacted.

Certain provisions contained in this Circular are subject to approval by the Office of Management and Budget, where they are currently under review.

II. Bank Relationships with Troubled Borrowers

Problems in the agricultural economy have directly affected the banks that provide financing for the agricultural sector. Severe financial pressures on borrowers dependent on the agricultural economy have resulted in an increase in loan delinquencies. As conditions have worsened, borrowers increasingly fear foreclosure, while bankers are increasingly concerned about supervisory actions that may result from

VOL 51 ISS 78 AP 23 1986 UMI

reduction in their banks' capital as a consequence of loan losses.

In response to this situation, the OCC has encouraged bankers to develop work-out strategies with their agricultural borrowers. In a joint statement on April 23, 1985, the Federal bank regulatory agencies reiterated their policy of encouraging banks to enter into work-out plans with agricultural borrowers who are experiencing temporary difficulties in meeting their debt service obligations. The OCC renews that encouragement now.

Although OCC examiners will point out to management the weaknesses that may be present in loans, the OCC does not require foreclosure on collateral or the acceleration of the maturity of loans. The OCC recognizes that downturns in certain sectors of the economy are expected to be transitory. Therefore, lenders may find that the most prudent policy is to restructure the loan terms rather than to take more precipitous action such as foreclosure.

The volatility in energy prices has created a similar situation between oil and gas companies and the banks that lend to them. Accordingly, the OCC also encourages banks to develop appropriate work-out strategies with their oil and gas borrowers.

III. Capital Forbearance Policy

Despite the difficult problems facing many agricultural and oil and gas banks, the OCC believes that most have sound prospects for the future. Even with the losses suffered by these banks and the likelihood that losses will continue to occur, these banks retain substantial strength. Many of them possess strong capital to asset ratios and capable management that adheres to sound lending policies.

Accordingly, the OCC has adopted, effective immediately, a capital forbearance policy which will benefit basically well-managed banks that have sufficient capital to absorb loan losses and reasonable prospects to replenish capital. Capital forbearance formally acknowledges that capital should be used during periods of unusually heavy loan losses and that capital replenishment takes time. The capital forbearance policy should provide banks greater incentives to recognize promptly losses arising in their loan portfolios, work with borrowers to restructure loans, and rebuild bank capital in an orderly manner. This capital forebearance policy is temporary and will terminate on January 1, 1993.

Under the capital forbearance policy, the OCC will not take administrative action to enforce the minimum capital requirements in 12 CFR Part 3 against a bank whose primary capital ratio declines below 5⅓ percent to no less than 4 percent before December 31, 1987, provided the bank meets the following qualifications and conditions.

1. The bank must meet the definition of an agricultural/oil and gas bank. An agricultural/oil and gas bank is one whose agricultural and oil and gas loans, in the aggregate, are equal to or greater than 25 percent of the bank's total loans and leases, net of unearned income. Agricultural loans are defined as loans secured by farmland and loans to finance agricultural production and other loans to farmers from Schedule C on the bank's Call Report. A list of the kinds of loans qualifying as oil and gas loans for purposes of the capital forbearance policy is attached as Exhibit A.

2. The weakened capital position of the bank must be largely the result of problems in the agricultural and/or oil and gas sectors of the economy and not due to excessive bank operating expenses, insider abuse, excessive dividends or actions taken solely for the purpose of qualifying for capital forbearance.

3. The bank must be well-managed. In reaching determinations about the quality of a bank's management, the OCC will take into account existing management's past record of performance in guiding the bank, including its timely recognition of loan losses and other weaknesses. The OCC will also consider the bank's past compliance with any agreements with, commitments to, or orders from the OCC. Further, the OCC will consider the capability of management to develop and implement an acceptable rehabilitative plan.

4. The bank must submit an acceptable plan for restoring capital by January 1, 1993 to the minimums required by 12 CFR Part 3. The plan should describe the means and schedule by which capital will be increased. This plan should also specifically address reduced dividends levels; limitations on the compensation of directors, executive officers or individuals having a controlling interest; limits on asset growth; and payments for services or products furnished by affiliated companies.[1] The plan should provide for improvement in the bank's primary capital ratio on a continuous or periodic basis from earnings, capital injections, asset shrinkage, or a combination thereof. A plan which projects no significant improvement in capital until near the end of the forbearance period will not normally be acceptable. The OCC may require modification to a bank's plan in order for the bank to receive, or to continue to receive, capital forbearance.

5. The bank must commit to file annual progress reports regarding compliance with its capital plan. Depending on an individual bank's progress, more frequent reports may be required. Moreover, any contemplated actions that would represent a material variance from the capital plan must be submitted to the OCC for review.

Banks with capital below the minimums established in 12 CFR Part 3 seeking capital forbearance must file a written request no later than December 31, 1987 with the Deputy Comptroller for the District in which the bank is located. The request must include a certification and explanation of its eligibility to participate (covering items 1 through 3 above), its plan, and its commitment to file the required reports. Capital forbearance will be considered granted unless, within 60 days of receipt of the request, the District notifies the bank that its request has been denied or that additional information or time is required. Pursuant to 12 CFR 3.8, during the period covered by this capital forbearance policy, a bank granted capital forbearance and in compliance with an acceptable capital plan will not be considered in violation of the minimum capital ratios required by 12 CFR 3.6.

Upon the written request of an agricultural/oil and gas bank and at the discretion of the OCC, the capital forbearance policy may be extended, in special circumstances, to a bank with a primary capital ratio lower than 4 percent. In addition, the OCC will consider extending its capital forbearance policy to banks which do not meet the above definition of an agricultural/oil and gas bank, but nevertheless are suffering capital declines caused by problems in the agricultural or oil and gas sectors. Capital forbearance may be extended to these banks only on a case-by-case basis upon written request and explanation submitted to the District Deputy Comptroller. In both circumstances, capital forbearance will not be considered granted until the District so notifies the bank.

The OCC reserves the right to terminate capital forbearance for banks engaged in unsafe or unsound or other objectionable practices, or if it becomes apparent to the OCC that the bank is unwilling or unable to comply with an acceptable capital plan. Capital forbearance, once granted, will not be terminated solely on the basis of subsequent changes in a bank's percentage of loans to agricultural and/or oil and gas borrowers.

Some banks are at present subject to capital requirements higher than those specified in 12 CFR Part 3 by a capital directive, an effective order issued pursuant to 12 U.S.C. 1818, or a formal agreement between a bank and the OCC. Banks which have experienced agricultural or oil and gas losses and which are subject to a capital ratio higher than the minimums set forth in 12 CFR 3.6 may request a modification from the OCC. The OCC will reconsider the higher requirement in light of the capital forbearance policy.

In addition, the OCC capital forbearance policy extends to well-managed banks whose primary capital ratios decline, as a result of problems in the agricultural or oil and gas sectors of the economy, from historic levels to levels above the 5⅓ percent minimum primary capital ratio. These banks do not have to apply for capital forbearance, and the OCC will not require them to take any action solely on the basis of that decline in capital. These banks will be expected to maintain adequate capital for the nature of their operations and, if appropriate, to increase their capital over time back to historic levels. In addition, these banks must recognize that asset growth should be accompanied by appropriate increases in capital.

All banks which are operating with capital levels below those which would be expected under normal economic conditions should be aware that the OCC will be unlikely to approve applications by them to acquire other banks. Similarly, the OCC will be likely to object to changes in control or acquisitions of such banks unless the transaction will result in prompt restoration of capital to appropriate levels.

The implementation of the OCC's capital forbearance policy has no effect on balance sheet or income statement items reported in Call Reports or other financial statements, nor does it allow banks to report, as assets, loans (or portions thereof) considered losses. On the contrary, the policy retains existing financial presentation rules and creates no inconsistencies with generally accepted accounting principles. The OCC believes that maintaining the integrity of financial statements is vital to assuring confidence in the banking system.

IV. Accounting for Troubled Debt Restructurings

The OCC has followed, and will continue to follow, generally accepted accounting principles with respect to loans which have been formally restructured to enable the borrower to service the debt. Statement of Financial Accounting Standards No. 15 (FAS 15), Accounting by Debtors and Creditors for Troubled Debt Restructurings, governs the accounting for such restructurings. This Standard allows a loan to continue to be carried on the bank's books without any loss recognition if the loan is formally restructured in a manner so that it is probable and estimable that the borrower can repay the loan under the new terms, and that the total future cash payments by the borrower (principal and interest combined) at least equals the loan amount on the bank's books.

Accordingly, a bank which reasonably expects a borrower's future cash payments to equal or exceed the loan amount does *not* need to recognize a loss on the restructuring. In those situations where it is expected that the future cash payments on the restructured loan will be less than the loan amount, the loss recognized is limited to the expected cash flow deficiency.

[Banking Circular 195 includes more specific details of the accounting provisions.] Bankers are encouraged to familiarize themselves with the accounting treatment described in FAS 15.

V. Call Report Changes

Two changes are being made to the Call Reports, expected to be effective with the reports for the quarter ending June 30, 1986. One is needed to monitor the capital forbearance policy and potential changes to legal lending limits for national banks; the other is designed to prevent misconceptions about certain restructured loans.

Schedule RI–B, "Charge-offs and Recoveries and Changes in Allowance and Lease Losses," will be changed for national banks to provide information relative to capital forbearance and legal lending limits. Memorandum items will be added to this schedule to identify a bank's charge-offs and recoveries of Special Category Loans on a cumulative basis since January 1, 1986. Special Category Loans are defined as (a) loans secured by farmland and loans to finance agricultural production and other loans to farmers from Schedule C of the bank's Call Report and (b) the oil and gas loans listed on Exhibit A hereto. Should the definitions change, the OCC will provide national banks with revised definitions prior to the due date for the Call Report first affected by the change.

The second set of changes involves the reporting of renegotiated "troubled" debt. The existing Schedule RC–N ("Past Due, Nonaccrual, and Renegotiated Loans and Lease Financing Receivables"), will be modified by removing the column entitled "Renegotiated troubled debt." Renegotiated loans which are performing in compliance with the modified terms will be reported in the memorandum section of Schedule RC–C under a new heading "Loans Restructured and in Compliance with Modified Terms." Renegotiated loans that become past due or are otherwise placed in nonaccrual status will be reported in Schedule RC–N in the appropriate categories.

In addition, a new memorandum item will be added to Schedule RC–N to require reporting of total renegotiated "troubled" debt included in the categories 30–89 days past due and accruing, 90 days or more past due and accruing, and nonaccrual. This memorandum item will be maintained for supervisory purposes on a confidential basis.

VI. Lending Limits

The recognition by a bank of losses on loans reduces not only its capital, but also reduces the maximum amount the bank can lend by law to any single borrower. Lending limits are an important ingredient in protecting the safety and soundness of banks by requiring diversification of credit risks. Many banks have established internal controls limiting the size of loans to any single borrower to an amount less than the legal lending limit. In those banks that do make loans at the legal lending limit, such loans are generally small in number. However, the declines in capital attributable to the problems in the oil and gas and agricultural sectors of the economy may cause some banks to be unable to serve the normal credit needs of a greater number of their creditworthy customers. In order to reduce the impact of these loan losses on a bank's ability to meet the legitimate credit needs of its financially sound customers, the OCC believes it necessary and appropriate to relax lending limits during the period in which the capital forbearance policy is in effect.

The Federal statute governing national bank lending limits is 12 U.S.C. 84. The OCC has issued implementing regulations at 12 CFR Part 32. In general, national banks are subject to a *General* limitation of 15 percent of total capital

[1] Banks should also refer to Banking Circular No. 115, "Income Diversion Through Management and Other Fees", dated August 30, 1976, and Supplement No. 1 thereto, dated December 28, 1976.

VOL 51 ISS 78 AP 23 1986 UMI

(i.e. unimpaired capital and unimpaired surplus), and may lend an additional 10 percent of total capital to the same borrower fully secured by readily marketable collateral. There are also a number of exceptions for specified types of loans. Under the statute, the OCC has the authority to establish limits other than those specified.

Under that authority, the OCC contemplates adopting as soon as possible a temporary amendment to 12 CFR Part 32 to be consistent with the purposes of the capital forbearance policy. It is anticipated at present that the amendment would substitute an increased general lending limit for national banks to offset the decline in capital resulting from losses attributable to problems in the agricultural and oil and gas sectors of the economy. As an offset, the new general lending limit would not increase any bank's lending limit above what if would have been had it not experienced losses attributable to these troubled economic sectors. The OCC also contemplates including in the amendment a maximum general lending limit of 20 percent to preserve the benefits of risk diversification. The change would cover losses occurring after January 1, 1986 and no later than December 31, 1987, but the effect of those losses on lending limits would continue until January 1, 1993.

The change would allow banks, whose capital declines by no more than 25 percent as a result of losses attributable to agricultural and oil and gas loans, a general lending limit of 15 percent of their capital as of December 31, 1985. For example, a bank with a 10 percent capital ratio, whose capital ratio at December 31, 1985 subsequently declines to 8 percent as a result of losses attributable to the agricultural or oil and gas sectors, would have no reduction in its general lending limit. For banks whose capital ratios are even more dramatically reduced, the effect of the new provision would be a general lending limit of as much as 20% of their reduced capital. The new general lending limit rule would expire simultaneously with the capital forbearance policy on January 1, 1993. Comment will be solicited on the temporary amendment.

Exhibit B hereto is a worksheet which would enable national banks to compute their general lending limits under the new rule. The Comptroller will send appropriate material to national banks relating to the formal adoption of the change to 12 CFR Part 32. *The new lending limit will not be effective until formal adoption of the rule.*

Dated: March 28, 1986.

Robert L. Clarke,

Comptroller of the Currency.

Exhibit A—Definitions of Oil and Gas Loans

The types of loans listed below regardless of purpose will be considered oil and gas loans for the purposes of qualifying for capital forebearance. Wherever "company" is referenced, the caption also assumes "individuals". SIC stands for Standard Industry Codes. See following pages for definitions.

A. Loans to the major integrated oil companies;

B. Loans to companies engaged in operating oil and gas field properties (SIC 1311) (production);

C. Loans to companies primarily engaged in contract drilling (SIC 1381);

D. Loans to companies primarily engaged in performing exploration services on a contract basis (SIC 1382);

E. Loans to companies primarily engaged in performing oil and gas field services (SIC 1389);

F. Loans to petroleum refiners (SIC 2911);

G. Loans to manufacturers and lessors of oil field machinery and equipment (SIC 3533, 7394);

H. Loans to companies primarily engaged in pipeline transportation of petroleum (SIC 4612, 4613);

I. Loans to companies primarily engaged in natural gas transmission or distribution (SIC 4922, 4923, 4924);

J. Loans to companies primarily engaged in investing in oil and gas royalties or leases (SIC 6792);

K. Loans to others engaged in oil and gas related activities.

Major Integrated Oil Companies

International Companies

British Petroleum Co.
Chevron Corp.
Exxon Corp.
Gulf Oil Corp.
Mobil Corp.
Royal Dutch/Shell Group
  Royal Dutch Petroleum Co.
  Shell Oil Co.
  Shell Canada Ltd.
  Shell Transport & Trading Co.
Texaco, Inc.

Domestic Companies

Amerada-Hess
Ashland Oil Co.
Atlantic Richfield Co.
Kerr McGee Corp.
Occidental Petroleum Co.
Pennzoil
Phillips Petroleum Co.
Standard Oil Co. of California
Standard Oil Co. (Indiana)
Standard Oil Co. (Ohio)
Sun Company, Inc.
Tenneco Co.
Unocal

SIC CODES

SIC 1311—Crude Petroleum and Natural Gas

Establishments primarily engaged in operating oil and gas field properties. Such activities include exploration for crude petroleum and natural gas; drilling, completing, and equipping wells; operation of separators, emulsion breakers, desilting equipment; and all other activities in the preparation of oil and gas up to the point of shipment from the producing property. Also includes the production of oil through the mining and extraction of oil from oil shale and oil sands.

SIC 1381—Drilling Oil and Gas Wells

Establishments primarily engaged in drilling wells for oil or gas field operations for others on a contract, fee, or similar basis. Includes contractors that specialize in "spudding in," "drilling in," redrilling, and directional drilling.

SIC 1382—Oil and Gas Field Exploration Services

Establishments primarily engaged in performing geophysical, geological, and other exploration services for oil and gas on a contract, fee or similar basis.

SIC 1389—Oil and Gas Field Services

Establishments primarily engaged in performing oil and gas field services, for others on a contract, fee, or similar basis, such as excavating slush pits and cellars; grading, and building of foundations at well locations; well surveying; running, cutting, and pulling casings, tubes, and rods; cementing wells; shooting wells; perforating well casing; acidizing and chemically treating wells; and cleaning out, bailing, and swabbing wells.

SIC 2911—Petroleum Refining

Establishments primarily engaged in producing gasoline, kerosene, distillate fuel oils, residual fuel oils, lubricants and other products from crude petroleum and its fractionation products, through straight distillation of crude oil, redistillation of unfinished petroleum derivatives, cracking or other processes.

SIC 3522—Oil Field Machinery and Equipment

Establishments primarily engaged in manufacturing machinery and equipment for use in oil and gas fields.

SIC 7394—Equipment Rental and Leasing Services

—Oil field equipment rental
—Oil well drilling equipment rental: Machinery, drilling bits, etc.

SIC 4612—Crude Petroleum Pipe Lines

Establishments primarily engaged in the pipe line transportation of crude petroleum.

SIC 4613—Refined Petroleum Pipe Lines

Establishments primarily engaged in the pipe line transportation of refined products of petroleum, such as gasoline and fuel oil.

SIC 4922—Natural Gas Transmission

Establishments engaged in the transmission and/or storage of natural gas for sale.

SIC 4923—Natural Gas Transmission and Distribution

Establishments engaged in both the transmission and distribution of natural gas for sale.

SIC 4924—Natural Gas Distribution

Establishments engaged in the distribution of natural gas for sale.

SIC 6792—Oil Royalty Traders

Establishments primarily engaged in investing in oil and gas royalties or leases, or fractional interest therein.

SIC 1321—Natural Gas Liquids Production

Establishments primarily engaged in producing liquid hydrocarbons from oil and gas field gases.

SIC 1623—Pipe Line Construction

—Distribution lines (oil and gas field construction)
—Pipe laying
—Pipe line construction
—Pipe line wrapping
—Pumping station construction

SIC 1629—Heavy Construction

—Oil refinery construction
—Petroleum refinery construction

SIC 3494—Values and Pipe Fittings

SIC 3498—Fabricated Pipe and Fabricated Pipe Fittings

SIC 3559—Special Industry Machinery

—Petroleum refinery equipment

SIC 4226—Special Warehousing and Storage

—Oil and gasoline storage caverns (for hire)
—Petroleum and chemical bulk stations and terminals for hire

SIC 4925—Mixed, Manufactured or Liquefied Petroleum Gas Production and/or Distribution

Establishments engaged in the manufacture and/or distribution of gas for sale, including mixtures of manufactured with natural gas.

SIC 5084—Industrial Machinery and Equipment

—Derricks (Wholesale)
—Drilling bits (Wholesale)
—Oil Refining machinery, equipment, and supplies (Wholesale)
—Oil well machinery, equipment, and supplies (Wholesale)
—Oil well supply houses (Wholesale)

SIC 5171—Petroleum Bulk Stations and Terminals

Establishments primarily engaged in wholesaling petroleum products, including liquefied petroleum gas, from bulk liquid storage facilities.

SIC 5172—Petroleum and Petroleum Products Wholesalers

Establishments primarily engaged in wholesaling petroleum and products. Included are packaged and bottled petroleum products distributors, truck jobbers, and other marketing petroleum and products at wholesale.

SIC 6211—Security Brokers, Dealers, and Flotation Companies

—Oil and gas lease brokers
—Dealers in oil royalties

SIC 8911—Engineering, Architectural, and Surveying Services

—Petroleum Engineering

Others

Establishments and individuals engaged primarily in oil and gas related activities. Examples of such loans would be mortgages and personnel loans to individuals whose sole source of repayment is from the profits of an oil or gas company or employment by an oil or gas company.

14 CFR Part 71

[Airspace Docket No. 86-AGL-4]

Establishment of Transition Area; Paxton, IL

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Final rule.

SUMMARY: The nature of this action is to establish the Paxton, Illinois transition area to accommodate a new VOR Runway 18 instrument approach procedure to Paxton Airport.

The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: 0901 U.T.C., July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

VOL 51 ISS 78 AP 23 1986 UMI

SUPPLEMENTARY INFORMATION:

History

On Tuesday, March 11, 1986, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish the Paxton, Illinois transition area (51 FR 8334).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations establishes the Paxton, Illinois transition area to accommodate a new VOR Runway 18 instrument approach procedure to Paxton Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition Areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.181 is amended as follows:

Paxton, IL—[New]

That airspace extending upward from 700 feet above the surface, within a 5 mile radius of Paxton Airport (lat. 40°26'55" N., long. 88°07'40" W.) and within 3 miles each side of the Roberts, Illinois VORTAC 166 radial, extending from the 5 mile radius area to the Roberts VORTAC, excluding that portion which overlies the Gibson City, Illinois, transition area.

Issued in Des Plaines, Illinois, on April 11, 1986.

Teddy W. Burcham,

Manager, Air Traffic Division.

BILLING CODE 4910-13-M

14 CFR Part 75

[Airspace Docket No. 85-AWA-48]

Realignment and Revocation of Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment realigns Jet Routes J-4, J-104, J-169 and J-50. Also, this amendment revokes Jet Route J-181. These route changes are in conjunction with planned or future changes to the descriptions of several special use airspace areas located in Arizona and California. This action increases safety and improves air traffic control efficiency and service to users.

EFFECTIVE DATE: 0901 G.M.T., July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8526.

SUPPLEMENTARY INFORMATION:

History

On February 24, 1986, the FAA proposed to amend Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to realign jet Routes J-4, J-104, J-169, J-50 and also, to revoke J-181 (51 FR 6420). These route changes are in conjunction with planned or future changes to the descriptions of several special use airspace areas located in Arizona and California. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for a minor change in the alignment in J-104 between Parker, CA, and Gila Bend, AZ, and for minor editorial changes, this amendment is the same as that proposed in the notice. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 75 of the Federal Aviation Regulations realigns J-4, J-104, J-169, J-50, and revokes J-181 located in Arizona and California. These changes increase safety, permit more efficient use of the airspace and allow more flexibility for military operations.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 75

Aviation safety, Jet routes.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 75 of the Federal Aviation Regulations (14 CFR Part 75) is amended, as follows:

PART 75—[AMENDED]

1. The authority citation for Part 75 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. § 75.100 is amended as follows:

J-4 [Amended]

By removing the words "Twentynine Palms, CA; via intersection of Twentynine Palms 103° and Stanfield, AZ, 299° radials; Stanfield; San Simon, AZ;" and substituting the words "Twentynine Palms; Parker, CA; Buckeye, AZ; San Simon, AZ;"

J-104 [Amended]

By removing the words "Twentynine Palms; via intersection Twentynine Palms 103° and Gila Bend, AZ, 312° radials; Gila Bend," and substituting the words "Twentynine Palms; Parker, CA; INT Parker 112° and Gila Bend, AZ, 312° radials; Gila Bend;"

J-169 [Amended]

By removing the words "Blythe, CA" and substituting the words "Blythe, CA; INT Blythe 096° and Stanfield, AZ, 299° radials; to Stanfield."

J-50 [Amended]

By removing the words "Blythe; INT Blythe 096° and Gila Bend, AZ, 299° radials, Gila Bend," and substituting the words "Blythe, CA; INT Blythe 096° and Gila Bend, AZ, 312° radials; Gila Bend;"

J-181 [Revoked]

Issued in Washington, DC., on April 16, 1986.

James Burns, Jr.,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1262

Implementation of the Equal Access to Justice Act in Agency Proceedings

AGENCY: National Aeronautics and Space Administration.

ACTION: Interim rule with request for comments.

SUMMARY: The National Aeronautics and Space Administration (NASA) is amending its final rules governing the implementation of the Equal Access to Justice Act (Title 2 of Pub. L. 96-481, 94 Stat. 2325) in Agency proceedings. The Act was amended and reauthorized as permanent law by Pub. L. 99-80, 99 Stat. 183, on August 5, 1985. This interim rule reflects the changes in the law and establishes procedures for the submission and consideration of applications for awards of attorney fees and other expenses in adversary adjudication which may be conducted by NASA under 5 U.S.C. 554 and before the NASA Board of Contract Appeals pursuant to section 6 of the Contract Disputes Act of 1978, as amended (41 U.S.C. 605).

DATES: These rules are effective April 23, 1986. Comments must be received by June 23, 1986.

ADDRESS: Office of General Counsel, Code GS, National Aeronautics and Space Administration, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Sara Najjar, Telephone (202) 453-2432.

SUPPLEMENTARY INFORMATION: On August 5, 1985, Pub. L. 99-80, amended and permanently reauthorized the Equal Access to Justice Act (EAJA). The amendments made certain substantive changes in the Act, concerning covered proceedings to include the Board of Contract Appeals, required that the substantial justification determination be based on the underlying record, redefined position of the United States, confirmed that the agency makes the final administrative decision on fees but provided for no court appeal by the agency of fee awards, increased the net worth amount of the parties, barred recovery of fees where the party has unreasonably protracted the proceedings, clarified that awarded fees and expenses are payable out of the agency's appropriation, and repealed the sunset provisions and made the coverage of the Act conditionally retroactive. This revision of NASA's existing rules incorporates the changes in the law as amended. Miscellaneous.

This regulation does not constitute a major rule for the purposes of Executive Order 12291 (46 FR 13193, February 19, 1981).

Finally, this regulation will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 96-354, September 19, 1980; 5 U.S.C. 601 et seq.).

List of Subjects in 14 CFR Part 1262.

Administrative practice and procedure, Adversary adjudication, Attorney fees, Board of Contract Appeals, Claims, Equal Access to Justice Act, Fees and expenses, Lawyers.

Accordingly, 14 CFR Part 1262 is revised to read as follows:

PART 1262—EQUAL ACCESS TO JUSTICE ACT IN AGENCY PROCEEDINGS

Subpart 1262.1—General Provisions

Sec.

1262.101 Purpose of these rules.
1262.102 When the Act applies.
1262.103 Proceedings covered.
1262.104 Eligibility of applicants.
1262.105 Standards for awards.
1262.106 Allowable fees and expenses.
1262.107 Rulemaking on maximum rates for attorney fees.
1262.108 Awards against other agencies.
1262.109 Delegations of authority.

Subpart 1262.2—Information Required From Applicants

1262.201 Contents of application.
1262.202 Net worth exhibit.
1262.203 Documentation of fees and expenses.
1262.204 When an application may be filed.

Subpart 1262.3—Procedures for Considering Applications

1262.301 Filing and service of documents.
1262.302 Answer to application.
1262.303 Reply.
1262.304 Comments by other parties.
1262.305 Settlement.
1262.306 Further proceedings.
1262.307 Decision.
1262.308 Agency review.
1262.309 Judicial review.
1262.310 Payment of award.

Authority: Sec. 203(a)(1), Pub. L. 96-481, 94 Stat. 2325 (Oct. 21, 1980); Pub. L. 99-80, 99 Stat. 183 (Aug. 5, 1985)—5 U.S.C. 504; Sec. 203(c)(1) of the National Aeronautics and Space Act of 1958, as amended—42 U.S.C. 2473(c)(1).

Subpart 1262.1—General Provisions

§ 1262.101 Purpose of these rules.

(a) The pertinent provisions of the Equal Access to Justice Act at 5 U.S.C. 504 (hereinafter "the Act") provide for the award of attorney fees and other expenses to eligible individuals and entities who are parties to certain administrative proceedings (called "adversary adjudications"). An eligible party may receive an award when it prevails, unless it has unreasonably protracted the proceedings, or the Agency's position in the proceeding was substantially justified, or special circumstances make an award unjust. The rules in this part describe the parties eligible for awards and the proceedings that are covered. They also explain how to apply for awards, and the procedures and standards that the National Aeronautics and Space Administration (NASA) will use in determining awards.

(b) As used in this part:

(1) "*Adversary adjudication*" means an adjudication under 5 U.S.C. 554 in which the position of the United States is represented by counsel or otherwise, but excludes an adjudication for the purpose of establishing or fixing a rate or for the purpose of granting or renewing a license;

(2) "*Adjudicative officer*" means the deciding official, without regard to whether the official is designated an administrative law judge, a hearing officer or examiner, or otherwise, who presided at the adversary adjudication;

(3) "*Position of the agency*" means, in addition to the position taken by the agency in the adversary adjudication, the action or failure to act by the agency upon which the adversary adjudication is based;

(4) "*Party*", as defined in 5 U.S.C. 551(3), includes a person or agency named or admitted as a party, or properly seeking and entitled as of right to be admitted as a party, in an agency

BEST COPY AVAILABLE

VOL 51 ISS 78 AP 23 1986 UMI

proceeding, and a person or agency admitted by an agency as a party for limited purposes, and who meets the eligibility requirements of § 1262.104; and

(5) "*agency*" with a capital "A" denotes the NASA.

(c) Determination of "*Substantially justified*". Whether or not the position of the agency was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought.

§ 1262.102 When the Act applies.

The Act applies to any adversary adjudication pending or commenced before NASA on or after August 5, 1985. It also applies to any adversary adjudication commenced on or after October 1, 1984, and finally disposed of before August 5, 1985, provided that an application for fees and expenses, as described in Subpart 1262.2, had been filed with the Agency within 30 days after August 5, 1985, and to any adversary adjudication pending on or commenced on or after October 1, 1981, in which an application for fees and other expenses was timely filed and was dismissed for lack of jurisdiction.

§ 1262.103 Proceedings covered.

(a) The Act applies to adversary adjudications conducted by the Agency. These are:

(1) adjudications under 5 U.S.C. 554 in which the position of NASA or any other agency of the United States, or any component of an agency, is presented by an attorney or other representative who enters an appearance and participates in the proceedings; and

(2) appeals of decisions made pursuant to Section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before the Agency's Board of Contract Appeals (BCA) as provided in Section 8 of that Act (41 U.S.C. 607). Any proceeding in which this Agency may prescribe a lawful present or future rate is not covered by the Act. Proceedings to grant or renew licenses are also excluded, but proceedings to modify, suspend, or revoke licenses are covered if they are otherwise adversary adjudications. The Act does not include proceedings which are covered by a compromise or settlement agreement, unless specifically consented to in such agreement. For NASA, the types of proceedings covered include those before the NASA BCA as described in paragraph (a)(2) of this section.

(b) NASA may also designate a proceeding as an adversary adjudication for purposes of the Act by so stating in an order initiating the proceeding or designating the matter for hearing. The Agency's failure to designate a proceeding as an adversary adjudication shall not preclude the filing of an application by a party who believes the proceeding is covered by the Act; whether the proceeding is covered will then be an issue for resolution in proceedings on the application.

(c) If a proceeding includes both matters covered by the Act and matters specifically excluded from coverage, any award made will include only fees and expenses related to covered issues.

§ 1262.104 Eligibility of applicants.

(a) To be eligible for an award of attorney fees and other expenses, the applicant must be a "party" to the adversary adjudication for which an award is sought. The applicant must show that it meets all conditions of eligibility set out in this subpart and in Subpart 1262.2.

(b) The types of eligible applicants are as follows:

(1) An individual with a net worth of not more than $2 million;

(2) Any owner of an unincorporated business who has a net worth of not more than $7 million, including both personal and business interests, and not more than 500 employees;

(3) A charitable or other tax-exempt organizaiton described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) with not more than 500 employees;

(4) A cooperative association as defined in section 15(a) of the Agricultural Marketing Act 12 U.S.C. 1441j(a)) with not more than 500 employees; and

(5) Any other partnership, corporation, association, unit of local government, or organization with a net worth of not more than $7 million and not more than 500 employees.

(c) For the purpose of eligibility, the net worth and number of employees of an applicant shall be determined as of the date the proceeding was initiated.

(d) An applicant who owns an unincorporated business will be considered as an "individual" rather than as a "sole owner of an unincorporated business" if the issues on which the applicant prevails are related primarily to personal interests rather then to business interests.

(e) The employees of an applicant include all persons who regularly perform services for remuneration for the applicant, under the applicant's direction and control. Part-time employees shall be included on a proportional basis.

(f) The net worth and number of employees of the applicant and all of its affiliates shall be aggregated to determine eligibility. Any individual, corporation, or other entity that directly or indirectly controls or owns a majority of the voting shares or other interest of the applicant, or any corporation or other entity of which the applicant directly or indirectly owns or controls a majority of the voting shares or other interest, will be considered an affiliate for purposes of this part, unless the adjudicative officer determines that such treatment would be unjust and contrary to the purposes of the Act in light of the actual relationship between the affiliated entities. In addition, the adjudicative officer may determine that financial relationships of the applicant other than those described in this paragraph constitute special circumstances that would make an award unjust.

(g) An applicant that participates in a proceeding primarily on behalf of one or more other persons or entities that would be ineligible is not itself eligible for an award.

§ 1262.105 Standards for awards.

(a) A prevailing applicant may receive an award subject to paragraph (b) of this section, for fees and expenses incurred in connection with a proceeding, or in a significant and discrete substantive portion of the proceeding, unless the position of the agency over which the applicant has prevailed was substantially justified. No presumption arises that the agency's position was not substantially justified simply because the agency did not prevail. The burden of proof that an award should not be made to an eligible prevailing applicant is on the agency.

(b) An award, for any portion of the adversary adjudication, will be denied if the applicant has unreasonably protracted the proceedings, or denied or reduced if special circumstances make the award sought unjust.

§ 1262.106 Allowable fees and expenses.

(a) Awards will be based on rates customarily charged by persons engaged in the business of acting as attorneys, agents, and expert witnesses, even if the services were made available without charge or at a reduced rate to the applicant.

(b) No award for the fee of an attorney or agent under these rules may exceed $75 per hour. No award to compensate an expert witness may exceed the highest rate at which this Agency pays expert witnesses, which is $20 an hour (5 hours maximum) or maximum daily rate of $100 (3 days maximum). However, an award may also include the reasonable expenses of the attorney, agent, or witness as a separate item, if the attorney, agent, or witness ordinarily charges clients separately for such expenses.

(c) In determining the reasonableness of the fee sought for an attorney, agent, or expert witness, the adjudicative officer shall consider the following:

(1) If the attorney, agent, or witness is in private practice, his or her customary fee for similar service, or, if an employee of the applicant, the fully allocated cost of the services;

(2) The prevailing rate for similar services in the community in which the attorney, agent, or witness ordinarily performs services;

(3) The time actually spent in the representation of the application;

(4) The time reasonably spent in light of the difficulty or complexity of the issues in the proceeding; and

(5) Such other factors as may bear on the value of the services provided.

(d) The reasonable cost of any study, analysis, engineering report, test, project, or similar mater prepared on behalf of a party may be awarded, to the extent that the charge for the service does not exceed the prevailing rate for similar services, and the study or other matter was necessary for preparation of the applicant's case.

§ 1262.107 Rulemaking on maximum rates for attorney fees.

(a) If warranted by an increase in the cost of living or by special circumstances (such as limited availability of attorneys qualified to handle certain types of proceedings), the Agency may adopt regulations providing that attorney fees may be awarded at a rate higher then $75 per hour in some or all of the types of proceedings covered by this part. This Agency will conduct any rulemaking proceedings for this purpose under the informal rulemaking procedures of the Administrative Procedure Act (5 U.S.C. 553).

(b) Any person may file with the Agency a petition for rulemaking to increase the maximum rate for attorney fees. The petition should be addressed to the General Counsel, NASA Headquarters, Washington, DC 20546; should identify the rate the petitioner believes the Agency should establish and the types of proceedings in which the rate should be used; and should also explain fully the reasons why the higher rate is warranted. The Agency will respond to the petition within 60 days after it is filed, by initiating a rulemaking proceeding or denying the petition, or taking other appropriate action.

§ 1262.108 Awards against other agencies.

If an applicant is entitled to an award because it prevails over another agency of the United States that participates in a proceeding before NASA, the award or an appropriate portion of the award shall be made against that agency, subject to § 1262.105(b), if it had taken a position that is not substantially justified.

§ 1262.109 Delegations of authority.

(a) The NASA Administrator hereby delegates authority to the General Counsel or designee to take final action on matters pertaining to the Act, other than the authority for final fee determination after Agency review pursuant to § 1262.308.

(b) The NASA Administrator may, in particularly specified matters under the Act, delegate authority to officials other than those designated in paragraph (a) of this section.

Subpart 1262.2—Information Required From Applicants

§ 1262.201 Contents of application.

(a) An application for an award of fees and expenses under the Act shall identify the applicant and the proceeding for which an award is sought. The application shall show that the applicant has prevailed and identify the position of an agency or agencies in the proceeding that the applicant alleges was not substantially justified. Unless the applicant is an individual, the application shall also state the number of employees of the applicant and describe briefly the type and purpose of its organization or business.

(b) The application shall also include a statement that the applicant's net worth does not exceed $2 million (if an individual) or $7 million (for all other applicants, including their affiliates). However, an applicant may omit this statement if the applicant:

(1) Attaches a copy of a ruling by the Internal Revenue Service that it qualifies as an organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)), or, in the case of a tax-exempt organization not required to obtain a ruling from the Internal Revenue Service on its exempt status, a statement that describes the basis for the applicant's belief that it qualifies under such section; or

(2) States that it is a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)).

(c) The application shall state the amount of fees and expense for which an award is sought.

(d) The application may also include any other matters that the applicant wishes this Agency to consider in determing whether and in what amount an award should be made.

(e) The application shall be signed by the applicant or an authorized officer or attorney of the applicant. It shall also contain or be accompanied by a written verification under oath or under penalty of perjury that the information provided in the application is true and correct.

§ 1262.202 Net worth exhibit.

(a) Each applicant except a qualified tax-exempt organization or cooperative association must provide with its application a detailed exhibit showing the net worth of the applicant and any affiliates (as defined in § 1262.104(f) when the proceeding was initiated. The exhibit may be in any form convenient to the applicant that provides full disclosure of the applicant's and its affiliates' assets and liabilities and is sufficient to determine whether the applicant qualifies under the standards in this part. The adjudicative officer may require an applicant to file additional information to determine its eligibility for an award.

(b) Ordinarily, the net worth exhibit will be included in the public records of the proceeding. However, an applicant that objects to public disclosure of information in any portion of the exhibit and believes there are legal grounds for withholding it from disclosure may submit that portion of the exhibit directly to the adjudicative officer in a sealed envelope labeled "Confidential Financial Information," accompanied by a motion to withhold the information from public disclosure. The motion shall describe the information sought to be withheld and explain, in detail, why it falls within one or more of the specific exemptions from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552(b)(1)–(9), why public disclosure of the information would adversely affect the applicant, and why disclosure is not required in the public interest. The materials in question shall be served on counsel representing the agency against which the applicant seeks an award, but need not be served on any other party to the proceeding. If the adjudicative officer finds that the information should not be withheld from disclosure, it shall be placed in the public record of the proceeding. Otherwise, any request to inspect or copy the exhibit shall be disposed of in accordance with the Agency's

VOL 51 ISS 78 AP 23 1986 UMI

regulations under the Freedom of Information Act, at 14 CFR Part 1206.

§ 1262.203 Documentation of fees and expenses.

The application shall be accompanied by full documentation of the fees and expenses, including the cost of any study, analysis, engineering report, test, project, or similar matter for which an award is sought. A separate itemized statement, accompanied by an oath of affirmation under penalty of perjury (28 U.S.C. 1746), shall be submitted for each professional firm or individual whose services are covered by the application, showing the hours spent in connection with the proceeding bu each individual, a description of the specific services performed, the rate at which each fee has been computed, any expenses for which reimbursement is sought, the total amount paid or payable by the applicant or by any other person or entity for the services provided. The adjudicative officer may, in addition, require the applicant to provide vouchers, receipts, or other substantiation for any expenses claimed.

§ 1262.204 When an application may be filed.

(a) An application may be filed whenever the applicant has prevailed in the proceeding or in a significant and discrete substantive portion of the proceeding, but in no case later than 30 days after the Agency's final disposition of the proceeding.

(b) If review or reconsideration is sought or taken of a decision as to which an applicant believes it has prevailed, proceedings for the award of fees shall be stayed pending final disposition of the underlying controversy.

(c) For purposes of this rule, final disposition means the latter of:

(1) The date on which the last "initial decision", in a bifurcated proceeding, or other recommended disposition of the merits (both as to liability and amount, if applicable) of the proceeding, by an adjudicative officer or intermediate reviewer, becomes administratively final;

(2) The date on which an order is issued disposing of any petitions for reconsideration;

(3) If no petition for reconsideration is filed, the last date on which such a petition could have been filed; or

(4) The date of a final order or any other final resolution of the proceeding, such as a settlement or a voluntary dismissal, which is not subject to a petition for reconsideration.

Subpart 1262.3—Procedures for Considering Applications

§ 1262.301 Filing and service of documents.

Any application for an award or other pleading or document related to an application shall be filed and served on all parties to the proceeding in the same manner as other pleadings in the proceeding, except as provided in § 1262.202(b) for confidential financial information.

§ 1262.302 Answer to application.

(a) Within 30 calendar days after service of an application, counsel representing the agency against which an award is sought may file an answer to the application. Unless agency counsel requests an extension of time for filing or files a statement of intent to negotiate under paragraph (b) of this section, failure to file an answer within the 30-day period may be treated as a consent to the award requested.

(b) If agency counsel and the applicant believe that the issues in the fee application can be settled, they may jointly file a statement of their intent to negotiate a settlement. The filing of this statement shall extend the time for filing an answer for an additional 30 calendar days, and further extensions may be granted by the adjudicative officer upon request by agency counsel and the applicant.

(c) The answer shall explain in detail any objections to the award requested and identify the facts relied on in support of agency counsel's position. If the answer is based on any alleged facts not already in the record of the proceeding, agency counsel shall include with the answer either supporting affidavits or a request for further proceedings under § 1262.306.

§ 1262.303 Reply.

Within 15 calendar days after service of an answer, the applicant may file a reply. If the reply is based on any alleged facts not already in the record of the proceeding, the applicant shall include with the reply either supporting affidavits or a request for further proceedings under § 1262.306.

§ 1262.304 Comments by other parties.

Any party to a proceeding other than the applicant and agency counsel may file comments about an application within 30 calendar days after it is served, or about an answer within 15 calendar days after it is served. A commenting party may not participate further in proceedings on the application unless the adjudicative officer determines that the public interest requires such participation in order to permit full exploration of matters raised in the comments.

§ 1262.305 Settlement.

The applicant and agency counsel may agree on a proposed settlement of the award before final action on the application, either in connection with a settlement of the underlying proceeding, or after the underlying proceeding has been concluded. If a prevailing party and agency counsel agree on a proposed settlement of an award before an application has been filed, the application shall be filed with the proposed settlement.

§ 1262.306 Further proceedings.

(a) Ordinarily, the determination of an award will be made on the basis of the written record. However, on request of either the applicant or agency counsel, or on his or her own initiative, the adjudicative officer may order further proceedings, such as an informal conference, oral argument, additional written submissions, or, as to issues other than substantial justification (such as the applicant's eligibility or substantiation of fees and expenses), pertinent discovery or an evidentiary hearing. Such further proceedings shall be held only when necessary for full and fair resolution of the issues arising from the application, and shall be conducted as promptly as possible.

(b) A request that the adjudicative officer order further proceedings under this section shall specifically identify the information sought or the disputed issues and shall explain why the additional proceedings are necessary to resolve the issues.

§ 1262.307 Decision.

(a) The adjudicative officer (in the case of the NASA BCA, the administrative judge or panel who decided the contract appeal) shall issue an initial decision on the application within 90 calendar days after completion of proceedings on the application. The decision shall include written findings and conclusions on such of the following as are relevant to the decision:

(1) The applicant's eligibility and status as a prevailing party;

(2) Whether the Agency's position was substantially justified;

(3) Whether the applicant unreasonably protracted the proceedings, or whether special circumstances make an award unjust; and

(4) The amounts, if any, awarded for fees and expenses with an explanation of the reasons for any difference between the amount requested and the amount awarded. Further, if the applicant has sought an award against more than one agency, the decision shall allocate responsibility for payment of any award made among the agencies, and shall explain the reasons for the allocation made.

(b) When the Agency appeals the underlying merits of an adversary adjudication, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.

§ 1262.308 Agency review.

(a) Within 30 calendar days of the receipt of the adjudicative officer's initial decision on the fee application, either the applicant or agency counsel may seek Agency review of the decision; or, the NASA Administrator, upon the recommendation of the General Counsel or other designee, may decide to review the decision based on the record. Whether to review a decision is solely a matter within the discretion of the NASA Administrator. A 15-day notice of such review will be given the applicant and agency counsel, and a determination made not later than 45 days from the date of notice. The Administrator may make a final determination concerning the application or remand the application to the adjudicative officer for further proceedings.

(b) If neither the applicant nor agency counsel seek review, and the NASA Administrator does not on own initiative take a review, the adjudicative officer's initial decision on the fee application shall be the final administrative decision of the Agency 45 days after it is issued.

§ 1262.309 Judicial review.

Judicial review of final Agency decisions on awards may be sought under 5 U.S.C. 504(c)(2), which provides: If a party other than the United States is dissatisfied with a determination of fees and other expenses made under [this Part], that party may, within 30 days after the [final administrative] determination is made, appeal the determination to the court of the United States having jurisdiction to review the merits of the underlying decision of the agency adversary adjudication. The court's determination of any appeal heard under this [authority] shall be based solely on the factual record made before the agency. The court may modify the determination of fees and other expenses only if the court finds that the failure to make an award of fees and other expenses, or the calculation of the amont of the award, was unsupported by the substantial evidence.

§ 1262.310 Payment of award.

(a) An applicant seeking payment of an award shall submit to the paying agency a copy of the Agency's final decision granting the award, accompanied by a statement that the applicant will not seek review of the decision in the United States courts. The submission to NASA should be addressed as follows:

Director, Financial Management Division, NASA Headquarters, Washington, DC 20546

(b) The Agency will pay the amount awarded to the applicant within 60 days, if feasible, unless judicial review of the award or of the underlying decision of the adversary adjudication has been sought by the applicant or any other party to the proceeding.

William R. Graham,

Acting Administrator.

April 14, 1986.

BILLING CODE 7510-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 379

[Docket No. 51197-5197]

Export of Technical Data; Commercial Agreements With Certain Countries

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Export Administration Amendments Act of 1985 (Pub. L. 99-64 of July 12, 1985) amended the Export Administration Act of 1979 by revising section 5(j), "Commercial Agreements With Certain Countries." Section 5(j), as revised, states that a U.S. firm, enterprise, or other nongovernmental entity entering into an agreement with an agency of the government of a controlled country that encourages technical cooperation and is intended to result in the export of U.S.-origin technical data, should report the agreement to the Secretary of Commerce. This rule amends Part 379 of the Export Administration Regulations (15 CFR Parts 368-399) to implement the revised section 5(j) provision.

EFFECTIVE DATE: April 23, 1986.

FOR FURTHER INFORMATION CONTACT: Joan Maguire, Regulations Branch, Export Administration, Department of Commerce, Washington, DC 20230 (Telephone: (202) 377-4479).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 12(a) of the Export Administration Act of 1979, as amended (5 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, like other Department of Commerce rules, comments from the public are always welcome. Written comments (six copies) should be submitted to: Betty Ferrell, Regulations Branch, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under section 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule does not contain a collection of information requirement under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 15 CFR Part 379

Exports, Science and technology.

PART 379—[AMENDED]

Accordingly, Part 379 of the Export Administration Regulations (15 CFR Parts 368-399) is amended as follows:

VOL 51 ISS 78 AP 23 1986 UMI

1. The authority citation for 15 CFR Part 379 continues to read as follows:

Authority: Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97–145 of December 29, 1981 and by Pub. L. 99–64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95–223, 50 U.S.C. 1701 *et seq*; E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

§ 379.9 [Redesignated as § 379.10]

2. Section 379.9 is redesignated as new § 379.10.

3. New § 379.9 is added to read as follows:

§ 379.9 Commercial agreements with certain countries.

Pursuant to section 5(j) of the Export Administration Amendments Act of 1979, as amended, any non-governmental U.S. person or firm that enters into an agreement with any agency of the government of a controlled country (Country Groups Q, W, Y, and the People's Republic of China), which agreement encourages technical cooperation and is intended to result in the export from the U.S. to the other party of U.S.-origin technical data (except under General License GTDA or General License GTDR as provided under the provisions of § 379.4(b) (1) and (2) of this part), shall submit those portions of the agreement that include the statement of work and describe the anticipated exports of data to the Office of Technology and Policy Analysis, Room 4054, P.O. Box 273, Washington, DC 20044. This material shall be submitted no later than 30 days after the final signature on the agreement.

(a) This requirement does not apply to colleges, universities and other educational institutions.

(b) The submission required by this section does not relieve the exported from the licensing requirements for controlled technical data and goods.

(c) Acceptance of a submission does not represent a judgment as to whether Export Administration will or will not issue any authorization for export of technical data.

Dated: April 17, 1986.

Walter J. Olson,

Deputy Assistant Secretary for Export Administration.

Customs Regulations Amendments Concerning Convention on Cultural Property Implementation Act

Correction

In FR Doc. 86–4025, beginning on page 6905 in the issue of Thursday, February 27, 1986, make the following correction:

On page 6907, in the third column, in the sixth line of § 12.104(b), delete the word "States".

BILLING CODE 1505–01–M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Part 561

[PP 4H5444/R826; FRL–3007–6]

(Alpha RS,2R)-Fluvalinate [(RS)-Alpha-Cyano-3-Phenoxybenzyl (R)-2-[2-Chloro-4-(Trifluoromethyl) Anilino]-3-Methylbutanoate]; Feed Additive Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a feed additive regulation permitting residues of the insecticide (alpha *RS*,2R)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate] in or on cottonseed oil (crude and refined) and cottonseed hulls. This regulation was requested by the Zoecon Corp.

EFFECTIVE DATE: Effective on April 23, 1986.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: George T. LaRocca, Product Manager (PM) 15, Registration Division (TS/767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 204, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2400).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of December 5, 1984 (49 FR 47549), which announced that Zoecon Corp., a Sandoz company, 975 California Ave., Palo Alto, CA 95304–0859, had submitted a feed additive petition (FAP 4H5444) to EPA proposing to amend 21 CFR Part 561 by establishing a regulation permitting residues of the insecticide (alpha *RS*,2R)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate] in or on cottonseed oil (crude and refined) at 0.75 part per million (ppm), cottonseed hulls at 0.3 ppm, and cottonseed meal and soapstock at 0.01 ppm. The tolerance level of 0.01 ppm for cottonseed meal and soapstock is being deleted since the proposed 1.0 ppm tolerance for the RAC cottonseed will adequately cover maximum anticipated residues in cottonseed meal and soapstock. The petition was subsequently amended by increasing the tolerance level for cottonseed oil to 1.0 ppm.

There were no comments received in response to the petition.

The data submitted in the petition and other relevant material have been evaluated. The toxicity and other relevant data pertaining to this insecticide are discussed and included in a related final rule document, [PP 4F3153/R827], establishing a tolerance in or on the raw agricultural commodity cottonseed and appearing elsewhere in this issue of the **Federal Register**.

The insecticide is considered useful for the purpose for which the feed additive regulation is sought, and it is concluded that the insecticide may be safely used in accordance with the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, (86 Stat. 973–999, 7 U.S.C. 136 et seq.) for a period of time extending to August 31, 1990, to cover residues existing from the conditional registration of fluvalinate. Therefore, the feed additive regulation is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the additive regulation is established as set forth below. **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a

hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

As required by Executive Order 12291, EPA has determined that this rule is not a "Major" rule and therefore does not require a Regulatory Impact Analysis. In addition, the Office of Management and Budget (OMB) has exempted this rule from the OMB review requirements of Executive Order 12291, pursuant to section 8(b) of that Order.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new food or feed additive levels, or conditions for safe use of additives, or raising such food or feed additive levels do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24945).

List of Subjects in 21 CFR Part 561

Feed additives, Pesticides and pests.

Dated: March 28, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

PART 561—[AMENDED]

Therefore, 21 CFR Part 561 is amended as follows:

1. The authority citation continues to read as follows:

Authority: 21 U.S.C. 348.

2. Section 561.437 is added, to read as follows:

§ 561.437 (Alpha RS,2R)-fluvalinate [(RS)-alpha-cyano-3phenoxybenzyl (R)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate].

A regulation is established permitting residues of the insecticide (alpha *RS*, 2R)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate] in or on the following feed commodities:

Commodities	Parts per million
Cottonseed hulls	0.3
Cottonseed oil (crude and refined)	1.0

BILLING CODE 6560–50–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances, Changes in Definitions; Use of Administration Controlled Substances Code Numbers; Addition of an Emergency Scheduling Regulation

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: This final rule is issued by the Administrator of the Drug Enforcement Administration and revises 21 CFR Part 1308 to reflect statutory changes necessitated by parts of the Comprehensive Crime Control Act of 1984 (Pub. L. 98–473). The Dangerous Drug Diversion Control Act of 1984, as part of the Comprehensive Crime Control Act of 1984 (Pub. L. 98–473), which became effective on October 12, 1984, amended portions of the Controlled Substances Act (CSA) pertaining to the schedules and scheduling of controlled substances. These amendments include a new definition of the term "isomer," a redefinition of the term "narcotic drug," and a revision of Schedule II (A)(4) to specifically list cocaine, ecgonine and their salts, isomers, derivatives and salts of isomers and derivatives. In addition, the Administrator of the Drug Enforcement Administration (DEA) is given an emergency authority to expeditiously and temporarily place new substances of abuse into Schedule I of the CSA in order to avoid an imminent hazard to the public safety. The Dangerous Drug Diversion Control Act of 1984 also amended portions of the Controlled Substances Import and Export Act which necessitates the use of the Administration Controlled Substances Code Number by registrants.

EFFECTIVE DATE: April 23, 1986.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, D.C. 20537, Telephone: (202) 633–1366.

SUPPLEMENTARY INFORMATION:

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

A notice published in the **Federal Register** on Thursday, February 13, 1985 (51 FR 5370–2) proposed several revisions to 21 CFR Part 1308. These changes reflect statutory amendments to the Controlled Substances Act (21 U.S.C. 801 et seq.) brought about by the enactment of the Comprehensive Crime Control Act of 1984 (Pub. L. 98–473).

All interested persons were given until March 17, 1985 to submit written comments or objections regarding this matter. No such comments or objections have been received by the Drug Enforcement Administration.

Therefore, pursuant to the authority vested in the Attorney General by 21 U.S.C. 871(b) and delegated to the Administrator of the Drug Enforcement Administration by 28 CFR 0.100, the Administrator hereby orders that 21 CFR Part 1308 be amended as follows:

PART 1308—[AMENDED]

1. The authority citation for Part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b).

2. Section 1308.02 is amended by revising paragraph (c), adding a new paragraph (e), redesignating existing paragraphs (e) and (f) as (f) and (g) as follows:

§ 1308.02 Definitions.

* * * * *

(c) The term "isomer" means the optical isomer, except as used in § 1308.11(d) and § 1308.12(b)(4). As used in § 1308.11(d), the term "isomer" means the optical, positional, or geometric isomer. As used in § 1308.12(b)(4), the term "isomer" means the optical or geometric isomer.

* * * * *

(e) The term "narcotic drug" means any of the following whether produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) Opium, opiates, derivatives of opium and opiates, including their isomers, esters, ethers, salts, and salts of isomers, esters, and ethers whenever the existence of such isomers, esters, ethers and salts is possible within the specific chemical designation. Such term does not include the isoquinoline alkaloids of opium.

(2) Poppy straw and concentrate of poppy straw.

(3) Coca leaves, except coco leaves and extracts of coca leaves from which cocaine, ecgonine and derivatives of ecgonine or their salts have been removed.

(4) Cocaine, its salts, optical and geometric isomers, and salts of isomers.

(5) Ecgonine, its derivatives, their salts, isomers and salts of isomers.

(6) Any compound, mixture, or preparation which contains any quantity

VOL 51 ISS 78 AP 23 1986 UMI

of any of the substances referred to in subparagraphs (1) through (5).

* * * * *

3. Section 1308.03 is amended by revising paragraph (a) to read as follows:

§ 1308.03 Administration Controlled Substances Code Number.

(a) Each controlled substance, or basic class thereof, has been assigned an "Administration Controlled Substances Code Number" for purposes of identification of the substances or class on certain Certificates of Registration issued by the Administration pursuant to §§ 1301.44 and 1311.43 of this chapter and on certain order forms issued by the Administration pursuant to § 1305.05(d) of this chapter. Applicants for procurement and/or individual manufacturing quotas must include the appropriate code number on the application as required in §§ 1303.12(b) and 1303.22(a) of this chapter. Applicants for import and export permits must include the appropriate code number on the application as required in §§ 1312.12(a) and 1312.22(a) of this chapter. Authorized registrants who desire to import or export a controlled substance for which an import or export permit is not required must include the appropriate Administration Controlled Substances Code Number beneath or beside the name of each controlled substance listed on the DEA Form 236 (Controlled Substance Import/Export Declaration) which is executed for such importation or exportation as required in §§ 1312.18(c) and 1312.27(b) of this chapter.

4. Section 1308.12(b)(4) is revised to read as follows:

§ 1308.12 Schedule II.

* * * * *

(b) * * *

(4) Coca leaves (9040) and any salt, compound, derivative or preparation of coca leaves (including cocaine (9041) and ecgonine (9180) and their salts, isomers, derivatives and salts of isomers and derivatives), and any salt, compound, derivative, or preparation thereof which is chemically equivalent or identical with any of these substances, except that the substances shall not include decocainized coca leaves or extraction of coca leaves, which extractions do not contain cocaine or ecgonine.

* * * * *

5. A new § 1308.52 is added to read as follows:

§ 1308.52 Emergency Scheduling.

Pursuant to 21 U.S.C. 811(h) and without regard to the requirements of 21 U.S.C. 811(b) relating to the scientific and medical evaluation of the Secretary of Health and Human Services, the Administrator may place a substance into Schedule I on a temporary basis, if he determines that such action is necessary to avoid an imminent hazard to the public safety. An order issued under this section may not be effective before the expiration of 30 days from: (a) The date of publication by the Administrator of a notice in the Federal Register of his intention to issue such order and the grounds upon which such order is to be issued, and (b) the date the Administrator has transmitted notification to the Secretary of Health and Human Services of his intention to issue such order. An order issued under this section shall be vacated upon the conclusion of a subsequent rulemaking proceeding initiated under Section 201(a) (21 U.S.C. 811(a)) with respect to such substance or at the end of one year from the effective date of the order scheduling the substance, except that during the pendency of proceedings under section 201(a) (21 U.S.C. 811(a)) with respect to the substance, the Administrator may extend the temporary scheduling for up to six months.

Regulatory Flexibility and Paperwork Reduction

The Administrator hereby certifies that this rule will have no significant impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. These changes are predominantly clarifications of existing regulations. The new regulation regarding emergency scheduling applies only to clandestinely produced and harmful drugs of abuse which have no currently accepted medical use in the United States, and therefore does not impact upon the legitimate pharmaceutical industry.

Pursuant to Section 3(c)(3) and 3(e)(2)(B) of Executive Order 12291, this final rule has been submitted for review by the Office of Management and Budget, and approval of that office has been requested pursuant to the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501, et seq.).

Dated: April 3, 1986.

John C. Lawn,

Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

DEPARTMENT OF STATE

22 CFR Part 7

[Department Regulations 108.848]

Board of Appellate Review; South Africa Fair Labor Standard Cases

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The Board of Appellate Review is revising its regulations to reflect jurisdiction acquired pursuant to 22 CFR 64.1(b), which entitles any U.S. national operating in South Africa, who under 22 CFR 64.1(a), has been determined by the Department of State to have failed to comply with the Fair Labor Standards set forth in 22 CFR 6.2, to file a written appeal within 30 days of notification of the decision with the Board of Appellate Review.

EFFECTIVE DATE: April 8, 1986.

FOR FURTHER INFORMATION CONTACT: Alan G. James (Chairman), Board of Appellate Review. (202) 663-1364.

SUPPLEMENTARY INFORMATION: 22 CFR Parts 50 through 65 implement the Fair Labor provisions of Executive Order 12532 of September 9, 1985 (50 FR 36861), which provide that no department or agency of the United States may intercede after December 31, 1985 with any foreign government regarding the export marketing activities of certain U.S. firms operating in South Africa unless they adhere to the Fair Labor Standards set forth in the Executive Order.

22 CFR 64.1(b), provides that any U.S. national who has been determined by the Department of State to have failed to adhere to the principles specified in 22 CFR 61.2 shall be entitled to appeal the determination to the Board of Appellate Review within 30 days of receipt of notification of the decision.

The Board of Appellate Review is revising regulations to reflect this newly acquired jurisdiction.

List of Subjects in 22 CFR Part 7

Administrative practices and procedures, Citizenship and naturalization, Organization and functions (Government agencies), Passports and visas, South Africa.

PART 7—BOARD OF APPELLATE REVIEW

In consideration of the foregoing, Chapter I of Title 22, Code of Federal Regulations, Part 7, is amended as follows:

1. The authority citation for 22 CFR Part 7 is revised to read as follows:

Authority: Sec. 1, 44 Stat. 887, sec. 4, 63 Stat. 111, as amended, 22 U.S.C. 211a, 2658; secs. 104, 360, 66 Stat. 174, 273, 8 U.S.C. 1104, 1503; E.O. 11295, 36 FR 10603; 3 CFR 1966-1970 Comp., page 507; 22 CFR 60-65; E.O. 12532, 50 FR 36861 § 7.4 also issued under 22 U.S.C. 3926.

2. In § 7.3, paragraph (d) is redesignated as (e) and new (d) is added as follows:

§ 7.3 Jurisdiction.

* * * * *

(d) Appeals from administrative determinations under § 64.1(a) of this chapter, denying U.S. Government assistance to U.S. nationals who do not comply with the Fair Labor Standards in § 61.2 of this chapter.

3. In § 7.5, paragraph (b)(3) is redesignated as (b)(4) and a new (b)(3) is added as follows:

§ 7.5 Procedures.

* * * * *

(b) *Time limit on appeal* * * *

(3) A national who has been subject of an adverse decision under § 61.1(a) of this chapter shall be entitled to appeal the decision to the Board within 30 days after receipt of notice of such decision.

* * * * *

§§ 7.8-7.11 [Redesignated as §§ 7.9-7.12]

4. Sections 7.8 through 7.11 are redesignated as §§ 7.9 through 7.12 and a new § 7.8 is added as follows:

§ 7.8 South African Fair Labor Standards Cases.

(a) *Scope of review.* With respect to appeals taken from the Assistant Secretary for African Affairs denying assistance to U.S. nationals operating in South Africa which do not comply with the Fair Labor Standards outlined in §61.2 of the chapter, the Board's review except as provided in paragraph (b) of this section shall be limited to the record on which the Assistant Secretary's decision was based.

(b) *Admissibility of evidence.* The Board shall not receive or consider evidence or testimony not presented pursuant to § 63.3(a) or § 63.3(b) of this chapter unless it is satisfied that such evidence was not available or could not have been discovered by the exerciser of reasonable diligence prior to entry of the decision of the Assistant Secretary for African Affairs.

Dated: April 11, 1986.

Alan G. James,

Chairman, Board of Appellate Review.

BILLING CODE 4710-09-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8083]

Treatment of Non-Alternative Tax Itemized Deductions by Trusts and Estates

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to the treatment of non-alternative tax itemized deductions by trusts and estates for purposes of the alternative minimum tax. Changes to the applicable tax law were made by the Tax Equity and Fiscal Responsibility Act of 1982. The regulations would affect trusts and estates which have non-alternative tax itemized deductions and their beneficiaries and would provide them with guidance needed to comply with that Act.

DATE: The amendment to the regulations is effective for taxable years beginning after December 31, 1982.

FOR FURTHER INFORMATION CONTACT: William A. Jackson of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T (LR-5-86) (202) 566-4336, not a toll free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary regulations relating to the treatment of non-alternative tax itemized deductions by trusts, estates, and their beneficiaries in determining the amount of their alternative minimum tax liability under section 55 of the Internal Revenue Code of 1954 (Code), as amended by section 201(d)(3)(B) of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248, 96 Stat. 419).

In General

Under section 55 of the Code, a noncorporate taxpayer (*i.e.*, an individual, estate, or trust) computes alternative minimum taxable income by reducing the taxpayer's adjusted gross income by the amount of alternative tax itemized deductions (as defined in section 55 (e)(1) of the Code) and adding to the resulting amount any items of tax preference (listed under section 57(a) of the Code). Certain itemized deductions, such as state and local income taxes, are not treated as alternative tax itemized deductions and therefore are not allowed as deductions in computing the taxpayer's alternative minimum taxable income. Thus, under the alternative minimum tax provisions, itemized deductions that are not alternative tax itemized deductions have the same tax effect as items of tax preference in that they reduce taxable income but not alternative minimum taxable income.

On April 11, 1984, the Internal Revenue Service published a news release (IR-84-52) which stated that itemized deductions, such as state and local income taxes, that are not alternative tax itemized deductions, should be apportioned between estates and their beneficiaries, and trusts and their beneficiaries, as if they were items of tax preference. The news release also stated that trusts that are required to distribute all their income currently and have no items of tax preference will not be liable for alternative minimum tax in taxable years beginning after 1982.

The temporary regulations are intended to clarify that for taxable years beginning after December 31, 1982, itemized deductions that are not alternative tax itemized deductions shall be treated as items of tax preference for purposes of section 58(c) and shall be properly apportioned between trusts and their beneficiaries, and estates and their beneficiaries. This treatment of non-alternative tax itemized deductions as items of tax preference applies to trusts and estates described in section 661 of the Code, as well as trusts described in section 651, and applies whether or not the trust or estate has other items of tax preference described in section 57. A beneficiary to whom a trust or estate allocates non-alternative tax itemized deductions must treat such allocated amounts as items of tax preference in determining its alternative minimum taxable income under section 55.

Need for Temporary Regulations

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Special Analyses

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act does not

VOL 51 ISS 78 APR 23 1986 UMI

apply and no Regulatory Flexibility Analysis is required for this rule. The Commissioner of Internal Revenue has determined that this temporary rule is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required.

Drafting Information

The principal author of these temporary regulations is William A. Jackson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR 1.0-1—1.58-8

Income taxes, Tax liability, Tax rates, Credits.

Adoption of Amendments to the Regulations

PART 1—[AMENDED]

Accordingly, 26 CFR Part 1 is amended as follows:

Paragraph 1. The authority for Part 1 continues to read in part:

Authority: 26 U.S.C. 7805. * * *

Par. 2. New § 1.58-3T is added immediately following § 1.58-2 to read as set forth below.

§ 1.58-3T Treatment of non-alternative tax itemized deductions by trusts and estates and their beneficiaries in taxable years beginning after December 31, 1982.

For purposes of section 58(c), in taxable years beginning after December 31, 1982, itemized deductions of a trust or estate which are not alternative tax itemized deductions (as defined in section 55(e)(1)), shall be treated as items of tax preference and apportioned between trusts and their beneficiaries, and estates and their beneficiaries.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: March 31, 1986.

J. Roger Mentz,
Assistant Secretary of the Treasury (Designate).

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2676

Valuation of Plan Assets and Plan Benefits Following Mass Withdrawal; Interest Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This is an amendment to the Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Assets and Plan Benefits Following Mass Withdrawal, which was published on March 25, 1986 (at 51 FR 10322), and is effective on April 24, 1986. Section 2676.15(c) of the regulation contains a table setting forth, for each calendar month ending after the effective date of the regulation, a series of interest rates to be used in valuing benefits and certain assets as of valuation dates that occur within that calendar month. This amendment establishes the first series of interest rates in that table.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Deborah Murphy, Attorney, Corporate Policy and Regulations Department (35100), Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, DC 20006; 202-956-5050 (202-956-5059 for TTY and TDD). (These are not toll-free numbers).

SUPPLEMENTARY INFORMATION: The Pension Benefit Guaranty Corporation's regulation on Valuation of Plan Assets and Plan Benefits Following Mass Withdrawal establishes rules for valuing assets and benefits of multiemployer plans under sections 4219(c)(1)(D) and 4281(b) of the Employee Retirement Income Security Act of 1974, as amended. Section 2676.15 of the regulation prescribes an interest assumption to be used in performing these valuations Paragraph (c) of that section contains a table setting forth, for each calendar month ending after the effective date of the regulation, a series of interest rates to be used in any valuation performed as of a valuation date within that calendar month.

This amendment to the regulation establishes the first monthly rate series in the table in § 2676.15(c). This rate series is for the month of April 1986 and applies to valuation dates occurring on or after April 24 (the regulation's effective date) and before May 1, 1986. The PBGC intends to publish a new entry in the table each month, whether or not the new entry contains rates different from those prescribed for the preceding month. The PBGC will publish the rate series for each month before the beginning of the month. Beginning with the rates for June 1986, the PBGC expects to publish each month's rates on or about the fifteenth of the preceding month.

The PBGC finds that notice of and public comment on this amendment would be impracticable and contrary to the public interest, and that there is good cause for making this amendment effective immediately. These findings are based on the need to have the interest rates in this amendment reflect market conditions that are as nearly current as possible and the need to issue the interest rates promptly so that they are available to the public before the beginning of the period to which they apply. (*See* 5 U.S.C. 533 (b) and (d).) Because no general notice of proposed rulemaking is required for this amendment, the Regulatory Flexibility Act of 1980 does not apply (5 U.S.C. 601(2)).

The PBGC has also determined that this amendment is not a "major rule" within the meaning of Executive Order 12291 because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 29 CFR Part 2676

Employee benefit plans, Pensions.

In consideration of the foregoing, Part 2676 of Subchapter H of Chapter XXVI of Title 29, Code of Federal Regulations, is amended as follows:

PART 2676—VALUATION OF PLAN BENEFITS AND PLAN ASSETS FOLLOWING MASS WITHDRAWAL

1. The authority citation for Part 2676 continues to read as follows:

Authority: Secs. 4002(b)(3), 4219(c)(1)(D), and 4281(b), Pub. L. 93-406, as amended by sections 403(1) and 104(2) (respectively), Pub. L. 96-364, 94 Stat. 1302, 1237-1238, and 1261 (1980) (29 U.S.C. 1302(b)(3), 1399(c)(1)(D), and 1441(b)(1)).

2. In § 2676.15, paragraph (c) is revised to read as follows:

32 CFR Part 735

Reporting Births and Deaths in Cooperation With Other Agencies

AGENCY: Naval Medical Command, Navy, DOD.

ACTION: Final rule.

SUMMARY: The Naval Medical Command promulgated this regulation to disseminate the latest information relative to the registration of births, deaths, and other vital statistics for such events occuring under the jurisdiction of Navy Medical Department facilities. Part 138 of this title on the registration of births occurring in overseas activities, disseminates in its entirety the Department of Defense Directive. This promulgation assures conformity with that Department of Defense directive.

EFFECTIVE DATE: January 10, 1986.

FOR FURTHER INFORMATION CONTACT: Herbert L. Pelham, Program Analyst, Naval Medical Command, Washington, DC 20372-5120 (202) 653-1179.

List of Subjects in 32 CFR Part 735

Military personnel, Health professions, Archives and records.

J.S. Cassells,
Commander, Naval Medical Command.

Accordingly, 32 CFR Part 735 is added to read as follows:

PART 735—REPORTING BIRTHS AND DEATHS IN COOPERATION WITH OTHER AGENCIES

Sec.
735.1 Purpose.
735.2 Background.
735.3 Action.

Authority: 70A Stat. 278; 60 Stat. 379, 383; 5 U.S.C. 301, 552; and 10 U.S.C. 5031.

§ 735.1 Purpose.

To promulgate latest guidance on reporting births and deaths, including births to which Part 138 of this title is applicable.

§ 735.2 Background.

For Armed Forces members and their dependents on duty overseas, registration of vital statistics with an appropriate foreign government may be a distinct advantage should documentary evidence, acceptable in all courts, be required at any future time. Department of Defense (DOD) policy is that military services will require their members to make official record of births, deaths, marriages, etc., with local civil authorities in whose jurisdiction such events occur.

§ 735.3 Action.

When a medical officer has knowledge of a birth or death occurring under the following conditions, he or she shall refer the matter to the commanding officer for assurance of compliance with DOD policy.

(a) *Births.* (1) In accordance with local health laws and regulations, the commanding officer of a naval hospital in the United States (U.S.) shall report to proper civil authorities all births, including stillbirths, occurring at the hospital. Medical officers on ships and aircraft operating within U.S. political boundaries, or at stations other than naval hospitals in the U.S., shall report all births occurring within their professional cognizance. It shall be the duty of the medical officer to determine the requirements of local civil authorities for these reports.

(2) When births occur on aircraft or ships operating beyond U.S. political boundaries, the medical officer responsible for delivery shall make a report to the commanding officer, master of the ship, or to the officer in command of any aircraft, in every case to be recorded in the ship or aircraft log. A report shall also be made to local civil authorities in the first port of entry if required by law and regulation of such authorities when births occur on a course inbound to the U.S. Additionally, the medical officer shall:

(i) Furnish the parents with appropriate certificates and shall, if the report is not accepted by the local registrar of vital statistics or other civil authority, or in any case in which local authority has indicated in writing that such a report will not be accepted,

(ii) Advise the parents to seek the advice of the nearest office of the U.S. Immigration and Naturalization Service (USINS), at the earliest practicable time. USINS offices are located in ports of entry and in major cities of the United States.

(iii) For births occurring on courses out-bound and beyond the continental limits of the U.S., report to the U.S. consular representative at the next appropriate foreign port. When the aircraft or ship does not enter a foreign port, procedures described in § 735.3(a)(2)(ii) shall be followed.

(3) Attention is invited to the fact that reports of birth may be forwarded to the Bureau of Health Statistics, Department of Health, Honolulu, Hawaii for any births occurring on courses destined for islands in the Pacific Ocean over which the United States has jurisdiction as well as for those births which are otherwise accepted by civil authorities for Hawaii.

(4) Part 138 of this title prescribes policy, responsibilities, and procedures on birth registration of infants born to U.S. citizens, in military medical facilities outside the United States and its possessions.

(b) *Deaths.* When a death occurs at a naval activity in any State, Territory, or insular possession of the United States, the commanding officer or designated representative shall report the death promptly to proper civil authorities in accordance with Naval Medical Command directives. If requested by these civil authorities, the civil death certificate may be prepared and signed by the cognizant naval medical officer. Local agreements concerning reporting and preparation of death certificates

VOL 51 ISS 78 AP 23 1986 UMI

should be made between the naval facility and local civil authorities.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 81

[A-6-FRL 3005-7]

Designation of Areas for Air Quality Planning Purposes; Redesignation of Portion of Tulsa County, OK, for Carbon Monoxide

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice approves the Oklahoma State Department of Health (OSDH) July 20, 1984, request to redesignate the carbon monoxide (CO) nonattainment area in Tulsa County to attainment. On May 22, 1985, and July 11, 1985, the OSDH submitted corrections to their submittal in support of their request.

EFFECTIVE DATE: This action will be effective on June 23, 1986 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Notice of adverse or critical comments may be submitted to Kathryn M. Griffith at the EPA Regional Office address listed below. Copies of the documents relevant to this action are available for inspection during normal business hours at the following locations:

Environmental Protection Agency:
Region 6; Air Programs Branch; 1201 Elm Street; Dallas, Texas 75270
Oklahoma State Department of Health; Air Quality Service; 1000 Northeast 10th Street; Oklahoma City; Oklahoma 73152

FOR FURTHER INFORMATION CONTACT: Kathryn M. Griffith; SIP New Source Section; Environmental Protection Agency; Region 6; Air, Pesticides and Toxics Division; Air Programs Branch; 1201 Elm Street; Dallas, Texas 75270; (214) 767-9857. Docket No. OK-85-6.

SUPPLEMENTARY INFORMATION: On July 20, 1984, the OSDH submitted a request to redesignate the CO nonattainment area in Tulsa County to attainment. On May 22, 1985, and July 11, 1985, the OSDH submitted corrections to their submittal. EPA reviewed the request and developed an evaluation report [1], which is available for inspection during normal business hours at the EPA Region 6 office and the other addresses listed above. The request satisfies all of the necessary criteria for redesignations which include valid, recent air quality data showing no violations and evidence of an implemented control strategy resulting in real and enforceable emission reductions.

A detailed description of the nonattainment area is as follows:

Those portions of Tulsa County that include Sections 30, 29, 31, 22, 33 of Township 20 N and Range 13 E; Sections 6, 5, 4, 7, 8, 9 of Township 19 N and Range 13 E; Sections, 1, 2, 11, 12 of Township 19 N and Range 12 E; and Sections 36, 35, 26, 25 of Township 20 N and Range 12 E.

Maps of the nonattainment area with the location of the monitors can be found in the evaluation report.

Tulsa County has two continuous CO monitors. Site 126 has had no violations of the CO standard in the last three years. Site 191 was established in October 1983, to replace site 112 which was discontinued in August 1983, due to construction of a 600 car parking lot which encompassed the site. Neither site 191 nor site 112 had any violations of the CO standard in the last three years.

Evaluated levels of carbon monoxide emissions usually occur in Tulsa County during the most adverse weather conditions when the County has ice or snow on the streets, traffic flow is severely impeded and the wind speeds are low. Even when these conditions occurred during December 1983, there were no exceedances of the CO standard.

[1] EPA Review of Oklahoma's Request to Redesignate Tulsa County to Attainment for CO.

The 1979 state implementation plan called for a reduction in emissions of CO of 21 percent in order to attain the ambient standard. According to the latest calculations, implementation of the Federal Motor Vehicle Control Program and Regulation 3.6 "Control of Emission of Carbon Monoxide" (approved November 28, 1980, at 45 FR 79051) have decreased CO emissions in Tulsa County by 28.7 percent.

Based upon EPA's review of the State's request, EPA is redesignating a portion of Tulsa County to attainment for CO.

Because EPA considers today's action to be noncontroversial and routine, we are approving it today without prior proposal. The action will become effective on June 23, 1986. However, if we receive notice by (within 30 days) that someone wishes to submit critical comments *then* EPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new rulemaking by proposing the action and establishing a comment period.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 23, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2)).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

40 CFR Part 180

[PP 5E3210/R824; FRL-3007-1]

Pesticide Tolerances for Norflurazon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide norflurazon and its metabolite in or on the raw agricultural commodities asparagus and avocados. This regulation, to establish maximum permissible levels for residues of norflurazon in or on the commodities, was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4).

EFFECTIVE DATE: Effective on April 23, 1986.

ADDRESS: Written objections, identified by the document control number [PP 5E3210/R824], may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:
By mail: Jack Housenger, Emergency Response and Minor Use Section (TS-767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington DC 20460.
Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-1806).

SUPPLEMENTARY INFORMATION: The EPA issued a proposed rule, published in the Federal Register of March 12, 1986 (51 FR 8519), which announced that the Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, submitted pesticide petition 5E3210 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project and the Agricultural Experiment Stations of Michigan, Texas, and Washington and the United States Department of Agriculture proposing the establishment of tolerances for the combined residues of the herbicide norflurazon (4-chloro-5-(methylamino)-2-(alpha, alpha, alpha-trifluoro-*m*-tolyl)-3-(2*H*)-pyridazinone and its desmethyl metabolite 4-chloro-5-(amino)-2-(alpha, alpha, alpha-trifluoro-*m*-tolyl)-3-(2*H*)-pyridazinone in or on the raw agricultural commodities asparagus at 0.05 part per million (ppm) and avocados at 0.2 ppm; that use of the herbicide norflurazon on asparagus be limited to Michigan and Washington and on avocados to Florida only based on the geographical representation of the residue data submitted; and that additional residue data will be required to expand the area of usage.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. Based on the data and information considered, the Agency concludes that the tolerances would protect the public health. Therefore the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1806).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of March 28, 1986 (51 FR 10411), which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, submitted pesticide petition 4E3088 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project and the Agricultural Experiment Station of California proposing the establishment of a tolerance for the combined residues of the fungicide 1-(4-chlorophenoxy)-3,3-dimethyl-1-(1*H*-1,2,4-triazol-1-yl)-2-butanone and its metabolites containing chlorophenoxy and triazole moieties (expressed as the fungicide) in or on the raw agricultural commodity raspberries at 2.0 parts per million (ppm); that the use of the fungicide be limited to California based on the geographical representation of the residue data submitted.

There were no comments or request for referral to an advisory committee received in response to the proposed rule.

Based on the information and data considered, and the fact that raspberries are not considered an animal feed commodity, secondary residues are not expected in meat, milk, poultry or eggs. The Agency concludes that the tolerance would protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 10, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

Therefore, 40 CFR 180 is amended as follows:

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.410 is amended by designating the current paragraph and list of tolerances as paragraph (a) and adding paragraph (b) to read as follows:

§ 180.410 1-(4-chlorophenoxy)-3,3-dimethyl-1-(1*H*-1,2,4,-triazol-1-yl)-2-butanone; tolerances for residues.

* * * * *

(b) Tolerances with regional registration are established for the combined residues of the fungicide 1-(4-chlorophenoxy)-3,3-dimethyl-1-(1H-1,2,4-triazol-1-yl)-2-butanone and its metabolites containing chlorophenoxy and triazole moieties (expressed as the fungicide) in or on the following raw agricultural commodities:

Commodities	Parts per million
Raspberries	2.0

[FR Doc. 86–9049 Filed 4–22–86; 8:45 am]
BILLING CODE 6560–50–M

40 CFR Part 180

[PP 3E2845, 3E2930/R807; FRL–3004–8]

Pesticide Tolerances for Glyphosate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide glyphosate and its metabolite in or on certain crop groups. The regulation to establish a maximum permissible level for residues of glyphosate in or on the crop groups was required in petitions submitted by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: Effective on April 23, 1986.

ADDRESS: Written objections, identified by the document control number (PP 3E2845, 3E2930/R807), may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:
By mail: Jack Housenger, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.
Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1806).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of November 26, 1985 (50 FR 48615), which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petitions (PP) to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project and the named Agricultural Experiment Stations proposing the establishment of tolerances for the combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine), and its metabolite aminomethylphosphonic acid in or on certain crop groups as follows:

1. *PP 3E2845* on behalf of the Agricultural Experiment Stations of Arkansas, Florida, Georgia, Louisiana, Michigan, Minnesota, Missouri, Puerto Rico, Texas, and Vermont, and the United States Department of Agriculture for the crop group cucurbit vegetables at 0.5 part per million (ppm).

2. *PP 3E2930* on behalf of the Agricultural Experiment Stations of Alaska, Arkansas, Connecticut, Forida, Georgia, Illinois, Louisiana, Maine, Maryland, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, North Carolina, Ohio, Oregon, Virginia, and West Virginia, and the U.S. Department of Agriculture for the crop group small fruits and berries at 0.2 ppm.

As stated in the proposed rule, the Agency was unable to fully assess the oncogenic potential of glyphosate in CD–1 male mice. The Agency, however, considers the evidence for oncogenicity to be extremely limited and based on available data does not expect any significant risk from the dietary level of glyphosate to which humans are likely to be exposed from the proposed and established uses of the pesticide. Although there were no comments or requests for referral to an advisory committee received in response to the proposed rule, the Agency delayed publication of the rule establishing tolerances for residues of glyphosate and its metabolite in or on the crop groups cucurbits and small fruits and berries pending an evaluation of the Agency's findings by the FIFRA Scientific Advisory Panel. The Panel's review, which was completed on February 11, 1986, concluded that existing data are insufficient to determine whether glyphosate is an oncogen. The Panel proposed that additional oncogenicity studies be conducted in rats and/or mice. The Agency will announce the data requirements for the continued registration of glyphosate in a registration standard which is scheduled for completion in June of 1986.

The data submitted in the petition and other relevant material have been evaluated in the proposed rulemaking. Based on the data and information considered, including the Scientific Advisory Panel's review, the Agency concludes that the tolerances would protect the public health.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 180

40 CFR Part 180

[PP 3E2929/R801; FRL–3004–6]

Pesticide Tolerances for Glyphosate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide glyphosate and its metabolite in or on certain raw agricultural commodities. The regulation to establish a maximum permissible level for residues of the herbicide in or on the commodities was requested in petitions submitted by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: Effective on April 23, 1986.

ADDRESS: Written objections, identified by the document control number (PP 3E2929/R801), may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:
By mail: Jack Housenger, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703–557–1806).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of October 30, 1985 (50 FR 45121), which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition (PP) 3E2929 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project and the Agricultural Experiment Stations of California and Puerto Rico proposing the establishment of tolerances for the combined residues of the herbicide glyphosate (*N*-(phosphonomethyl)glycine), and its metabolite aminomethylphosphonic acid in or on the raw agricultural commodities acerola, figs, kiwifruit, and olives at 0.2 part per million (ppm).

As stated in the proposed rule, the Agency was unable to fully assess the oncogenic potential of glyphosate in CD–1 male mice. The Agency, however, considers the evidence for oncogenicity to be extremely limited and based on available data does not expect any significant risk from the dietary level of glyphosate to which humans are likely to be exposed from the proposed and established uses of the pesticide. Although there were no comments or requests for referral to an advisory committee received in response to the proposed rule, the Agency delayed publication of the rule establishing tolerances for residues of glyphosate and its metabolite in or on the raw agricultural commodities acerola, figs, kiwifruit, and olives pending an evaluation of the Agency's findings by the FIFRA Scientific Advisory Panel. The Panel's review, which was completed on February 11, 1986, concluded that existing data are insufficient to determine whether glyphosate is an oncogen. The Panel proposed that additional oncogenicity studies be conducted in rats and/or mice. The Agency will announce the data requirements for the continued registration of glyphosate in a registration standard which is scheduled for completion in June of 1986.

The data submitted in the petition and other relevant material have been evaluated in the proposed rulemaking. Based on the data and information considered, including the Scientific Advisory Panel's review, the Agency concludes that the toleranaces would protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560-50-M

40 CFR Part 180

[PP 4F3153/827; FRL-3007-8]

(Alpha RS,2R)-Fluvalinate [(RS)-Alpha-Cyano-3-Phenoxybenzyl (R)-2-[2-Chloro-4-(Trifluoromethyl) Anilino]-3-Methylbutanoate; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide (alpha *RS*,2R)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate] in or on the raw agricultural commodities cottonseed, cattle, goats, hogs, horses, sheep, and poultry and eggs and milk. This regulation to establish the maximum permissible level for residues of the insecticide was requested by the Zoecon Corp.

EFFECTIVE DATE: Effective on April 23, 1986.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: George T. LaRocca, Product Manager (PM) 15, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 204, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2400).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of December 5, 1984 (49 FR 47549), which announced that Zoecon Corp., a Sandoz company, 975 California Ave., Palo Alto, CA 95304-0859, had submitted pesticide petition (PP) 4F3153 proposing to amend 40 CFR Part 180 by establishing a tolerance for residues of (alpha *RS*,2R)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate] in or on the raw agricultural commodities (RAC) cottonseed at 0.1 part per million (ppm); meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep at 0.01 ppm; meat, fat, and meat byproducts of poultry at 0.01 ppm; and milk at 0.01 ppm and eggs at 0.1 ppm.

EPA also issued a notice, published in the **Federal Register** of November 21, 1984 (49 FR 45923), which announced that Zoecon Corp. filed an application for amended registration of the subject pesticide on cotton to control various insects.

There were no comments received in response to those notices.

The Agency reviewed the data submitted in support of the application for amended registration and decided to conditionally accept the amendment under the authority of section 3(c)(7)(B) of FIFRA for use on cotton for a period through August 31, 1986. This related document appears elsewhere in this issue of the **Federal Register.**

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include an acute oral rat toxicity study with a median lethal dose (LD_{50}) of 282 milligrams (mg)/kilogram (kg) for male rats and 261 mg/kg for female rats; a 90-day rat and mouse feeding study with a no-observed-effect level (NOEL) of 3.0 mg/kg/day for both rats and mouse; a 180-day dog feeding study with a NOEL of 5.0 mg/kg/day; a 21-day delayed hen neurotoxicity study with a NOEL of 20,000 mg/kg/day, the highest dose tested (HDT); teratology studies (in rats and rabbits), with a NOEL of 50.0 mg/kg (HDT) for teratology in rats and a NOEL for teratology of 125.0 mg/kg in rabbits; a 2-generation rat reproduction study with a NOEL of 20.0 ppm; a 24-month mouse chronic feeding/oncogenicity study that resulted in a systemic NOEL of 10 mg/kg/day in which no oncogenic effects were noted at dosage levels of 2, 10, and 20 mg/kg/day (20 mg/kg/day being the highest dosage level tested) under the conditions of the study; a 24-month rat oral feeding/oncogenicity study with a NOEL of 1.0 mg/kg/day (HDT), no oncogenic effects noted under the conditions of the study at 2.5 mg/kg/day (HDT) or at the lowest dose tested; and the following mutagenicity studies: Ames' Salmonella Microsome Test, sister chromatid exchange assay, mouse lymphoma, unscheduled DNA synthesis, cell transformation (all negative except for the mouse lymphoma, which was positive with metabolic activation but negative without metabolic activation).

The acceptable daily intake (ADI) is calculated to be 0.01 mg/kg/day based on a 2-year rat feeding study and using a 100-fold safety factor. The maximum permissible intake (MPI) has been calculated to be 0.6 mg/kg/day for a 60-kg person. Approval of tolerances for cottonseed, meat, fat, and meat byproducts of cattle, goats, hogs, horses, sheep, poultry, eggs, and milk would result in a theoretical maximum residue contribution (TMRC) of 0.0504 mg/day (1.5 kg) and would utilize 8.40 percent of the ADI. Based on an analysis of current Agency approved and proposed tolerances on the tolerance assessment system (TAS), the ADI was not exceeded.

The nature of the residue is adequately understood for these tolerances. An adequate analytical method, gas chromatography, is available for enforcement purposes. There are currently no regulatory actions pending against the registration of this pesticide, and there are no other relevant considerations in establishing these tolerances.

Because of the long lead time from establishing this tolerance to publication of the enforcement methodology in the Pesticide Analytical Manual II, an interim analytical methods package is being made available to State pesticides enforcement chemists when requested from: By mail, Information Service Section (TS-757C), Program Management Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C., 20460. Office location and telephone number: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-3262).

A related document (PP 4H5444/R826) establishing a regulation permitting residues of this chemical in or on cottonseed oil (crude and refined) and cottonseed hulls appears elsewhere in this issue of the **Federal Register.**

Based on the above information, the Agency has determined that establishing tolerances for residues of the pesticide in or on the commodities will protect the public health. Therefore, as set forth below, the tolerances are established for a period extending to August 21, 1990, to cover residues existing from the conditional registration of fluvalinate.

Any person adversely affected by this regulation may within 30 days after publication of this document in the **Federal Register** file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant impact on a substantial number of small entities.

A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: March 28, 1986.

Steven Schatzow,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended as follows:

1. The authority citation continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.427 is added to read as follows:

§ 180.427 (Alpha RS,2R)-fluvalinate [(RS)-alpha-cyano-3-phenoxybenzyl (R)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate].

Tolerances are established for residues of the insecticide (alpha *RS*,2R)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[2-chloro-4-(trifluoromethyl) anilino]-3-methylbutanoate in or on the following raw agricultural commodities:

Commodities	Parts per million
Cottonseed	0.1
Cattle, fat	0.01

[FR Doc. 86-8188 Filed 4-22-86; 8:45 am]

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

41 CFR Parts 114-38, 114-39

Personal Property Management Procedures; Repeal

AGENCY: Department of the Interior.

ACTION: Final rule.

SUMMARY: The Department of the Interior is repealing 41 CFR Part 114-38 (except §§ 114-38.53 and 114-48.55) and 41 CFR Part 114-39 which contain the internal regulations and procedures which govern motor equipment management and interagency motor vehicle pools and will incorporate those provisions in the Department's administrative manual.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: John Moresko, Personal Property Management, 202-343-2704.

SUPPLEMENTARY INFORMATION: On April 14, 1986, the Department of the Interior issued a revision of the Interior Property Management Regulations found at 41 CFR Part 114-38 (except §§ 114-38.53 and 114-38.55) and 41 CFR Part 114-39 in Part 412 of the Departmental Manual. This revision incorporates those provisions formerly included in 41 CFR Part 114-38 (except §§ 114-38.53 and 114-38.55) and 41 CFR Part 114-39, which establish requirements and guidelines for the acquisition, receipt, operation, storage, servicing, transfer, and disposal of motor vehicles. Additionally, the regulation contains procedures and requirements for use of the Interagency Fleet Management System. Periodic reports, recordkeeping and accidents and accident reporting are also covered.

The remaining parts of 41 CFR Part 114 will be revised as necessary, and upon revision, will also be incorporated in the Departmental Manual as appropriate.

The Departmental Manual is indexed and is available for inspection and copying in accordance with the Freedom of Information Act (5 U.S.C. 522(a)(2)(c)).

The Department is taking this action as means of both eliminating unnecessary rules from the Code of Federal Regulations and for consolidating the personal property management requirements in one logical place, the Departmental Manual.

Because the personal property management procedures govern only internal actions of the Department, this action is not expected to affect the public. The Department has determined that notice and public comment on the rule are unnecessary because the Department, by repeal of 41 CFR 114-38 (except §§ 114-38.53 and 114-38.55) and 41 CFR Part 114-39, is simply electing another method of issuance of revised internal instructions and procedures.

The primary author of this document is John Moresko, Personal Property Management Division, Office of Acquisition and Property Management (434-2704).

The Department of the Interior has determined that this document is not a major rule and does not require a regulatory impact analysis under Executive Order 12291 because the rule is procedural and has no economic impact on the public. For the same reasons, the Department has also determined that the rule will not have a significant economic effect on a substantial number of small entities and does not require a flexibility analysis under the Regulatory Flexibility Act.

Dated: April 14, 1986.

Joseph E. Doddridge, Jr.,

Deputy Assistant Secretary—Policy, Budget, and Administration.

VOL 51 ISS 78 APR 23 1986 UMI

Accordingly, 41 CFR 114–38 and 41 CFR 114–39 are amended as follows:

PART 114–38—[AMENDED]

PART 114–39—[REMOVED]

1. The authority citation for Parts 114–38 and 114–39 continue to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 5 U.S.C. 301, 40 U.S.C. 486(c).

2. Accordingly, 41 CFR 114–38 (except §§ 114–38.53 and 114–38.55) and 41 CFR Part 114–39 are repealed and removed.

[FR Doc. 86–9032 Filed 4–22–86; 8:45 am]

BILLING CODE 4310–10–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 65

[CC Docket No. 84–800; Phase II]

Common Carrier Services; Interstate Service of AT&T Communications and Exchange Telephone Carriers

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: This action corrects omissions in the Report and Order in this proceeding concerning Interstate Service of AT&T Communications, published in the **Federal Register** on January 15, 1986, 51 FR 1795.

FOR FURTHER INFORMATION CONTACT: Giovanna M. Longo, Common Carrier Bureau, (202) 634–1742.

Erratum

Authorized rates of return for the interstate services of AT&T Communications and Exchange Telephone Carriers (CC Docket No. 84–800, Phase II).

Released: April 15, 1982.

Several omissions were made in the *Report and Order* in CC Docket No. 84–800, Phase II (FCC 85–645, Mimeo Number 36337, released December 20, 1985). The Commission's Rules in Part 65 concerning service of certain submissions in rate of return prescription proceedings require clarification. Some documents are required to be served by hand in order to permit participants adequate time to prepare subsequent filings. In order to eliminate any confusion on this point, the phrase "by hand" will be inserted in the Rules at §§ 65.100(b), 65.103(d), 65.104(c), and 65.105(c) in the following manner.

Sections 65.100(b), 65.103(d), 65.104(c), and 65.105(c) are correctly added to read as follows:

§ 65.100 Participation and notice of appearance.

* * * * *

(b) In order to permit participants to complete service by hand on the filing dates when so required by Part 65, participants shall specify in their notice of appearance an agent for acceptance of service by hand in the District of Columbia. The participant may elect in its notice to receive service by mail and/or upon an agent at another location. When such an election is made, other participants are not required by any provision of Part 65 to complete service on the filing date, and requests for extension of time due to delays in completion of service will not be entertained.

§ 65.103 Discovery.

* * * * *

(d) Service of requests, oppositions, and responses shall be made upon all participants who have filed a notice of appearance pursuant to § 65.100(a). Service of requests upon participants who have filed a notice of appearance pursuant to § 65.100(a) shall be made by hand on the filing dates thereof.

§ 65.104 Oral cross examination of witnesses.

* * * * *

(c) An original and 8 copies of each request or opposition shall be filed with the Secretary. Service of requests and oppositions shall be made upon all participants who have filed a notice of appearance pursuant to § 65.100(a). Service of requests and oppositions shall be made by hand on the filing dates thereof upon all participants who have filed a notice of appearance pursuant to § 65.100(a)(1).

§ 65.105 Proposed findings of fact and conclusions.

* * * * *

(c) Participants shall file an original and 13 copies of their findings and conclusions with the Secretary. Service shall be made upon all participants who have filed a notice of appearance pursuant to § 65.100(a). Service shall be made by hand on the filing date upon all participants who have filed a notice of appearance pursuant to § 65.100(a)(1).

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 86–8903 Filed 4–22–86; 8:45 am]

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

48 CFR Parts 1301, 1302, 1306, 1309, 1314, 1319, 1333, 1349, and 1352

[Docket No. 50830–6003) (Amdt. 85–2)]

Acquisition Regulation Relating to Competition in Contracting and Miscellaneous Amendments

AGENCY: Department of Commerce.

ACTION: Final rule.

SUMMARY: This final rule amends the Commerce Acquisition Regulation (CAR) to implement the protest provisions of the Competition in Contracting Act of 1984, Pub. L. 98–369 (CICA), and amendments to the Federal Acquisition Regulation (FAR) which incorporate and reflect changes to Federal acquisition policy required by the protest provisions of the CICA.

This final rule also makes changes to the CAR unrelated to implementing the CICA and FAR revisions. Procedures are established for: expanding contracting and subcontracting opportunities for women-owned small businesses; conducting preaward surveys of prospective contractors for ship construction, ship alteration and ship repair; recovering administrative costs in the event of contractor default; and using Alternate I of the FAR prescribed disputes clause. This final rule also amends the CAR by adding citations to internal Department procedures for oversight reviews of contracting activities and reporting fraudulent claims and misrepresentations, and by making miscellaneous updates and corrections.

Public comments were requested on September 24, 1985 (50 FR 38677–83). No public comments were received. However, internal Department of Commerce comments were received during the comment period, some of which were incorporated into the final rule.

EFFECTIVE DATE: April 23, 1986.

FOR FURTHER INFORMATION CONTACT: John Dammeyer, Procurement Analyst, Office of Procurement Management, HCHB, Room H6424, U.S. Department of Commerce, 14th St. between Pennsylvania and Constitution Avenues, N.W., Washington, D.C. 20230, (202) 377–4248.

SUPPLEMENTARY INFORMATION:

Public Comments

On September 19, 1985 the Department of Commerce issued a proposed rule known as CAR Amendment 85–2 (50 FR 38677–83, September 24, 1985), requesting public comments by November 8, 1985. No public comments were received. However, comments were received from offices within the Department of Commerce during the comment period. The comments which resulted in changes to the proposed rule are described below.

The first comment addressed a reorganization within the Department's Office of General Counsel which occurred since the publication of the proposed rule. The Contract Law Division is no longer part of the Department's Office of the Assistant General Counsel for Administration. The Contract Law Division is now part of the Department's Office of the Assistant General Counsel for Finance and Litigation. The final rule reflects this change.

The second comment added the following example to the list of areas which might be of specific concern to a team conducting preaward surveys for ship construction, ship alteration, or ship repair contracts.

The depth of water in the navigable waterway and the pier where the vessel will be berthed.

The language was added to the final rule at 1309.106–70(c)(11). This is not a significant change because the same language was listed in the proposed rule at 1309.106(f)(1), as one of the items about which a surveying team must provide information.

The third comment suggested that we reconsider the proposed dollar threshold for Department use of formal source selection procedures. We agreed to withdraw this coverage, pending an overall review of the need for guidance on Department source selection procedures.

The fourth comment suggested that we indicate the result when a protest to the contracting activity is received after the prescribed time limit for receipt of such protests. We agreed to add language to make it clear that, unless the time limit for receiving the protest is extended for good cause, a protest to the contracting activity which is received after the time limit will not be considered.

Administrative Procedure Act and Small Business and Federal Procurement Competition Enhancement Act Requirements

Because this amendment involves matters of agency management, public property, and contracts, under subsection 553(a)(2) of the Administrative Procedure Act (APA) (5 U.S.C. 553(a)(2)), it is exempt from all requirements of section 553 including giving notice of proposed rulemaking, providing an opportunity for comment, and delaying the effective date until at least 30 days after publication or service.

However, section 302 of the Small Business and Federal Procurement Competition Enhancement Act of 1984, Pub. L. 98–577, added section 22 to the Office of Federal Procurement Policy Act which requires that notice of proposed rulemaking and at least 30 days opportunity for comment be given for acquisition regulations having a significant cost or administrative impact on contractors or offerors, and specifies that such regulations may not take effect until 30 days after such notice. Since it was determined that some of the changes that would be made to the CAR by the proposed amendment might have a significant cost or administrative impact on contractors or offerors, a notice of proposed rulemaking was published and written comments from the public were invited for consideration by November 8, 1985.

Regulatory Flexibility Act Requirements

The General Counsel of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that the rule would not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis was not prepared.

Executive Oder 12291 Requirements

As stated in the interim notice, this regulation is not a major rule as defined in Executive Order 12291 and therefore a regulatory impact analysis was not prepared. The rule was submitted to the Office of Management and Budget (OMB) for review in accordance with E.O. 12291 and OMB Bulletin 85–7.

Paperwork Reduction Act Requirements

The collection of information requirements imposed on the public by this rule were approved by the Office of Management and Budget under OMB control numbers 0605–0018 and 0690–0002 in accordance with the Paperwork Reduction Act.

List of Subjects in 48 CFR Parts 1301, 1302, 1306, 1309, 1314, 1319, 1333, 1349, and 1352

Government procurement.

Accordingly, Chapter 13 of Title 48 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C., April 18, 1986.

Hugh L. Brennan,

Director, Office of Procurement and Administrative Services, U.S. Department of Commerce.

1. The authority citation for Parts 1301, 1302, 1306, 1309, 1314, 1319, 1333, and 1352 continues to read as follows:

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486 (c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

PART 1301—GENERAL

1301.101 [Amended]

2. Section 1301.101 of Subpart 1301.1 is corrected by removing "CAP" and inserting "CAR" in its place.

3. Section 1301.104–3(b) of Subpart 1301.1 is revised to read as follows:

1301.104–3 Copies.

* * * * *

(b) Loose-leaf copies of the CAR are distributed within the Department by the Procurement Executive.

4. Section 1301.201–1(b) of Subpart 1301.2 is revised to read as follows:

1301.201–1 The two FAR councils.

(b) The Department representatives to the Civilian Agency Acquisition Council will be appointed by the Procurement Executive. The Procurement Executive will be responsible for coordinating and advocating Department proposed revisions to the FAR.

1301.301 [Amended]

5. Section 1301.301(c) of Subpart 1301.3 is amended by replacing the term "Office of Procurement and Federal Assistance" with the term "Procurement Executive" in the two sentences where it appears.

1301.402 [Amended]

6. Section 1301.402 of Subpart 1301.4 is amended by replacing the term "Office of Procurement and Federal Assistance" with the term "Procurement Executive" in the two sentences where it appears.

1301.501 [Amended]

7. Section 1301.501 of Subpart 1301.5 is amended by replacing the term "Office of Procurement and Federal Assistance" in the last sentence, with the term "Procurement Executive".

1301.601–70 [Amended]

8. Section 1301.601–70 of Subpart 1301.6 is amended by replacing the term "Office of Procurement and Federal Assistance" with the term "Procurement

VOL 51 ISS 78 AP 23 1986 UMI

Executive" in the two sentences where it appears.

1301.601-71 [Amended]

9. Section 1301.601-71 of Subpart 1301.6 is amended by replacing the term "Office of Procurement and Federal Assistance" with the term "Procurement Executive" in the heading and in the two sentences where it appears.

10. Section 1301.601-71 of Subpart 1301.6 is further amended by adding the phrase "pursuant to the Department Administrative Order on Contracting (Procurement) Review and Approval Requirements (DAO 208-5)," before the word "to" in the second sentence.

11. Section 1301.601-71 of Subpart 1301.6 is further amended by replacing the term "OPFA" with the term "Department".

PART 1302—DEFINITIONS OF WORDS AND TERMS

1302.1-1 [Amended]

12. Section 1302.1-1 of Subpart 1302.1 is corrected by replacing "(DA) 208-2)" in the third sentence of the definition for "Head of the Agency" with "(DAO 208-2)".

13. Section 1302.1-1 of Subpart 1302.1 is further amended by adding the sentence "Procurement Executive also means the Senior Procurement Executive." after the first sentence in the definition for "Procurement Executive".

PART 1306—COMPETITION REQUIREMENTS

14. New sections 1306.303 and 1306.303-1 are added to Subpart 1306.3 to read as follows:

1306.303 Justifications.

1306.303-1 Requirements.

(d) Where the authority or FAR 6.302-3(a)(2)(i) or FAR 6.302-7 is cited as a basis for not providing full and open competition for any contract action subject to the Agreement on Government Procurement, the contracting officer shall send a copy of the justification to the Procurement Executive within 14 work days after contract award. The Procurement Executive shall send the copy of the justification to the Office of the United States Trade Representative.

PART 1309—CONTRACTOR QUALIFICATIONS

15. Part 1309 is amended to add a new Subpart 1309.1 as follows:

Subpart 1309.1—Responsible Prospective Contractors

1309.106 Preaward surveys. 1309.106-70 Preaward surveys for ship construction, ship alteration, and ship repair.

(a) *General.* The contracting officer shall request a preaward survey of a prospective contractor for contracts involving ship construction, ship alteration, or ship repair, where the cost or price of the contract is anticipated to be in excess of $100,000, and the information on hand is not sufficient to make a determination regarding responsibility. The contracting officer may request a preaward survey of a prospective contractor for contracts involving ship construction, ship alteration, or ship repair, where the cost or price of the contract is anticipated to be $100,000 or less, if the circumstances justify the cost of the survey.

(b) *Extent of preaward survey.* The contracting officer shall determine the manner and extent of the preaward survey based upon the specific requirements of the contract. At a minimum, the contracting officer shall request a preaward survey for contracts involving ship construction, ship alteration, and ship repair where the contracting officer cannot affirmatively determine that the prospective contractor's facility is adequate for the work to be performed. For the purpose of this section, the prospective contractor's facility includes the land, buildings, shop spaces, dock facilities, drydock or marine railways, and plant security and safety.

(c) *Examples of specific concern.* The contracting officer shall coordinate efforts with technical and requirements personnel to identify areas of specific concern for the preaward survey. The following examples illustrate areas which may be of specific concern to the preaward survey team, depending on the nature of the work to be performed:

(1) Acceptable facilities and equipment for special production techniques (e.g., unique welding procedures, special test fixtures, or production equipment);

(2) Adequate size and lift capacity for the drydock or marine railway;

(3) Well maintained drydock and lifting equipment and acceptable preventative maintenance of these items;

(4) Acceptable dock master and crew who are experienced in operating the equipment and lifting a vessel of comparable size and weight;

(5) Adequate drydock or pier utilities to support the vessel, including electrical power, steam, potable water, fire fighting capability, sewage disposal, and telephone service;

(6) Responsible subcontractors;

(7) Contractor's demonstrated ability to monitor and coordinate subcontractor performance;

(8) Contractor's demonstrated ability to conduct dock and sea trials;

(9) Contractor's demonstrated ability to protect the vessel and yard and vessel personnel, including safety and security programs or individual plans;

(10) Adequate secure storage facilities for Government property; and

(11) The depth of water in the navigable waterway and the pier where the vessel will be berthed.

(d) *Preaward survey team.* The contracting officer may use any of the following individuals to form the preaward survey team:

(1) A cost or price analyst or cognizant audit agency for review of the contractor's financial and accounting systems;

(2) Technical or requirements personnel from the cognizant marine center or office of marine operations, for technical, production, or quality assurance evaluations; and

(3) Representatives of the contracting officer for management and administrative evaluations.

(e) *On-site survey.* If it is necessary to conduct a survey at the proposed site where the work is to be performed, the contracting officer shall coordinate the visit with the prospective contractor or subcontractor.

(f) *Reports.* The surveying team shall comply with the applicable reporting requirements of FAR 9.106-4. When using the short-form preaward survey report prescribed in FAR 9.106-4(d), the surveying team shall provide information on the following at a minimum:

(1) The depth of water in the navigable waterway and the pier where the vessel will be berthed;

(2) The condition of the drydock or marine railway where the work is to be performed;

(3) Availability of adequate utilities and services for the vessel;

(4) Evidence of prospective contractor or subcontractor financial problems or poor past performance.

(g) Contracting officer determination. Upon completion of the preaward survey, the contracting officer shall determine whether the prospective contractor and subcontractors are responsible.

PART 1314—SEALED BIDDING

1314.407-8 [Removed]

16. Part 1314 is amended by removing section 1314.407-8.

PART 1319—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

17. A new Subpart 1319.70 is added to Part 1319 as follows:

Subpart 1319.70—Contracting Opportunities for Women-Owned Small Businesses

1319.7001 Policy.

The Department encourages the use of women-owned small businesses in its acquisition programs. Whenever practicable, Department contracting activities shall include women-owned small businesses in competitive solicitations and assist prime contractors in identifying women-owned small businesses for subcontracting opportunities.

1319.7002 Source identification and solicitation.

(a) The contracting officer shall include women-owned small businesses on the mailing list for each solicitation which is expected to result in an award in excess of the small purchase dollar threshold whenever there are women-owned small businesses known to be potential suppliers.

(b) The contracting officer should contact the Office of Small and Disadvantaged Business Utilization (OSDBU) for assistance in locating these sources through the Small Business Administration Procurement Automated Source System (PASS) and the Minority Vendor Profile System (MVPS). The contracting officer should also encourage technical and requirements personnel to identify women-owned small business sources.

1319.7003 Subcontracting opportunities.

(a) Contracting officers shall provide assistance to prime contractors to identify potential women-owned small businesses. Such assistance is intended to aid prime contractors in placing a fair proportion of subcontracts with women-owned small businesses.

(b) The contracting officer shall insert the clause at 1352.219-1, Women-Owned Small Business Sources, in solicitations and contracts where the clause prescribed by FAR 19.708(b) is required (see FAR 52.219-9).

PART 1333—PROTESTS, DISPUTES, AND APPEALS

18. The heading to Part 1333 is revised to read as set forth above.

19. Part 1333 is amended by adding new Subparts 1333.1 and 1333.2 as follows:

Subpart 1333.1—Protests

1333.102 General.

The Departmentwide contact point for protests to the GAO or to the GSBCA is the Assistant General Counsel for Finance and Litigation (AGC). The AGC represents the Department in protests filed with the GAO or the GSBCA. The AGC furnishes all necessary correspondence concerning protests to the GAO or the GSBCA, including the Department's report in response to a GAO or GSBCA protest.

1333.103 Protests to the agency.

(a) Protests must be received within ten work days after the basis for protest is known or should have been known unless good cause is shown to extend the time limit. However, protests based upon alleged improprieties in any type of solicitation which are apparent prior to bid opening or the closing time for receipt of initial proposals shall be filed prior to bid opening or the closing time for receipt of initial proposals. Unless the time limit for receiving the protest is extended for good cause, a protest to the contracting activity which is received after the time limit will not be considered. When a timely protest is filed only with the contracting activity, the contracting officer shall take prompt action towards resolution after consulting with the AGC, and notify the protestor in writing of the action taken.

(b) When a protest is filed only with the contracting activity before award, an award shall not be made until the matter is resolved unless the head of the contracting office makes the determination prescribed in FAR 33.103(a).

(c) When a protest is filed only with the contracting activity after award, the contracting officer need not notify the contractor if the protest can be promptly resolved. If it appears likely that the award may be invalidated or that a protest will be filed with the GAO or the GSBCA, the contracting officer should promptly notify the contractor in writing and consider suspending contract performance.

1333.104 Protests to GAO.

(a)(1) *General.* A protestor shall furnish a copy of its complete protest to the contracting officer designated in the solicitation and a copy of its complete protest to the Contract Law Division of the Office of the Assistant General Counsel for Finance and Litigation, no later than one day after the protest is filed with the GAO. The envelope containing the complete protest shall be clearly marked "GAO Protest".

(2) The GAO report shall be assembled and organized by the contracting office in accordance with rule 4(d) of the GSBCA Rules of Procedure (48 CFR Part 6101) except where rule 4(d) may conflict with GAO procedures.

(3) The contracting officer shall give the notice required in FAR 33.104(a)(3) (GAO 4 CFR 21.3).

(4)(i) The contracting officer shall submit a draft index of the GAO report to the Contract Law Division of the Office of the Assistant General Counsel for Finance and Litigation so that it is received within 10 work days after the contracting officer receives telephonic notice of the protest from the Contract Law Division.

(ii) The contracting officer shall submit the GAO report described in FAR 33.104(a)(2) to the Contract Law Division so that it is received within 13 work days after the contracting officer receives telephonic notice of the protest from GAO, or from the Contract Law Division, whichever notice is sooner. The GAO report shall be submitted with the appropriate number of copies for GAO, the AGC, the protestor, and all interested parties. The AGC will supplement the protest file with legal arguments to support the contracting officer's position and will submit the complete report to GAO and all interested parties within the time established by GAO.

(iii) The contracting officer shall submit a draft index of the GAO report to the Contract Law Division so that it is received within 4 work days after the contracting officer receives telephonic notice of a GAO determination to use the express option.

(iv) The contracting officer shall submit the GAO report to the Contract Law Division so that it is received within 6 work days after the contracting officer receives telephonic notice of a GAO determination to use the express option.

(b) *Protests before award.* When the contracting activity has received notice of a protest filed directly with GAO, a contract may not be awarded prior to a GAO decision on the protest, unless the Head of the Contracting Activity makes the written finding prescribed in FAR 33.104 (b)(1) after consulting with the AGC. The head of the contracting office shall notify the AGC when the written

BEST COPY AVAILABLE

VOL 51 ISS 78 AP 23 1986 UMI

finding has been executed so that the AGC can notify GAO. The contracting activity is not authorized to award the affected contract until the AGC has notified GAO of the written finding.

(c) *Protests after award.* When the contracting activity receives notice of a protest filed directly with GAO within 10 calendar days after contract award, the contracting officer shall immediately suspend performance pending a GAO decision on the protest or terminate the awarded contract, unless the Head of the Contracting Activity makes the written finding prescribed in FAR 33.104 (c)(2) after consulting with the AGC. The head of the contracting office shall notify the AGC when the written finding has been executed so that the AGC can notify GAO. The contracting activity is not authorized to continue contract performance until the AGC has notified GAO of the written finding.

(f) *Notice to GAO.* The Head of the Contracting Activity shall report to the Comptroller General within 60 days of receipt of the GAO's recommendation if the contracting activity has decided not to comply with the recommendation. The Head of the Contracting Activity shall consult with, and send a draft report to, the Procurement Executive and the AGC prior to sending the report to the Comptroller General.

1333.105 Protests to GSBCA.

(a)(1) A protestor shall furnish a copy of its complete protest to the contracting officer designated in the solicitation and a copy of its complete protest to the Contract Law Division of the Office of the Assistant General Counsel for Finance and Litigation, on the same day the protest is filed with the GSBCA. The envelope containing the complete protest shall be clearly marked "GSBCA Protest".

(2) The contracting officer shall give the notice required in FAR 33.105(a)(2) (GSBCA Rule 5d, 48 CFR Part 6101).

(b)(1) The GSBCA protest file shall be assembled and organized by the contracting office in accordance with rule 4(d) of the GSBCA Rules of Procedure (48 CFR Part 6101).

(2) The contracting officer shall submit a draft index of the GSBCA protest file to the Contract Law Division so that it is received within 5 works days after the protest is filed with the GSBCA.

(3) The contracting officer shall submit the GSBCA protest file described in FAR 33.105 (b) and (c) (GSBCA Rule 4, 48 CFR Part 6102) to the Contract Law Division so that it is received within 8 work days after the protest is filed with the GSBCA. The protest file shall be submitted with the appropriate number of copies for GSBCA, the AGC, the protestor, and all interested parties. The AGC will supplement the protest file with legal arguments to support the contracting officer's position and will submit the complete protest file to GSBCA and all interested parties within the time established by GSBCA.

(d) If suspension of procurement authority was requested, but not considered appropriate due to the circumstances in FAR 33.105(d)(1), the Head of the Contracting Activity shall execute the determination and findings prescribed by FAR 33.105 after consulting with the AGC, so that the GSBCA may decide the issue.

1333.106 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 1352.233-2, Service of Protest (JAN 1985) (Deviation FAR 52.233-2), in lieu of the provision at FAR 52.233-2 in solicitations for other than small purchases.

Subpart 1333.2—Disputes and Appeals

1333.209 Suspected fraudulent claims.

The contracting officer shall report suspected fraudulent claims or misrepresentations of fact to the Office of Inspector General in accordance with the Department Administrative Order on Inspector General Investigations (DAO 207-10).

1333.213 Obligation to continue performance.

(a) The contracting officer may use Alternate I to the clause at FAR 52.233-1, Disputes, only after the Head of the Contracting Activity has determined in writing that—

(1) Continued performance is necessary pending resolution of any claim arising under or relating to the contract because of unusual circumstances which make continued performance essential to the public health or welfare;

(2) Financing is or will be available for the continued performance; and

(3) The Government's interest is or will be properly secured.

20. A new Part 1349 is added to Subchapter G to read as follows:

PART 1349—TERMINATION OF CONTRACTS

Sec.
1349.001 Definitions.

Subpart 1349.4—Termination for Default

1349.402-7 Other damages.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10-5 and Department Administrative Order 208-2.

1349.001 Definitions.

(a) "Administrative costs", as used in this part, means those costs other than excess costs, incurred by the Government as a result of the contractor's default. Administrative costs include but are not limited to:

(1) Salaries and fringe benefits paid to Government employees who are assigned to a work activity (e.g., reprocurement activities) as a result of the default;

(2) Preaward survey expenses incurred in qualifying reprocurement contractors; and

(3) Costs incurred in printing and distributing the reprocurement solicitation.

(b) "Excess costs", as used in this part, means any costs, other than administrative costs, incurred by the Government in reprocuring similar supplies or services or performing similar services as a result of the contractor's default.

Subpart 1349.4—Termination for Default

1349.402-7 Other damages.

(a) The contracting officer may recover administrative costs under the default clause when it is in the best interest of the Government. A contracting officer's decision to recover administrative costs must balance the expected cost to the Government of documenting and supporting the assessment with the expected recovery amount.

(b) Documents used to support an assessment of administrative costs must clearly demonstrate that the added costs incurred by the Government were a direct result of the default.

(1) To support administrative labor costs, the contracting officer should keep a record of:

(i) Name, position, and organization of each employee performing work activities as a consequence of the default;

(ii) Dates of work and time spent by each employee on the repurchase;

(iii) Specific tasks performed (e.g., solicitation preparation, clerical);

(iv) Hourly rates of pay (straight time or overtime); and

(v) Applicable fringe benefits.

(2) Travel vouchers, invoices, printing requisitions, and other appropriate evidence of expenditures may be used to support other administrative costs (e.g., travel, per diem, printing and distribution of the repurchase contract).

(c) If assessment of administrative costs is considered appropriate after review by the AGC, the contracting officer shall make a written demand on the contractor for administrative costs. The written demand shall describe the basis for the assessment and the cost computations. The same demand letter may be used to assess administrative costs and any excess costs. If the contractor fails to make payment after receiving a contracting officer's final decision, the contracting officer shall follow the procedures in Subpart 1332.6 and FAR Subpart 32.6 to collect the amount owed the Government.

(d) The recovery of excess or administrative costs does not preclude the Government from exercising other rights or remedies which it may have by law or under the terminated contract.

PART 1352—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

21. Part 1352 is amended by adding a new Subpart 1352.2 as follows:

Subpart 1352.2—Texts of Provisions and Clauses

1352.219-1 Women-owned small business sources.

As prescribed in 1319.7003, insert the following provision:

Women-Owned Small Busines Sources (May 1985)

The contractor agrees to develop a list of qualified bidders that are women-owned small businesses. The Small Business Administration Procurement and Automated Source System (PASS) and the Minority Vendor Profile System (MVPS) may be used for this purpose. The contractor may contact the Department of Commerce, Office of Small and Disadvantaged Business Utilization (OSDBU) for assistance.

The Contractor shall provide opportunities for women-owned small businesses to compete for subcontracts by making information on forthcoming opportunities available.

Where the clause "Small Business and Small Disadvantaged Business Subcontracting Plan" is required in accordance with FAR 19.708(b), the contractor shall include qualified women-owned small businesses in the subcontracting plan.

(End of Provision)

1352.233-2 Service of protest.

As prescribed in 1333.106, insert the following provision:

Service of Protest (Jan. 1985) (Deviation FAR 52.233-2)

Protests, as defined in § 33.101 of the Federal Acquisition Regulation, shall be served on the Contracting Officer and the Contract Law Division of the Office of the Assistant General Counsel for Finance and Litigation by obtaining written and dated acknowledgement of receipt from the Contracting Officer or the head of the contracting office or designee and from the Contract Law Division of the Office of the Assistant General Counsel for Finance and Litigation located at the U.S. Department of Commerce, Herbert C. Hoover Building, Room H5882, 14th St. between Pennsylvania and Constitution Avenues, NW., Washington, DC 20230.

[Insert the address of the contracting officer or refer to the number of the block on the Standard Form 33 or 1442, etc., where the address of the contracting offfice is located.]

(End of Provision)

BILLING CODE 3810-17-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 192 and 195

[Amdts. 192-51 and 195-37; Docket No. PS-86]

Transportation of Gas or Hazardous Liquid by Pipeline; Updating Steel Line Pipe Specifications

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Final rule.

SUMMARY: These amendments update the existing incorporation by reference of the American Petroleum Institute (API) specifications for steel line pipe, API 5L, 5LS, and 5LX, by adopting the 1985 edition of API Specification 5L for gas and hazardous liquid pipelines. API 5L, 5LS, and 5LX have been consolidated into one specification by the API. Editions prior to the 1985 edition are out of print, although provisions are made for their appropriate use.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: William A. Gloe (202) 426-2082, regarding the content of this amendment, or the Dockets Branch (202) 426-3148, regarding copies of the amendment or other information in the docket file for this proceeding.

SUPPLEMENTARY INFORMATION:

Background

RSPA published a Notice of Proposed Rulemaking in the **Federal Register** on November 27, 1985 (50 FR 48809), proposing to adopt the 1985 edition of API Specification 5L for line pipe and providing the following information:

Parts 192 and 195 incorporate by reference the 1980 editions of API Specifications 5L (Line Pipe), 5LS (Spiral-Weld Line Pipe), and 5LX (High-Test Line Pipe). In Part 192, each specification is included among "listed specifications" which must be followed in pipe manufacture to qualify steel pipe for use in gas pipelines. In Part 195, the specifications serve to denote allowable design factors for steel pipe. Under both parts the specifications are used for determining yield strength when specified minimum yield strength is unknown.

These API specifications have been the most predominantly used specifications for steel line pipe in the industry and have been maintained separately to identify different grades and types of pipe as they were originally developed. In 1963, the three specifications were consolidated into one by the API, using the identification, API Specification 5L, and the title, "API Specification for Line Pipe." All grades and types of steel line pipe are now combined in the one specification. Since 1963, API 5L has been revised to incorporate editorial changes in the 1964 edition, and recently in the 1985 edition, to provide requirements for a higher strength X80 grade (80,000 psi specified minimum yield strength).

Comments on the Notice

All comments received by RSPA in response to the notice were favorable for adoption of the 1985 edition of API Specification 5L without exception or condition. Comments were received from the Battelle Columbus Laboratories, the Champlin Petroleum Company, the Interstate Natural Gas Association of America, the Michigan Department of Commerce, Mountain Fuel Resources, Inc., Mountain Fuel Supply Company, the Northern Natural Gas Company, the Ohio Gas Association, Pacific Gas and Electric, the Southern California Gas Company, Tennessee Gas Pipeline Company, Texas Eastern Pipeline Company, the Transcontinental Gas Pipeline Company, Washington Gas, and the API. Commentary had also previously been provided by Battelle and the Bethlehem Steel Corporation in advisory committee meetings.

In the notice, RSPA had invited comments on increasing the yield/tensile (Y/T) ratio for the X80 grade in the 1985 edition of API 5L, stating:

Besides the inclusion of the X80 grade, other changes in the 1985 edition are (1) an increase in the yield/tensile ratio from .90 for X70 to .93 for X80, and (2) allowing supplementary fracture toughness requirements to replace the yield/tensile ratio by agreement between the purchaser and the manufacturer for any grade of pipe. Interested persons having experience and background qualifications in this area are invited to comment on the safety impact of these changes if any is perceived. RSPA is particularly interested in receiving comments

VOL 51 ISS 78 AP 23 1986 UMI

on the .93 yield/tensile ratio for X80 steel line pipe because it represents a reduction, although small, of the margin between the maximum operating stress level (72 percent of the specified yield strength) and the ultimate tensile strength.

No commenter perceived a safety impact from the increase in the maximum Y/T ratio for the new X80 grade, although questions were raised with regard to the purpose and application of the ratio in the specification. The API states that it incorporated the Y/T ratio in the specification to limit the amount of cold expansion in the manufacture of lower strength grades of pipe, resulting in an increase in yield strength but no change in ultimate tensile strength. The API provided the following explanation:

When Y/T ratio first appeared in API 5LX in the early 1950's, the API Committee on Standardization of Tubular Goods believed that a limitation should be placed on the amount of cold expansion of pipe to enhance its yield strength. The method chosen to do this was a Y/T ratio limitation. The original Y/T ratio limitation was 0.85. When Grade X65 was first approved, a Y/T ratio of 0.90 was established for wall thicknesses greater than 0.375 inches. When Grade X70 was added, a Y/T ratio limitation was set at 0.90.

Tennessee Gas also commented on the history of the Y/T limitation, providing the following information.

The nature of steel is such that, as the strength increases, the ratio of yield strength to tensile strength becomes greater. Therefore, it was necessary for the Y/T ratio limitation to be increased for the higher strength grades. Otherwise, the pipe could not be manufactured and meet the specification.

In recent years, it has been necessary for pipe users to specify line pipe with high toughness properties. In order to provide pipe with greater toughness in an economical manner while maintaining acceptable weldability, pipe manufacturers developed specialized rolling procedures for the plate. These procedures resulted in pipe with a higher than normal Y/T ratio. Since one of the significant pipe properties affected by excessive cold expansion is fracture toughness, the Committee agreed that, for pipe that is made to a fracture toughness requirement, the Y/T ratio was unnecessary. The standards were then changed in 1981 to accommodate this problem.

It must be mentioned that none of this affected the specified minimum values for yield strength, tensile strength or ductility.

Also, the Michigan Department of Commerce stated that it supports the RSPA proposal, but expressed reservations as to whether X80 steel line pipe should be used for natural gas systems. The comment letter stated in part:

The reservations we have come from an article that appeared in the Wall Street Journal on January 16, 1984 regarding high strength steel. (See attached copy.) We request that RSPA and/or experts in metallurgy consider the contents of this article and determine if X80 line pipe has its place in the natural gas pipeline systems.

The article referred to discusses failures, such as the Alexander L. Kielland hotel platform in the North Sea, metal-in-the-body failures, hydrogen storage tank failures and problems with high strength steel vessel walls of nuclear reactors, as well as automobile and aircraft failures. RSPA has reviewed the article (noting that the cause for the Kielland platform failure was not related to the use of high strength steel) and has consulted with expert metallurgists who are either members of the API Tubular Goods Standardization Committee or are employed by the Committee. The problems discussed in the article should not arise in the operation of gas pipelines because of the additional inspection and testing requirements for the construction of gas pipelines (including hydrostatic testing) and because of the amount of testing and evaluation that is done before approval of a new steel pipe grade and inclusion of API Specification 5L. Failures of materials discussed are those that are related to improper practices or to the usage of nonstandard alloy or heat-treated steels that are not produced in accordance with the requirements of a stringent specification and that may be used in nonregulated applications. As a result, this final rule permits the use of X80 steel line pipe subject to meeting all of the requirements of API Specification 5L, including mandatory fracture toughness requirements. Persons having a further interest should specifically address the requirements of the specification.

Use of Other Editions

Three commenters pointed out a possible problem with regard to the removal of reference to the earlier editions of API 5LS and 5LX and suggested a change to § 192.7, Incorporation by reference. Because RSPA does not intend to prohibit the use of line pipe that may have been manufactured to formerly listed editions and stock-piled for later use, the language suggested to clarify § 192.7(c) is incorporated by this final rule as an editorial change.

Advisory Committee Review

Section 4(b) of the Natural Gas Pipeline Safety Act of 1968, as amended (49 U.S.C. 1673(b)), and section 204(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2003(b)) require that each proposed amendment to a safety standard established under these statutes be submitted to a 15-member advisory committee for its consideration. The Technical Pipeline Safety Standards Committee, composed of persons knowledgeable about transportation of gas by pipeline, considered the proposed amendments to §§ 192.55, 192.113, Appendix A, and Appendix B of Part 192 in a meeting on December 10, 1985, in Washington, D.C. The Technical Hazardous Liquid Pipeline Safety Standards Committee considered the proposed amendments to §§ 195.3 and 195.106 in a meeting on November 18, 1985, in Washington, D.C. Both committees found the proposed amendments to be technically feasible, reasonable, and practicable. A copy of the report of each committee is available in the docket for review.

Classification

This final rule is considered to be nonmajor under Executive Order 12291 and is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). The economic impact of this final rule has been found to be so minimal that further evaluation is unnecessary. The rule merely updates the incorporation by reference provisions of 49 CFR Parts 192 and 195 with regard to API specifications for line pipe.

Since the impact of this final rule is expected to be minimal, the agency certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 49 CFR Parts 192 and 195

Pipeline safety, Incorporation by reference, Line pipe.

PART 192—[AMENDED]

In view of the foregoing, RSPA amends 49 CFR Parts 192 and 195 as follows:

1. The authority citation for Part 192 continues to read as follows:

Authority: 49 U.S.C. 1672; 49 U.S.C. 1804; 49 CFR 1.53, and Appendix A of Part 1.

2. By revising § 192.7(c) to read:

§ 192.7 Incorporation by reference.

* * * * *

(c) The full titles for the publications incorporated by reference in this part are provided in Appendix A to this part. Numbers in parentheses indicate applicable editions. Earlier editions of documents listed or editions of documents formerly listed in previous editions of Appendix A may be used for materials and components

manufactured, designed, or installed in accordance with those earlier editions or earlier documents at the time they were listed. The user must refer to the appropriate previous edition of 49 CFR for a listing of the earlier listed editions or documents.

3. By revising § 192.55(e) to read:

§ 192.55 Steel pipe.

* * * * *

(e) New steel pipe that has been cold expanded must comply with the mandatory provisions of API Specification 5L.

§ 192.113 [Amended]

4. By amending § 192.113 to remove reference to API 5LX and API 5LS and related entries from the table of longitudinal joint factors.

5. By amending Appendix A to Part 192 to remove and reserve subdivisions II.A.(5) and II.A.(6) and by amending II.A.(4) by changing "(1980)" to "(1985)."

6. By amending subdivision I of Appendix B to Part 192 to remove "API 5LS-Steel pipe (1980)" and "API 5LX-Steel pipe (1980)" from the listed pipe specifications, and by removing the date "(1980)" following "API 5L-Steel pipe" and inserting in its place "(1985)."

7. By revising the introductory text of subdivision II.D. of Appendix B to Part 192 to read:

Appendix B—Qualification of Pipe

* * * * *

II. * * *

D. Tensile Properties. If the tensile properties of the pipe are not known, the minimum yield strength may be taken as 24,000 p.s.i. or less, or the tensile properties may be established by performing tensile tests as set forth in API Specification 5L. All test specimens shall be selected at random and the following number of tests must be performed:

* * * * *

PART 195—[AMENDED]

8. The authority citation of Part 195 continues to read as follows:

Authority: 49 U.S.C. 2002; 49 CFR 1.53, and Appendix A to Part 1.

9. By amending § 195.3 to remove paragraphs (c)(1)(iv) and (c)(1)(v) and by amending paragraph (c)(1)(iii) by changing "(1980)" to "(1985)".

10. By revising the introductory text of § 195.106(b) to read:

§ 195.106 Internal Design Pressure.

* * * * *

(b) The yield strength to be used in determining internal design pressure under paragraph (a) of this section is the specified minimum yield strength. If the specified minimum yield strength is not known, the yield strength is determined by performing all of the tensile tests of API Specification 5L on randomly selected test specimens with the following number of tests:

* * * * *

11. By amending § 195.106(e) to remove reference to API 5LX and API 5LS and related entries from the table of seam joint factors.

Issued in Washington, D.C., on April 17, 1986.

M. Cynthia Douglass,
Administrator, Research and Special Programs Administration.

BILLING CODE 4910-60-M

National Highway Traffic Safety Administration

49 CFR Part 533

[Docket No. FE-86-01, Notice 2]

Light Truck Average Fuel Economy Standards; Model Year 1988

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: This notice establishes new light truck average fuel economy standards for model year 1988. The standards are required to be established at the maximum feasible level under section 502(b) of the Motor Vehicle Information and Cost Savings Act. Based on its analysis, the agency is establishing a combined average fuel economy standard of 20.5 mpg for model year 1988 light trucks. Optional separate standards of 21.0 mpg for two-wheel drive light trucks and 19.5 mpg for four-wheel drive light trucks are also established.

DATES: The amendments made by this rule to the Code of Federal Regulations are effective May 23, 1986. The standards are applicable to the 1988 model year. Petitions for reconsideration must be submitted within 30 days of publication.

ADDRESS: Petitions for reconsideration should be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Shelton, Office of Market Incentives, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-755-9384).

SUPPLEMENTARY INFORMATION:

Background

On January 24, 1986, NHTSA published in the **Federal Register** (51 FR 3221) a notice of proposed rulemaking (NPRM) on the establishment of light truck average fuel economy standards for model years 1988 and 1989. The issuance of the standards for those years is required by section 502(b) of the Motor Vehicle Information and Cost Savings Act, 15 U.S.C. 2002(b). That provision requires the Secretary of Transportation to set light truck standards at the "maximum feasible average fuel economy level" for each model year after model year 1978. In determining the "maximum feasible" level, the Secretary is directed to consider four factors: technological feasibility, economic practicability, the effect of other Federal motor vehicle standards on fuel economy, and the need of Nation to conserve energy. See 15 U.S.C. 2002(e).

The agency's January 1986 NPRM proposed ranges of possible standards for all types of light trucks, with the 1988 combined standard to be set within the range of 20.5 mpg to 22.0 mpg, and the 1989 combined standard to be set within the range of 20.5 mpg to 22.5 mpg. As a compliance alternative to the combined standard, the agency also proposed separate standards for two- and four-wheel drive vehicles. The agency stated that in view of factual uncertainties, the setting of standards outside the proposed ranges was possible depending on the comments that might be submitted.

NHTSA received comments on the NPRM from General Motors, Ford, Chrysler, American Motors, Volkswagen, the National Automobile Dealers Association (NADA), the Center for Auto Safety (CFAS), numerous employees of light truck manufacturers, dealers, and private individuals. The issues raised by the commenters are discussed below.

Summary of Decision

At this time, the agency has concentrated its efforts on analyzing issues relating to the 1988 standard. Based on its analysis, NHTSA is establishing a combined average fuel economy standard of 20.5 mpg for model year 1988 light trucks. Optional separate standards of 21.0 mpg for two-wheel drive (2WD) light trucks and 19.5 mpg for four-wheel drive (4WD) light trucks are also established. Both the combined and optional separate standards are being set at the same levels as the MY 1987 light truck fuel economy standards.

VOL 51 ISS 78 AP 23 1986 UMI

A decision will be reached at a later date with respect to the proposed model year 1989 standards.

Manufacturer Capabilities of MY 1988

As part of its consideration of technological feasibility and economic practicability, the agency has evaluated the manufacturers' fuel economy capabilities for MY 1988. In making this evaluation, the agency has analyzed manufacturers' current projections and underlying product plans and has considered what, if any, additional actions the manufacturers could take to improve their fuel economy.

A. Manufacturer Projections

General Motors: As discussed in the NPRM, General Motors (GM) projected in March 1985 that it could achieve a CAFE level of 22.6 mpg in MY 1988. That projection was 0.2 mpg higher than that company's 22.4 mpg projection for MY 1987. While GM's March 1986 submission indicated that program risks (the details of which are subject to a claim of confidentiality) could result in a decline in its projected MY 1987 CAFE of up to 1.3 mpg, the NPRM stated that the agency did not believe that particular risks affected GM's projection for MY 1988.

The NPRM noted that GM had emphasized the following in its March 1985 submission:

> All estimates and future product plans contained in this submission are but a "snapshot in time". As we have stated on a number of occasions . . ., changes in the economic outlook, in fuel availability, in fuel prices or in consumer preference significantly affect GM's CAFE. The unpredictability of the market, the unknown effect of future light duty truck emission regulations and the unproven results of future combinations of technology cause CAFE projections to be . . . tentative . . .

In GM's February 1986 comment on the NPRM, the company lowered its CAFE projections for MY 1987 and MY 1988 to levels no higher than 20.5 mpg and 20.7 mpg, respectively.

One reason for the reduced MY 1987 projection is the realization of the program risk noted above, which accounts for 0.9 mpg of the decline. Additional reasons, together accounting for another 0.9 mpg of the decline, include the achievement of lower-than-anticipated fuel economy from certain programs, the purchase by consumers of more options than expected and certain changes to meet consumer demand for higher performance. A small portion of the reduction, 0.1 mpg, is associated with increased sales of certain larger engines and heavier trucks.

(The details of the changes are subject to a claim of confidentiality as confidential business information whose release could cause competitive harm. This is also true with respect to this notice's discussion of GM's MY 1988 projection and to the projections of other manufacturers.)

These changes, other than the program risks, also affect GM's MY 1988 projection, together accounting for a 1.0 mpg decline in that projection. The company also identified a number of other reasons for the reduced projection. The company no longer plans to make certain product changes which it once planned for that model year. Reasons for not making the changes relate to such concerns as durability, cost, results of market research, and the unavailability of certain equipment it planned to use. GM also now expects to include additional standard equipment on certain vehicles. These changes together account for an additional 0.6 mpg of the decline. GM also identified an apparent error in its earlier projection, accounting for 0.2 mpg of the decline, and cited miscellaneous reasons for the remaining 0.1 mpg loss.

GM's comment on the NPRM indicated that uncertainties such as the future price of fuel, small truck sales by foreign competitors and potential less-than-anticipated gains through the use of technology could result in its MY 1988 CAFE level being below its current projection of 20.7 mpg.

GM presented three possible scenarios to illustrate how factors such as these could influence its MY 1988 CAFE. The first scenario assumes constant rather than rising fuel prices and an economic outlook which reflects the former price pattern instead of the latter. According to GM, there would be a reduced incentive under this scenario for customers to buy smaller vehicles with more fuel efficient powertrains, and the company would experience a model and powertrain mix change estimated to cause a 0.3 mpg to 0.4 mpg decline in its MY 1988 CAFE projection. GM's second scenario develops that company's sensitivity to an unanticipated increase in import light truck sales above its current forecasts. According to that company, this could result in a 0.2 mpg to 0.3 mpg decline in its MY 1988 CAFE projection. GM's third scenario focuses on the introduction of emission controls which will cause heavy duty engines in trucks over 8500 pounds gross vehicle weight rating (GVWR) to be equipped with catalytic converters and use unleaded gasoline just as the trucks with lower GVWR's have been. This regulatory change creates the potential for a shift in consumer purchases from vehicles which are just over 8500 pounds GVWR and thus not subject to the fuel economy standards to vehicles which are between 7000 pounds and 8500 pounds GVWR and within the ambit of those standards. According to GM, this potential increase in the sales of the high GVWR light trucks could reduce its CAFE projection below 20.7 mpg by approximately 0.1 mpg.

Ford: As discussed in the NPRM, Ford projected in February 1985 that it could achieve a CAFE level of up to 22.5 mpg in MY 1988. This number was adjusted in the NPRM to 22.2 mpg, however, in light of later technical information provided by Ford. The primary reason for the reduction was that actual test data regarding some programs had indicated smaller fuel economy improvements than projected. The 22.2 mpg level was 1.2 mpg higher than Ford's 21.0 mpg projection for MY 1987. The NPRM noted, however, that 0.4 mpg of the increase was attributable to mix shifts toward more fuel-efficient vehicles, which the agency considered unlikely given the recent and expected continued declines in gasoline prices. Thus, if these mix shifts were deleted, the upper end projection for MY 1988 would be 21.8 mpg.

The NPRM noted that Ford had identified several risks to its MY 1988 projection. These included both technological risks, i.e., risks that technological programs might not achieve expected fuel economy gains, and mix shift risks, i.e., risks that the sales mix of Ford's light truck fleet might shift toward less fuel-efficient vehicles. Ford identified additional technological risks totaling 0.9 mpg and mix shift risks totalling 0.6 mpg, for a total risk of 1.5 mpg. However, the agency had already incorporated 0.7 mpg in technological and sales mix risks in the 21.8 mpg figure, reducing the remaining risk to 0.8 mpg. Thus, if the events creating these risks occurred simultaneously, the lower end figure for MY 1988 would have been 21.0 mpg as of the time of the NPRM.

In Ford's February 1986 comment on the NPRM, the company lowered its CAFE projections for both MY 1987 and MY 1988. For MY 1987, Ford projected a CAFE level of 20.2 mpg to 20.4 mpg. For MY 1988, it projected a CAFE level of 20.2 mpg to 20.6 mpg. In explaining its lower projections, Ford stated that ". . . recent development testing of new hardware and technology has yielded lower levels of fuel economy benefit than had been predicted earlier in the program."

In the final rule for MY 1987, published in the Federal Register (50 FR 40398) on October 3, 1985, the agency noted that Ford's then latest projection for that year was for a CAFE level of no higher than 21.0 mpg. Even that figure was subject to possible adverse mix shifts of 0.4 mpg and technological risks totalling 0.3 mpg. The decline in Ford's upper end projection from 21.0 mpg to 20.4 mpg is attributable to technological reasons, almost entirely related to certain programs not achieving expected fuel economy. Of particular significance is a drop in projected fuel economy for the electronic fuel injection program for Ford's 4.9 liter I–6 engine. A very small portion of the decline, less than 0.1 mpg, is related to small increases in weight and performance. Technological risk explains the difference in Ford's low and high end current CAFE projections for MY 1987.

The drop in Ford's MY 1988 CAFE from the 21.8 mpg value used in the NPRM to the company's current maximum projection of 20.6 mpg is also attributable to technological reasons. The most significant factor in the decline is the drop in projected fuel economy for the 4.9 liter fuel injection program, which carries over from MY 1987. In addition, Ford no longer plans to make a certain technological change due to durability concerns. A number of small factors, primarily engine calibration issues, explain the remaining decline. Some of the engine calibration changes are being made to ensure compliance with emissions standards.

Ford's 20.6 mpg projection is subject to both further technological risks and mix shift risks. The company identified technological risks of 0.3 mpg, which are related to certain programs possibly not achieving projected fuel economy levels. Ford also presented a mix risk scenario in which sales were higher for standard trucks and lower for compact trucks, resulting in a potential 0.3 mpg CAFE loss. Ford's 20.2 mpg to 20.6 mpg range is explained by these risks. The company also indicated that its CAFE could decline an additional 0.2 mpg as a further mix shift risk if gasoline prices remain below $1.00 per gallon on a sustained basis.

Chrysler: As discussed by the NPRM, Chrysler projected in August 1985 that it could achieve a CAFE level of 22.3 mpg in MY 1988. This projection was 1.1 mpg higher than that company's then latest MY 1987 projection. The NPRM stated that the bulk of the improvement would be attributable to technological improvements, especially transmission improvements. The NPRM noted that Chrysler also expected slight mix shifts toward smaller, more fuel-efficient trucks.

In March 1986, Chrysler provided new projections of 20.4 mpg to 21.3 mpg for MY 1987 and 21.5 mpg to 22.3 mpg for MY 1988. The company stated the following:

> There is considerable uncertainty associated with predicting any specific single level of annual CAFE for the 1987–89 time frame because we are in the process of revising our long range plan. For this reason, our new estimate for model years 1987–89 are presented as ranges to indicate the effects of various marketing alternatives available to Chrysler. The high ends of our ranges represent Chrysler's fuel economy capabilities, given our current product plan. These numbers are similar to those previously submitted to [NHTSA], although 1987 estimates are now much firmer due to actual test data being available. The low ends of the ranges represent the results of a new analysis in which it was assumed we would sell our products in a completely free market with no attempt on our part to force the sales mix to a desired fuel economy target.
>
> Both product plans contain the same fuel economy improving technologies and our new Dakota N-Body truck previously described to you. Projected CAFE differences are solely a result of mix shifts . . . . Should international economic conditions continue to change, even the low end of these estimates may ultimately require market forcing and/or product limiting actions by Chrysler.

The 22.3 mpg estimate at the high end of Chrysler's projection for MY 1988 is thus the same mix of vehicles and technology as discussed in the NPRM. The 21.5 mpg estimate at the low end of that company's range for MY 1988 is based on mix shifts toward larger, less fuel-efficient trucks.

American Motors: In February 1985, American Motors (AMC) projected 4WD CAFE levels of 18.5 mpg to 22.2 mpg for MY 1987 and 19.0 mpg to 22.7 mpg for MY 1988. The company projected 2WD CAFE levels of 21.5 mpg to 24.3 mpg for MY 1987 and 21.5 mpg to 24.2 mpg for MY 1988. These projections, for which no supporting data were provided, were the latest available to the agency at the time the NPRM was issued. Since AMC had projected in its mid-model year report for MY 1985 that its CAFE levels for that model year would be 20.3 mpg for its 4WD fleet and 23.5 mpg for its 2WD fleet, the agency placed greater credence in the upper ends of the company's CAFE projections for MY 1987–88. The NPRM noted, however, that AMC had recently advised NHTSA that it was revising its projections.

In AMC's February 1986 comment on the NPRM, the company projected that its 4WD CAFE levels would be 19.2 mpg for MY 1987 and 19.3 mpg for MY 1988. AMC projected that its 2WD CAFE levels would be 21.3 mpg for both MY 1987 and MY 1988. With 4WD vehicles accounting for most of AMC's light truck fleet, these figures result in composite CAFE levels of 19.7 mpg for MY 1987 and 19.9 mpg for MY 1988.

AMC provided the following explanation for the decline in its CAFE projections:

> . . . As has been widely reported in the press, our Jeep products have experienced record sales, which have substantially changed our model mix projections. Lower-than-anticipated fuel economy performance for some future models, coupled with some administrative changes to reduce product complexity are also expected to measureably alter the fleet average values. In addition, our 2- and 4-wheel drive pickup trucks, which had not yet been introduced last February, are now on the market, giving us some actual sales information for developing future model mix projections.

NHTSA's analysis of the data provided by AMC indicated that most of the reason for the decline in that company's CAFE projections was a drop-off in average fuel economy for each truckline and not sales mix changes between trucklines. For 2WD vehicles, the fuel economy declines within each truckline caused all of the drop in the projections for both MY 1987 and MY 1988. For 4WD vehicles, the drop in the MY 1987 projection was attributable to both a shift in sales mix and lower fuel economy levels for individual trucklines. The drop in the MY 1988 projection, however, was attributable entirely to lower fuel economy levels for individual trucklines.

AMC's comment on the NPRM stated that uncertainties related to lower gasoline prices and market trends toward greater performance could significantly lower its CAFE beyond its projections. AMC stated that there is a level of uncertainty with respect to engine mix in Jeep XJ vehicles and a possibility that sales of larger model "senior Jeeps" such as the Grand Wagoneer and J-series pick-up trucks will escalate. That company also stated that sales of its smaller Commanche pick-ups could decline as buyers "move up" to larger trucks.

Volkswagen: Volkswagen (VW) currently offers only one light truck model, the Vanagon compact bus. In February 1985, VW projected a CAFE level of 21 mpg through MY 1990. In VW's March 1986 comment on the NPRM, the company provided a MY 1988 CAFE projection of 19.1 mpg. VW stated that, in response to consumer demand, it has had to make performance improvements in the

VOL 51 ISS 78 APR 23 1986 UMI

Vanagon vehicles. The company also stated that it has introduced a new 4WD version of the Vanagon, to increase the utility of the vehicle to the consumer.

Other manufacturers: Foreign manufacturers other than VW compete only in the small vehicle portion of the light truck market and are therefore expected to achieve CAFE levels well above GM, Ford, and Chrysler, which offer full ranges of light truck models.

NHTSA is aware of one other domestic manufacturer, Lands Motor Company, whose light truck fuel economy capability is expected to be below that of GM, Ford, Chrysler and AMC. While that company did not submit comments on the NPRM, it has submitted a petition requesting that the agency establish a separate class of light truck for its Precedent model and provide a separate fuel economy standard for that class. (This issue and a similar one raised by Volkswagen are addressed below in the section entitled Setting the MY 1988 Standards.) Lands Motor Company has a production goal of 500 vehicles for MY 1988, with a CAFE level of 16.9 mpg.

B. Possible Additional Actions To Improve MY 1988 CAFE

The possible additional actions which manufacturers may be able to take to improve their MY 1988 CAFE above the levels which are currently projected may be divided into three categories: further technological changes to their product plans (beyond what they are already planning), increased marketing efforts, and product restrictions.

1. Further Technological Changes

Ford commented that it is unaware of any new technology which could be executed within available leadtime to improve its CAFE significantly. Chrysler commented that "(i)t is important to recognize that the leadtime required to implement improvements in engines, transmissions, aerodynamics and rolling resistance, is usually three to four years." That company argued that "as of today, it is too late in the engineering cycle to design, develop, and implement any further major technological CAFE improvements on 1988–89 model year light trucks."

In light of limited leadtime, the agency agrees that it is too late at this time to initiate further major technological improvements. Once a new design is established and tested as feasible for production, the leadtime necessary to design, tool, and test components such as new body sheet-metal subsystems for mass production is typically 22 to 29 months. Other potential major changes, such as those cited by Chrysler, often take longer. Leadtimes for new vehicles are typically at least three years.

However, there may be sufficient leadtime for manufacturers to make more minor technological changes, such as changes in axle ratios, refinement of engine calibrations, and changes in horsepower. In analyzing specific manufacturer capabilities below, the agency has considered whether manufacturers can make these types of changes.

2. Increased Marketing Efforts

As discussed in the NPRM, the agency believes that the ability to improve light truck CAFE by marketing efforts is relatively small. Light trucks are generally purchased for their work-performing capabilities. This is particularly true for the larger, less fuel-efficient light trucks. Since the small light trucks cannot meet the needs of many users, the manufacturers' abilities to use marketing efforts to encourage consumers to purchase smaller light trucks instead of larger light trucks are limited.

As a practical matter, marketing efforts to improve CAFE are largely limited to techniques which either make fuel-efficient vehicles less expensive or less fuel-efficient vehicles more expensive. Moreover, the ability of a manufacturer to increase sales of fuel-efficient light trucks depends in part on increasing its market share at the expense of competitors or pulling ahead its own sales from the future. The ability of domestic manufacturers to make such sales increases is also affected by the strong competition in that market from Japanese manufacturers. While Japanese manufacturers currently have an overall combined market share of about 20 percent of light trucks, their share for the smaller, more fuel-efficient pick-up trucks is about 50 percent.

The agency also notes that the improved fuel efficiency of all sizes of modern light trucks makes it more difficult to sell the small light trucks on the basis of significant operating cost savings. The reason for this is that there are diminishing returns in terms of fuel economy from purchasing smaller light trucks as the fuel efficiency of larger light trucks increases. The average fuel economy of large pickup trucks rose from 13.1 mpg in 1975 to 18.4 mpg in 1985, and the average fuel economy of large vans rose from 13.1 mpg to 17.5 mpg during this time period. The average fuel economy of small pickup trucks rose from 22.1 mpg to 28.2 mpg, and the average fuel economy of small vans rose from 20.7 mpg to 23.9 mpg. (SAE Paper No. 850550, "Light Duty Automotive Fuel Economy . . . Trends Thru 1985.") The fuel economy of large pickup trucks and vans has thus improved more than the fuel economy of small pickup trucks and vans, both in absolute and percentage terms.

Also, as gasoline prices have declined, there are diminishing returns from purchasing more fuel-efficient vehicles. For example, an improvement in fuel efficiency from 20 mpg to 25 mpg at a gasoline price of $1.50 per gallon would save a truck owner about $150.00 per year, assuming 10,000 miles driven annually. However, at a gasoline price of $1.00 per gallon, which more closely reflects today's market, the annual savings drop to about $100.00. The financial savings for smaller changes in fuel economy will, of course, be even lower. Hence, an economically rational consumer will not be as concerned with improving fuel efficiency as gasoline prices decline, making it more difficult for a manufacturer to market its most fuel-efficient vehicles.

A problem with pulling ahead sales is that the manufacturers' CAFE levels for subsequent years are reduced. For example, if a manufacturer increases its MY 1988 CAFE by pulling ahead sales of fuel-efficient light trucks from MY 1989, its MY 1989 CAFE will decrease, compared with the level it would have been in the absence of any pull-ahead sales attributable to marketing efforts. For this reason, a manufacturer cannot continually increase its CAFE simply by pulling ahead sales.

GM commented that "(i)t would be difficult, if not impossible, to predict any gains in CAFE through marketing incentivies based on present and future projections of consumer purchasing preferences, particulary in view of the uncertain future of world oil prices." Ford commented that "because of the number of competitive entries in the compact segment, potential countering actions by each competitor, and the price/cost advantage of imported models, . . . marketing actions cannot be relied upon to produce the desired effect."

Chrysler commented that "(t)ruck buyers are much more sensitive to functional needs in making their purchase decisions and in many cases they must consider their product selection as a longer term decision than a passenger car customer." That company stated that "(f)uel efficiency must often be downgraded in priority for many truck buyers because vehicle function is often paramount to the purchaser's livelihood." The National Automobile Dealers Association commented that because light trucks are most often purchased for capability and practicability reasons, a decision to buy a larger, more powerful vehicle cannot be changed by marketing incentives. That organization emphasized that there are no available alternatives at any price for a consumer that needs a heavier light truck.

Given all of these factors, the agency does not believe that the domestic manufacturers can significantly improve their CAFE levels by increasing marketing efforts.

3. Product Restrictions

As discussed in the NPRM, manufacturers could improve their CAFE by restricting their product offering, e.g., limiting or deleting particular larger light truck models or larger displacement engines. However, such product restrictions could have significant adverse economic impacts on the industry and the economy as a whole. In the final rule reducing the light truck fuel economy standard for MY 1985, the agency concluded that sales reductions to a manufacturer of 100,000 to 180,000 units, with resulting employment losses of 12,000 to 23,000, "go beyond the realm of 'economic practicability' as contemplated in the Act. . . ." 49 FR 41252, October 22, 1984. These impacts were believed by the agency to be a reasonable projection of the impacts to Ford of restricting the availability of larger trucks and engines in order to achieve a 1.5 mpg average fuel economy benefit.

In addition to the adverse impacts on the automotive industry, a wide range of businesses could be seriously affected to the extent they could not obtain the light trucks they need for business use. Also such product restrictions could run counter to the congressional intent that the CAFE program not unduly limit consumer choice. See H.R. Rep. No. 93-340, 94th Cong., 1st Sess. 87 (1975).

GM commented that CAFE standards that are set at too stringent a level could require full-line manufacturers to consider product restrictions as a last resort. GM stated that this would occur only after incentives had been applied and other reasonable steps taken, including the application of carryforward credits. That company stated that product restrictions would be harmful to the vehicle manufacturer, its employees and suppliers, to the consumer and the nation's economy. Ford commented that establishing truck fuel economy standards above manufacturers' capability could result in substantial sales decline, adverse employment effects, and a threat of substantial economic hardship. That company stated that should the MY 1988 standard be set above its capability, it may be forced to restrict the availability of certain V-8 engines in full-size light trucks, vans, Club Wagons and large utilities, and possibly delete some of its full-size products entirely. The company stated that market research data show that the vehicles that would most likely be restricted are used for a combination of commercial as well as personnel uses.

Given all of these considerations, NHTSA concludes that significant product restrictions should not be considered as part of manufacturers' capabilities to improve CAFE.

C. Manufacturer-Specific CAFE Capabilities

In analyzing manufacturer-specific CAFE capabilities, the agency has focused on GM, the largest domestic manufacturer and one of the two "least capable manufacturers" with a substantial share of 4WD sales; Ford, the "least capable manufacturer" with a substantial share of both combined light truck sales and 2WD sales; and AMC, the other "least capable manufacturer" with a substantial share of 4WD sales.

General Motors: As discussed above, while GM projected in March 1985 that it could achieve a CAFE level of 22.6 mpg for MY 1988, it now projects a CAFE level no higher than 20.7 mpg. The agency's analysis indicated that some of the reasons for the decline in GM's projected MY 1988 CAFE level were within that company's control. The company made a number of changes in its product plan which, in the agency's judgment, were not consistent with its long-range maximum fuel economy capability. Other reasons for the decline in GM's projected MY 1988 CAFE level were outside the company's control, including changing sales mixes of vehicles and engines due to consumer demand and achieving lower-than-anticipated gains from the introduction of new technologies.

Some of the product plan changes that were within GM's control canot be reversed within available leadtime. However, the agency's analysis has concluded that GM can still incorporate certain other of the product actions it identified in its March 1985 submission. The agency believes that GM has time to reverse its plans for increasing horsepower and that doing so would not have a significant effect on sales. While GM claimed that this action was necessary to compete in the marketplace, its supporting documentation did not provide a sufficient rationale for the agency to change its conclusion that reversing this action would not result in competitive or other economic harm. Achieving lower horsepower levels would have the effect of increasing GM's CAFE by an additional 0.2 mpg. In addition, GM indicated in its NPRM comments that two other planned actions (the details of which are subject to a claim of confidentiality) will reduce its CAFE by 0.2 mpg. However, the agency believes that those actions can be undertaken without adversely affecting CAFE.

NHTSA thus concludes that GM's MY 1988 CAFE could be as high as 21.1 mpg. However, the agency agrees with GM's comment that it faces a mix shift risk of 0.2 mpg to 0.3 mpg due to continued declines in gasoline prices and concomitant shifts toward larger trucks and engines for MY 1988. NHTSA is not including a risk associated with increased import light trucks in GM's capability. While manufacturers face a continuing challenge to meet possible increased light truck competition from abroad, the agency does not believe this issue, in the particular case of MY 1988 light truck sales, is likely to adversely affect domestic CAFE values. Moreover, the agency does not believe that mix shift risks and potential risks related to increased imports are additive, since lower fuel prices should enhance the domestic manufacturers' competitive positions. NHTSA believes that the issue should instead be recongized as a limitation on manufacturers' abilities to increase their market share of compact trucks beyond their present projections. NHTSA concludes that GM's MY 1988 fuel economy capability is 20.8 mpg to 21.1 mpg.

The agency has also evaluated GM's fuel economy capability for its 4WD fleet for MY 1988. The actions discussed above to raise GM's combined CAFE above its projection would also raise its 4WD CAFE. Taking these additional actions into account, NHTSA has concluded that GM's MY 1988 4WD capability could be as high as 19.5 mpg.

The agency has concluded that there is insufficient time for GM to introduce additional programs or technologies beyond those discussed above to improve its MY 1988 fuel economy level.

Ford: As discussed above, while at the time of the NPRM the agency believed that Ford might be able to achieve a MY 1988 CAFE level of as high as 21.8 mpg, the company now projects a CAFE level of 20.2 mpg to 20.8 mpg. The agency's analysis indicates that virtually all of the decline in Ford's CAFE was due to reasons beyond that company's control. The bulk of the decline in Ford's projected MY 1988 CAFE level is attributable to lower-than-anticipated fuel economy levels for the 4.9 liter fuel injection program. Given the aggressive fuel economy goals of the program when

VOL 51 ISS 78 APR 23 1986 UMI

it was approved, the agency does not consider it surprising that the goal has not been, and is not likely to be, fully attained. More stringent EPA emissions requirements also added to the difficulty of meeting the original fuel economy goal. The only significant change in Ford's MY 1986 product plan that reduced its projected CAFE was the deletion of a certain confidential technological change due to durability concerns. The agency concurs with Ford's concern about this particular issue.

The agency does not consider it likely that Ford can achieve the 20.8 mpg upper end of its range of MY 1988 CAFE values. The sales mix included in Ford's 20.8 mpg projection for MY 1988 is comparable to the mix Ford now expects for MY 1986. The agency believes that Ford's actual My 1988 sales mix could experience some further shift toward larger trucks and engines, should gasoline prices continue to decline. Thus, the agency agrees with Ford's assessment that it faces mix shift risks of 0.3 to 0.5 mpg. As discussed above, Ford, also faces technological risks of 0.3 mpg. Taking all of these risks into account, Ford's maximum achievable CAFE could be as low as 20.0 mpg. The agency believes it likely that some but not all of these risks will occur and concludes that Ford's MY 1988 capability does not exceed 20.5 mpg.

The agency has also evaluated Ford's 2WD and 4WD fuel economy capabilities. Since the company's projected 2WD CAFE is higher than those projected by Chrysler, GM and AMC, the agency did not focus on Ford in establishing the separate 2WD standard. Ford's 4WD projection is slightly lower than those of those projected by Chrysler, GM and AMC. With the consideration of the risks to Ford's projected 2WD CAFE, the agency concluded that company's 2WD CAFE does not exceed 21.0 mpg.

As with GM, NHTSA concludes that there is insufficient leadtime for Ford to introduce additional new programs or technologies to increase its MY 1988 CAFE.

AMC: AMC projects that its 4WD CAFE will decline from 20.0 mpg for MY 1986 to 19.3 mpg for MY 1988. In analyzing AMC's fuel economy capability, NHTSA looked closely at the changes that are projected to lower that company's CAFE. The agency has concluded that certain changes related to that company's efforts to reduce product complexity, in an effort to improve its profitability, could be reversed within available leadtime, thereby raising AMC's 4WD CAFE by 0.2 mpg. The agency has also concluded that AMC could take certain development and refinement actions that would raise its 4WD CAFE by 0.1 mpg to 0.2 mpg. The agency therefore concludes that AMC's MY 1988 4WD CAFE could be as high as 19.7 mpg.

NHTSA believes that AMC faces some mix shift risks, as well as risks that it may not be able to achieve all of the additional gains identified by the agency's analysis. Because the agency believes that some but not all of these risks will occur, it concludes that 19.5 mpg is that company's maximum 4WD fuel economy capability. The agency concludes that there is insufficient leadtime for AMC to introduce additional new programs or technologies to increase its MY 1988 CAFE.

Other Federal Standards

A. Safety Standards

As discussed by the NPRM, several recent and proposed changes in Federal safety requirements may affect CAFE. These include several amendments to NHTSA's lighting standard, which permit reductions in aerodynamic drag and slight weight savings; an amendment to the agency's occupant crash protection standard to promote the comfort and convenience of safety belts, and a proposal to extend the applicability of the agency's standard concerning steering control rearward displacement to additional light trucks.

The NPRM stated that while the agency has estimated that passenger car fuel economy could be increased by 0.4 to 0.9 percent by using aerodynamic headlamps, it is likely that the potential fuel economy improvement for light trucks by adoption of this feature is less. The reason for this is that the basic shape of light trucks is often dictated by load carrying capability or other functional attributes, thereby making it more difficult to reduce aerodynamic drag. Ford commented that it agrees with the agency's conclusion in the PRIA that the potential for CAFE improvement from vehicle aerodynamics is minimal due to the higher frontal area and drag coefficients inherent in light trucks compared with passenger cars. GM commented that aerodynamics headlamps will not have an impact on light truck CAFE in the 1986–89 timeframe. That company also noted that truck designs which included improved aerodynamics through the use of lower profile headlamps and more rounded sheet metal were not well received by the public in recent design clinics.

The NPRM cited the PRIA's conclusion that the effect of the comfort and convenience requirements on light truck CAFE will be negligible, since both the number of affected vehicles and weight impact are small. GM and Ford agreed that these requirements will not significantly affect CAFE.

With respect to the proposal to extend the applicability of the agency's standard on steering control rearward displacement, the NPRM cited the PRIA's similar conclusion that CARE would not be significantly affected since the number of affected vehicles is believed to be small and the required modifications minimal. GM disagreed with this conclusion, stating that the standard would primarily affect the older model lines in its fleet and that significant mass increases may result from required vehicle changes. That company stated that the magnitude of the mass increases associated with the vehicle changes has not been determined, but may be relatively large and could negatively affect CAFE. Ford commented that the Econoline is its only vehicle anticipated to have significant potential for weight increase due to this proposal. It stated that since baseline testing has not been completed, specific corrective actions have not been identified and the weight effect of these changes remains an open issue. NHTSA currently anticipates that any final rule concerning this proposal would have an effective date of September 1, 1988, or later and therefore should not impact manufacturers' MY 1988 CAFE levels, significantly, if at all. The agency will address these comments to the extent necessary in establishing the MY 1989 light truck fuel economy standards.

B. Environmental Standards

The NPRM cited several final and proposed changes in environmental standards which may affect CAFE.

The Environmental Protection Agency (EPA) published a proposal on July 1, 1985 (50 FR 27168) to provide test adjustment credits to light truck manufacturers for changes made in test procedures. Assuming that EPA's final rule is along the lines of the proposal, the rulemaking is not likely to have any significant effect on the manufacturers' projections discussed above.

The EPA requirement for control of diesel particulate matter becomes more stringent in MY 1987. NHTSA's NPRM noted that in the preamble to the final rule establishing MY 1987 light truck fuel economy standards, the agency concluded that any impact of the diesel particulate requirement on fuel economy would be very small, i.e., much less than 0.1 mpg. GM commented that the standard will have a negative impact on its CAFE but that the impact will be small since diesel sales have declined. According to that company, the maximum impact on its MY 1988 CAFE is estimated to be 0.05 mpg. AMC commented that more stringent standards are reducing diesel engines, not solely because of technological difficulties, but because with the low sales volume it would be impossible to recover the engineering costs associated with development of control systems. That company argued that the impact on CAFE of a more stringent emissions standards is the total removal of a fuel-efficient engine from the market, not just an incremental loss in fuel economy due to meeting more stringent standards. After analyzing the comments, the agency continues to believe that there will be little CAFE effect from the more stringent particulate standard since manufacturers do not plan on offering significant volumes of diesel engines that would require changes. The agency agrees with AMC that when volumes for an engine family drop below certain levels, it may become economically unattractive to spend the money necessary to certify compliance with the emissions standards. However, this is a business decision and not a direct result of the more stringent requriements to control emissions.

The EPA requirement for control of oxides of nitrogen (NO_x) becomes more stringent in MY 1988. As noted in NHTSA's NPRM, EPA estimates that with the use of three-way catalyst technology, there will no net loss in fuel efficiency and possibly even small gains. Moreover, since the EPA regulation provides for averaging compliance with the more stringent particulate standard and the oxides of nitrogen standard, manufacturers have greater flexibility to help ensure that there are little or no attendant fuel economy penalties.

GM commented that the recalibration required to meet the 1988 NO_x standard decreases its light truck CAFE 0.3 mpg to 0.35 mpg from the level attainable if the standard were not changed. The company stated that this reduction assumes across-the-board use of closed loop throttle body injection and three way catalysts for gasoline vehicles, and has been factored into its CAFE projections. Ford stated that it does not believe that EPA's overall assessment that there will be no net loss in fuel efficiency associated with the NO_x standards is applicable to its vehicles. Ford argued that paired fuel economy data from its MY 1985 Federal and California vehicles show a fuel economy penalty of 1.3 percent to 5.3 percent (0.4 to 1.2 mpg) between the versions having the same control technologies. (California vehicles were required to meet a MY 1985 NO_x standard that was more stringent than either the current or MY 1988 Federal standard.) According to that company, these data are consistent with its conclusion presented earlier to the agency that a light truck fuel economy penalty of 0.5 mpg may be encountered from the new Federal standard. Ford stated that a reassessment of its 1988 capabilities indicates a fuel economy penalty of about 0.2 mpg for its fleet, and that it still anticipates some degree of risk that the penalty is understated. That company also stated that it does not see any benefit in using the NO_x averaging concept adopted by EPA in light of the restrictions imposed by the conditional certificates of conformity and the engine family emission limits provisions. Ford stated that it had included a fuel economy penalty of 0.2 mpg in its MY 1988 projection.

NHTSA believes that GM's and Ford's arguments about a fuel economy penalty associated with the more stringent NO_x standards are consistent with EPA's position presented in the NPRM. That position is that with the use of three-way catalyst technology, the new NO_x standard will not cause any net loss in fuel efficiency, compared to the fuel efficiency levels under the current NO_x standard. There might even be small gains as a result of the new standard. The losses to which GM and Ford refer are actually "gains foregone" in the context of EPA's analysis, i.e., the loss is the difference in fuel economy capability of a closed loop three-way catalyst system calibrated to meet the current and new NO_x standards. Thus, by adopting three-way catalyst technology, the manufacturers avoid any losses in fuel economy associated with the new NO_x standards but do not achieve the gains that would be associated with such technology in the absence of the new standards.

AMC commented that other emission-related considerations are the increase in the useful life interval, limited maintenance intervals, and warranty liability. That company argued that because of these restrictions, manufacturers must reduce compliance/warranty risks by utilizing current technology with proven durability in the field. AMC stated that this has a direct effect on decisions to adopt newer fuel-efficient technology, especially for the lower volume manufacturers, until after the technology has proven its durability in the field for 11 years/120,000 miles. AMC did not provide any data concerning how these types of considerations affect its CAFE. As a general matter, NHTSA believes it would be inappropriate to assume that manufacturers need to wait 11 years before deciding to adopt new technology for purposes of emissions and/or fuel economy.

NHTSA is not aware of any plans on the part of EPA to promulgate noise regulations applicable to MY 1988 light trucks and therefore does not anticipate any attendent fuel economy penalties.

GM and Ford cited several other standards which could potentially affect CAFE after MY 1988. The agency will address those comments to the extent necessary in establishing the MY 1989 light truck fuel economy standards.

Need to Conserve Energy

Since 1975, when the Energy Policy and Conservation Act was passed, this nation's energy situation has changed significantly. For example, oil markets have been deregulated and the Strategic Petroleum Reserve has been established.

In 1977, the United States imported 46.4 percent of its oil needs and the value of imported crude oil and refined petroleum products was $67 billion (stated in 1984 dollars). While the import share of total petroleum demand declined after that year, the cost continued to rise to a 1980 peak level of $93.2 billion (1984 dollars). By 1985, the import share had declined to 28.7 percent at a cost of $48.3 billion.

Moreover, imports from OPEC sources have declined, from a high of 6.2 million barrels per day and 70.3 percent of all imports in 1977 to 1.8 billion barrels per day and 36.2 percent of imports in 1985. As imports have shifted to non-OPEC sources, such as Mexico, Canada and the United Kingdom and as this country builds up its strategic stockpile, the United State's petroleum market has become less vulnerable to the political instabilities of some OPEC countries, as compared to the situation in the mid-1970's.

Overall, the nation is much more energy independent than it was a decade ago, when Congress established that fuel economy standards program. From 1975 to 1984, energy efficiency in the economy improved by 21 percent (*1984 Annual Energy Review*, Energy Information Administration (EIA), U.S. Department of Energy, p. 47). Domestic oil production is higher than it was in 1975, total imports have dropped 18 percent since then, the value of the nation's imported oil bill has declined 35 percent in the last five years, and the amount of imported oil from OPEC has dropped by 71 percent since the peak of

VOL 51 ISS 78 AP 23 1986 UMI

1977. As a percentage share of GNP, the net oil import bill fell from 2.8 percent in 1980 to 1.2 percent in 1985. Future trends, as history has demonstrated, are subject to great uncertainty. However, the price of oil is now fully decontrolled, permitting consumers to make choices in response to market signals and allowing the market to adjust quickly to changing conditions. The Strategic Petroleum Reserve now contains approximately 500 million barrels that can be used to ameliorate the effect of supply interruptions. Thus, by any measure, the nation is in a stronger, and more efficient, energy position than it was a decade ago.

GM's comment on the NPRM stated that the effect of "the deregulation of the oil industry and the existence of the Strategic Petroleum Reserve as well as continued conservation and the development of alternative energy sources, such as methanol, has been to place the U.S. in a much more secure energy position. That commenter urged that it is "important that NHTSA take these developments into account in explaining the 'need of the nation to conserve energy.'

Chrysler commented that the need to conserve petroleum-based energy should remain a national priority, despite the transient period of falling fuel prices we are now experiencing. That company stated that there is every reason to expect that oil will again be in short supply, even within the lifetime of vehicles produced in the 1988–89 models years.

The Center for Auto Safety commented that the nation is facing a future of greater reliance on imported petroleum to fuel a vehicle fleet which includes an increasing share of light trucks. That organization argued that the Iraq-Iran war and other Middle East instabilities continue to threaten our national security, and cited a study by the National Academy of Sciences noting that the oil in the Strategic Petroleum Reserve will equal a decreasing number of days supply in future years.

Since the NPRM was prepared, world oil prices have dropped precipitously, from $28 to $30 a barrel late last year to close to $10 a barrel this year in some cases. While the fall in oil prices offers significant benefits to consumers and other users of oil, it may also result in decreased domestic production and increased reliance on foreign imports. The most recent available long term projection by EIA and Data Resources, Inc. (DRI), which are based on late 1985 data, indicate that domestic production could decline from a stable level of 10.8 MMB/D to about 8.2 MMB/D by 1995, and net imports could rise from 4.2 MMB/D to about 7.7 (EIA) to 9.1 (DRI) MMD/D by 1995. If this occurred, imports could reach 50 percent of U.S. petroleum use by 1995. As noted by the NPRM, however, experience has shown that future projections about petroleum supply, prices and imports are subject to great uncertainty.

MY 1988 light trucks meeting the 20.5 mpg standard established by this rule will be more fuel-efficient than the average vehicle in the current light truck fleet in service, thus making a positive contribution to petroleum conservation. Further, the agency believes that many of the changed conditions since 1975, including decontrol of oil, establishment of the Strategic Petroleum Reserve, and diversification of the sources of oil imports, ensure that the nation will remain in a strong energy position, even if imports should rise to earlier levels.

Determining the Maximum Feasible Average Fuel Economy Level

As discussed above, section 502(b) requires that light truck fuel economy standards be set at the maximum feasible average fuel economy level. In making this determination, the agency must consider the four factors of section 502(e): technological feasibility, economic practicability, the effect of other Federal motor vehicle standards on fuel economy, and the need of the nation to conserve energy.

A. Interpretation of "Feasible"

Based on dictionary definitions and judicial interpretations of similar language in other statutes, the agency has in the past interpreted "feasible" to refer to whether something is capable of being done. The agency has thus concluded in the past that a standard set at the maximum feasible average fuel economy level must: (1) Be capable of being done and (2) be at the highest level that is capable of being done, taking account of what manufacturers are able to do in light of available technology, economic practicability, how other Federal motor vehicle standards affect average fuel economy, and the need of the nation to conserve energy. In this rulemaking, as earlier rulemakings, NHTSA has considered and weighed all four statutory factors of section 502(e) and has not merely adopted a level based on what was technologically capable of being done.

B. Industrywide Considerations

The statute does not expressly state whether the concept of feasibility is to be determined on a manufacturer-by-manufacturer basis or on an industrywide basis. Legislative history may be used as an indication of congressional intent in resolving ambiguities in statutory language. The agency believes that the below-quoted language provides guidance on the meaning of "maximum feasible average fuel economy level."

The Conference Report to the 1975 Act (S. Rep. No. 94–516, 94th Cong., 1st Sess. 154–5 (1975)), states:

> Such determination [of maximum feasible average fuel economy level] should therefore take industrywide considerations into account. For example, a determination of maximum feasible average fuel economy should not be keyed to the single manufacturer which might have the most difficulty achieving a given level of average fuel economy. Rather, the Secretary must weigh the benefits to the nation of a higher average fuel economy standard against the difficulties of individual manufacturers. Such difficulties, however, should be given appropriate weight in setting the standard in light of the small number of domestic manufacturers that currently exist, and the possible implications for the national economy and for reduced competition association (sic) with a severe strain on any manufacturer. . . .

It is clear from the Conference Report that Congress did not intend that standards simply be set at the level of the least capable manufacturer. Rather, NHTSA must take industrywide considerations into account in determining the maximum feasible average fuel economy level. The focus, thus, must be on the manufacturers' collective ability to meet a standard, rather than any particular manufacturer's ability to meet it.

NHTSA has consistently taken the position that it has a responsibility to set light truck standards at a level that can be achieved by manufacturers whose vehicles constitute a substantial share of the market. See 49 FR 41251, October 22, 1984. The agency did set the MY 1982 light truck fuel economy standards at a level which it recognized might be above the maximum feasible fuel economy capability of Chrysler, based on the conclusion that the energy benefits associated with the higher standard would outweigh the harm to Chrysler (45 FR 20871, 20876; March 31, 1980). However, as the agency noted in deciding not to set the MY 1983–1985 light truck standards above Ford's level of capability, Chrysler had only 10–15 percent of the light truck domestic sales, while Ford had about 35 percent. (45 FR 81593, 81899); December 11, 1980).

C. Setting the MY 1988 Standards

Based on the analysis described above and on manufacturer projections, the agency concludes that

manufacturers can achieve the combined fuel economy levels in the following table:

Manufacturer	Approximate market share	Combined CAFE
Chrysler	13.0	21.5 mpg to 22.3 mpg.
GM	33.0	20.8 mpg to 21.1 mpg.
Ford	25.0	20.5 mpg.
AMC	5.0	19.9 mpg [1]
Volkswagen	0.5	19.1 mpg.
Lands	(*)	18.9 mpg.

[1] AMC's MY 1988 combined projection, unadjusted for the additional 4WD fuel-economy improving actions identified by NHTSA's analysis.
[*] Less than 0.01 percent.

As indicated above, foreign manufacturers other than Volkswagen only compete in the small vehicle portion of the light truck market and are therefore expected to achieve CAFE levels well above GM, Ford and Chrysler, which offer full ranges of light truck models.

NHTSA has concluded that among the manufacturers with a substantial share of combined light truck sales, Ford is the least capable manufacturer, with a maximum MY 1988 combined fuel economy capability no higher than 20.5 mpg. While AMC has a lower combined capability than Ford, due to AMC's model mix being heavy weighted toward 4WD vehicles, AMC does not have a substantial share of combined light truck sales. Further, the agency has again adopted the approach of setting optional separate 2WD and 4WD standards in light of model mixes that are heavily weighted toward 4WD vehicles. Since, as discussed below, AMC can meet both the 2WD and 4WD standards, it is unnecessary for it to be able to meet the combined standard.

NHTSA has concluded that 20.5 mpg is the maximum feasible combined standard for the 1988 model year. This level balances the potential petroleum savings associated with higher standards against the difficulties of individual manufacturers facing potentially higher standards.

The setting of maximum feasible fuel economy standards, based on consideration of the four required factors, is not a mere mathematical exercise but requires agency judgment. In setting the MY 1988 standards, the agency believes that the current plummeting of gasoline prices affects both the benefits of differing levels of average fuel economy standards and the difficulties of individual automobile manufacturers facing higher standards, i.e., both of the considerations NHTSA must balance in setting maximum feasible standards taking industrywide considerations into account. (See the language of the Conference Report quoted above.)

The main benefit from setting higher fuel economy standards is the potential additional petroleum savings which would result. Since rapidly falling gasoline prices result in reduced consumer demand for higher fuel economy, individual manufacturers whose maximum fuel economy capabilities may be above the level of the industrywide standard may have less incentive to achieve their maximum capabilities. This may explain GM's business decision to cancel some technological programs to improve fuel economy and Chrysler's current reconsideration of its product mix for future model years. There may, of course, be counterbalancing motivations for achieving higher fuel economy, such as a need or desire to earn credits for exceeding fuel economy standards.

The 20.5 mpg standard will be challenging for Ford, without causing significant economic distortion, and act as an incentive for that company to achieve its maximum fuel economy capability. Since Ford produces more than 25 percent of all light trucks subject to fuel economy standards, a standard set at its level can make a substantial contribution to petroleum conservation.

NHTSA believes there are serious questions whether a standard set at a level above Ford's capability would be consistent with the requirement that standards be set taking industrywide considerations into account, given that company's more than 25 percent market share. Even if the MY 1988 standard could be set at a level above Ford's capability, however, the agency believes that it clearly could not be set above both Ford's and GM's capabilities, since those companies' combined market share approaches 60 percent. As noted previously, the agency's estimate of GM's maximum capability for MY 1988 is 20.8 to 21.1 mpg. Thus, any higher standard than 20.5 mpg could not exceed that range.

The precise effects on petroleum conservation of a standard set at GM's projected capability are uncertain, although the effects can be bounded. The maximum theoretical additional energy savings associated with a standard set at that higher level can be determined by comparing hypothetical situations where GM and Ford would have combined average fuel economy levels of 21.0 mpg versus 20.5 mpg. Since most other manufacturers in the industry project MY 1988 CAFE above that of GM's capability, a standard set at 21.0 mpg would not be expected to affect the petroleum consumption of trucks manufactured by that part of the industry. The difference in total gasoline consumption between these two hypothetical situations, over the *lifetime* of the MY 1988 fleet, would be 419 million gallons. The maximum yearly impact on U.S. gasoline consumption would be 48.3 million gallons, or roughly five hundredths of one percent of total motor vehicle gasoline consumption.

The agency believes, however, that any actual gasoline savings associated with a higher standard would be much less. While GM would have an added incentive to achieve its maximum fuel economy capability, it is not clear in light of possible carryforward/carryback credits whether this would actually occur. Ford could not likely improve its CAFE other than by restricting sales of its larger light trucks and engines. To the extent that would-be purchasers of such vehicles and engines transferred their purchases to GM and Chrysler without those companies otherwise changing their product plans, there could be little or no effect on petroleum consumption.

While the agency recognizes that a higher standard could have some effect on gasoline consumption, it concludes that the effect would be much less than the theoretical maximum noted above and could be negligible.

A higher standard than 20.5 mpg could result in serious economic difficulties for Ford. NHTSA believes that the first potential fuel-efficiency enhancing actions that Ford or any other manufacturer would consider in response to a higher standard would primarily consist of marketing actions. For the reasons discussed earlier in this notice, however, the agency does not believe that marketing actions can be relied upon to significantly improve fuel economy. Assuming that such marketing actions were unsuccessful in whole or in part, Ford would likely have to engage in product restrictions, including limiting the sales of larger engines and/or vehicles to improve its fuel economy. Such product restrictions could result in adverse economic consequences for Ford, its employees, and the economy as a whole and unduly limit consumer choice, especially with regard to the load carrying needs of light truck purchasers.

The agency believes that the current situation of plummeting gasoline prices can create significant difficulties for individual manufacturers facing higher CAFE standards. As gasoline prices fall, consumer demand shifts toward larger vehicles and more power engines. While the magnitude of such shifts is limited to some extent by the fact that trucks are purchased largely with respect to work-

VOL 51 ISS 78 AP 23 1986 UMI

performing capabilities, lower gasoline prices can nonetheless result in mix shifts which lower manufacturers' CAFE. The large magnitude of the recent drop in gasoline prices makes it particularly difficult for manufacturers such as Ford to attempt to use marketing efforts to overcome such shifts in consumer demand.

Given Ford's more than 25 percent share of the light truck market, its capability has a significant effect on the level of the industry's capability and, therefore, on the level of the standards. The agency believes that for Ford, the 20.5 mpg standard balances the potentially serious adverse economic consequences associated with market and technological risks against that company's opportunities as the least capable manufacturer with a substantial share of sales. The agency concludes, in view of the statutory requirement to consider several factors, that the relatively small and uncertain energy savings associated with setting a standard above Ford's capability would not justify the economic harm to that company and the economy as a whole.

The agency recognizes that a 20.5 mpg standard is above the capabilities of Volkswagen and Lands Motor Company. Given the limited remaining leadtime for both companies and the limited financial resources of Lands, the agency does not believe that either company could change its product plans to meet the 20.5 mpg standard. In the absence of some type of alternative light truck standard which these companies could meet (an issue which is addressed further below), the companies would therefore be limited to two options: paying the statutory penalties associated with failure to comply with fuel economy standards (to the extent credits are not available) or drastic product actions which, in the case of Lands, could include ceasing production. While the agency appreciates these difficulties, it also concludes that establishment of a standard less than 20.5 mpg would reduce or eliminate the incentives for Ford to achieve its maximum capability and essentially render meaningless any impact the light truck CAFE program has on petroleum conservation. Given that Volkswagen and Lands Motor Company together represent less than one-half of one percent of the light truck market and in light of the above factors, NHTSA believes that it would be inappropriate to set industrywide standards based on these manufacturers' capabilities. In light of the statutory criteria, NHTSA concludes that the petroleum savings associated with the 20.5 mpg standard outweigh the difficulties to these two companies.ge

A combined standard of 20.5 mpg was supported by some manufacturers. Ford's comment on the NPRM recommended a MY 1988 standard of 20.5 mpg. Ford noted that although the level of its recommended standard is higher than the low end of its estimated capability when all potential risks are taken into account, it believes that the 20.5 mpg level represents a reasonable balancing of the risks and opportunities facing the company and, therefore, reflects its best estimate of Ford's maximum feasible average fuel economy capability. Chrysler stated that given the present circumstances and uncertainties, it would not object if the agency sees fit to carry over the present 1987 light truck CAFE standard of 20.5 mpg to MY 1988.

GM commented that due to such uncertainties as potential further mix shifts and increased imports, beyond what it is currently projecting, a 20.5 mpg standard might be too stringent. That company stated that if its current forecasts prove to be unduly optimistic, it would then have to either petition for a lower standard or resort to product restrictions with attendant layoffs and negative impact on the economy in order to remain in compliance.

NHTSA disagrees with this comment of GM. As discussed above, the agency has concluded that GM can take additional technological actions beyond what it is now planning to achieve a MY 1988 CAFE of 20.8 mpg to 21.1 mpg. If that company now believes that there is a significant question concerning whether its current product plan can meet the 20.5 mpg standard, it can take the additional technological actions to ensure compliance. Moreover, as GM stated elsewhere in its comment and as noted above, product restrictions would occur only after incentives and available credits had been applied.

The Center for Auto Safety (CFAS) urged that the MY 1988 standard be set at 23.5 mpg. That commenter's request appears to have been based on the manufacturers' projections cited in the NPRM, on its assertion that the manufacturers' projections are "considerably below true manufacturing potential," and on its contention that changing market conditions will help light truck fuel-economy rather than cause it to deteriorate, as the percentage sales of compact and more fuel-efficient light trucks is expected to increase. CFAS also argued that GM and Ford have had at least five years leadtime to introduce new models and technologies for the 1988 standard.

NHTSA disagrees with CFAS's arguments supporting a 23.5 mpg standard. The agency's analysis of changes in the manufacturers' projections is fully discussed above. CFAS did not support its allegation concerning manufacturers' projections being below true manufacturing potential, other than to reference a comment it has made in the agency's ongoing passenger automobile fuel economy rulemaking. The agency has analyzed the data underlying the manufacturers' light truck CAFE projections and has no reason to give this allegation any credence. While it is true that the percentage sales of compact light trucks is expected to increase, the agency agrees with a comment by Ford that this shift is unlikely to cause any significant increase in its CAFE because estimated sales of its products are heavily weighted toward the larger vehicles. As stated by that company, significantly increasing its share of the compact truck market beyond projections would be difficult, since the Japanese manufacturers have emphasized that market. Ford also pointed out that competitive reports indicate that competition is expected to intensify in that market as the Japanese work to strengthen their market share at the expense of the domestic manufacturers. NHTSA also disagrees with CFAS's argument that GM and Ford have had at least five years leadtime for the 1988 standard. Unlike the situation with passenger automobile fuel economy standards, where a 27.5 mpg standard is in place indefinitely unless it is amended by the agency, no light truck fuel economy standard is in place until it is established by the agency.

As in past years, the agency has decided to continue setting 2WD and 4WD standards as an alternative to the combined standard. Separate 2WD/4WD standards allow manufacturers greater flexibility in planning to meet CAFE standards and do not discriminate against firms with truck fleets heavily weighted toward 4WD models.

NHTSA has concluded that AMC and GM are the least capable manufacturers with substantial shares of 4WD light trucks, and has focused on these manufacturers' capabilities in establishing the separate 4WD standard. As discussed earlier in the notice, the agency concluded that 19.5 mpg is AMC's maximum 4WD fuel economy capability and that GM's 4WD fuel economy capability could be as high as 19.5 mpg. The final 4WD standard is being established at 19.5 mpg.

AMC has traditionally been the manufacturer primarily concerned about separate standards due to the high percentage of 4WD light trucks in its fleet. AMC requested in its comment that the 4WD standard be set at 19.0 mpg. NHTSA has concluded, however, that AMC can achieve a MY 1988 4WD CAFE of 19.5 mpg by making relatively minor changes in its product plan and thereby meet the 19.5 standard. While the agency recognizes that the 19.5 mpg standard will be challenging for AMC, it believes that it is appropriate under the statutory requirement for "maximum feasible" standards.

The agency notes that Chrysler has a lower 4WD fuel economy capability than GM, AMC, or Ford. Chrysler projects that its 4WD CAFE could be as low as 17.4 mpg. However, in 1985, Chrysler's share of the 4WD market was less than five percent. Thus, that company did not have a substantial share of 4WD light truck sales. Moreover, since Chrysler can meet the combined standard, it is unnecessary for it to be able to meet the separate standards.

NHTSA has concluded that Ford is the least capable manufacturer with a substantial share of 2WD light trucks, and has focused on that manufacturer's capabilities in establishing the separate 2WD standard. As discussed earlier in the notice, the agency concluded that Ford's maximum 2WD fuel economy capability is 21.0 mpg. The final 2WD standard is being set at 21.0 mpg.

AMC requested in its comment that the 2WD standard be set at 20.3 mpg. The company projects its MY 1988 2WD CAFE at 21.3 mpg. NHTSA has concluded, based on its analysis of that company's projection, underlying product plan, and expected market conditions, that AMC can meet the 2WD separate standard of 21.0 mpg.

Volkswagen suggested as an alternative to establishing a combined standard within its capability that the agency consider alternate special consideration for limited product line truck manufacturers. In establishing the MY 1980–81 light truck CAFE standards, the agency did establish a separate standard in light of International Harvester's (IH) limited product line. See 43 FR 11995, March 23, 1978. The agency noted that IH had unique problems given its limited sales volume, restricted product line, the fact that its engines were derivatives of medium duty truck (above 10,000 pounds GVWR) engines, and the fact it did not have experience with state-of-the-art emission control technology which the other manufacturers had obtained in the passenger automobile market. The agency emphasized, however, that the separate class was being established for only two model years' duration, concluding that IH should be able to achieve levels of fuel efficiency in line with other manufacturers within that time period either through purchasing engines from outside sources or by making improvements to current engines. The agency does not believe that Volkswagen's situation is similar to that of IH. While IH's difficulties were related to being newly subject to the fuel economy program, Volkswagen's CAFE difficulties are not. Moreover, establishing a separate standard for Volkswagen would be outside the scope of notice of the NPRM.

The agency will address Lands Motor Company's petition requesting a separate fuel economy standard for its Precedent model in a separate notice.

Impact Analyses

1. Executive Order 12291

The agency considered the economic implications of the fuel economy standards established by this rule and determined that the rule is major within the meaning of Executive Order 12291 and significant within the meaning of the Department's regulatory procedures. The agency believes that many of the changed conditions since 1975, including decontrol of oil, establishment of the Strategic Petroleum Reserve, and diversification of the sources of oil imports, ensure that the nation will remain in a strong energy position, even if imports should rise to earlier levels. The agency believes also that the standards established by this notice can be met without significant economic distortion. The agency's detailed analysis of the economic effects is set forth in its regulatory impact analysis. The contents of that analysis are generally described in the above sections of this preamble.

2. Environmental Impacts

The agency has analyzed the potential environmental impacts of these light truck fuel economy standards in accordance with the requirements of the National Environmental Policy Act of 1969 and concluded that the rule it is adopting will not significantly affect the human environment. An Environmental Assessment (EA) was prepared and placed in the public docket in conjunction with the NPRM and made available to the public for comment. The EA analyzed the potential environmental effects for the range of standards proposed by the NPRM. The EA stated that the agency expected to make a finding that the rulemaking would not have a significant impact on the human environment. No comments were received on the EA.

As indicated in the EA, any fuel savings that might have resulted from the establishment of standards at the high end of the proposed range would have been minimal. With respect to any possible effects on air pollution, the agency notes that a recent letter to NHTSA from the Environmental Protection Agency (EPA), in another fuel economy rulemaking, discussed a number of considerations concerning why little change in air quality can be expected from different levels of fuel economy standards. (Docket No. FE–85–01, Notice 2, Item 121.) Among other things, the letter indicated that exhaust emissions will not change because EPA mobile source standards for oxides of nitrogen (NO_x), carbon monoxide (CO), and hydrocarbons (HC) are expressed in grams/mile. While the EPA mobile source standard for lead (Pb) is expressed in grams per gallons of gasoline, compliance with that standard would not be affected by a change in fuel consumption because MY 1988 light trucks must use unleaded fuel. NHTSA concludes that little change in air quality is expected as a result of the adoption of these regulations.

Based on all available information, including the analysis presented in the EA, the agency has determined that this rulemaking action will not have a significant effect upon the environment. The agency is therefore making a finding of no significant impact (FONSI).

3. Impacts on Small Entities

Pursuant to the Regulatory Flexibility Act, the agency has considered the impact this rulemaking action will have on small entities. I certify that this action will not have a significant economic impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis is not required for this action. Only one light truck manufacturer, Lands Motor Company, might be classed as a "small business" under the Regulatory Flexibility Act. In the case of small businesses, organizations and governmental units which purchase light trucks, those entities which purchase a 1988 truck might achieve a gain in fuel economy as compared to a situation in which there was no standard. The cost impact of this rulemaking action is not

VOL 51 ISS 78 AP 23 1986 UMI

high enough to reduce the ability of these groups to purchase new vehicles.

Department of Energy Review

In accordance with section 502(j) of the Act, the agency has submitted this rule to the Department of Energy for review. The Department made no unaccommodated comments.

Energy conservation, Gasoline, Imports, Motor vehicles.

PART 533—[AMENDED]

In consideration of the foregoing, 49 CFR Part 533 is amended as follows:

1. The authority citation for Part 533 continues to read as follows:

Authority: 49 U.S.C. 1657; 15 U.S.C. 2002; delegation of authority at 49 CFR 1.50.

2. Table II in § 533.5(a) is revised to read as follows:

§ 533.5 Requirements.

(a) * * *

TABLE II

Model year	Combined standard		2-wheel drive light trucks		4-wheel drive light trucks	
	Captive imports	Others	Captive imports	Others	Captive imports	Others
1982	17.5	17.5	18.0	18.0	16.0	16.0
1983	19.0	19.0	19.5	19.5	17.5	17.5
1984	20.0	20.0	20.3	20.3	18.5	18.5
1985	19.5	19.5	19.7	19.7	18.9	18.9
1986	20.0	20.0	20.5	20.5	19.5	19.5
1987	20.5	20.5	21.0	21.0	19.5	19.5
1988	20.6	20.5	21.0	21.0	19.5	19.5

* * * * *

3. Section 533.5(d) is revised to read as follows:

* * * * *

(d) For model years 1982–88, each manufacturer may:

(1) Combine its 2- and 4-wheel drive light trucks (segregating captive import and other light trucks) and comply with the combined average fuel economy standard specified in paragraph (a) of this section; or

(2) Comply separately with the 2-wheel drive standards and the 4-wheel drive standards (segregating captive import and other light trucks) specified in paragraph (a) of this section.

Issued on April 17, 1986.

Diane K. Steed,

Administrator.

BILLING CODE 4910-59-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 671

[Docket No. 60060–5182]

Tanner Crab off Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of season closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the *Chionoecetes opilio* Tanner crab fishery in the Southeastern Subdistrict of the Bering Sea District of Registration Area J (Westward) must be closed in order to protect all Tanner crab stocks. The Secretary of Commerce therefore issues this notice closing fishing for all Tanner crabs by vessels of the United States in the Southeastern subdistrict. This action is intended as a management measure to conserve Tanner crab stocks.

DATES: This notice is effective at noon, Alaska Standard Time (AST), April 21, 1986. Public comments on this notice of closure are invited until May 6, 1986.

ADDRESSES: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data on which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m., AST, weekdays) at the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Raymond E. Baglin (Fishery Management Biologist, NMFS) 907–586–7230.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act), provides for in season adjustments of area openings and closures. Implementing regulations at § 671.27(b) specify that notices of these adjustments will be issued by the Secretary of Commerce under criteria set out in that section.

Section 671.26(f) establishes six district within Registration Area J to independently manage individual Tanner crab stocks. One of these districts is the Bering Sea District, which is further divided into three subdistricts. The regularly scheduled 1986 fishing season for *C. opilio* in the Southeastern Subdistrict began on January 15, 1986 (50 FR 47549, November 19, 1985). A large portion of this subdistrict, south of 58° N. latitude and east of 164° W., longitude, was closed by emergency rule (51 FR 12857, April 16, 1986) to all fishing for Tanner and king crabs because of the depressed condition of *C. bairdi* Tanner crab and red king crab stocks.

Reasons for this closure follows:

As of April 7, approximately 46 vessels have delivered about 7.4 million pounds of *C. opilio* Tanner crab from the Southeastern Subdistrict. The catch per unit of effort (CPUE) fluctuated from 152 to 247 *C. opilio* Tanner crabs per pot during January. Beginning in February, effort remained constant enough to document trends in CPUE. The CPUE declined from 169 crabs per pot during the week ending February 9 to 66 crabs per pot during the week ending April 6. Currently, fishing vessels are transferring into the Pribilof Subdistrict because catches in the Southeastern Subdistrict are low. The drastic decline in CPUE indicates a rapid unanticipated depletion of the available *C. opilio* Tanner crab stock.

Based on the rapidly declining CPUE in the fishery, the Regional Director has determined that the condition of the *C. opilio* Tanner crab stocks in the Southeastern Subdistrict is substantially different from the condition anticipated on November 1, the beginning of the fishing year, and that this difference reasonably supports the need to protect the *C. opilio* Tanner crab stocks. The Southeastern Subdistrict, as defined in § 671.26(f)(1)(vi)(A), is closed by this notice until noon, Alaska Daylight Time, August 1, 1986, at which time the closure of this subdistrict prescribed in Table 1 of § 671.21(a) will begin.

This closure will become effective after this notice is filed for public inspection with the Office of the Federal Register and the closure is publicized for 48 hours through procedures of the Alaska Department of Fish and Game. Public comments on this notice of closure may be submitted to the Regional Director at the address above. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the **Federal Register**, either confirming this notice's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the Southeastern Subdistrict of Registration Area J (Westward) will be subject to damage unless this closure takes effect promptly. NOAA therefore finds for good cause that advance opportunity for public comment on this notice is contrary to the public interest and that no delay should occur in its effective date.

This action is taken under 50 CFR Part 671 and complies with Executive Order 12291.

BILLING CODE 3510-22-M

50 CFR Part 672

[Docket No. 51180–5180]

Fishery Conservation and Management Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region NMFS (Regional Director), has determined that the share of the sablefish optimum yield (OY) allocated to hook-and-line gear in the Southeast Outside District and in the East Yakutat District of the Eastern Regulatory Area of the Gulf of Alaska will be achieved on April 17, 1986. A closure of the fishery for sablefish by hook-and-line gear is necessary to limit the harvest of sablefish by hook-and-line gear to the 95 percent of the OY that is permissible by Federal law in these districts. This closure is a management measure intended to allocate the sablefish resource between hook-and-line and trawl gear in the Southeast Outside and East Yakutat districts as required by Amendment 14 to the Fishery Management Plan for the Groundfish Fishery of the Gulf of Alaska (FMP).

DATES: This notice is effective at noon, Alaska Standard Time (AST), April 17, 1986, until midnight, AST, December 31, 1986. Public comments are invited on this closure until May 2, 1986.

ADDRESS: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802. During the 15-day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m., Monday through Friday) at the Alaska Regional Office, NMFS, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Management Biologist, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: The FMP, which governs the groundfish fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act (Magnuson Act) provides for inseason adjustments of fishing seasons and areas. Regulations at § 672.22(a) specify that these adjustments will be made by the Secretary of Commerce under procedures set out in that section.

Section 672.2 defines three regulatory areas in the Gulf of Alaska. One of these is the Eastern Regulatory Area, which is further divided into three regulatory districts for the purpose of better managing sablefish: West Yakutat, East Yakutat, and Southeast Outside. Current regulations at § 672.20, Table 1, specify the OYs in the Southeast Outside and East Yakutat Districts to be 470 to 1,435 mt and 850 to 1,135 mt, respectively. However, the North Pacific Fishery Management Council (Council), at its December 10–14, 1985, meeting, determined that the OYs in these two districts should be 2,346 mt and 1,104 mt, respectively. The Council recommended that NOAA promulgate an emergency rule under Magnuson Act section 305(e), to implement these new OYs, pending amendment of the FMP. The Alaska Region has submitted this emergency rule for review by the Secretary of Commerce; it is expected to be promulgated within the next month.

Section 672.24(b)(1) of the regulations allows directed fishing, defined at § 672.2, for sablefish in the Eastern Area with hook-and-line gear only to 95 percent of its OY. Fishing for other groundfish species with trawl gear is allowed until trawl vessels have harvested 5 percent of the sablefish OY as a bycatch. Thus, 95 percent and 5 percent of the new sablefish OYs are allocated to vessels using hook-and-line gear and trawl vessels, respectively.

In determining the 1986 sablefish shares between hook-and-line and trawl gear in the Southeast Outside and East Yakutat Districts under the sablefish allocation formula provided by Amendment 14, the NMFS Alaska Region is using 95 percent and 5 percent of the recommended 1986 OYs, respectively. The allocations, therefore, between hook-and-line and trawl gear are 2,229 mt and 117 mt in the Southeast Outside District; and 1,049 mt and 55 mt in the East Yakutat District.

An estimated 150 hook-and-line vessels have conducted a directed fishery for sablefish during the fishing season, which began on April 1, 1986. Except for a week of poor weather, many vessels have experienced good catches. On average, each of the vessels is harvesting an estimated 1.3 metric tons of sablefish per day. At the current catch rate, the hook-and-line shares of the OYs will be fully harvested on April 17, 1986, and further directed sablefish fishing with hook-and-line gear after noon on that date is prohibited. This closure is a management measure intended to implement the allocation of the sablefish resource as provided for by Amendment 14 to the FMP. Sablefish landings by hook-and-line vessels west of the East Yakutat District, i.e., west of 140° W. longitude, are expected to increase rapidly as part of the fleet moves west following notice of this closure.

One of the regulations implementing Amendment 14—§ 672.24(b)—requires the NMFS Regional Director to close all fishing for groundfish with a gear type in an area when the sablefish share allocated by Amendment 14 to that gear type in that area has been taken. At its January 15–17, 1986 meeting, however, the Council recommended that NOAA amend this regulation to allow the Regional Director to prohibit directed fishing for sablefish by that gear type in that area and thus leave a bycatch amount to support other directed groundfish fisheries. Fishing for other groundfish species could thus continue. If the sablefish share was nevertheless harvested before the end of that year, the Regional Director could allow fishing by that gear in that area for other groundfish species to continue, with sablefish being treated as a prohibited species, providing that overfishing of sablefish would not result. The Alaska Region has also submitted an emergency rule that would amend the regulation cited above to implement the Council's recommendation.

The requirement of § 672.20(b) that all groundfish fishing by a gear type in an area be closed when its sablefish allocation for that area has been taken conflicts with Amemdment 14 as interpreted by the Council and NMFS. The Regional Director is, therefore, not obliged even before promulgation of the new rule to impose such a closure, provided that continued fishing by that gear type will not cause overfishing of sablefish. The Regional Director has reviewed the bycatches of sablefish that might be taken in other directed

VOL 51 ISS 78 AP 23 1986 UMI

groundfish hook-and-line fisheries in the Southeast Outside and East Yakutat Districts and finds that continued fishing for other groundfish species will not cause overfishing of sablefish.

This closure will be effective when this notice is filed for public inspection with the Office of the Federal Register and after it has been publicized for 48 hours through procedures of the Alaska Department of Fish and Game under § 672.22(a). Public comments on this notice of closure may be submitted to the Regional Director at the address above for 15 days following its effective date. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the **Federal Register**, either confirming this closure's continued effect, modifying it, or rescinding it.

Other Matters

Allocation of the sablefish resource between hook-and-line and trawl gear in the Southeast Outside and East Yakutat Districts, as required by Amendment 14, and the continued health of that resource will be jeopardized unless this closure takes effect promptly. NOAA therefore finds for good cause that advance opportunity for comment on this notice is contrary to the public interest and that its effective date should not be delayed.

This action is taken under §§ 672.22 and 672.24 and is taken in compliance with Executive Order 12291.

BILLING 3510-22-M

Proposed Rules

Federal Register
Vol. 51, No. 78
Wednesday, April 23, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 911

Limes Grown in Florida; Proposed Amendment to Container Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would permit lime handlers to make export shipments in 2.5 kilogram containers and eliminate five containers no longer used by the industry. The addition of the 2.5 kilogram container will allow U.S. shippers to compete more favorably in certain European markets. Elimination of the five containers currently authorized but no longer used will bring the container requirements into conformity with current handler packing practices.

DATE: Comments due May 23, 1986.

ADDRESS: Comments should be sent to: Docket Clerk, F&V, AMS, Room 2069–S, U.S. Department of Agriculture, Washington, DC 20250. Two copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone (202) 447–5697.

SUPPLEMENTARY INFORMATION: This proposed rule has been reviewed under Departmental Regulation 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules proposed thereunder, are unique in that they are brought about through the group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximtely 26 handlers of limes will be subject to regulation under the Florida Lime Marketing Order during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the season impose some costs on affected handlers, the added burden imposed on small entities by this amendment, if present at all, is not significant.

The proposed container requirement changes are pursuant to the marketing agreement and Marketing Order No. 911 regulating the handling of limes grown in Florida. The program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Lime Administrative Committee, established under the program, is responsible for its local administration.

At its public meeting on February 12, 1986, the committee recommended adding a new container to be used for export shipments. The new container would have inside dimensions of 7⅛ by 12 by 4⅛ inches and contain 2.5 kilograms (approximately 5.5 pounds) of limes. Foreign shippers, notably those from Brazil, tend to adjust container sizes as the market price of limes changes. This can place U.S. shippers at a competitive disadvantage if they cannot use a container similar to those used by other shippers. The addition of the 2.5 kilogram container will make it easier for U.S. exporters to compete in certain European markets with shippers from other lime producing areas using the 2.5 kilogram container.

The committee also recommended eliminating five containers from the container regulation. These containers are of larger capacity, ranging from 38 to 42 pounds and 20 to 22 pounds of limes. The industry has been moving toward smaller containers over the years, and the ones to be eliminated are no longer used. The proposed change would lessen the number of large containers authorized and bring the container requirements into conformity with industry operating practices.

List of Subjects in 7 CFR Part 911

Marketing agreements and orders, Limes, Florida.

PART 911—LIMES GROWN IN FLORIDA

1. The authority citation for 7 CFR Part 911 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 911.329 (47 FR 22073, May 21, 1982; 47 FR 29647, July 8, 1982; and 47 FR 45865, October 14, 1982) is hereby amended by removing (a)(2)(i) through (a)(2)(v), adding a new (a)(2)(i), and redesignating (a)(2)(iv) through (a)(2)(xii) as (a)(2)(ii) through (a)(2)(viii), respectively, as follows:

§ 911.329 Lime regulation 27.

(a) * * *

(2) * * *

(i) Containers with inside dimensions of 7⅛ by 12 by 4⅛ inches; except that any such containier shall contain not less than 5 nor more than 6 pounds net weight of limes.

* * * * *

Dated: April 17, 1986.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 73

[Airspace Docket No. 86–AWA–10]

Proposed Subdivision of R–6412, Camp Williams, UT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to subdivide Restricted Area R–6412, Camp Williams, UT, into R–6412A and R–6412B with changes in altitude

VOL 51 ISS 78 APR 23 1986 UMI

structures and times of use. This action would provide the necessary airspace for the live-fire training of weaons by the Department of Army. This airspace is expected to be used approximately 38 days per year.

DATE: Comments must be received on or before June 9, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Northwest Mountain Region, Attention: Manager, Air Traffic Division, Docket No. 86–AWA–10, Federal Aviation Administration, 17900 Pacific Highway South, C–68966, Seattle, WA 98168.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC

An informal docket may also be examined during normal business hours at the office of the Regional Traffic Division.

FOR FURHTER INFORMATION CONTACT:

Andrew B. Oltmanns, Airspace and Aeronautical Information Requirements Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–3128.

SUPPLEMENTARY INFORMATION:

Comment Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–AWA–10." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability for NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to subdivide Restricted Area R–6412, Camp Williams, UT, into R–6412A and R–6412B with changes in altitude structures and times of use. The Department of the Army has requested these changes in airspace to accommodate the live-fire training of weapons. The ceiling of R–6412A will be 9,000 feet MSL. The designated altitudes of R–6412B will be from 9,000 feet MSL to and including 10,000 feet MSL. R–6412A and R–6412B will be used for two weeks in the month of June. In addition, R–6412A will be used for five weekends per year during the months of April, May, August, September, and October. Section 73.64 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule'" under DOT Regulatory Policies and Procedures (44 FR 11034: February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 1069(g) (revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69

2. Section 73.64 is amended as follows:

R–6412 Camp Williams, UT—[Removed]

R–6412A Camp Williams, UT—[New]

Boundaries. Beginning at lat. 40°27'30" N., long. 111°56'24" W.; thence southerly along Redwood Road (Utah Highway 68) to lat. 40°23'30" N., long. 111°54'58" W.; to lat. 40°23'30" N., long. 112°06'00" W.; to lat. 40°27'30" N., long. 112°06'00" W.; to the point of beginning.

Designated altitudes. Surface to 9,000 feet MSL.

Time of designation. By NOTAM.

Controlling agency. FAA, Salt Lake City Tower.

Using agency. The Adjutant General, state of Utah.

R–6412B Camp Williams, UT—[New]

Boundaries. Beginning at lat. 40°27'30" N., long. 111°56'24" W.; thence southerly along Redwood Road (Utah Highway 68) to lat. 40°23'30" N., long. 111°54'58" W.; to lat. 40°23'30" N., long. 112°06'00" W.; to lat. 40°27'30" N., long. 112°06'00" W.; to the point of beginning.

Designated altitudes. 9,000 feet to 10,000 feet MSL.

Time of designation. By NOTAM.

Controlling agency. FAA, Salt Lake City Tower.

Using agency. The Adjutant General, state of Utah.

Issued in Washington, D.C., on April 17, 1986.

James Burns, Jr.,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910–13–M

14 CFR Part 73

[Airspace Docket No. 86–AWA–14]

Proposed Amendment to Hours of Operation for Restricted Areas; Quantico, VA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to increase, by two hours daily, the times of designation for Restricted Areas R–6608A and R–6608B, near Quantico, VA. The current times have proven inadequate to meet increased military requirements for these areas. To accommodate expanded use, the restricted areas are currently being activated outside the published hours through NOTAM action. Current and future requirements justify a permanent modification to the times of designation. This action will satisfy the increased user needs and enhance flight safety through publication of the actual hours of operation on the appropriate aeronautical charts.

DATE: Comments must be received on or before June 6, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Eastern Region, Attention: Manager, Air Traffic Division, Docket No. 86–AWA–14, Federal Aviation Administration, JFK International Airports, The Fitzgerald Federal Building, Jamaica, NY 11430.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Paul Gallant, Airspace and Aeronautical Information Requirements Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426–3656.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–AWA–14." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) to change the times of designation for Restricted Areas R–6608A and R–6608B, Quantico, VA, from 0700 to 2400 hours local time daily to 0500 to 2400 hours local time daily. The Department of the Navy has stated a need for an additional two hours of use daily to accommodate increased training requirements. Currently, the restricted areas are being activated for this additional time outside the published times by NOTAM. Present utilization and future requirements indicates a level of usuage that would justify modifying the times of designation as proposed. The proposal would make permanent the present actual times of use. Section 73.66 of Part 73 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 73

Aviation safety, Restricted areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as follows:

PART 73—[AMENDED]

1. The authority citation for Part 73 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510, 1522; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. § 73.66 is amended as follows:

R–6608A Quantico, VA—[Amended]

By removing the words "Continuous, 0700 to 2400 hours, local time; other times by NOTAM issued at least 24 hours in advance." and substituting the words "0500 to 2400 local time daily; other times by NOTAM 24 hours in advance."

R–6608B Quantico, VA—[Amended]

By removing the words "Continuous, 0700 to 2400 hours, local time; other times by NOTAM issued at least 24 hours in advance." and substituting the words "0500 to 2400 local time daily; other times by NOTAM 24 hours in advance."

Issued in Washington, DC, on April 17, 1986.

James Burns, Jr.,

Manager, Airspace-Rules and Aeronautical Information Division.

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 807

Issuance of Air Force Publications and Forms Outside the Air Force

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Proposed rule.

SUMMARY: On March 13, 1986, the Air Force published (at 50 FR 9671) a final rule to remove 32 CFR, Chapter VII, Part 807, Issuing Air Force Publications and Forms Outside the Air Force. Removal of Part 807 was in error. The source document, Air Force Regulation (AFR) 7-1 is being revised. The regulation provides Air Force procedures for issuing publications and forms to private citizens, organizations and commercial activities. The regulation informs the public sector to obtain administrative publications and forms from the local Air Force installation, or where not available from the local installation, the requests are referred to the proper source.

DATE: Comments must be received by May 23, 1986.

ADDRESS: HQ USAF/DAPD, Bolling AFB, DC 20332-6468.

FOR FURTHER INFORMATION CONTACT: Walter S. Frazer, HQ USAF/DAPD, Bolling AFB, DC 20332-6468, telephone (202) 767-6077.

SUPPLEMENTARY INFORMATION: The proposed revision updates references and adds information on Limited (L) distribution items pertaining to Automatic Data Processing (ADP) systems.

List of Subjects in 32 CFR Part 807

Government contracts, Government procurement.

It is proposed to amend 32 CFR, Chapter VII, by adding Part 807 as set forth below:

PART 807—ISSUING AIR FORCE PUBLICATIONS AND FORMS OUTSIDE THE AIR FORCE

Secs.

807.1 Issuing publications and forms to private citizens, private organizations, and commercial activities.
807.2 Issuing publications and forms free outside the Air Force.
807.3 Shipments made by contractors.

Authority: Sec. 8012, 70A Stat. 488, 10 U.S.C. 8012.

§ 807.1 Issuing publications and forms to private citizens, private organizations, and commercial activities.

(a) Classified publications, accountable forms, or forms requiring storage safeguards will not be released to private citizens, private organizations or commercial activities except as stated in § 807.2 and Part 808 of this chapter.

(b) Publications marked For Official Use Only (FOUO) and Limited (L) distribution will be processed as follows:

(1) FOUO publications will be processed in accordance with Part 808 of this chapter.

(2) Requests for limited (L) distribution will be referred to the Automatic Data Processing System (ADPS) manager.

(c) Except as stated in paragraphs (a) and (b) of this section, requests from private citizens and organizations will be processed as follows. The fee schedule and charges outlined in Part 813 of this chapter will be used. Non-user charge transactions, waiver or reduced charges, other special charges and exclusions will be processed in accordance with Part 812 of this chapter. Requests will be processed according to locally established procedures.

(1) If requested items are not immediately available from local stocks, the Publishing Distribution Office will obtain them from the Air Force Publishing Distribution Center for release to the requester. Where special release prohibitions are indicated on the cover or title page, the publication will be processed according to the instructions shown.

(2) If an item is not stocked by the Air Force Publishing Distribution Center, and the index indicates availability from another source, the request will be referred to that source and the requester advised of the referral.

(3) If the request is submitted under the Freedom of Information Act as defined in Part 806 of this chapter, it will be referred to the local Freedom of Information Act Office.

(4) If a request is received by HQ USAF or the Air Force Publishing Distribution Center, it will be referred to the Air Force installation nearest to the requester for processing.

(d) Publications and forms will be issued free to commercial activities only under the conditions set forth in § 807.2; otherwise, Parts 808, 812 and 813 of this chapter apply.

§ 807.2 Issuing publications and forms free outside the Air Force.

(a) If an Air Force publication or form requested concerns invitation for bid, then it is available for review by prospective bidders and may be obtained free from the Air Force procurement authority concerned.

(b) If an Air Force publication or form is needed in connection with contract performance, then it may be obtained free from the Air Force or Defense Logistics Agency (DLA) official responsible for administering the contract, as follows:

(1) One-time issue to contractor.

(2) Followup or recurring issue to contractors of Federal Supply Catalog handbooks and manual chapters when guaranteed by contract (otherwise contractor must purchase from Superintendent of Documents, GPO).

(3) Followup or recurring issue to contractor of Air Force publication or form when the Air Force contract administering official determines issue to be necessary to contract performance.

(c) If an Air Force publication or form is desired in small quantities, and is one-time issue to another federal, state, or local government agency, then it is available free subject to security regulations on classified material; Part 808 of this chapter for FOUO publications; release requirements on L distribution items; and special release statements on individual items. The publications may be obtained from the Publishing Distribution Office or other issuing activity. Recurring requests and requests for large quantities will be referred to the procuring headquarters for determination of whether reimbursement is required.

§ 807.3 Shipments made by contractors.

(a) Air Force activities responsible for printing and distribution contracts will ensure that contractors comply with this part to the extent it is incorporated into the contract. Appropriate shipping instructions must be included in printing contracts that require initial distribution of the publications being printed.

(b) Backup stock is generally shipped to storage points by freight. However, if the contract requires the contractor to make distribution by mail, the contracting activity is authorized to furnish the contractor with Air Force official mailing labels which carry the return address of the Air Force sponsor.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted the pesticide petitions (PP) 5E3291 and PP 5E3292 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR-4 Project and the Agricultural Experiment Station of California.

These petitions requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for residues of the insecticide carbaryl (1-naphthyl *N*-methylcarbamate) in or on the raw agricultural commodities pome fruits group (PP 5E3291) and avocados (PP 5E3292) at 10 parts per million (ppm). Tolerances are currently established for residues of the insecticide carbaryl (1-naphythl *N*-methylcarbamate) including its hydrolysis product 1-naphthol, calculated as 1-naphthyl *N*-methylcarbamate at 10.0 ppm in or on the representative commodities of the pome fruit group, apples and pears. Establishment of the proposed tolerance for residues of carbaryl per se in or on the crop group pome fruits complies with the Registration Standard for carbaryl of March 30, 1984, which states the Agency's intent to change U.S. tolerances for carbaryl to omit references to 1-naphthol. With the establishment of the proposed crop group tolerance, tolerances would also be established for residues of the insecticide carbaryl (1-naphthyl *N*-methylcarbamate) in or on loquats, crabapples, oriental pears and quince at 10.0 ppm. The petition is not intended to extend the use of carbaryl, but to establish a pome fruit group tolerance relevant to the already established individual tolerances on apples and pears and to identify the residue of concern. Also, the petitioner proposed that use on avocados be limited to California based on the geographical representation of the residue data submitted. Additional residue data will be required to expand the area of usage. Persons seeking geographically broader registration should contact the Agency's Registration Division at the address provided above.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerances include a three-generation rat reproduction study with a no-observed-effect level (NOEL) of 200 milligrams (mg) per kilogram (kg) and a rat feeding study with a NOEL of 200 ppm (10 mg/kg), which was negative for oncogenic effects at 400 ppm (highest level tested). Also, ten other studies were used to evaluate the oncogenic potential of carbaryl. No significant increase in the incidence of tumors was observed in these studies at levels as high as 400 ppm (the highest level tested). Although each study was found to contain some flaws in scientific design or reporting of data, the Agency believes that when the ten studies are examined collectively they provide sufficient evidence that carbaryl is not oncogenic in experimental animals and therefore does not pose an oncogenic risk to humans.

Twenty-four studies were used to evaluate the teratogenic potential of carbaryl. After evaluating these studies, the Agency has concluded that the available data do not indicate that carbaryl constitutes a potential human teratogen or reproductive hazard under the proper use. However, because certain teratology studies with dogs did not rule out teratogenic effects in that species, concern has been expressed for dogs treated with carbaryl to control fleas and ticks. The Registration Standard for carbaryl issued in March 1984 required that carbaryl registrants conduct an additional dog teratology study. In response to this requirement, Union Carbide has requested the Agency to consider the necessity of another teratology study in the dog. The Agency reevaluated the need for this study and concluded that it was needed. The carbaryl toxicology data base was previously evaluated when carbaryl was a candidate for Special Review (previously known as Rebutable Presumption Against Registration). The Agency published its determination and

VOL 51 ISS 78 AP 23 1986 UMI

findings in the Federal Register of December 12, 1980 (45 FR 81699), that the data did not support allegations of unreasonable adverse effects to humans, and therefore a Special Review was not warranted. Essentially, the Agency concluded that the data do not indicate that carbaryl is oncogenic, teratogenic or a reproductive hazard under proper use. More recently, the Agency reexamined these data as part of the reregistration process for carbaryl. In the Guidance Document dated March 30, 1984, the Agency reaffirmed the conclusions reached in previous evaluation.

The acceptable daily intake (ADI), based on the 2-year rat feeding study with a NOEL of 10.0 mg/kg/day and using a 100-fold safety factor, is calculated to be 0.1 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 6.0 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 4.6776 mg/day; the current action will increase the TMRC by 0.0180 mg/day (0.38 percent). Published tolerances utilize 77.98 percent of the ADI; the current action will utilize an additional 0.30 percent.

The nature of the residues is adequately understood and an adequate analytical method, high pressure liquid chromatography, is available for enforcement purposes. There are presently no actions pending against the continued registration of carbaryl.

Based on the information and data considered by the Agency, and the fact that currently established tolerances for meat and milk are adequate to cover any residues resulting from use as animal feed, the Agency concludes that the proposed tolerances would protect the public health. Therefore, it is proposed that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 5E3296/5E3292/P391]. All written comments filed in response to this petition will be available in the Information Services Section, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 11, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

1. The authority citation for Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.169 is amended by removing the commodities apples and pears from the table in paragraph (a), revising paragraph (d), and adding paragraph (e) to read as follows:

§ 180.169 Carbaryl; tolerances for residues.

(a) * * *

Commodities	Parts per million
* * *	* * *
Apples [Removed]	10.0 [Removed]
* * *	* * *
Pears [Removed]	10.0 [Removed]
* * *	* * *

(d) Tolerances are established for residues of the insecticide carbaryl (1-naphthyl *N*-methylcarbamate) in or on the following raw agricultural commodities:

Commodities	Parts per million
Pineapples	2.0
Pome fruits	10.0

(e) Tolerances with regional registration are established for the insecticide carbaryl (1-naphthyl N-methylcarbamate) in or on the following raw agricultural commodities.

Commodities	Parts per million
Avocados	10.0

[FR Doc. 86-8811 Filed 4-22-86; 8:45 am]

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

14 CFR Part 34

Medical Examination of Aliens (AIDS)

AGENCY: Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: As of November 1985, approximately 15,000 cases of acquired immunodeficiency syndrome (AIDS) have been reported to the Center for Disease Control, and almost 8,000 deaths have occurred. The virus that causes AIDS is transmitted by sexual contact, by sharing needles with an infected person, through infected blood products, and perinatally. It is not transmitted by casual, nonintimate forms of contact or by food, air, water, and other inanimate objects. The Public Health Service proposes to amend the regulations concerning the medical examination of aliens to add AIDS to the list of "dangerous contagious diseases." This proposed action will allow the Department of State to deny visas and the Immigration and Naturalization Service to deny admission to aliens with AIDS who are subject to medical examination (generally immigrants and refugees).

DATE: Written comments are invited and must be received on or before June 23, 1986.

ADDRESS: Comments should be addressed in writing to the Director, Division of Quarantine, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333. Comments received will be available for public inspection between 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) in Room 201C, 1600 Tullie Circle, Atlanta, Georgia. All relevant comments received during the comment period will be considered in developing the final rule.

FOR FURTHER INFORMATION CONTACT: Dr. Laurence S. Farer, Director, Division of Quarantine, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333, telephone (404) 329-1286, or FTS 235-1286.

SUPPLEMENTARY INFORMATION: Section 212(a) of the Immigration and Nationality Act, 8 U.S.C. 1182(a), lists seven medical grounds for exclusion of aliens. The first five grounds pertain to certain mental conditions, narcotic drug addiction, and chronic alcoholism. The sixth ground excludes aliens with a "dangerous contagious disease." The seventh ground refers to any physical condition that would prevent an alien from earning a living.

The scope of the medical examination required of aliens seeking admission into the United States and the definition of dangerous contagious diseases are specified in "Medical Examination of Alien Regulations" contained in 42 CFR part 34. Medical examination is mandatory for applicants for permanent resident status (immigrant visas), fiance(e)s of U.S citizens and/or their children, and refugees. For aliens seeking temporary admission (nonimmigrant visas), medical examination may be required at the discretion of a consular officer overseas or an immigration inspection at a U.S port of entry if there is reason to suspect that an excludable condition exists. Currently, the regulations list seven diseases which qualify as dangerous contagious diseases under section 212(a) of the Immigration and Nationality Act; aliens with these diseases are excludable from the United States. The seven diseases are: chancroid, gonorrhea, granuloma inguinale, lymphogranuloma venereum, infectious syphilis, infectious leprosy, and active tuberculosis.

It is proposed that AIDS be added to the list of dangerous contagious diseases since it would be anomalous to have diseases such as chancroid and lymphogranuloma venereum on such a list and not include AIDS. AIDS is added to the list because it is a recently defined sexually transmitted disease of significant public health importance. This section will allow the Department of State to deny visas and the Immigration and Naturalization Service to deny admission to aliens with AIDS who are subject to medical examination.

The Secretary has determined that this proposed amendment will not significantly impact on a substantial number of small entities and therefore does not require preparation of a regulatory flexibility analysis under the Regulatory Flexibility Act, Pub. L. 96-354.

The Secretary has also determined that this proposed amendment is not a "major rule" usner Executive Order 12291. Thus, regulatory impact analysis is not required because it will not:

(1) Have an annual effect on the economy of $100 million or more;

(2) Impose a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

(3) Result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 14 CFR Part 34

Acquired immunodeficiency syndrome (AIDS)

It is therefore proposed to amend Title 42 of the Code of Federal Regulations as set forth below:

PART 34—MEDICAL EXAMINATION OF ALIENS

1. The authority citations for 42 CFR Part 34 continues to read as follows:

Authority: Sec. 58 Stat. 690, as amended, Sec. 234, 66 Stat. 198; 42 U.S.C. 216, 8 U.S.C 1224; Sec. 322, 325, 58 Stat. 666, as amended, 667 as amended, Sec. 212, 326, 66 Stat. as amended, 200; 42 U.S.C 249, 252, 8 U.S.C. 1182, 1226.

2. Section 34.2 is amended by adding paragraph (b)(8) to read as follows:

§ 34.2 Definitions.

* * * * *

(b) * * *

(8) Acquired Immunodeficiency Syndrome (AIDS).

* * * * *

Dated: November 15, 1985.

James O. Mason,

Acting Assistant Secretary for Health.

Approved: January 9, 1986.

Otis R. Bowen,

Secretary.

BILLING CODE 4160-18-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 94

[PR Docket No. 86-125; RM-5202; FCC 86-156]

Commission's Rules Governing the Private Operational-Fixed Microwave Service

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has adopted a Notice of Proposed Rule Making in response to a petition for rulemaking, RM-5202, filed by the Harris Corporation—Farinon Division. This proposal would require applicants for facilities in the Private Operational-Fixed Microwave Service (OFS) to furnish information regarding the system's transmitter and antennas to the entity performing its frequency engineering analysis. This proposal would improve the efficiency and quality of microwave frequency engineering analyses.

DATES: Comments are due June 3, 1986; and Reply comments are due June 18, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR INFORMATION CONTACT:

Harold Salters, Land Mobile & Microwave Div., Private Radio Bureau, (202) 632-7597.

Mary Beth Hess, Rules Branch, Land Mobile & Microwave Div., Private Radio Bureau, (202) 634-2443.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 94

Radio broadcasting.

This is a summary of the Commission's notice of proposed rule making, adopted April 8, 1986, and released April 14, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Notice of Proposed Rule Making

1. The Commission is proposing to change its Part 94 rules, which govern the Private Operational-Fixed Microwave Service (OFS), in response

VOL 51 ISS 78 AP 23 1986 UMI

to a petition for rulemaking (RM–5202) filed by the Harris Corporation-Farinon Division.

2. Harris petitioned the Commission to require OFS applicants to include the FCC ID number of their microwave transmitter and the make and model numbers of their antennas with the frequency engineering analyses that accompany OFS applications. Part 94 requires OFS applications to include frequency engineering analyses in order to ensure that the OFS station being applied for will not cause harmful interference to existing or previously applied-for OFS stations. Harris claimed that transmitter and antenna performance characteristics, which are communicated by the transmitter's FCC ID number and the antennas's make and model numbers, are critical elements in the microwave frequency engineering process.

3. Information regarding the transmitter's FCC ID number and the make and model of the antennas is not used by the Commission staff to determine whether to grant a particular OFS application. Additionally, after authorization, an OFS licensee may change this equipment without notifying the Commission as long as the change does not result in a substantial modification to the station's facilities. Although this information is not used by the Commission, Harris' petition and the comments received unanimously supporting it highlight the value of this information to the microwave frequency coordination process. Accordingly, we propose, as detailed in the attached Appendix, to amend § 94.15 to require applicants to furnish this transmitter and antenna information to the frequency engineering firm or other entity performing its frequency engineering analysis.

4. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605, it is certified that the proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities.

5. The proposed rule has been analyzed with respect to the Paperwork Reduction Act of 1980 and may impose a modified information collection requirements on the public. Comments received in response to the Notice will assist the Commission in determining what the ultimate change in burden hours imposed on the public would be if the proposal were adopted. Implementation of any new or modified requirement or burden will be subject to approval by the Office of Management and Budget as prescribed by the Act.

6. This is a non-restricted notice and comment rule making proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

7. Pursuant to applicable procedures set forth in 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415 and 1.419, interested parties may file comments on or before June 3, 1986, and reply comments on or before June 16, 1986. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding.

8. Authority for issuance of the Notice of Proposed Rule Making is contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r).

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 94—PRIVATE OPERATIONAL-FIXED MICROWAVE SERVICE

Part 94 of Chapter I of Title 47 of the Code of Federal Regulations is proposed to be amended as follows:

The authority citation for Part 94 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303, unless otherwise noted.

In Section 94.15, paragraph (b) is revised to read as follows:

§ 94.15 Policy governing the assignment of frequencies.

* * * * *

(b) All applications for new or modified stations must contain an engineering analysis of the potential interference between the proposed facilities and previously authorized facilities and pending applications. The application must contain as supplemental information: (1) A certification that based upon frequency engineering analysis, the potential interference will not exceed that prescribed by the interference criteria in § 94.63; or (2) if the potential interference will exceed that prescribed by § 94.63, a statement to the effect that all parties affected have agreed to accept the higher level of interference. In either case, the application must contain the names of the licensees and the call signs of the stations that were considered in conducting the engineering analysis. Further, applicants and licensees will be expected to cooperate promptly and fully in the exchange of technical information necessary to performing frequency engineering analysis and, in the event of technical differences, cooperate in resolving these differences. Engineering analyses prepared pursuant to this section shall include consideration of the technical characteristics of the transmitting equipment that an applicant proposes to use, as indicated by the FCC ID number of the transmitter and the make and model numbers for all antennas the applicant proposes to use. Applicants shall provide this information to the entities responsible for performing the frequency engineering analysis.

* * * * *

[FR Doc. 86–8911 Filed 4–22–86; 8:45 am]

BILLING CODE 6712–01–M

DEPARTMENT OF DEFENSE

48 CFR Part 242

Department of Defense Federal Acquisition Regulation Supplement; Indirect Cost Rates

AGENCY: Department of Defense (DoD).

ACTION: Proposed rule and request for comments.

SUMMARY: The Department of Defense is considering changes to DoD Federal Acquistion Regulation Supplement (DFARS) Subpart 242.7 which extend the auditor determination of final indirect costs rates procedure to all commercial contractor locations where DoD has the predominant interest.

DATE: Comments on the proposed rule should be submitted in writing to the DAR Council at the address shown below no later than (30 days from date of publication), to be considered in the formation of the final rule. Please cite DAR Case 85–250 in all correspondence related to this issue.

ADDRESS: Interested parties should submit written comments to: Defense Acquisition Regulatory Council, ATTN: Mr. Charles W. Lloyd, Executive Secretary, ODASD(P)/DARS, c/o OASD(A&L), Room 3C841, The Pentagon, Washington, DC 20301–3062.

FOR FURTHER INFORMATION CONTACT: Mr. Charles W. Lloyd, Executive Secretary, DAR Council, (202) 697–7266.

SUPPLEMENTARY INFORMATION:

A. Background

On 17 October 1985, the Deputy Secretary of Defense issued "Procedures for Implementation of Audit-Determined Indirect Cost Rates at all Contractor Locations." This proposed rule, if adopted, will implement the procedures directed by the Deputy Secretary of Defense.

B. Regulatory Flexibility Act Information

The proposed changes to DFARS Subpart 242.7 do not appear to have significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) because this coverage pertains only to large businesses. Small businesses are already audit determined. Therefore, the Regulatory Flexibility Act does not apply.

C. Paperwork Reduction Act Information

The proposed rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 48 CFR Part 242

Government procurement.

Charles W. Lloyd,

Executive Secretary, Defense Acquisition Regulatory Council.

Therefore, it is proposed that 48 CFR Part 242 be amended as follows:

PART 242—CONTRACT ADMINISTRATION

1. The authority citation for 48 CFR Part 242 continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

2. Section 242.704 is added to read as follows:

242.704 Billing rates.

(a) The contracting officer is responsible for determining billing rates for those contractor locations listed at FAR 42.705–1(a) (1) through (6). If the contracting officer and the auditor agree, the auditor may determine the billing rates if any of the circumstances in FAR 42.705–2(a)(2) (i) through (iv) apply.

3. Section 242.705–1 is amended by adding paragraph (a), and by re-designating the existing paragraph (a)(1) as paragraph (1), as follows:

242.705–1 Contracting officer determination procedure.

(a) In accordance with Deputy Secretary of Defense decision of 17 October 1985, responsibility for determination of final indirect cost rates is being transitioned to DCAA. Contracting officer determination procedures will continue to apply at individual contractor locations until transitioned to DCAA responsibility.

* * * * *

4. Section 242.705–2 is amended by adding paragraphs (a), (b)(1), (b)(2)(i), and (b)(2)(ii); by revising paragraph (b)(2)(iii); by adding paragraph (b)(2)(iv), and by revising paragraph (b)(2)(v) to read as follows:

242.705–2 Auditor determination procedure.

(a) Auditor determination procedures will be used for commercial contractor locations where DoD has the predominant interest (on the basis of unliquidated dollar amount). Transition years for contractor locations will be published at a later date. This procedure, as it applies to DoD contractor locations meeting the FAR criteria for contracting officer determination, is a test. Results are to be evaluated at the end of FY 1988.

(b)(1) For multidivisional contractors, the proposal for each segment shall be submitted to the auditor responsible for conducting audits of that division and that divisional ACO, with a copy to the corporate ACO and auditor. The contractor's proposal must contain an executed Certificate of Overhead Costs.

(b)(2)(i) Upon completion of the audit, the auditor will issue to the contractor a written notification setting forth audit exceptions to the contractor's proposal. The notification will state that the contractor has 90 days to provide its agreement or rebuttal comments. A copy of the notification will be furnished to the cognizant ACO. The auditor may grant the contractor one 30-day extension upon receipt of a written request from the contractor. Upon receipt of the contractor's response to the written notification of audit exceptions, the auditor will evaluate the response and issue the audit report required in FAR 42.705–2(b)(2)(iv) to the cognizant ACO within 60 days. If the contractor fails to respond to the notification by the required date (initial or extended), the auditor will issue the audit report. Regardless of agreement or disagreement, the audit report will cover, as a minimum: (A) The contractor's indirect cost rate proposal; (B) the audit findings; (C) reconciliation of all costs questioned, with identification of all individual elements of cost and amounts allowed or disallowed in the final settlement if agreement was reached, or recommended for disallowance if agreement was not reached; (D) disposition of period costing or allocability issues; and (E) identification of cost or pricing data submitted and relied upon in reaching an agreement.

(ii) See paragraph (b)(2)(iii) of this section.

(iii) If the audit report details that agreement has been reached, the auditor will obtain from the contractor the Certificate of Current Cost or Pricing Data required in FAR 42.705–2(b)(2)(ii) and prepare an indirect cost rate agreement in accordance with FAR 42.705–2(b)(2)(iii). The agreement shall be signed by the contractor and the designated audit official.

(iv) See paragraph (b)(2)(i).

(v) If the audit report details that agreement with the contractor cannot be reached, the auditor will also issue DCAA Form 1 detailing the items of exception. Upon receipt of a DCAA Form 1, the contractor can submit a request, in writing, to the cognizant ACO to reconsider the auditor's determination and/or file a claim under the Disputes clause. Such request or claim shall be submitted within 60 days. In considering the contractor's request, the ACO will not resolve any questioned cost without obtaining adequate documentation and the opinion of the auditor. To the maximum extent practicable, the auditor should be present at any negotiation or meeting regarding the questioned costs. If agreement between the parties is reached, the ACO will obtain the Certificate of Current Cost or Pricing Data, prepare the indirect cost rate agreement, and prepare a negotiation memorandum containing the elements set forth in FAR 42.705–1(b)(5)(iii). Failure of the parties to reach agreement will be treated in accordance with FAR Subpart 33.2.

5. Section 242.706 is amended by revising paragraph (a), by removing paragraph (b)(1), and adding paragraph (b) to read as follows:

242.706 Distribution of documents.

(a) When the auditor executes the overhead rate agreement (see 242.705–2(b)(2)(iii)), copies of the agreement will be furnished to the contractor, the cognizant CACO (if assigned), and the cognizant ACO. In addition, copies will be distributed to other Departments, and (upon specific request) any other interested Government agencies. Departments may make further distrubition to activities within their Departments and shall insert one copy in each contractor general file (see S–101.2 and S2–102.4). When the ACO executes the overhead rate agreement (see § 242.705–2(b)(2)(v)), distribution is the same except that a copy will also be provided to the cognizant auditor.

(b) The audit report issued to the cognizant ACO pursuant to § 242.705–2(b)(2)(i) will also be furnished to the cognizant CACO (if assigned). If the ACO prepares a negotiation memorandum pursuant to § 242.705–2(b)(2)(v), copies will be furnished to the cognizant auditor and the cognizant

VOL 51 ISS 78 AP 23 1986

CACO (if assigned). Upon specific request, a copy of the auditor's report and/or the contracting officer's negotiation memorandum will be furnished to other Departments or Government agencies.

BILLING CODE 3810-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1003, 1043 and 1084

[Ex Parte No. MC-5 (Sub-3) and Ex Parte No. MC-159 (Sub-2)]

General Investigation and Revocation Procedures Governing Failure To File or Maintain Prescribed Insurance or Other Security for Public Protection—Motor Carriers, Brokers and Freight Forwarders

AGENCY: Interstate Commerce Commission.

ACTION: Discontinuance of proposed rulemaking proceeding.

SUMMARY: The Commission is discontinuing the proceeding in which it proposed an ongoing general investigation and revocation mechanism applicable to all motor carriers, brokers, and freight forwarders that fail to maintain the required amounts of insurance or other security for public protection.

The notice instituting this proceeding, 47 FR 55980, December 14, 1982, indicated that the proposed procedures were intended to encourage greater compliance with the Commission's insurance and surety requirements and to provide increased protection to the public and shippers by expediting authority revocation proceedings involving non-compliant carriers. However, upon further consideration, we have determined that existing compliance monitoring and enforcement measures are adequate to support increased mandatory security limits and that the proposed general investigation and revocation procedures are unnecessary to afford the required protections. In a decision denying a petition seeking similarly enhanced enforcement and revocation procedures, we concurrently announced discontinuance of this proceeding. *See* Ex Parte No. MC-178 (Sub-No. 2), *Petition for Rulemaking of the American Bus Association Concerning Enforcement of Minimum Insurance Standards* (Not printed), served April 23, 1986.

EFFECTIVE DATE: This decision will be effective on May 23, 1986.

FOR FURTHER INFORMATION CONTACT:
Howell I. Sporn, (202)275-7691;
or
Suzanne Higgins, (202) 275-7161.

SUPPLEMENTARY INFORMATION: Additional information concerning discontinuance of the general investigation and revocation proceeding is contained in the Commission's decision in ex Parte No. MC-178 (Sub-No. 2), *Petition for rulemaking of the American Bus Association Concerning Enforcement of Minimum Insurance Standards* (not printed), served April 23, 1986. To purchase a copy of the full decision, write the TS InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC, or call: 289-4357 in the DC metropolitan area or toll-free (800) 424-5403.

Environmental and Energy Considerations

Discontinuance of the general investigation and revocation proceeding will not affect significantly the quality of the human environment or conservation of energy resources.

Notices

Federal Register
Vol. 51, No. 78
Wednesday, April 23, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee of Judicial Review, Notice of Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. No. 92-463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States, to be held at 9:00 a.m. on Monday, May 5, 1986, at the offices of Cadwalader, Wickersham & Taft, 7th floor conference room, 1333 New Hampshire Avenue, NW., Washington, DC.

The committee will meet to discuss public comments received concerning Professor Mark Gruewald's study on the feasibility of establishing an administrative tribunal for the resolution of disputes under the Freedom of Information Act and concerning other possible alternatives for improving the process of resolving FOIA disputes.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the committee before, during or after the meeting.

For further information concerning this meeting contact Mary Candace Fowler, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, D.C. (Telephone: 202-254-7065.) Minutes of the meeting will be available on request.

Richard K. Berg,
General Counsel.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

April 16, 1986.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from:

Department Clearance Officer, USDA, OIRM, Room 404-W Admin. Bldg., Washington, DC 20250, (202) 447-2118.

Comments on any of the items listed should be submitted directly to:

Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

BILLING CODE 3410-01-M

Soil Conservation Service

Dry Fork Watershed, Oregon; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1960; the Council on Environmental Quality Guidelines (40

VOL 51 ISS 78 AP 23 1986 UMI

CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Dry Fork Watershed, Gilliam and Morrow Counties, Oregon.

FOR FURTHER INFORMATION CONTACT: Jack P. Kanalz, State Conservationist, Soil Conservation Service, 1640 Federal Building, 1220 SW. Third Avenue, Portland, Oregon 97204, telephone 503–221–2751.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Jack P. Kanalz, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan for the watershed. The planned works of improvement include accelerated technical assistance for land treatment on cropland and rangeland.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Jack P. Kanalz.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials)

Dean F. Fisher,

Deputy State Conservationist.

April 14, 1986.

[FR Doc. 86–9083 Filed 4–22–86; 8:45 am]

BILLING CODE 3410–16–M

Statistical Reporting Service

Modification of Program Reports

Notice is hereby given that the Statistical Reporting Service (SRS) plans a series of program reimbursements and a slight modification of the States included in the potato summer and fall seasonal groupings. The planned program reinstatements are in response to language in the Senate Committee on Agriculture report on fiscal year 1986 appropriations. These planned changes will be made during 1986.

SRS will work with commodity organizations and State agencies to expand these estimating programs (dry peas and lentils, white wheat, and bee and honey) being reinstated if funds for the collection, summarization, and publication can be provided.

Dry Peas and Lentils—Estimates discontinued after the 1981 crop have been reinstated on an annual basis only. Dry peas, lentils, and wrinkled seed peas will be estimated by Washington and Idaho and Austrian winter peas will be estimated by Idaho and Oregon. End-of-season estimates will be made for acreage planted and harvested, yield, production, prices received per ctw, and value of production. Acreage, yield and production data for 1986 dry peas, lentils and Austrian winter peas will be published in the October 10 *Crop Production* report. Wrinkled seed pea data will be collected later and published in the annual *Crop Production* summary scheduled for release in early 1987. Prices received and value of production will be published in *Crop Values* in February 1987.

Potatoes—Summer seasonal potato estimates for Indian and Ohio will be combined with the fall group beginning with the July 1986 acreage estimates. For a number of years, summer potatoes in these areas have been stored and marketed in competition with the fall crop making these changes necessary.

White Wheat—Estimates for the Pacific Northwest discontinued in 1982 have been reinstated on an annual basis only. End-of-season estimates of white wheat production will be made in Idaho, Oregon, and Washington. Data for 1986 will be published in each State's annual summary publication scheduled for release in early 1987. There will be no white wheat State level data published in the U.S. annual Crop Production summary.

Honey—An annual bee and honey survey which was discontinued in 1981 will be reinstated in 1986. Beekeepers with less than five colonies will be excluded. The survey will be conducted in mid-December with State and U.S. estimates published in January 1987. Items covered in the publication include colonies of bees and production, stocks and prices for honey and beeswax.

Comments regarding the proposed modifications outlined should be addressed to Richard D. Allen, Director, Estimates Division, Room 5847–S, SR/USDA, Washington, D.C. 20250.

Done at Washington, D.C. this 18th day of April 1986.

W.E. Kibler,

Administrator.

National Oceanic and Atmospheric Administration

Gulf of Mexico and South Atlantic Fishery Management Councils; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Gulf of Mexico and South Atlantic Fishery Management Councils and their intercouncil mackerel management committee will convene joint public meetings at the Inn on the Point, 7627 West Columbus Drive, Rocky Point Island, Tampa, FL, as follows:

Joint Council—will discuss setting the total allowable catch for king and Spanish mackerel for the forthcoming fishing seasons, amendments to the fishery management plan for mackerel, and mackerel reports provided by the Southeast Fisheries Center's Laboratory Directors; will convene April 29, 1986, at 1:30 p.m., recess at 5 p.m., reconvene April 30, at 8:30 a.m. and adjourn at 5 p.m.

Joint Committee—will convene April 28 at 3 p.m., recess at 5 p.m., reconvene April 29 at 8:30 a.m. and adjourn at noon. The agenda is the same as that of the Joint Councils', above.

The Gulf of Mexico Council and its Committee also will convene public meetings at the above address, as follows:

Council—will convene on April 30, from 1:30 p.m. and will adjourn at 5 p.m., to discuss statistical catch information on red drum. During a closed session (not open to the public) from 1:45 p.m. to 2:30 p.m., the Council will discuss employment/personnel matters regarding advisory panel (AP) and scientific and statistical committee (SSC) membership appointments for next year.

Committee—will convene April 28, with the same agenda as the Council's above, including a closed session from 1 p.m. to 3 p.m.

For further information contact Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, 5401 West Kennedy Boulevard, Suite 881, Tampa, FL 33609; telephone: (813) 228–2815.

Dated: April 18, 1986.

BILLING CODE 3710–08–M

Coastal Engineering Research Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee meeting:

Name of committee: Coastal Engineering Research Board (CERB).

Date of meeting: May 14–16, 1986.

Place: Captain Bartlett Inn, Fairbanks, Alaska, and Lakewood Inn, Homer, Alaska.

Time: 8:15 a.m. to 5:45 p.m. on May 14 in Fairbanks and Prudhoe Bay, Alaska; 8:00 a.m. to 4:00 p.m. on May 15 in Valdez and Homer, Alaska; 8:00 a.m. to 5:30 p.m. on May 16 in Homer, Alaska.

VOL 51 ISS 78 APR 23 1986 UMI

Proposed agenda: The May 14 session will consist of presentations on Regulatory Functions in Alaska Coastal Areas, North Slope Hydraulic Modeling Activities, and Deep Draft Navigation Aspects of the Prince William Sound. A flight to Prudhoe Bay is also scheduled for May 14.

On May 15 a flight to Valdez, with a briefing and tour of the Valdez Terminal facilities is scheduled. A discussion of the field trips is planned at the Lakewood Inn in Homer, Alaska.

The May 16 session will consist of presentations and discussions on a review of previous CERB business, initiatives to meet the Chief of Engineers' charges to the CERB, updates on Duck 1986 experiment, Crescent City Dolos Monitoring, and Directional Spectral Wave Generator, Computer Aided Coastal Engineering, South Atlantic and North Pacific Divisions research needs, Floating Breakwaters, Anchorage Harbor Studies, St. George Harbor, (Alaska) Coastal Data Collection Program, Homer Spit Erosion, the Coastal Community in the State of Alaska, recommendations by members of the Board, and selection of date and place for the next CERB meeting.

There is an optional Chena Lakes tour scheduled on May 13 prior to the meeting and an optional Homer Harbor tour scheduled for the morning of May 17.

This meeting is open to the public; participation by the public is scheduled for 4:00 p.m. on May 16 in Homer, Alaska. The public may attend the tours on May 13, 14, 15, and 17, but must provide their own transportation.

The entire meeting is open to the public subject to the following:

1. Since seating capacity of the meeting room is limited, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

2. Oral participation by public attendees is encouraged during the time scheduled on the agenda; written statements may be submitted prior to the meeting or up to 30 days after the meeting.

Inquiries and notice of intent to attend the meeting may be addressed to Colonel Allen F. Grum, Executive Secretary, Coastal Engineering Research Board, U.S. Army Engineer Waterways Experiment Station, P.O. Box 631, Vicksburg, Mississippi 39180-0631.

Patrick J. Kelly,

Brigadier General, U.S. Army, President, Coastal Engineering Research Board.

BILLING CODE 3710-08-M

Department of the Navy

Navy Resale System Advisory Committee; Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Navy Resale System Advisory Committee will meet on May 12, 1986, in the Riviera Room, Westgate Hotel, 1055 Second Avenue, San Diego, California. The meeting will consist of two sessions: The first from 8:00 a.m. to 9:00 a.m; and the second from 9:10 a.m. until 3:45 p.m. The purpose of the meeting is to examine policies, operations, and organization of the Navy Resale System and to submit recommendations to the Secretary of the Navy. The agenda will include discussions of the organization of the Resale System, planning, financial management, merchandising, field support, and industrial relations.

The Secretary of the Navy has determined in writing that the public interest requires that the second session of the meeting be closed to the public because it will involve discussions of information pertaining solely to trade secrets and confidential commercial or financial information. These matters fall within the exemptions listed in subsections 552b(c) (2), (4), and (9)(B) of title 5, United States Code. Therefore, the second session will be closed to the public.

For further information concerning this meeting, contact: Commander R. F. Hendricks, SC, USN, Naval Supply Systems Command, NAVSUP 09B, Room 516, Crystal Mall Building No. 3, Arlington, Virginia 22202, Telephone number: (202) 695-5457.

Dated: April 16, 1986.

William F. Roos, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Vocational Education Indian and Hawaiian Natives Program; Noncompeting Continuation Awards

AGENCY: Department of Education.

ACTION: Application Notice for *Noncompeting Continuation Awards* under the Vocational Education Indian and Hawaiian Natives Program (for Indians) for Fiscal Year 1987 projects.

Programmatic and Fiscal Information

Applications are invited for noncompeting continuation awards under the Vocational Education Indian and Hawaiian Natives Program. This application notice is only for Indian tribes that received grants for Fiscal Year 1986. The purpose of the awards is to provide Federal support to Indian tribes to plan, conduct, and administer projects or portions of projects that are authorized by and consistent with the Carl D. Perkins Vocational Education Act (the Act) (Pub. L. 98-524, 20 U.S.C. 2301 et seq.) Pursuant to 34 CFR 410.10, projects funded under this program are in addition to other programs, services, and activities made available to eligible Indians under other provisions of the Act.

Under this program, the Secretary may award grants to the tribal organizations of any Indian tribe that is eligible to contract with the Secretary of the Interior for the administration of programs under the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638 (25 U.S.C. 450 note) or the Act of April 16, 1934 (25 U.S.C. 452-457).

In accordance with 34 CFR 75.118, each applicant eligible for a continuation grant must submit a revised face page, revisions to other affected pages of the approved application, and new budget information. In addition, the applicant must submit a report of the project accomplishments to date, including documentation of the number of completers who have successfully obtained (1) employment (including place of employment), (2) service in military specialties related to their training, or (3) continuation of education in a field related to their training.

It is estimated that $3,436,721 from the Fiscal Year 1986 appropriation will be available for 19 noncompeting continuation awards for 12-month budget periods that will operate generally during 1987-88.

These estimates do not bind the Department of Education to a specific number of grants, or to the amount of any grants, unless that amount is otherwise specified by statute or regulations.

Closing Date for Transmittal of Applications

Applications for continuation awards should be mailed or hand delivered on or before July 15, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.101B), Maryland Avenue SW., Washington, DC 20202.

If an application is late, the Department of Education may lack sufficient time to review it with other applications for noncompeting continuation awards and may decline to accept it.

Applications that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building No. 3, 7th & D Streets SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays.

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Indian and Hawaiian Natives Program in 34 CFR Parts 400 and 410.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

Application Forms

Application forms and program information packages iwll be sent to eligible applicants on April 23, 1986. Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information package is only intended to aid applicants in applying for assistance under this program. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those imposed under the statute and regulations. (Approved under OMB control number 1830-0013.)

Further Information

For further information contact Harvey G. Thiel or Timothy D. Halnon, Program Specialists, Special Programs Branch, U.S. Department of Education, 400 Maryland Avenue, SW., 519 Reporters Building, Washington DC 20202-5516. Telephone: (202) 732-2380 or 732-2379.

BILLING CODE 4000-01-M

Vocational Education Indian and Hawaiian Natives Program; New Awards

AGENCY: Department of Education.

ACTION: Application Notice for New Awards under the Vocational Education Indian and Hawaiian Natives Program (for Indians) for Fiscal Year 1987 projects.

Programmatic and Fiscal Information

Applications are invited for new projects under the Vocational Education Indian and Hawaiian Natives Program. This application notice is for Indian tribes only and does not apply to organizations for Hawaiian Natives. The purpose of the awards is to provide Federal support to Indian tribes to plan, conduct, and administer projects or portions of projects that are authorized by and consistent with Carl D. Perkins Vocational Education Act (the Act) (Pub. L. 98-524, 20 U.S.C. 2301 et seq.) Pursuant to 34 CFR 410.10, projects funded under this program are in addition to other programs, services, and activities made available to eligible Indians under other provisions of the Act.

Eligible applicants are tribal organizations of Indian tribes that are eligible to contract with the Secretary of the Interior for the administration of programs under the Indian Self-Determination and Education Assistance Act, Pub. L. 93-638, (25 U.S.C. 450 note) or the Act of April 16, 1934 (25 U.S.C. 452-457). A group of eligible applicants may also apply for a grant. Joint applicants should pay specific attention to 34 CFR 75.127-75.129 of the Education Department General Administrative Regulations (EDGAR) and 34 CFR 41020.

The program regulations in section 410.30 authorized the Secretary to distribute an additional 15 points among the criteria described in the regulations in section 410.31 to bring the total to a maximum of 100 points. For the purposes of this competition, the Secretary assigns the reserved 15 points as follows:

Need—5 additional points
Plan of operation—5 additional points
Quality of key personnel—5 additional points

The total of 100 points is allocated among the selection criteria as follows:

(a) *Need* (20 points)
(b) *Plan of operation* (25 points)
(c) *Quality of key personnel* (15 points)
(d) *Budget and cost efectiveness* (10 points)
(e) *Evaluation plan* (5 points)
(f) *Adequacy of resources* (5 points)
(g) *Private sector involvement* (10 points)
(h) *Employment opportunities* (10 points)

The amount of funds currently available from the fiscal year 1986 appropriation for new awards under this program is $6,127,643. (This amount reflects a reduction of $429,750 from the fiscal year 1986 appropriation pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985, Pub. L. 99-177). At an anticipated average award of $200,000, it is estimated that these funds could support up to 30 new projects.

Applicants sould be aware that the President has proposed budget rescissions that may reduce the amount available for new awards to $3,436,721. However, the deadline in this notice will not be extended and applicants should prepare and submit applications by the closing date.

These estimates do not bind the U.S. Department of Education to a specific number of grants, or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand delivered on or before June 16, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.101A), 400 Maryland Avenue SW., Washington, DC 20202.

Each late applicant will be notified that its application will not be considered.

Applications that are hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets SW., Washington, DC.

Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC, time) daily, except Saturdays, Sundays, and Federal holidays.

Application Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Indian and Hawaiian Natives Program in 34 CFR Parts 400 and 410.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

VOL 51 ISS 78 AP 23 1986 UMI

Application Forms

Application forms and program information packages are expected to be available by April 23, 1986. These may be obtained by writing to the Special Programs Branch, Room 519, Reporters Building, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information package. However, the program information package is only intended to aid applicants in applying for assistance under the program. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those specifically imposed under the statute and regulations (Approved under OMB control number 1830–0013).

The Secretary is soliciting applications for fully funded awards of up to 18 months duration.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages.

The Secretary further urges that applicants only submit required information.

Further Information

For further information contact Harvey Thiel or Timothy Halnon, Program Specialists, Special Programs Branch, Room 519, Reporters Building, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202–5516. Telephone: (202) 732–2380 or 732–2379.

Program Authority

20 U.S.C. 2313.

(Catalog of Federal Domestic Assistance No. 84.101, Vocational Education—Programs for Indian Tribes, Indian Organizations, and Hawaiian Natives)

Dated: April 18, 1986.

John K. Wu,

Acting Assistant Secretary for Vocational and Adult Education.

BILLING CODE 4000-01-M

Meeting of the Elementary Education Study Group

AGENCY: Office of the Secretary of Education.

ACTION: Notice of meeting.

SUMMARY: Notice is hereby given that the Secretary of Education will conduct a meeting on information and ideas about the improvement of elementary education in the United States.

DATE: April 28, 1986 at 9:00 a.m.–4:00 p.m.

ADDRESS: The Horace Mann Learning Center Auditorium, 400 Maryland Avenue SW., Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Nelson Smith, Staff Director, Elementary Education Study Group, Room 556, 1200 19th Street NW., Washington, DC 20208. Telephone (202) 254–0721.

SUPPLEMENTARY INFORMATION: This fourth and final public meeting of the Elementary Education Study Group will review topics being considered for inclusion in the Secretary's forthcoming report to the nation on elementary education.

Dated: April 18, 1986.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER86–405–000 et al.]

Boston Edison Company et al.; Electric Rate and Corporate Regulation Filings

April 17, 1986.

Take notice that the following filings have been made with the Commission:

1. Boston Edison Company

[Docket No. ER86–405–000]

Take notice that on April 14, 1986, Boston Edison Company ("Edison") filed an agreement between itself and Cambridge Electric Light Company ("Cambridge") for the use by Cambridge of a 115/14 kv station in Brighton, Massachusetts, owned by Edison and known as Station 329. Edison requests that the agreement be made effective in accordance with its terms on June 1, 1985.

Cambridge and Edison had previously agreed that Cambridge would cease its use of Station 329 on notice from Edison which became effective on May 31, 1985; however, Cambridge notified Edison that it could not remove its load from the station for at least another two years. The agreement tendered for filing herewith permits Cambridge to continue to use Station 329 subject to payment to Edison of (1) an annual support charge developed according to a formula rate contained in Article II of the agreement, (2) a negotiated monthly charge of $41,667 to compensate Edison for the loss in service reliability as a result of Cambridge's continued use of Station 329 beyond May 31, 1985 and (3) costs of equipment modifications required by Edison to serve its own customers while continuing to serve Cambridge. The payments are treated as a revenue credit in Edison's retail rate filing currently pending before the Massachusetts Department of Public Utilities.

Edison requests waiver of the 60 day notice requirement in order to permit the agreement to become effective on June 1, 1985 in accordance with its terms. The negotiations could not be completed and the agreement executed in time to comply with the notice requirement.

Comment date: May 1, 1986, in accordance with Standard Paragragh E at the end of this notice.

2. Central Illinois Public Service Company

[Docket No. ER86–407–000]

Take notice that Central Illinois Public Service Company (CIPS) on April 14, 1986, tendered for filing Amendment No. 9 dated April 1, 1986 to the Interconnection Agreement between Commonwealth Edison (CE) and CIPS dated November 1, 1964.

Amendment No. 9 replaces Service Schedule B, Economy Energy, with a new Service Schedule B, Economy Energy; revises Service Schedule C, Short Term Power; replaces Service Schedule E, Non-Displacement Energy, with a new Service Schedule E, General Purpose Energy; and adds a Service Schedule F, Term Energy.

Copies of the filing were sent to Commonwealth Edison Company and the Illinois Commerce Commission.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Central Illinois Public Service Company

[Docket No. ER86–411–000]

Take notice that on April 15, 1986 Central Illinois Public Service Company ("CIPS") tendered for filing amended Rate Schedule W–2 (Flora) for Wholesale Electric Service to the City of Flora for Distribution and Retail Sale to Its Customers ("Rate Schedule W–2 (Flora)"). CIPS also tendered for filing an amendment to the supply contract between CIPS and the City of Flora ("City").

The tendered rate schedule and amendment to supply contract comprise integral parts of a comprehensive agreement between CIPS and the City, reached after negotiations, to continue and extend their long-term customer-supplier relationship.

CIPS requests an effective date of January 1, 1986, and therefore requests a waiver of the Commission's notice requirements.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Central Louisiana Electric Company, Inc.

[Docket No. ER86–313–000]

Take notice that on April 14, 1986, Central Louisiana Electric Company, Inc. ("CLECO") submitted for filing additional information relating to the executed contract for the sale of Replacement Energy by CLECO to the City of Alexandria.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this document.

5. The Kansas Power and Light Company

[Docket No. ER86–404–000]

Take notice that on April 7, 1986, The Kansas Power and Light Company (KPL) tendered for filing a newly executed renewal contract dated March 4, 1986, with the City of Hillsboro, Kansas for wholesale service to that community. KPL states that this contract permits the City of Hillsboro to receive service under rate schedule WSM–12/83 designated Supplement No. 9 to R. S. FERC No. 166. The proposed effective date is October 1, 1986. The proposed contract change provides essentially for the ten year extension of the original terms of the presently approved contract. In addition, KPL states that copies of the contract have been mailed to the City of Hillsboro and the State Corporation Commission.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. The Kansas Power and Light Company

[Docket No. ER86–412–000]

Take notice that on April 14, 1986, the Kansas Power and Light Company (KPL) tendered for filing a newly executed renewal contract dated April 4, 1986, with the City of Sabetha, Kansas for wholesale service to that community. KPL states that this contract permits the City of Sabetha to receive service under rate schedule WSM–12/83 designated Supplement No. 9 to R. S. FERC No. 165. The proposed effective date is July 1, 1986. The proposed contract change provides essentially for the ten year extension of the original terms of the presently approved contract. In addition, KPL states that copies of the contract have been mailed to the City of Sabetha and the State Corporation Commission.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. Public Service Company of Colorado

[Docket No. ER86–408–000]

Take notice that Public Service Company of Colorado (Public Service) on April 14, 1986, tendered for filing a Non-Firm Energy Agreement (Agreement) between Public Service and the City of Colorado Springs, Colorado (Colorado Springs).

Public Service states that the Agreement provides for the non-firm sale and purchase of electric energy between Public Service and Colorado Springs. The Agreement provides for establishing terms and conditions for such non-firm sales between the parties.

Public Service states that copies of the filing were served upon all parties to the Agreement and affected state commissions.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

8. Public Service Company of New Mexico

[Docket No. ER86–409–000]

Take notice that on April 14, 1986, Public Service Company of New Mexico (PNM) submitted for filing Amendment No. 1 dated December 30, 1985, amending the PNM and City of Riverside (Riverside) Economy Energy Agreement, dated May 17, 1982. The Amendment permits the seller to offer economy energy at rates which permit the price to reflect the current market price of such energy or the seller's actual costs to generate such energy.

Copies of the filing have been served upon Riverside and the New Mexico Public Service Commission.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

9. Public Service Company of New Mexico

[Docket No. ER86–409–000]

Take notice that on April 14, 1986, Public Service Company of New Mexico (PNM) submitted for filing Amendment No. 1 dated December 30, 1985, amending the PNM and City of Anaheim (Anaheim) Economy Energy Agreement, dated June 15, 1982. The Amendment permits the seller to offer economy energy at rates which permit the price to reflect the current market price of such energy or the seller's actual costs to generate such energy.

Copies of the filing have been served upon Anaheim and the New Mexico Public Service Commission.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

10. San Diego Gas & Electric Company

[Docket No. ER86–410–000]

Take notice that on April 14, 1986, San Diego Gas & Electric Company (SDG&E) tendered for filing a revision to the Power Exchange and Sales Agreement between SDG&E and Washington Water Power Company (WWP).

Under the terms of the revision, points of delivery at Hot Springs, Montana, and Burke, Idaho will be added to the terms of the agreement.

SDG&E has requested an effective date of February 2, 1986 and, therefore, requests a waiver of the prior notice requirement.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs:

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE. Washington, DC, 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–9084 Filed 4–22–86; 8:45 am]

BILLING CODE 6717-01-M

Bangor Hydro-Electric Co.; Notice of Application

April 16, 1986.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory

VOL 51 ISS 78 AP 23 1986 UMI

Commission and is available for public inspection:

a. Type of Application: Amendment of License.

b. Project No: 2600-006.

c. Date Filed: March 21, 1986.

d. Applicant: Bangor Hydro-Electric Company.

e. Name of Project: West Enfield.

f. Location: On the Penobscot River in Penobscot County, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Robert S. Briggs, Bangor Hydro-Electric Company, 33 State Street, Bangor, ME 04401, (207) 945-5621.

i. Comment Date: May 19, 1986.

j. Description of Project: The license for this project was issued on June 26, 1984. The project as licensed consists of a timber crib dam with 5.6-foot-high flashboards, an impoundment with a normal surface elevation of 151.1 feet mean sea level, an 800-foot-long canal, a powerhouse with 5 units with a total installed capacity of 13 MW, a 1,000-foot-long tailrace, an 800-foot-long transmission line, and fish passage facilities at the dam and at the powerhouse.

The licensee requests that the project description be amended as follows: (1) a 45-foot-high concrete dam composed of a 194-foot-long non-overflow spillway, a 107-foot-long gated spillway, and a 363-foot-long overflow spillway surmounted by 6-foot-high flashboards; (2) a reservoir with a storage capacity of 11,250 acre-feet and a normal surface elevation of 151.1 feet mean sea level; (3) a powerhouse at the dam with 2 turbine-generator units with a total installed capacity of 13 MW; (4) a vertical slot fish ladder at the powerhouse; (5) a 1,100-foot-long tailrace; (6) a 46-kV, 1,400-foot-long transmission line; and (7) other appurtenances.

k. This notice also consists of the following standard paragraphs: B, C, and D2.

B. *Comments, Protests, or Motions to Intervene.*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents.*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203-RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. *Agency Comments.*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9073 Filed 4-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-419-000 et al.]

Natural Gas Certificate Filings; ANR Pipeline Company et al.

April 17, 1986.

Take notice that the following filings have been made with the Commission:

1. ANR Pipeline Company

[Docket No. CP86-419-000]

Take notice that on April 8, 1986, ANR Pipeline Company (Applicant), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP86-419-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing, the construction and operation of natural gas pipeline and related facilities and related transportation services, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to construct and operate 18.2 miles of 8⅝-inch pipeline in Forest and Marinette Counties, Wisconsin, and 17.1 miles of 36-inch pipeline in Oconto County, Wisconsin. In addition, Applicant requests authorization to construct and operate appurtenant facilities in Wisconsin and Ohio. These facilities, costing approximately $16,658,000, would be constructed in two phases and according to Applicant would enable it to transport up to 211,400 Mcf of natural gas per day after Phase I construction and up to 425,000 Mcf per day after Phase II.

Applicant states that it would transport Canadian and domestic natural gas for Transco Gas Services Company, Inc. (Gas Services), for a fifteen-year period and deliver the gas to Erie Pipeline System (Erie) as proposed in Docket No. CP86-329-000. Applicant would receive Canadian gas from Great Lakes Gas Transmission Company near Crystal Falls and Farwell, Michigan, and Gulf coast gas from Texas Gas Transmission Company near Eunice, Louisiana. The above volumes would be delivered to Erie for Gas Services' account at Defiance County, Ohio, it is explained.

Pursuant to an April 7, 1986, agreement, Gas Services would pay Applicant the following rates for transportation:

Point of receipt	Demand rate/Mcf per month	Commodity rate/Mcf (cents)	Demand volume (Mcf per day)
Phase I:			
Farwell	$1.71	5.67	37,500
Crystal Falls	$2.19	7.27	37,500
Eunice	$4.11	13.52	142,400
Total			217,400
Phase II:			
Farwell	$1.69	5.59	90,000
Crystal Falls	$2.96	9.75	180,000
Eunice	$4.09	13.44	156,500
Total			426,500

Comment date: May 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

2. Southern Natural Gas Company

[Docket No. CP86-406-000]

Take notice that on March 31, 1986, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-406-000 an application pursuant to section 7 of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing the transportation of natural gas for Atlanta Gas Light Company (Atlanta), acting as agent for Anglo-American Clays Corporation (Anglo-American), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 4.7 billion Btu of natural gas per day for Atlanta, as agent for Anglo-American, on an interruptible basis, for a one-year term. It is indicated that Anglo-American would purchase the gas from Diamond Shamrock Partners Limited Partnership. Applicant states that it would receive the gas for the account of Anglo-American at the Diamond Shamrock receiving station, offshore Louisiana. Applicant proposes to redeliver equivalent volumes of gas, less 3.25 percent for fuel and company-use gas, at an existing delivery point to Atlanta in Washington County, Georgia.

Applicant proposes to charge Atlanta a transportation rate of 48.2 cents per million Btu where the aggregate of the volumes transported by Applicant for Atlanta under any and all transportation agreements between Applicant and Atlanta, when added to the volumes of gas delivered under Applicant's Rate Schedule OCD, does not exceed Atlanta's daily contract demand from Applicant. For those volumes that exceed Atlanta's daily contract demand, Applicant proposes to charge 77.6 cents per million Btu. In addition Applicant proposes to collect the GRI surcharge of 1.35 cents per Mcf.

Applicant states that the proposed transportation arrangement would enable Anglo-American to diversify its natural gas supply sources and to obtain gas at competitive prices. In addition, Applicant indicates that it would obtain take-or-pay credit on all volumes transported under the arrangement.

Applicant also requests flexible authority to add delivery points in the event that Anglo-American obtains alternative sources of supply. It is stated that the redelivery point, the recipient and the maximum daily transportation volume would remain unchanged. It is further stated that Applicant would file a report providing certain information with regard to the addition of any delivery points.

Comment date: May 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Tennessee Gas Pipeline Company, a Division of Tenneco Inc.

[Docket No. CP86-415-000]

Take notice that on April 2, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Appliant), Post Office Box 2511, Houston, Texas 77001, filed in Docket No. CP86-415-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the transportation and delivery of natural gas for Southern Natural Gas Company (Southern), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Applicant states that pursuant to a gas transportation agreement, dated March 5, 1979, between Applicant and Southern, it transports up to 1,800 Mcf of natural gas per day, on a best-efforts basis, to the Placid Oil Company's plant, located in St. Mary Parish, Louisiana, for the account of Southern. It is stated that Applicant receives said volumes from the "B" production platform in South Marsh Island Block 243, offshore Louisiana. It is further stated that Southern has informed Applicant, by letter dated August 27, 1985, of its election to terminate the transportation arrangement, effective September 1, 1986.

Comment date: May 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice, that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission of its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9065 Filed 4-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CI86-325-000]

Samson Resources Co.; Application for Certificate of Public Convenience and Necessity and for an Order Permitting and Approving Limited-Term Abandonment and Pre-Granted Abandonment

April 16, 1986.

Take notice that on April 9, 1986, Samson Resources Company, (hereinafter referred to as Samson) filed an Application pursuant to sections 4 and 7 of the Natural Gas Act (NGA), the provisions of 18 CFR Parts 154 and 157 and 18 CFR 2.77(a)(1), seeking (i) a certificate of public convenience and necessity authorizing the sale for resale in interstate commerce of certain natural gas produced by Samson and its joint interest owners, and (ii) limited-term abandonment and pre-granted permanent abandonment of certain sales as described therein, to effectuate the sale and purchase of gas on the spot market, as more fully described in the Application which is on file with the Commission and open for public inspection. The term of the authorizations requested by Samson is two years. Alternatively, Samson requests that the Commission extend as to Samson for one year the blanker certificate and abandonment authority provided in *Tenneco Oil Company, et al.*, 33 FERC (CCH) ¶ 61.134 (1985), as extended for certain applicants in *Marathon Oil Company*, Docket Nos. CI85-651-001, *et al.* (March 31, 1986).

Samson states that the authority as requested is consistent with the Commission's rules and regulations and is necessary for Samson to continue making short-term and spot gas sales. Further, Samson states that, absent said authorization, the flexibility and efficiency necessary for successful operation in the spot market would be hindered.

Specifically, Samson requests that the Commission authorize Samson:

(i) To make sales for resale in interstate commerce for a period of two

VOL 51 ISS 78 AP 23 1986 UMI

years, without supply or market limitations, of gas subject to the Commission's NGA jurisdiction that is produced from various interests owned by Samson;

(ii) To make sales for resale in interstate commerce for a period of two years, without supply or market limitations, of gas subject to the Commission's NGA jurisdiction, produced from various interests attributable to other owners having interests in the same wells as Samson, to the extent that such joint interest owners agree to same;

(iii) To abandon for a two-year term sales for resale of gas subject to the Commission's NGA jurisdiction and previously certificated by the Commission, to the extent that such gas is released by interstate pipelines for resale in the spot market to third parties; and

(iv) To abandon permanently (pre-granted abandonment) any sale for resale in the spot market authorized pursuant any certificate issued herein.

Sales proposed to be made by Samson on behalf of itself and its joint interest owners will not involve a dedication of reserves but will be based on periodic nomination, either by purchasers or by Samson. The sales volumes, prices, purchasers, delivery points, transporter, and supply source will vary. Samson proposes to sell and deliver to various short-term and spot gas purchasers all or a portion of the gas Samson determines is available for sale at terms acceptable to Samson for a particular month. Samson will not be obligated to sell gas pursuant to any nomination or proposed nomination until the exact volumes, terms and conditions, and prices are agreed to by Samson and a purchaser. The actual contract between Samson and the short-term and spot gas purchaser may be for all or any portion of the quantity which was set out in the nomination or proposed nomination. All contracts entered into by Samson and the short-term and spot gas purchaser will be subordinate to the requirements of Samson's current pipeline purchasers.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 12, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirments of the Commission's rules of practice and procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (ANR Production Company); Order Denying Request for Waiver

Issued: April 21, 1986

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt, and C.M. Naeve.

On February 18, 1986, ANR Production Company (ProdCo) filed a request for a waiver of the restrictions in the transitional provisions of Order No. 436 so as to permit Transcontinental Gas Pipeline Corporation (Transco) to transport gas for ProdCo from Mustang Island Block A-85, offshore Texas, without becoming subject to the requirements of Order No. 436.[1]

On January 13, 1982, ANR Pipeline Conpany (ANR) entered into a transportation agreement with Transco whereby Transco would transport ProdCo's gas from Mustang Island under Part 284 of the Commission's Regulations. The transportation commenced on January 15, 1982. On October 17, 1983, Transco filed an extension report to continue service for an additional two years, to January 15, 1986. Transco did not file any further extension reports, and the transportation service ceased on Janaury 15, 1986. A new transportation agreement was executed on January 27, 1986.

The Commission has, on occasion, granted waivers of the restrictions in the transitional provisions under circumstances in which significant construction or expenditure of funds had occurred prior to October 9, 1985, in reliance on a transportation agreement, although the transportation had not commenced on or before October 9, 1985. But those are not the facts before us here. The transportation agreement was executed, and transportation commenced, prior to October 9, 1985. Thereafter, the parties allowed the transportation agreement to terminate, and the transportation ceased. The new transportation agreement was executed in 1986. Thus, there is no extant transportation agreement that predates the issuance of Order No. 436. Under these circumstances, the parties do not have an agreement eligible for transition treatment. Accordingly, the request for waiver is denied.

By the Commission.

Kenneth F. Plumb

Secretary

[FR Doc. 86-9072 Filed 4-22-86; 8:45 am]

BILLING CODE 6717-01-M

[1] 33 FERC ¶ 61,007 (1985). 50 FR 42408 (October 18, 1985) [FERC Statutes and Regulations ¶ 30,665].

[Docket No. GP86-20-000]

Atlas Energy Group, Inc.; Petition To Reopen and Vacate Final Well Category Determinations and Request to Withdraw

Issued: April 18, 1986.

State of Ohio, Department of Natural Resources, Section 107 NGPA Determinations Atlas Energy Group, Inc., Callahan Unit No. 1 Well, FERC No. JD 81-28565, Metropolitan Homes Investmment Corporation No. 1 Well, FERC No. JD 81-28549.

Take notice that on February 24, 1986, Atlas Energy Group, Inc. (Atlas) filed pursuant to § 275.205 of the Commission's regulations a petition to reopen and vacate final well category determinations under section 107(c)(5) of the Natural Gas Policy Act of 1978 (NGPA) for the wells listed in the caption of this notice, both of which are located in Ohio, and to withdraw its applications for the determinations. The Ohio Department of Natural Resources (Ohio) issued determinations that the wells qualified under NGPA sections 103 and 107(c)(5) and such determinations became final on or about June 15, 1981. Atlas desires to retain the final NGPA section 103 well category determinations for the wells.

Atlas states that in its well category applications it stated that the wells were completed subsequent to July 16, 1979 and were thus eligible for NGPA section 107(c)(5) status. Atlas states that, based on the Commission's subsequent clarification of its recompletion tight formation regulations regarding when a well is completed, it concluded that the wells were actually completed prior to July 16, 1979 and accordingly do not qualify as NGPA section 107(c)(5) recompletion tight formation wells.

The question of whether refunds, plus interest calculated under § 154.102(c) of the regulations, will be required is a matter which will be considered by the commission in ruling on the subject petition.

Any person desiring to be heard or to protest this petition should file a motion to intervene or protest in accordance with rules 214 or 211 of the Commission's rules of practice and procedure. All motions to intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, not later than 30 days following publication of this notice in the **Federal Register**. All protests will be considered by the Commission but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with rule 214. Copies of this petition are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 8950-004]

James Caples; Surrender of Preliminary Permit

April 18, 1986.

Take notice that James Caples, Permittee for the Twelve Mile Creek Project No. 8950, has requested that his preliminary permit be terminated. The preliminary permit for Project No. 8950 was issued on September 27, 1985, and would have expired on August 31, 1988. The project would have been located on Twelve Mile Creek in Lemhi County, Idaho.

The Permittee filed the request on April 7, 1986, and the preliminary permit for Project No. 8950 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 28 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Citizens Energy Corp. and Citizens Resources Corp.; Application

[Docket No. CI86-56-001]

April 18, 1986.

Take notice that on April 14, 1986, Citizens Energy Corporation and Citizens Resources Corporation (jointly "Citizens") of 530 Atlantic Avenue, Boston, Massachusetts 02210, filed an application for extension for a one-year period of certificate and abandonment authority granted to them by the Commission on December 5, 1985, in Docket No. CI86-56-000.[1]

Any person desiring to be heard or to make any protests with reference to said application should on or before May 6, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR sections 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

[Docket No. CI86-22-001]

Fina Oil and Chemical Co., Petrofina Delaware, Inc., Fina Oil & Gas, Inc., Application

April 16, 1986.

Take notice that on March 31, 1986, Fina Oil and Chemical Company (FOCC), Petrofina Delaware, Incorporated (PDI), and Fina Oil & Gas, Inc. (FOGI) of 8350 N. Central Expressway, Suite 1866, Dallas, Texas 75221, filed an application pursuant to Sections 4 and 7 of the Natural Gas Act, 15 U.S.C. 717-717z (1982) (NGA) and Section 157 of the Commission's Regulations, 18 CFR 157 (1985), requesting for an extension of the blanket certificate of public convenience and necessity issued by the Commission in Docket No. CI86-22-000 on November 1, 1985.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 5, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

[1] Citizens Gas Supply Corporation, a wholly-owned subsidiary of Citizens Energy Corporation, also requests the Commission to grant it certificate and abandonment authority identical to that granted Citizens on December 5, 1985. Citizens Gas Supply Corporation was not in existence at the time Citizens filed its application to initiate this proceeding, but now has obtained corporate authority to engage in the transactions contemplated in that application. Citizens Gas Supply Corporation will promptly furnish the Commission with any documentation necessary to grant the instant request.

[Project No. 3195-014]

Joseph M. Keating; Notice Denying Motion for Reconsideration

April 18, 1986.

On January 27, 1986, the Commission issued an order denying the appeal of Harriet La Flamme in Project No. 3195.[1] On February 27, 1986, Ms. La Flamme filed a request for rehearing of that order. On March 21, 1986, a notice was issued rejecting the request as late-filed.

On April 1, 1986, Ms. La Flamme filed a motion for reconsideration of the March 21 rejection. The motion is in essence a request for an extension of the thirty-day deadline for submitting rehearing requests. The rehearing deadline is statutorily imposed,[2] and the Commission is not authorized to extend or waive it. Therefore, the motion for

[Project No. 5652-001]

George and Melvin Osborne; Surrender of Exemption

April 18, 1986.

Take notice that George and Melvin Osborne, exemptees for the Fall Creek Power Project No. 5652, have requested that their exemption be terminated because construction and operation of the project is not feasible at this time. The exemption for Project No. 5652 was issued on April 18, 1982. The project would have been located on Fall Creek in Power County, Idaho. The exemptees have stated that no ground disturbing activity has taken place; therefore, no conditions are needed concerning the restoration of lands.

The exemptee filed the request on March 24, 1986, and the exemption for Project No. 5652 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385. 2007, in which case the exemption shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

BILLING CODE 6717-01-M

[Docket No. SA86-8-000]

Palo Duro Pipeline Co., Inc.; Petition For Adjustment

Issued: April 17, 1986.

On January 2, 1986, Palo Duro Pipeline Company, Inc. (Palo Duro) filed with the Federal Energy Regulatory Commission a petition for an adjustment from the requirements of 18 CFR 284.123(b), pursuant to section 502(c) of the Natural Gas Policy Act (NGPA). 15 U.S.C. 3412(c) (1982). Palo Duro seeks to establish a rate for NGPA section 311 transportation service by reference to the currently effective rate for comparable intrastate transportation on file with the Texas Railroad Commission. Palo Duro asserts that such relief is necessary to spare it the undue hardship of dual regulatory review.

In its petition, Palo Duro seeks an adjustment approving its transportation rate, as well as permission to file an Initial Full Report and a Termination Notice for the transportation. Palo Duro indicates that the rate of 20¢ per MMBtu, plus one percent of volumes for fuel costs, charged to industrial end-users, was determined by reference to the 30.88¢ currently effective rate for comparable intrastate service contained in a tariff on file with the Texas Railroad Commission. While noting that the rate used was not based on city gate service as required under § 284.123(b)(1)(ii) of the Commission's regulations, Palo Duro points out its petition that the rates used were on file with the Texas Railroad Commission and represent a discount of Palo Duro's filed rate. Palo Duro concludes that the relief is necessary to spare the company the burdens and undue hardship of unnecessary dual agency review, especially in view of the short-term nature of the transaction and the nonjurisdictional customers involved.

The procedures applicable to the conduct of this adjustment proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure. 18 CFR Part 385, Subpart K (1985). Any person desiring to participate in this adjustment proceeding must file a motion to intervene in accordance with the provisions of Subpart K. All motions to intervene must be filed within fifteen days after publication of this notice in the Federal Register.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-307-000]

Sea Robin Pipeline Co.; Notice of Application for Abandonment Authorization

April 17, 1986.

Take notice that on April 7, 1986, Sea Robin Pipeline Company (Applicant), Post Office Box 1478, Houston, Texas 77251-1478, filed on behalf of Pogo Producing Company (Pogo) an application pursuant to § 7(b) of the Natural Gas Act and Section 157.30 of the Commission's Regulations for authorization to abandon Pogo's obligations established under certificates of public convenience and necessity issued in Docket Nos. CI76-653, CI76-648, CI76-706, CI78-935, CI78-938 and CI78-939. The reasons for the proposed abandonment are more fully set forth in the application, which is on file with the Commission and open to public inspection. Applicant states that Pogo is the producer and seller of natural gas. It received certificates of public convenience and necessity in the six (6) dockets identified above governing sales of natural gas to Applicant pursuant to six (6) sales contracts, all of which have expired by their own terms. The location, docket number, contract date, rate schedule and applicable price categories under each of the six sales are:

Location of sale	Authorized in docket No.	Contract date	Rate schedule No.	Applicable prices
East Cameron, block 334	CI76-653	06/17/76	12	§ 104 Post 1974, § 102(d).
East Cameron, block 335	CI76-648	06/17/76	11	§ 104 1973-1974 Biennium, § 104 Post 1974, and § 102(d).
South Marsh Island, block 128	CI76-706	07/02/76	13	§ 104 Post 1974, § 102(d).
Eugene Island, block 261	CI78-935	07/07/77	34	§ 104 Post 1974, § 102(d).
West Cameron, block 609	CI78-938	07/07/77	35	§ 104 1973-1974 Biennium, § 104 Post 1974, and § 102(d).
West Cameron, block 617	CI78-939	07/07/77	36	

Applicant states that all contracts have terminated, and the reserves previously covered by the contracts are no longer required by Applicant to meet the needs of its customers. Applicant further states that on November 21, 1984, Pogo filed in the Fifteenth Judicial District Court for the Parish of Vermilion, Louisiana, in Docket No. 84-48823, a petition seeking preliminary and permanent injunctive relief requiring Applicant to continue to purchase volumes of gas under the expired contracts. Applicant states that on March 26, 1985, the Court issued a preliminary injunction ordering Applicant to take and pay for both the monthly minimum take and pay quantity of approximately 55% of delivery capacity and the annual take-or-pay quantity of 85% of delivery capacity under the expired contracts. Applicant further states that under such contracts it is required to purchase 44,259 Mcf/d of gas from Pogo which has a weighted average cost of $3.04/Mcf, which is $0.68/Mcf higher than Applicant's total weighted average cost of gas of $2.36/Mcf.

Applicant states that the court's finding that it had any obligation to take gas from Pogo was based upon Section XI.06 of Article XI of the subject contracts and the court's belief that abandonment was not available to Pogo. According to Applicant, Section XI.06 states:

Section XI.06.—Deliveries After Termination of Contract

If Seller [Pogo] shall be required for any reason by an applicable law, rule, regulation or order to continue making deliveries to Buyer [Sea Robin] of the gas which is the subject matter of this Contract notwithstanding that this Contract shall have been terminated for any reason, whether by its own terms or by Seller or Buyer, it is expressly agreed and recognized by Seller and Buyer that Seller shall have no contractual obligations by reason of this Contract to Buyer in any such event, but Seller shall be entitled to enforce each and every provision of this contract against Buyer, such provisions being conclusively deemed, in the absence of a showing by Seller of a greater fair value, to be the fair value of the services performed and the subject matter delivered by Seller to Buyer under legal constraint, but without a contract. The obligation of Buyer under this Section XI.06 is absolute and unconditional and will remain in effect notwithstanding any event or circumstance whatsoever which might otherwise serve as a defense or relieve Buyer of any part of such obligation, *save and except that this obligation shall cease at such time as Seller shall become entitled in accordance with all applicable laws, rules, regulations and orders to cease once and for all making deliveries to Buyer of the gas which is the subject matter of this Contract.* (emphasis added.)

Applicant states that Pogo itself has not sought abandonment of these sales because Pogo is benefiting greatly by selling gas to Applicant far in excess of Applicant's needs at unrealistically high prices. Applicant states that while these purchases increase its average cost of gas and is therefore a significant detriment, such purchases also require it to reduce its purchases from other producers, thus increasing Applicant's potential take-or-pay exposure. Applicant states that the expeditious grant of the requested abandonment authorization on behalf of Pogo would remedy the above situation by removing the regulatory impediment that constitutes the foundation on which the injunction rests.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 6, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties of the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules. Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-45-001]

Union Oil Company of California and Union Exploration Partners, LTD.; Application

April 16, 1986.

Take notice that on March 28, 1986, Union Oil Company of California and Union Exploration Partners, Ltd. (Union), of P.O. Box 7600, Los Angeles, California 90051, filed an application pursuant to Sections 4 and 7 of the Natural Gas Act, 15 U.S.C. sections 717c and 717f, and Part 157 of the Federal Energy Regulatory Commission's (Commission) Regulations, 18 CFR 157, requesting the Commission to amend its Order Permitting and Approving Limited-Term Abandonments and Granting Certificates in Vesta Energy Company, *et al.*, Docket Nos. CI85-400-001, *et al.* such that the term of the programs authorized by the Order may be continued for an additional one-year period, through March 31, 1987, or as may be otherwise extended.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 5, 1986, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. RP86-34-001]

Western Transmission Corporation Compliance Filing

April 18, 1986.

Take notice that on February 13, 1986, Western Transmission Corporation (Western) tendered for filing the following sheets to its FERC Gas Tariff, Original Volume No. 1: Twenty-Sixth Revised Sheet No. 3-A, Substitute Seventh Revised Sheet No. 4.

Western states that these sheets reflect rates based on an updated cost and revenue study and are filed pursuant to letter order dated January 29, 1986 in Docket No. RP86-34-000. Western further states that the cost and revenue study reflects removal of the cash working capital allowance and use of the current gas cost adjustment to develop an amount for fuel usage. Western requests an effective date of February 1, 1986.

The February 13, 1986 filing was not accompanied by a filing fee or a petition for waiver and could not be processed pursuant to § 381.106 of the Commission's regulations. On March 31, 1986, Western filed a Petition For Waiver Of Filing Fee requesting waiver of the filing fee on the grounds that a fee of equal amount was submitted with its December 30, 1985 filing and that the February 13, 1986 filing merely provided an additional tariff sheet and one substitute tariff sheet as the Commission ordered in the same proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211 (1985)) All such motions or protests should be filed on or before April 25, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-66129; FRL-3004-4]

Pesticide Products Containing Carbon Tetrachloride; Notice of Intent To Cancel Registrations and Notice of Transmittal and Availability of Draft Notice To Cancel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability of Draft Notice of Intent to Cancel; Notice of Transmittal.

SUMMARY: This notice announces the availability for comment of a draft notice of intent to cancel the registrations of pesticide products containing carbon tetrachloride (CCl_4) used for grain fumigation pursuant to section 6(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). These products have the potential to cause oncogenic, mutagenic, and other chronic effects. The benefits of continued use of these products are limited. The remaining use on encased museum specimens will be allowed to continue because the current label instructions are sufficient to reduce applicator exposure and the risks from using this product are justified by the benefits.

DATE: Comments from the public on the draft notice must be received on or before [June 23, 1986, in the **Federal Register**].

ADDRESSES: Requests for copies of the draft intent to cancel should be submitted to:

Linda Zarow, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460;

Office location and telephone number: Rm. 711, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703-557-7453).

Submit three copies of written comments, identified with the document control number "OPP-66129," by mail to:

Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460;

In person, deliver comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTRACT: Linda Zarow (703-557-7453).

SUPPLEMENT INFORMATION: Legally to be sold and distributed in the United States, a pesticide product must be registered or exempt from registration pursuant to FIFRA. A pesticide product may remain registered only if it does not pose unreasonable adverse effects on the environment, that is, if it does not present any unreasonable risk to man and the environment, taking into account the economic, social, and environmental costs and benefits of the use of the pesticide. FIFRA sections 2(bb) and 6(b). If the Agency determines that a product no longer satisfies this requirement for registration, the Administrator may initiate the process for concelling its registration by issuing a notice of intent to cancel pursuant to section 6(b) of FIFRA. Section 6(b) and 25(d) of FIFRA require that the Environmental Protection Agency submit any proposed notice of intent to cancel pesticide registrations to the Secretary of Agriculture and to the Scientific Advisory Panel (SAP) at least 60 days prior to issuing a notice of intent to cancel. Accordingly, copies of a draft notice of intent to cancel pesticide products containing, $CC1_4$ have been sent to Secretary and the SAP for comment.

The Special Review (RPAR) of carbon tetrachloride was started by the publication of a notice in the **Federal Register** of October 15, 1980 (45 FR 68535). The Special Review was started because the Agency determined that continued use of carbon tetrachloride posed a risk of oncogenic, mutagenic, and other adverse effects and that it satisfied the criteria for commencing a Special Review set forth at 40 CFR 162.11(a) (3) (ii). Based on the information submitted and developed by the Agency in the course of the Special Review, as well as other information developed since 1980, EPA has concluded that exposure to products containing carbon tetrachloride continues to pose oncogenic, mutagenic, and other adverse effects.

To characterize better the risk attributable to continued use of carbon tetrachloride, the Agency required registrants to submit, pursuant to section 3(c) (2) (B) of FIFRA, the following: a reproduction study, teratology studies in two species, residue chemistry data, updated Confidential Statements of Formula, and product chemistry information. Many registrants chose to cancel voluntarily their carbon tetrachloride registrations rather than submit or commit to produce the required data. None of the remaining registrants of grain fumigant products have agreed to produce the data, and their registrations have now been suspended pursuant to section 3(c) (2) (B). Thus, there is now no registered pestcide product containing carbon tetrachloride for gain uses which registrants may legally sell or distribute in the United States.

A single product containing $CC1_4$ for use on encased museum specimens remains registered and unsuspended. EPA is now proposing to cancel the registrations of carbon tetrachloride products which have been suspended. These products include those registered for use as fumigants on stored grain, in flour milling and grain processing plants. All use of carbon tetrachloride for these purposes will soon cease and is now insignificant. There are altnatives readily available for all uses of carbon tetrachloride. Because alternatives are available and efficacious, there will be no significant impact resulting from cancellation of $CC1_4$. Moreover, the remaining registrants and potential users have elected not to comply with the requirements which would permit products to be marketed again. Accordingly, there are not significant benefits from continuing the registrations of carbon tetrachloride for these purposes.

Based on the potential oncogenic, mutagenic, and other adverse risks of products containing carbon tetrachloride and the limited benefits of continued registration of these products, EPA has concluded that the continued registration of food-use pesticide products containing carbon tetrachloride poses unreasonable adverse effects of the environment, including man. The risks attributable to the continued use of carbon tetrachloride are largely

associated with the exposure to residues in the diet. These residues cannot be eliminated by changes in the use pattern because any use of carbon tetrachloride for treatment of food must result in some contamination of the treated food product. Thus, the Agency is proposing to cancel the food-use registrations of all pesticide products containing the active ingredient, carbon tetrachloride.

The registration of products containing $CC1_4$ for use on encased museum specimens will be allowed to continue. The current label instructions for these products are sufficient to reduce applicator exposures and risks. Therefore, the Agency has concluded the risks from using this product are outweighed by the benefits.

Copies of the proposed notice of intent to cancel are available upon request. Although not required to do so by FIFRA, the Agency invites comments from the public on the proposal. Such comments must be submitted by June 23, 1986. The Agency does not anticipate granting any extensions of time to submit comments.

A limited number of comments were submitted in response to the notice of special review. Most of the information in these comments is not outdated. Therefore, the Agency has chosen to respond formally to these comments at this time. The Agency, however, will respond to any significant comments submitted in response to the proposed notice of intent to cancel when it issues a final determination. Commenters are invited to reiterate any comments which were previously submitted to the extent the commenters believe their 1980 comments are still relevant. In addition, all interested persons are invited to submit any additional comments.

Dated: April 10, 1986.

John A. Moore,
Assistant Administrator for Pesticides and Toxic Substances.

Ethylene Dibromide; Amendment to EDB Registration for Postharvest Fumigation of Exported Citrus Fruit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has amended the registration under which ethylene dibromide (EDB) may be used to fumigate citrus fruit exported from the United States between now and the end of the 1988-1989 citrus harvest season. The label changes have imposed specific requirements on the fumigation of fruit and the shipping of fumigated fruit in an attempt to significantly reduce exposure to workers who fumigate, transport, and handle the treated crop. In addition, the amended label reduces the quality of EDB treated fruit to be shipped over the next 3 years.

FOR FURTHER INFORMATION CONTACT: By mail:

Linda K. Vlier, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW. Washington, DC 20460.

Office location and telephone number:

Rm. 711, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-7451).

An administrative file containing information used in development of this label amendment is available for public inspection from 8 a.m. to 4 p.m., Monday through Friday, except on legal holidays, in Rm. 236, Crystal Mall No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia.

SUPPLEMENTARY INFORMATION: On September 28, 1983, EPA issued a Notice of Intent to Cancer Registration of Pesticide Products Containing Ethylene Dibromide (EDB) which was published in the **Federal Register** of October 11, 1983 (48 FR 46234). The Notice proposed cancellation of the registrations for pesticide products containing EDB for use as a quarantine fumigant.

The Agency amended the Notice of Intent to Cancel to permit continued registration and use of EDB as a quarantine fumigant for exported citrus and papaya provided additional worker protection measures were instituted, as published in the **Federal Register** of April 10, 1984 (49 FR 14161). The amendment limited use of EDB on exported citrus to the months of October, November, December and January.

In August 1985, a request was made to the Agency to amend the EDB registration to eliminate the temporal restriction on application. On February 14, 1986, the Agency amended the registration to allow the use of EDB on exported citrus throughout the calendar year but replaced the limitation on the time of the season in which EDB may be used with a new limitation on quantities of fruit which can be fumigated. The label will expire in 3 years. The Agency is also issuing a Data Call-In Notice for additional worker exposure data. These data are being required to enable EPA to evaluate the effectiveness of the revised label requirements to reduce exposure of workers to EDB.

The label which expires at the end of the 1988/89 harvest season specifies: (1) Maximum volumes of citrus which may be treated with EDB each year; (2) a reduction in the maximum volume treated each harvest season; and (3) an increase in the use of containerized shipments to reduce worker exposure to EDB from treated citrus. The Agency will not consider amending this label to permit an increase in the volume of fruit treated or reduce the minumum percentage of fruit shipped containerized. However, the Agency may consider amending the label to modify workplace practices or equipment to further reduce worker exposure to EDB as new information becomes available. The label may also be amended to provide alternative programs for treatment of citrus.

The Agency may allow continued use of EDB past the 1988/89 harvest season if an evaluation of the relevant risk and benefit information shows an extension is warranted. The Agency is committed to reconsidering the continued availability of EDB for use on exported citrus before the June 30, 1989 expiration of the amended label.

The Agency will not extend the use of EDB if the exposure data indicate that any worker group is at significant risk when fumigating fruit, or handling treated fruit. The Agency however, may extend the use of EDB if the risks to workers are at relatively low levels and the economic impacts of eliminating EBD remain significant. Specifically, before an extension of EDB use will be permitted, the Agency will require:

1. Dramatic reductions in EDB exposure to workers.

2. Compliance with the requirements identified on the label.

3. Timely submission of all data required under the section 3(c)(2)(B) notice in full compliance with all quality assurance requirements.

The Agency commitment to reconsider and extension of use in no way precludes the Agency from taking either cancellation or suspension actions under section 6 of FIFRA prior to the expiration of the current label if such regulatory action is deemed appropriate.

Dated: April 14, 1986.

Susan H. Sherman,
Acting Director, Office of Pesticide Programs.

Zoecon Corp.; Approval of a Pesticide Product Registration

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of an application submitted by Zoecon Corp. to register the pesticide product Mavrik® 2E Insecticide containing an active ingredient involving a changed use pattern pursuant to the provision of section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT:
By mail.
George LaRocca, Production Manager (PM) 15, Registration Division (TS-767C), Office of Pesticide Programs, 401 M St. SW., Washington, DC 20460.
Office of location and telephone number: Rm. 204, TS-767C, Environmental Protection Agency, 1921 Jefferson Davis Hwy, Arlington, VA. (703-557-2400).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of November 21, 1984 (49 FR 45923), which announced that Zeocon Corp., 975 California Ave., Palo Alto, Ca 94304, had submitted an application to conditionally register the pesticide product Mavrik® 2E Insecticide containing the active ingredient (alpha *RS, 2R*)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[chloro-4-(trifluoromethyl)anilino]-3-methyl-butanoate] at 25 percent; involving a changed use pattern of the product.

The application was approved on March 31, 1986 for Mavrik® 2E Insecticide for use on cotton. The product was assigned EPA Registration No. 20954-115.

The Agency has considered all required data on the risks associated with the proposed use of alpha *RS,2R*)-fluvalinate [(*RS*)-alpha-cayano-3-phenoxybenzyl (*R*)-2-[chloro-4-(trifluoromethyl) anilino]-3-methyl-butanoate] and information on social, economic, and environmental benefits to be derived from use. Specifically, the Agency has considered the nature of the chemical and its pattern of use, application methods and rates, and level and extent of potential exposure. Based on these reviews, the Agency was able to make basic health and safety determinations which show that use of (alpha *RS, 2R*(-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[chloro-4-(trifluoromethyl)anilino]-3-methyl-butanoate] when used in accordance with widespread and commonly recognized practive, will not generally cause unreasonable adverse effects on the environment.

More detailed information on this registration is contained in a Chemical Fact Sheet on (alpha *RS, 2R*)-fluvalinate [(*RS*)-alpha-cyano-3-phenoxybenzyl (*R*)-2-[chloro-4(trifluoromethyl)anilino]-3-methyl-butanoate].

A copy of this fact sheet, which provides a summary description of the chemical, use patterns and formulations, science findings, and the Agency's regulatory position, rationale, and data gaps may be obtained from Registration Division (TS-767C), Environmental Protection Agency, Registration Support and Emergency Response Branch, 401 M St. SW., Washington, D.C. 20460. In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 236, CM#2, Arlington, VA 22202 (703-557-3262). Request for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A-101), 401 M St. SW., Washington, DC 20460.

Such requests should: (1) identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.

Dated: April 14, 1986.

Susan H. Sherman,
Acting Director, Office of Pesticide Programs.

Premanufacture Notices; Monthly Status Report for August 1985

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substances Control Act (TSCA) requires EPA to issue a list in the Federal Register each month reporting the premanufacture notices (PMNs) pending before the Agency and the PMNs for which the review period has expired since publication of the last monthly summary. This is the report for August 1985.

Nonconfidential portions of the PMNs may be seen in Rm. E-107 at the address below between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

ADDRESS: Written comments, identified with the document control number "[OPTS-53077]" and the specific PMN number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E-201, 401 M Street SW., Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT:
Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-613, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: This monthly status report is published in the Federal Register pursuant to section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)). Effective with this notice, the following nonsubstantive changes in format are being initiated: (a) the chemical identity listings, the Federal Register citations, and the review period expiration date listings are being eliminated from categories II (PMNs received in previous months and still under review) and III (PMNs for which the review period ended this month); and (b) the monthly cumulative listing in category V of PMNs for which the review period has been suspended will be replaced with biannual cumulative listings (January and July) and monthly updates of those listings for the remaining ten months. These changes do not significantly affect the quantity of information presented in this monthly status report.

Dated: March 21, 1986.

Denise Devoe,
Acting Director, Information Management Division.

Premanufacture Notices Monthly Status Report August 1985

I. 149 Premanufacture Notices Received During the Month

PMN No.	Identity/generic name	FR citation	Expiration date
P 85-1296	Generic name: Saturated and unsaturated alkylcarboxylic acid diethanolamine/triethanolamine salt	50 FR 32302 (32306) (8-9-85)	Oct. 29, 1985.
P 85-1297	Generic name: Poly-beta-fluoroalkylethyl acrylate and alkyl acrylate	50 FR 33630 (8-20-85)	Oct. 30, 1985.
P 85-1298	Generic name: Condensation product of an alkylphenol and alkylamine, and formaldehyde, calcium salt	50 FR 33630 (8-20-85)	Nov. 2, 1985.

P 85-1339	Generic name: Bisphenol A, epichlorohydrin, diethanolamine, polysubstituted alkane adduct polymer	50 FR 34189 (34190) (8-23-85)	Do.
P 85-1340	Generic name: Polyester resin	50 FR 34189 (34190) (8-23-85)	Do.
P 85-1341	Generic name: Sulfonates of ethoxylated alcohols	50 FR 34189 (34190) (8-23-85)	Do.
P 85-1342	Generic name: Substituted diazo compound	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1343	Generic name: Silicon substituted organic amine	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1344	Generic name: Alkali metal salt of substituted sulfo-aryl transition metal complex	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1345	Generic name: Polysubstituted sulfo-aryl transition metal complex	50 FR 34189 (34191) (8-23-85)	Nov. 12, 1985.
P 85-1346	Generic name: Rosin maleated, fumarated ester with pentaerythritol, polypropylene glycol, and glycerine	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1347	Generic name: Rosin maleated, fumarated ester with pentaerythritol and diethylene glycol	50 FR 34189 (34191) (8-23-85)	Do
P 85-1348	Generic name: Rosin maleated, fumarated ester with pentaerythritol, diethylene glycol, glycerine, ethylene glycol, and castor oil.	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1349	Generic name: Polyamide	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1350	Generic name: Polyamide	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1351	Polymer of poly(oxy-1,4-butanediyl), alpha-hydro-omega-hydroxy-; 1,1'-biphenyl, 4,4'-diisocyanato-3,3'dimethyl; water; silicone surfactant; and 1,4-diazabicyclo-[2.2.2]octane.	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1352	Polymer of poly(oxy-1,4-butanediyl), alpha-hydro-omega-hdroxy-, 1,1'biphenyl,4,4'-diisocyanato-3,3'-dimethyl, 1,4-butanediol, 1, 3-propanediol, 2-(hydroxy-methyl)-2-methyl, and 1,4-diazabicyclo-[2.2.2]octane.	50 FR 34189 (34191) (8-23-85)	Do.
P 85-1353	1,3-benzenedicarboxylic acid, polymer with 1,6-hexanediol and nonanedioic acid; naphthalene, 1,5-diisocyanato-; phenol, 4,4'-(methanetetrayldinitrilo)bis(3,5-bis (1-methylethyl)-; hexamethylene 1,6-diisocyidurethane, ethanol, 2,2'(1,4-phenylenebis(oxy)bis-1,4 butanediol.	50 FR 34189 (34191) (8-23-85)	Do
P 85-1354	Polymer of poly(oxy-1,4-butanediyl), alpha-hydro-omega-hydroxy-, 1,1'-biphenyl, 4,4'-diisocyanato-3,3'-dimethyl, 1,4-butanediol, 1,3-propanediol, 2-(hydroxymethyl)-2-methyl, and 1,4-diazabicyclo-[2.2.2]octane.	50 FR 34189 (3419) (8-23-85)	Do.
P 85-1355	Polymer of poly(oxy-1,4-butanediyl), alpha-hydro-omega-hydroxy-, 1,1'-biphenyl, 4,4'-diisocyanato-3,3'-dimethyl, 1,4-butanediol, 1,3-propanediol, 2-(hydroxymethyl)-2-methyl, and 1,4-diazabicyclo-[2.2.2]octane.	50 FR 34189 (34192) (8-23-85)	Do.
P 85-1356	Polymer of hexanedioic acid, polymer with 1,2-ethanediol; naphthalene, 1,5-diisocyanato-; castor oil; phenol, 4,4'-(methanetetrayldinitrilo)bis(3,5-bis(1-methylethyl)-; castor oil, sulfonated; sodium salt, water silcone additive, triethylene diamine catalyst.	50 FR 34189 (34192) (8-23-85)	Do.
P 85-1357	Polymer of E-caprolactone and trimethylol propane, castor oil, 1,1'-biphenyl, 4,4'-diisocyanato-3,3'-dimethyl, phenol, 4,4'-(methanetetrayldinitrilo)bis(3,5-bis(1-methylethyl)-, 1,4-butanediol; 1,3-propanediol, 2-(hydroxymethyl)-2-methyl, 1,4-diazabicyclo[2.2.2]octane.	59 FR 35314 (8-30-85)	Nov. 13, 1985.
P 85-1358	Generic name: Aromatic acetamide	50 FR 35314 (8-30-85)	Do.
P 85-1359	Generic name: Phenolic resin	50 FR 35314 (8-30-85)	Do.
P 85-1360	Generic name: Esterified polymeric acid	50 FR 35314 (8-30-85)	Do.
P 85-1361	Generic name: Titanium IV neoalkoxy bisneodecanoato	50 FR 35314 (8-30-85)	Do.
P 85-1362	Generic name: Titanium IV neoalkoxy, tris(dodecyl-benzenesulfonato-O	50 FR 35314 (8-30-85)	Do.
P 85-1363	Generic name: Titanium IV neoalkoxy, tris(3-amino)phenylato	50 FR 35314 (8-30-85)	Do.
P 85-1364	Generic name: Titanium IV neoalkoxy, triethylenediaminoethanolato	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1365	Generic name: Titanium IV neoalkoxy, tris(diisooctyl)pyrophosphato-O	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1366	Generic name: Titanium IV neoalkoxy, bis(dioctyl)phosphato-O	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1367	Generic name: Titanium IV neoalkoxy tris(octyl		

VOL 51 ISS 78 APR 23 1986 UMI

I. 149 PREMANUFACTURE NOTICES RECEIVED DURING THE MONTH—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
P 85-1368	Generic name: Alkyl benzoic acid metal complex	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1369	Generic name: Ethenyl silane ester	50 FR 35314 (35315) (8-30-85)	Nov. 17, 1985.
P 85-1370	Generic name: Alkyl(heterocyclicyl) phenylazoheteromonocyclicpolyons	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1371	Generic name: Alkyl-heterocyclicquinazalone	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1372	Generic name: Substituted polyhydronaphthalenol	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1373	Generic name: 2-Hydroxyethyl trialkylacetate with carbon numbers of C_{11}-C_{28}	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1374	Generic name: Amine-modified epoxy resin	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1375	Generic name: Polypropylene toluene sulfonate	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1376	Generic name: Polypropylene toluene	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1377	Generic name: Alkyl fatty ester	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1378	Generic name: Reaction product of bismaleimide with aminoaryl hydrazide	50 FR 35314 (35315) (8-30-85)	Do.
P 85-1379	Generic name: Alkyl benzoinazole	50 FR 35314 (35316) (8-30-85)	Nov. 18, 1985.
P 85-1380	Generic name: Ester-modified epoxy resin	50 FR 35314 (35316) (8-30-85)	Do.
P 85-1381	Generic name: Unsaturated polyester	50 FR 35314 (35316) (8-30-85)	Do.
P 85-1382	Generic name: Amine-modified epoxy resin	50 FR 35314 (35316) (8-30-85)	Do.
P 85-1383	Generic name: Amine-modified epoxy resin	50 FR 35314 (35316) (8-30-85)	Do.
P 85-1384	Generic name: Butyltin carboxylate derivative	50 FR 35314 (35316) (8-30-85)	Nov. 19, 1985.
P 85-1385	Generic name: Butylmercaptide	50 FR 35314 (35316) (8-30-85)	Do.
P 85-1386	Polymer of styrene; acrylonitrile; and maleic anhydride	50 FR 36669 (9-9-85)	Nov. 20, 1985.
P 85-1387	Generic name: Carboxy substituted aromatic sulfonamide	50 FR 36669 (9-9-85)	Do.
P 85-1388	Generic name: Vinyl chloride-vinyl acetate hydroxyl modified copolymer	50 FR 36669 (9-9-85)	Do.
P 85-1389	Generic name: Fluoro polyaryl ether ketone	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1390	Generic name: (Dialkyl-substituted hydroxyphenyl)benzotriazole	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1391	4-Isopropyl thioxanthone	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1392	Generic name: Zinc salt of a carboxy substituted aromatic sulfonamide	50 FR 36669 (36670) (9-9-85)	Nov. 23, 1985.
P 85-1393	Generic name: Polymer of bisanhydride of bisphenol-A, and an aromatic diamine	50 FR 36669 (36670) (9-9-85)	Nov. 24, 1985.
P 85-1394	Benzenamine, N,N'-(1,4-phenylenedimethylidyne)bis[3-ethynyl]	50 FR 36669 (36670) (9-9-85)	Nov. 25, 1985.
P 85-1395	Generic name: Functionalized polyacrylate salt—acrylate ester	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1396	Copolymer of 2-hydroxyethylmethacrylate and sodium styrenesulfonate	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1397	Generic name: Acrylic copolymer latex	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1398	Generic name: Aliphatic polyurethane aqueous dispersion	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1399	Generic name: Substituted phenylazo benzenesulfonic acid	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1400	Generic name: Disubstituted phenylazo disubstituted naphthalenesulfonic acid, salt	50 FR 36669 (36670) (9-9-85)	Do.
P 85-1401	Generic name: Disubstituted phenylazo, disubstituted naphthalenesulfonic acid, substituted alkyl amine salt	50 FR 36669 (36671) (9-9-85)	Do.
P 85-1402	Substituted phenylazo disubstituted naphthalenesulfonic acid, salt	50 FR 36669 (36671) (9-9-85)	Do.
P 85-1403	Generic name: Substituted phenylazo disubstituted naphthalenesulfonic acid, substituted alkylamine salt	50 FR 36669 (36671) (9-9-85)	Do.
P 85-1404	Generic name: Substituted phenylazo substituted phenylazo benzenesulfonic acid, salt	50 FR 36669 (36671) (9-9-85)	Do.
P 85-1405	Generic name: Substituted phenylazo substituted phenylazo benzenesulfonic acid, compound with substituted alkylamine.	50 FR 36669 (36671) (9-9-85)	Do.
P 85-1406	Generic name: Substituted aryl-substituted aryl heterocycle, carboxylate salt	50 FR 36669 (36670) (9-9-85)	Nov. 26, 1985.
P 85-1407	Generic name: Phosphorodithioic acid, dialkyl ester, alkylammonium salt	50 FR 36194 (36195) (9-20-85)	Nov. 27, 1985.
P 85-1408	Generic name: Substituted alkyl, alkyl oxazolidine	50 FR 36194 (36195) (9-20-85)	Do.
P 85-1409	Generic name: Unsaturated polyester	50 FR 36194 (36195) (9-20-85)	Do.
P 85-1410	Generic name: Unsaturated polyester polymer	50 FR 36194 (36195) (9-20-85)	Do.
P 85-1411	Generic name: Alkyl aluminoxanes	50 FR 36194 (36195) (9-20-85)	Do.
P 85-1412	Generic name: N-(beta-substituted propyl) benzenesulfonamide	50 FR 33628 (33629) (8-20-85)	Aug. 22, 1985.
Y 85-115	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-116	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-117	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-118	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-119	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-120	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-121	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-122	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-123	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-124	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-125	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-126	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Dó.
Y 85-127	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-128	Generic name: Dimer acid polyamide	50 FR 33628 (33629) (8-20-85)	Do.
Y 85-129	Generic name: Aliphatic polyurethane aqueous dispersion	50 FR 33628 (33629) (8-20-85)	Aug. 25, 1985.
Y 85-130	Generic name: Acrylic copolymer latex	50 FR 33628 (33629) (8-20-85)	Aug. 26, 1985
Y 85-131	Generic name: Polyester resin	50 FR 33628 (33629) (8-20-85)	Aug. 27, 1985.
Y 85-132	Generic name: Copolyetheresteramide	50 FR 34192 (8-23-85)	Sept. 3, 1985.
Y 85-133	Generic name: Alkali metal salt of ester polyfunctional alkylene oxide polymer	50 FR 34192 (8-23-85)	Sept. 4, 1985.
Y 85-134	Generic name: Water soluble acrylate random copolymer	50 FR 35913 (9-30-85)	Sept. 9, 1985.
Y 85-135	Generic name: Water soluble acrylate random copolymer	50 FR 35913 (9-30-85)	Do.
Y 85-136	Generic name: Water soluble acrylate random copolymer	50 FR 35913 (9-30-85)	Do.
Y 85-137	Generic name: Cross-linked polymeric acrylic micro particles	50 FR 35913 (9-30-85)	Do.
Y 85-138	Generic name: Modified acrylate terpolymer	50 FR 35913 (9-30-85)	Do.
Y 85-139	Generic name: Polyurethane dispersion	50 FR 35913 (9-30-85)	Do.
Y 85-140	Generic name: Water-based polyurethane elastomer	50 FR 35913 (9-30-85)	Sept. 10, 1985.
Y 85-141	Generic name: Polymer from coconut fatty acids with alkanedioic acids and alkanediol	80 FR 36671 (9-9-85)	Sept. 12, 1985
Y 85-142	Generic name: Polyurethane polyester	50 FR 36671 (9-9-85)	Sept. 18, 1985.
Y 85-143	Generic name: Polyester of carbomonocyclic acid, sulfonated carbomonocyclic ester and alkylene glycol	50 FR 36671 (9-9-85)	Do.
Y 85-144	Generic name: Polyester of carbomonocyclic ester, sulfonated carbomonocyclic ester and alkylene glycol	50 FR 36671 (9-9-85)	Do.
Y 85-145	Generic name: Epoxy ester	50 FR 38194 (9-20-85)	Sept. 19, 1985.
Y 85-146	Generic name: Acrylate-styrene modified oil	50 FR 38194 (9-20-85)	Do.

IV. 73 CHEMICAL SUBSTANCES FOR WHICH EPA HAS RECEIVED NOTICES OF COMMENCEMENT TO MANUFACTURE

PMN No.	Identity/generic name	Date of commencement
P 80-300	Cuprate(6-), [u-[[3,3'-[iminobis[(1-hydroxy-3-sulfo-6,2-naphthalenediyl)azo(5-hydroxy-2-methyl-4,1-phenylene)azo]] bis[1,5-naphthalene-disulfonato]](10-)]]di-hexasodium.	Aug. 5, 1985.
P 81-666	Generic name: Cycloalkyl aralkyl ether	Jan. 3, 1985.
P 82-296	Generic name: Polymer of alkyl acrylate and acrylamide	Aug. 20, 1984.
P 83-336	Methanesulfonic acid, tin (2+) salt	July 7, 1985.
P 83-337	Methanesulfonic acid, lead (2+) salt	July 22, 1985.
P 83-401	Generic name: Naphtalenetrisulfonic acid, chlorotriazinyl-amino-methoxymethylphenylazo,-	Aug. 1, 1985.
P 83-455	Generic name: Alkenoyl disubstituted cycloalkane	July 10, 1985.
P 83-616	Generic name: C. I. direct red 259	Aug. 5, 1985.
P 83-619	Cuprate(5-), [u-[2-[[1-[4-[2-[4-[[4-[[4-[2-[4-[4-[(2-carboxyphenyl)azo]-4,5-dihydro-3-methyl-5-oxo-1H-pyrazol-1-yl]-2-sulfophenyl]ethenyl]-3-sulfophenyl]amino]-6-(phenylamino)-1,3,5-triazin-2-yl]amino]-2-sulfophenyl]ethenyl]-3-sulfophenyl]-4,5-dihydro-3-methyl]-5-oxo-1H-pyrazol-4-yl]azo]-5-sulfobenzoato(6-)]]di-, pentasodium.	July 18, 1985.
P 83-620	Generic name: C. I. direct red 260	Aug. 5, 1985.
P 83-621	Benzoic acid, 2-[[1-[4-[2-[4-[[4-[[4-[2-[4-[4-[(2-carboxyphenyl)azo]-4,5-dihydro-3-methyl-5-oxo-1H-pyrazol-1-yl]-2-sulfophenyl]ethenyl]-3-sulfophenyl]amino]-6-(phenylamino)-1,3,5-triazin-2-yl]amino]-2-sulfophenyl]ethenyl]-3-sulfophenyl]-4,5-dihydro-3-methyl-5-oxo-1H-pyrazol-4-yl]azo]-5-sulfo-, pentasodium salt.	Aug. 5, 1985. July 18, 1985.
P 83-808	2-, 3-, and 4-pinanol mixture	Aug. 1, 1985.
P 83-920	Generic name: Phosphoro carboxylic acid derivative	July 29, 1985.
P 83-1012	Generic name: Bis(sulfophenyl)chlorotriazine amino sulfophenylazo) hydroxyamino disulfonaphthalene	Aug. 1, 1985.
P 83-1055	Generic name: Trisubstituted heteromonocycle	Aug. 5, 1985.
P 83-1279	Generic name: Water dispersed oligourethane	July 31, 1985.
P 83-1280	Generic name: Polyurethane prepolymer resin	Do.
P 84-27	Generic name: Polyol carboxylate ester	May 10, 1984.
P 84-56	1,3-Benzenedicarboxylic acid, polymer with 2,2-dimethyl-1,3-propanediol, 2-ethyl-2-(hydroxymethyl)-1,3-propanediol and 2,2,4-trimethyl-1,3-pentadiol	July 11, 1985.
P 84-164	Generic name: Fluorine substituted diesterane	July 1, 1985.
P 84-233	Silicon aluminum oxynitride	Aug. 15, 1985.
P 84-614	Generic name: Polysubstituted polyol	Aug. 5, 1985.
P 84-624	Generic name: Brominated aromatic	Aug. 19, 1985.

VOL 51 ISS 78 APR 23 1986 UMI

IV. 73 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture—Continued

PMN No.	Identity/generic name	Date of commencement
P 84-884	1-methyl-1-phenylethyl peroxyneoheptanoate	July 26, 1985.
P 84-885	Generic name: Carboxylic acid chloride	Do.
P 84-1168	Generic name: Polysubstituted urethane	July 23, 1985.
P 85-83	1,2-Dimethyl-3-(1-methylethenyl)-cyclopentanol mixture	Aug. 1, 1985.
P 85-84	Generic name: Perfluoroalkyl substituted acrylate polymer	July 21, 1985.
P 85-108	Generic name: Acrylic copolymer	July 18, 1985.
P 85-126	Generic name: Unsaturated polyester	Aug. 28, 1985.
P 85-150	Generic name: Fluoranthenediamine-bis(substituted aminoanthraquinone)	July 16, 1985.
P 85-151	Generic name: Fluoranthenamine-substituted amino-anthraquinone	Do.
P 85-183	4,5-dihydro-5-ethyl-2-methyl-3-furane carboxylic acid ethyl ester	July 28, 1985.
P 85-316	Generic name: Aryl alkenyl aryl nitrile	July 29, 1985.
P 85-330	Generic name: Alkyl aryl ethoxylate sulfate, sodium salt	Do.
P 85-363	1,2-Dimethyl-3-(1-methylethenyl)-cyclo pentanol acetate mixture	Aug. 1, 1985.
P 85-508	9,10-Anthracenedione, 4-[(4-(1,1-dimethylethyl)phenyl)amino]-5-hydroxy-1-[(1-methylethyl)amino]-	Aug. 5, 1985.
P 85-510	Poly(oxy-1,2-ethanediyl), alpha-higher alkyl, C>30, omega-hydroxy	Aug. 15, 1985.
P 85-664	Generic name: Reaction product of metallic alkyls and polysiloxanes	Do.
P 85-666	Generic name: Reaction product of metallic alkyls, polysiloxanes and titanates	Do.
P 85-671	Generic name: Reacted modified cycloaliphatic diamine	Aug. 1, 1985.
P 85-695	Generic name: Acrylate copolymer	July 30, 1985.
P 85-696	Generic name: Acrylate copolymer	Do.
P 85-697	Generic name: Acrylate copolymer	Do.
P 85-698	Generic name: Acrylate copolymer	Do.
P 85-714	Generic name: Disubstituted urea	July 31, 1985.
P 85-736	Generic name: Modified rosin, calcium zinc salts	July 19, 1985.
P 85-797	Generic name: Diamine-polydimethylsiloxane	July 11, 1985.
P 85-799	Generic name: Modified polyacrylate polymer	Aug. 1, 1985.
P 85-801	Generic name: Adduct of polymeric 4,4'phenylmethane diisocyanate and hydroxyester of terephthalic acid	July 24, 1985.
P 85-819	Generic name: Tall oil fractions, unsaturated hydrocarbon resin, dienophile modified polymer with pentaerythritol	Aug. 16, 1985.
P 85-821	Generic name: Alkyd resin	Aug. 2, 1985.
P 85-823	Generic name: Alkene-methacrylate copolymer	Aug. 1, 1985.
P 85-864	Generic name: Dimethylhydrogen terminated polysiloxane	Aug. 12, 1985.
P 85-865	Generic name: Substituted acetonitrile	Aug. 2, 1985.
P 85-867	Indium orthoborate	July 31, 1985.
P 85-899	Generic name: Ethoxylated polyester	Aug. 9, 1985.
P 85-905	Sodium alumnum tetrahydride	Aug. 1, 1985.
P 85-913	Generic name: Polyol sulfate	Aug. 5, 1985.
P 85-927	Generic name: Modified essential oil	Aug. 13, 1985.
P 85-940	Generic name: Saturated branched chain secondary alcohol/ketone mixture having 12 carbon atoms	Aug. 8, 1985.
P 85-945	Generic name: Acrylic ester terpolymer	Aug. 13, 1985.
P 84-998	Generic name: Mixed esters of butane polyols	Aug. 16, 1985.
Y 85-21	Polymer of castor oil, succinic anhydride, and propylene glycol	Aug. 5, 1985.
Y 85-39	Generic name: Polyester polymer	June 28, 1985.
Y 85-40	Polymer of lactndecyl alcohol, trimellitic anhydride, maleic anhydride, neopentylglycol	Aug. 5, 1985.
Y 85-43	1,4-Benzenedicarboxylic acid polymer with Jeffamine ED 2001 and 2-oxepanone	July 1, 1985.
Y 85-57	Generic name: 1-substituted propene, 2-methyl-2-[(1-OXO-2-propenyl)amino]-, monosodium salt, polymer with 2-propenamide and 2 propenoic acid, sodium salt.	July 8, 1985.
Y 85-74	Adipic, azelaic, glutaric acids, copolymer with 1,4-butane diol and 2-ethylhexanol	Aug. 16, 1985.
Y 85-96	Polymer of 2-propenoic acid, 2-methyl-, methyl ester, ethenylbenzene and methyl-2-propenoate	July 22, 1985.
Y 85-99	Generic name: Dimethyl terephthalate, alkanediols and trimellitic anhydride polymer	July 25, 1985.
Y 85-101	Acid terminated prepolymer polyester	Aug. 5, 1985.
Y 85-131	Generic name: Polyester resin	Aug. 29, 1985.

V. 39 Premanufacture Notices for Which the Review Period Has Been Suspended

PMN No.	Identity/generic name	FR citation	Date suspended
P 84-587	Generic name: Blocked aliphatic polyisocyanate	49 FR 18835 (4-30-84)	Aug. 16, 1985.
P 84-713	Generic name: Acrylated alkoxylated aliphatic polyol	49 FR 22130 (5-25-84)	Aug. 7, 1985.
P 84-798	Generic name: Polyfunctional azindine	49 FR 24782 (6-15-84)	Do.
P 85-16	Generic name: Acrylamide unsaturated quaternary ammonium copolymer	49 FR 41102 (41103) (10-19-84)	Aug. 22, 1985.
P 85-609	Generic name: Functionally modified methacrylate polymer	50 FR 9504 (9508) (3-8-85)	Aug. 26, 1985.
P 85-611	Generic name: Copper complex of substituted-diazonaphthalenetrisulfonic acid	50 FR 9504 (9508) (3-8-85)	Do.
P 85-620	Generic name: Functionally substituted acrylic/methacrylic/styrene polymer	50 FR 9504 (9508) (3-8-85)	Do.
P 85-725	Generic name: Polymer of alkyl methacrylates, substituted alkyl methacrylate and styrene	50 FR 14439 (4-12-85)	Do.
P 85-854	Generic name: Triglycidyl ether of substituted tri(hydroxyphenyl)methane	50 FR 18915 (18916) (5-3-85)	Aug. 1, 1985.
P 85-855	Generic name: Triglycidyl ether of substituted tri(hydroxyphenyl)methane	50 FR 18915 (18916) (5-3-85)	Do.
P 85-875	Generic name: Alkylamidopropyl betaine	50 FR 19798 (19799) (5-10-85)	Aug. 24, 1985.
P 85-876	Generic name: Alkylamidopropyl betaine	50 FR 19798 (19800) (5-10-85)	Do.
P 85-877	Generic name: Alkylamidopropyl betaine	50 FR 19798 (19800) (5-10-85)	Do.
P 85-878	Generic name: Alkylamidopropyl betaine	50 FR 19798 (19800) (5-10-85)	Do.
P 85-879	Generic name: Alkylamidopropyl betaine	50 FR 19798 (19800) (5-10-85)	Do.
P 85-890	Generic name: Polypropylene glycol ether	50 FR 19798 (19800) (5-10-85)	Aug. 13, 1985.
P 85-891	Generic name: Polypropylene glycol ether	50 FR 19798 (19800) (5-10-85)	Do.
P 85-892	Generic name: Polypropylene glycol ether	50 FR 19798 (19800) (5-10-85)	Do.
P 85-929	Generic name: Alkylated aromatic diamine	50 FR 20598 (20599) (5-17-85)	Aug. 1, 1985.
P 85-932	Generic name: Disubstituted alkyltriazine	50 FR 20598 (20599) (5-17-85)	Aug. 21, 1985.
P 85-933	Generic name: Disubstituted alkyltriazine	50 FR 20598 (20599) (5-17-85)	Do.
P 85-941	Generic name: Substituted alkylamine salt	50 FR 21498 (21499) (5-24-85)	Aug. 22, 1985.
P 85-949	Generic name: Organosilane polymer	50 FR 21498 (21500) (5-24-85)	Aug. 12, 1985.
P 85-963	Generic name: Alkenylether-substituted polyester	50 FR 21498 (21501) (5-24-85)	Do.
P 85-966	3,9-diethyl tridecan-6-one	50 FR 21498 (21501) (5-24-85)	Aug. 9, 1985.
P 85-973	Generic name: Triglycidyl ether of a substituted tri(hydroxyphenyl)methane	50 FR 21498 (21502) (5-24-85)	Aug. 13, 1985.
P 85-976	Generic name: Reaction product of an organic polymer, silane, organosilanes and a functional organosilane	50 FR 21498 (21502) (5-24-85)	Aug. 12, 1985.
P 85-992	Generic name: Urethane acrylate	50 FR 23185 (23186) (5-31-85)	Aug. 18, 1985.
P 85-1042	Generic name: Amine salts of sulfonated, alkylated diphenyl oxide	50 FR 24938 (24940) (6-14-85)	Aug. 28, 1985.
P 85-1043	Generic name: Amine salts of sulfonated, alkylated diphenyl oxide	50 FR 24938 (24940) (6-14-85)	Do.
P 85-1044	Generic name: Amine salts of sulfonated, alkylated diphenyl oxide	50 FR 24938 (24940) (6-14-85)	Do.
P 85-1045	Generic name: Amine salts of sulfonated, alkylated diphenyl oxide	50 FR 24938 (24940) (6-14-85)	Do.
P 85-1046	Generic name: Amine salts of sulfonated, alkylated diphenyl oxide	50 FR 24938 (24940) (6-14-85)	Do.

Premanufacture Notices Monthly Status Report for September 1985

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substances Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) pending before the Agency and the PMNs for which the review period has expired since publication of the last monthly summary. This is the report for September 1985.

Nonconfidential portions of the PMNs may be seen in Rm. E-107 at the address below between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

ADDRESS: Written comments, identified with the document control number "[OPTS-53078]" and the specific PMN number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Room E-201, 401 M Street SW., Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Contol Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-613, 401 M Street SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during September; (b) PMNs received previously and still under review at the end of September; (c) PMNs for which the notice review period has ended during September; (d) chemical substances for which EPA has received a notice of commencement to manufacture during September and (e) PMNs for which the review period has been suspended. Therefore, the September 1985 PMN Status Report is being published.

Dated: March 21, 1986.

Denise Devoe,

Acting Director, Information Management Division.

Premanufacture Notices Monthly Status Report September 1985

I. 138 Premanufacture Notices Received During the Month

PMN No.	Identity/generic name	FR citation	Expiration date
P 85-1413	Polymer of chlorinated dicarboxylic acid, aromatic anhydride, aliphatic ester and polyol	50 FR 38194 (38195) (9-20-85)	Dec. 1, 1985.
P 85-1414	Generic name: Substituted aromatic polymer	50 FR 38194 (38195) (9-20-85)	Do.
P 85-1415	Generic name: Modified acrylic copolymer	50 FR 38194 (38195) (9-20-85)	Do.
P 85-1416	Generic name: Oligomeric hydroxy amidoester resin	50 FR 38194 (38195) (9-20-85)	Do.
P 85-1417	Generic name: Phenolic polyester	50 FR 38194 (38195) (9-20-85)	Dec. 2, 1985.
P 85-1418	Generic name: Unsaturated polyester	50 FR 38194 (38196) (9-20-85)	Do.
P 85-1419	Polymer of glycerol, phthalic, anhydride, phenol-formaldehyde, resin CX-1634, rosin; tall oil fatty acids and trimethylol propane.	50 FR 38194 (38196) (9-20-85)	Do.
P 85-1420	Generic name: Substituted allyl aniline	50 FR 38194 (38196) (9-20-85)	Do.
